Subject: Hazardous Materials Assessment
Central Estuary
Oakland, California

Dear Ms. Potter:

In accordance with your authorization, Ninyo & Moore has completed a Hazardous Materials Assessment for incorporation into the Environmental Impact Report (EIR) for the Central Estuary Project, in Oakland, California. The report describes our findings, methodologies, and conclusions.

Sincerely,
NINYO & MOORE

Professional Geologist

1. INTRODUCTION

Circle Point has authorized Ninyo & Moore to perform a Hazardous Materials Assessment (HMA) for incorporation into the Environmental Impact Report (EIR) for the Central Estuary Specific Plan, in Oakland, California. The objective of the Specific Plan is to establish a framework for development of the project area into a mixed use district and regional destination while preserving the industrial land base and maintaining the waterfront as a place of employment. The HMA was performed to identify, to the extent practical, contaminated, and potentially contaminated areas and other hazardous materials issues within the project area. The project area is bounded by 16th Avenue to the northwest, an East Bay Municipal Utilities Department (EBMUD) facility, located at 5597 Oakport Street, and San Leandro Bay to the southeast, the Interstate-880 freeway (I-880) to the northeast, and the Brooklyn Basin and Tidal Canal to the southwest (site, Figure 1).

1.1. Purpose and Scope of Investigation

The purpose of this HMA was to evaluate the likelihood that hazardous materials may be present in soil or groundwater beneath the site as a result of on-site activities. The likelihood of specific areas of the site being contaminated by hazardous materials was ranked as high, moderate, or low based on the following descriptions:

- **High** – Property with known or probable contamination within the area of the project. An example of a property in this category would be a leaking underground storage tank (UST) facility where remediation had not been started or was not yet finished.

- **Moderate** – Property with potential or suspected contamination within the area of the project. Examples of properties in this category would be leaking UST facilities in final stages of remediation or in post-remediation monitoring. A second example would be a property with known use and storage of hazardous materials which had received violation notices from an inspecting agency or where visual evidence of inadequate chemical and storage practices (such as significant staining) were observed but where no environmental assessments had occurred. Also included in this category are facilities where USTs are likely present and/or facilities that have used significant quantities of hazardous materials, but appear to be abandoned by their former operators.

- **Low** – Property which uses or stores hazardous materials but with no significant violations, known releases, or evidence of inadequate chemical handling practices. Example properties would be UST or dry cleaning facilities with no documented releases or where remediation of previous releases had been completed.

As presented in this report, Ninyo & Moore has been retained to conduct a HMA which will be incorporated into an EIR within the site area outlined on Figure 1 to identify areas of the site where unauthorized releases of hazardous materials have occurred. The scope of this HMA included but was not limited to the following tasks:

- Perform a visit to the site area to visually evaluate site characteristics for possible contaminated surface soil or surface water, improperly stored hazardous materials, possible sources of polychlorinated biphenyls (PCBs), and possible risks of contamination from activities at the facilities. Properties within and adjoining the site area will be visually evaluated from public rights-of-way, only.

- Perform a site vicinity reconnaissance to evaluate characteristics of adjacent properties for possible environmental influences on the site.

- Perform a review of a computerized database search of readily available government and regulatory agency environmental databases for the site and for properties located within approximately one eighth mile of the site. The objective of the database search was to evaluate locations where possibly hazardous materials may have been used or stored and their possible effects on the site.

- Perform a review of the site and site vicinity historical land use to provide an overview of past uses that likely involved the use or storage of hazardous materials. Information used to review the site history included, but was not necessarily limited to, readily available historical aerial photographs, Sanborn Insurance Maps, and historic United States Geological Survey (USGS) Topographic Maps. Ninyo & Moore attempted to note historical site uses involving the use and storage of hazardous materials from the time when the site area was undeveloped.

- Develop preliminary mitigation alternatives for hazardous materials issues which may impact the project.

- Prepare this stand-alone HMA report. This report documents work scope findings and provides a discussion of findings, conclusions, and mitigation measures regarding the current environmental condition of the site, and recommendations for supplemental assessment, as appropriate. This report was presented in an appropriate format consistent with reports prepared by Ninyo & Moore for similar projects in California.

1.2. Limitations

This HMA has been prepared for use by Circle Point. The information presented in this report is based on the project scope of work (Section 1.1). Ninyo & Moore has relied on information provided by others in our description of historical conditions and our review of

regulatory databases and files. However, Ninyo & Moore makes no warranties or guarantees regarding the accuracy or completeness of the information provided or compiled by others. Ninyo & Moore observed properties from public rights-of-way only. Ninyo & Moore did not conduct interviews with individual tenants within the area of the site.

No HMA can completely eliminate uncertainty regarding the potential for hazardous materials conditions in connection with a property. Performance of this HMA is intended to reduce, but not eliminate, uncertainty regarding the presence of hazardous materials conditions. The available data do not provide definitive information relative to past uses, operations, or incidents at the site or adjacent properties. The existence of contamination within the site area that was not identified during this HMA is possible and cannot be adequately assessed without additional research beyond the stated scope of work. Further evaluation of these types of risks could include subsurface exploration, sampling, and/or other forms of testing.

In addition, some substances may be present within the site area or in the vicinity in quantities below those categorized as actionable by current environmental regulations. Ninyo & Moore cannot be responsible if regulatory standards are changed in the future in a manner that renders the current site conditions actionable.

2. SITE DESCRIPTION/SETTING

The following sections provide a description of the land uses at the site. Because of the size of the site, we have, for this report, divided the site into four areas, Areas A through D, as discussed in the following sections (Figure 2).

2.1. Overview

The site includes approximately 428 acres in the central portion of the Oakland Estuary. It is bound by 16th Avenue to the northwest, an East Bay Municipal Utilities Department (EBMUD) facility, located at 5597 Oakport Street, to the southeast, the I-880 to the northeast, and the Brooklyn Basin and Tidal Canal to the southwest.

2.2. Area A

Area A is bound to the northwest by 16th Avenue, to the northeast by the I-880, to the southwest by the Brooklyn Basin and Tidal Canal, and to the southeast by 29th Avenue (Figure 3). Area A contains marinas, industrial/commercial properties including a concrete facility, a roofing company, a gas station, and railway spurs. Residential properties were also observed in Area A.

2.3. Area B

Area B is bound to the northwest by 29th Avenue, to the northeast by the I-880, to the southwest by the Tidal Canal, and to the southeast by Fruitvale Avenue (Figure 4). Area B contains industrial/commercial properties including a metal plating company, a machining and stamping company, a cold storage facility, and railway spurs. Residential properties were also observed in Area B.

2.4. Area C

Area C is bound to the northwest by Fruitvale Avenue, to the northeast by the I-880, to the southwest by the Tidal Canal, and to the southeast by High Street (Figure 5). Area C contains industrial/commercial properties including a Home Depot, an oil company, a can manufacturing company, and a glass manufacturing company. Residential properties were also observed in Area C.

2.5. Area D

Area D is bound to the northwest by High Street, to the northeast by the I-880, to the southwest by the Tidal Canal, and to the southeast by an EBMUD Facility located at 5597 Oakport Street and San Leandro Bay (Figure 6). Area D contains industrial/commercial properties including a PG&E service center, a trucking company, a business park, a storage company, a recreational vehicle service facility, and a gasoline station. Residential properties were also observed in Area D.

3. AREA GEOLOGY AND HYDROGEOLOGY

The site is located within the Coast Ranges Geomorphic province. The Coast Ranges are northwest trending and are underlain by marine and non-marine sedimentary rocks. These sedimentary units are underlain by either the Mesozoic Franciscan Formation (metamorphosed sea-floor deposits) or the granitic Salinian Block. The Oakland-Alameda area is situated on a broad, alluvial plain that slopes gently west from the Oakland hills to the San Francisco Bay. The alluvial plain is comprised of alluvial sediments derived from erosion of the hills to the east. The site region is located at the western margin of the alluvial plain and is underlain by fine-grained alluvial and tidal-bay sediments. Dredging and filling operations have modified these native sediments to create land masses of fill material that support waterfront properties. Both the fill and the native sediments overlie older age bay mud deposits.

Based on a previous report for a property located near the center of the site (Ninyo & Moore, 2009), groundwater in this area of the site was encountered at approximately 6.5 feet below ground surface (bgs). Groundwater flow beneath the site is expected to follow the regional topography and flow towards the south, southwest or west.

4. ENVIRONMENTAL DATABASE REVIEW

Ninyo & Moore obtained and reviewed a database search report for the site from Environmental Data Resources (EDR) dated February 20, 2009. The EDR report includes federal, state, and local databases. A summary of the environmental databases searched, their corresponding search distance, and number of noted sites of environmental concern are presented in the database search report included in Appendix A.

4.1. Federal and State Database Search Results

EDR supplied Ninyo & Moore with a DataMap Area Study, dated February 20, 2009, which is an environmental records search of federal, state, and local files for properties located within the site and an eighth of a mile from the site.

The Area Study also included a list of "orphan sites" that could not be mapped by EDR using the addresses included in the file. Ninyo & Moore reviewed this list and found that 14 of the 127 "orphan sites" were located within the site area. Detailed information for "orphan sites" was reviewed by clicking a link provided in the database report. These 14 facilities have been included in our assessment of the site area and have been verified by other investigative means. For the remaining 113 "orphan sites", either the location information indicated the property was out of the scope of this project or not enough information was provided to locate the property.

A summary of the Database Search Results is presented in Table 1 below.

Table 1 – Environmental Database Search Results

Database(s)	Description	Facilities Listed*
Federal Databases		
NPL/Proposed NPL/Delisted NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program. Updated quarterly.	0
CERCLIS/ CERC-NFRAP	The CERCLIS database is a compilation of facilities which the EPA has investigated or is currently investigating for a release or threatened release of hazardous substances pursuant to the CERCLA of 1980. CERC-NFRAP refers to facilities that have been removed and archived from its inventory of CERCLA sites. Listing on this database does not necessarily mean that there are no hazardous materials associated with a given property; it only means that, based upon available information, the property is not judged to be a potential NPL facility.	3
CORRACTS	The EPA maintains a database of RCRA facilities associated with TSD of hazardous materials that are undergoing "corrective action." A "Corrective action" order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.	1
RCRA-TSDF	The RCRA-TSDF database is a compilation by the EPA of facilities that report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS database, the RCRA-TSDF database does not include RCRA facilities where corrective action is required.	1
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as large (LQG), small (SQG), or conditionally exempt (CESQG). LQGs produce at least 1,000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQGs produce 100 to 1,000 kg/month of non-acutely hazardous waste. CESQGs are those that generate less than 100 kg/month of non-acutely hazardous waste.	53
RCRA-NonGen	Non-Generators do not presently generate hazardous waste.	8

Table 1 – Environmental Database Search Results

Database(s)	Description	Facilities Listed*
ERNS	ERNS records and stores information on reported releases of oil and hazardous substances.	51
HMIRS	The Hazardous Materials Incident Report System, maintained by the EPA, contains hazardous material spill incidents reported to the Department of Transportation.	13
US BROWNFIELDS	The EPA's listing of Brownfields properties addressed by Cooperative Agreement Recipients and Brownfields properties addressed by Targeted Brownfields Assessments.	1
TRIS	The Toxic Chemical Release Inventory System, maintained be the EPA, identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities,	3
TSCA	The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. The EPA has no current plan to update and/or re-issue this database.	1
FTTS	FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years.	10
HIST FTTS	A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). It included records that may not be included in the newer FTTS database updates. This database is no longer updated.	9
SSTS	The Section Seven Tracking System (SSTS) is a listing of registered pesticide-producing establishments is maintained by the EPA. Each establishment must report the types and amounts of pesticides, active ingredients, and devices being produced, and those having been produced and sold or distributed in the past year.	3
ICIS	The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.	15
FINDS	The Facility Index System (FINDS) contains both facility information and "pointers" to other sources of information that contain more detail. The source of this database is the U.S. EPA/NTIS.	90
RAATS	The RCRA Administration Action Tracking System (RAATS), maintained by the EPA, contains records based on enforcement actions issued under RCRA and pertaining to major violators. It includes administrative and civil actions brought by the United States Environmental Protection Agency.	2

Table 1 – Environmental Database Search Results

Database(s)	Description	Facilities Listed*
State Databases		
HIST Cal-Sites	Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California DTSC. It is no longer updated by the state agency and has been replaced by ENVIROSTOR.	1
CA BOND EXP. PLAN	Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.	2
SW/LF	The Solid Waste Facilities/Landfill Sites (SW/LF) records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.	1
CA WDS	California Water Resources Control Board - Waste Discharge System.	18
Cortese	The sites for this list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the DTSC (Cal-Sites). This listing is no longer updated by the state agency.	60
LUST	Databases of the LUST information system are maintained by the SWRCB and RWQCB.	60
CA FID UST	The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.	49
SLIC	The Spills. Leaks, Investiogation, and Cleanup (SLIC) database comes from the California Regional Water Quality Control Board.	22
CS	A listing of contaminated sites overseen by the Toxic Release Program (soil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).	59
UST	The UST Information System is maintained by the SWRCB, which may include the owner and location of the USTs. This database may also include registered ASTs.	10
HIST UST	Historical UST Registered Database.	54
SWEEPS UST	Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.	56
CHMIRS	The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.	56
AST	The Aboveground Storage Tank (AST) database contains registered ASTs. The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.	7
Notify 65	Notify 65 records contain facility notifications about any release that could impact drinking water and thereby expose the public to a potential health risk. The data come from the State Water Resources Control Board's Proposition 65 database.	6

Table 1 – Environmental Database Search Results

Database(s)	Description	Facilities Listed*
DEED	The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes.	1
VCP	Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.	1
RESPONSE	Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.	1
HAZNET	The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method.	181
EMI	Toxics and criteria pollutant emissions data collected by the California ARB and local air pollution agencies.	64
ENVIROSTOR	The DTSC's Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further.	4
HAULERS	A listing of registered waste tire haulers.	1

Notes:
ARB – Air Resources Board
AST – Aboveground Storage Tank
Cal-EPA – California Environmental Protection Agency
CERCLA – Comprehensive Environmental Response, Compensation and Liability Act
CERCLIS – Comprehensive Environmental Response, Compensation, and Liability Information System
CORRACTS – Corrective Action Report
CESQG – Conditionally Exempt Small Quantity Generators
DTSC – Department of Toxic Substances Control
EPA – United States Environmental Protection Agency
ERNS – Emergency Response Notification System
FTTS – FIFRA/TSCA Tracking System
LQG – Large Quantity Generator
LUST – Leaking Underground Storage Tank
NFRAP – No Further Remedial Action Planned
NPL – National Priorities List
RCRA – Resource Conservation and the Recovery Act
RWQCB – Regional Water Quality Control Board
SQG – Small Quantity Generators
SWIS – Solid Waste Information System
SWLF – Solid Waste Landfill
SWRCB – State Water Resources Control Board
TSD – Treatment, Storage, and Disposal
TSDF– Treatment, Storage, and Disposal Facility
UST – Underground Storage Tank
*Some facilities have multiple listings under a single database.

The following paragraphs describe properties listed in the abovementioned databases and include a discussion of the regulatory status of these facilities and their potential environmental impact to the site. If a property is of concern to the site it will be listed and discussed in Table 9. The area/ID number included in the first column of Table 9 indicates the figure and where the property is located (eg, A/9 designates that the property is in Area A, and that the property is location number 9 in that area). Additionally, area/ID numbers of properties of concern will be given in parentheses next to their addresses throughout this report. All properties given on Table 9 are properties with a high potential for hazardous material impacts to the site.

NPL - No properties within the search area were listed on the NPL, proposed NPL or Delisted NPL databases.

CERCLIS - No properties within the search area were listed on the CERCLIS Database.

CERC-NFRAP - Three properties within the search area were listed on the CERC-NFRAP database. The first of the properties listed is Esposito Plating & Polishing Co., located at 2904 Chapman Street (B/16). This property was archived with a No Further Remedial Action Planned status in April 1987 and was listed on the Envirostor website (discussed in Section 5.6) as an open voluntary cleanup case. The second of the properties listed is Bayside Oil Co., located at 4200 Alameda Avenue (C/17). This property was archived with a No Further Remedial Action Planned status in May 1988 and was listed on the Leaking Underground Storage Tank (LUST) database (discussed later in this section) as well as on the Geotracker website (discussed in Section 5.6) as both an open LUST case and an open cleanup program facility. Both of these properties are discussed in Table 9 and their listing as open LUST or voluntary cleanup cases indicate that they pose a high risk of environmentally impacting the site. The third of the properties listed is American National Can Co., located at 3801 East 8th Street. This property was archived into the database in January 1996 and is a closed LUST case; therefore it poses a low risk of environmentally impacting the site.

CORRACTS - One property located within the search area was listed on the CORRACTS database. The property listed is American National Can Co., located at 3801 East 8th Street. According to information in the database, by September 1997, migration of contaminated groundwater and human exposure to contaminants was "under control". Based on this information and the fact that it is a closed LUST case, this facility poses a low risk of environmentally impacting the site.

RCRA-TSDF - One property within the search area was listed on the RCRA-TSDF database. The property listed is American National Can Co., located at 3801 East 8th Street. According to the database, this property is a small quantity generator and had been listed as a large quantity generator prior to 1996. The database also stated that the property implemented stabilization measures consisting primarily of source removal and/or treatment in 1994. Additional information regarding this site is discussed on the CORRACTS database above. Based on this information and the fact that it is a closed LUST facility, this property poses a low risk of environmentally impacting the site.

RCRA-LQG – Five properties within the search area were listed on the RCRA-LQG database. Inclusion on this list is for permitting purposes and is not indicative of a release. The first property listed is EXXON CO. USA #7-3006, located approximately 200 feet northeast of the site at 720 High Street. According to information in the database, there are no violations noted for this property. The second property listed is Oakland Unified School District, located at 955 High Street. This site was listed by mistake as it is actually located outside the search area. The third property listed is Pacific Galvanizing, Inc., located approximately 400 feet northeast of the site at 715 46th Avenue. According to information in the database, this property generates lead and chromium waste and has received several notices of violations. There were no details indicating specific environmental concerns associated with these violations. The fourth property listed is Oakland Station J, located approximately 250 feet northeast of the site at 650 50th Avenue. According to information in the database, this property is owned by Pacific Gas and Electric (PG&E) and generates lead. No violations were noted for this property. Based on the distances of these properties from the site these latter

four properties pose a low risk of environmentally impacting the site. The fifth property listed is Owens Brockway Glass Container, located at 3600 Alameda Avenue (C/18). According to information in the database, this property generates heavy metals and spent solvents and has received several notices of violations; however there were no details indicating specific environmental concerns associated with these violations. Based on this information and the fact that this facility is an open LUST case, this property poses a high risk of environmentally impacting the site.

RCRA-SQG – Forty eight properties within the search area were listed on the RCRA-SQG database. Inclusion on this list is for permitting purposes and is not indicative of a release. According to information in this database, thirty one of the properties listed have no noted violations and no details on the types of hazardous waste generated. Based on the information in this database, these properties pose a low risk of environmentally impacting the site.

Fourteen of the properties listed on this database indicated details of the types of hazardous wastes generated and have received no notices of violations. Therefore these properties are likely to have a low risk of impacting the site, with the exception of three of these property addresses which are listed on other databases as releasing hazardous materials and are included in Table 9. These properties include Sea Power Marine, located at 333 Kennedy Street (A/9) which is also listed on the LUST and CORTESE databases as Rhodes and Jamieson Batch Plant; the Former Unocal Oakland UCD, located at 401 High Street (C/19) which is also listed on the SLIC database as Arco/Unocal (C/19); and Oak Harbor Freight Lines, located at 4919 Tidewater Avenue (D/24) which is also listed on several other databases, including the LUST and UST databases as Di Salvo trucking.

The three remaining properties listed on this database have received notices of violations. The first of these properties is Esposito Plating & Polishing Co., located at 2904 Chapman Street (B/16). This property is discussed in Table 9 as a voluntary cleanup case and is listed on the CERC-NFRAP database above and therefore poses a high risk of environmentally impacting the site. The second of these properties is Analysts Inc., located at 2910 Ford Street. The database did not contain details indicating specific environmental concerns asso-

ciated with this property's violations. Eighteen unidentified 55-gallon drums were observed in good condition at this property during the site reconnaissance (Section 6). The last of the properties listed on this database is American National Can Co., located at 3801 East 8th Street. Information in this database indicated that a significant release of hazardous materials had occurred at this property. As discussed in the RCRA-TSDF section above, this property is a closed LUST case. Based on this information, the latter two properties pose a low to moderate risk of environmentally impacting the site.

RCRA-NonGen - Eight properties within the search area were listed on the RCRA-NonGen database. These properties may handle hazardous waste, however they do not currently generate hazardous waste. According to this database, no violations or specific environmental concerns were noted for any of these properties; therefore these properties pose a low risk of environmentally impacting the site.

ERNS – Fifty three properties were listed within the search area on the ERNS database. Fifty of the properties listed had reports of spills or releases which were relatively minor and/or not indicative of a potential environmental concern for the site. This included two locations that appear to be adjacent to the site that were listed as "orphan sites".

Three of the properties listed reported a significant spill or release which may be a potential environmental concern for the site. The first property is located at 2900 East 7th Street. According to information in the database, an unknown quantity of petroleum-product contaminated soil was reportedly observed during excavation activities in 1990. The Alameda County Health Department and Fire Department responded to the incident. Because violations were not reported for this property it poses a low risk of environmentally impacting the site. The second property is listed at a location of Dennison Street & Embarcadero (A/2). According to information in the database, an operator error caused the dumping of an oily substance on land resulting in 250 square feet of oily sheen on the ground in 1993. There was no description of a cleanup effort. The third property is Di Salvo's Trucking, located at 4919 Tidewater Avenue (D/24). According to information in the database, two drums of printers ink and one drum of metal polish were abandoned on the

property in 1992, and the drums were observed to be leaking a silvery substance. A hazardous materials unit was reportedly on the scene with the Fire Department. Based on the information in this database and the fact that the latter two properties were listed as a cleanup program facility and a LUST facility respectively, these two properties pose a high risk of environmentally impacting the site.

HMIRS – Thirteen properties were listed within the search area on the HMIRS database. More detailed information for properties in this database was reviewed by clicking a link provided in the database report. All of the properties listed had reports of spills or releases which were relatively minor and/or not indicative of a potential environmental concern for the site.

US BROWNFIELDS - One property within the search area was listed on the US BROWNFIELDS database. This property is the Urban Promise Academy, located at 2200-2288 East 12th Street, approximately 550 feet northeast of the site. There were no details in the database for this property which would indicate a potential environmental concern for the site.

TRIS - Three properties within the search area were listed on the TRIS database. These properties are Cemex Oakland, located at 333 23rd Avenue, Owens Brockway Glass Container (Owens), located at 3600 Alameda Avenue (C/18), and Pacific Galvanizing Company, located at 715 46th Avenue. No specific information regarding the release of toxic chemicals at these sites was provided in the database for any of these properties. Owens, however, is listed on several other environmental databases, and therefore is considered a potential environmental risk to the site. However there were no violations reported for the other two properties, and so they have a low risk of environmentally impacting the site

TSCA - This database includes manufacturers and importers of chemical substances and is not indicative of a release. One property within the search area was listed on the TSCA database, however there were no violations reported for this property and so it has a low risk of environmentally impacting the site.

FTTS – Ten properties within the search area were listed on the FTTS database. Two of the properties had repeated addresses reducing the number of facilities to eight. Five of these properties were listed with no violations and one facility with one violation was reported off-site, located on the south side of the Tidal Canal. No specific information regarding violations was provided in the database for any of the other properties, therefore these properties pose a low risk of environmentally impacting the site. The remaining two facilities included the Bytech Chemical Corporation facility, located at 1905 Dennison Street (A/5), which had three reported violations, and the Owens-Illinois Glass Container facility, located at 3600 Alameda Avenue (C/18), which had one reported violation. These two properties were listed on other databases and are discussed in Table 9, and therefore are a potential high environmental risk to the site.

HIST FTTS – Nine of the ten properties discussed in the FTTS database Section above were also listed on the HIST FTTS database. The same information discussed on the FTTS database was provided on this database. The tenth property was reported with no violations, and therefore poses a low risk of environmentally impacting the site.

SSTS – Three properties within the search area were listed on the SSTS database. One of the properties, Rochester Midland Bytech Chemical Division (A/5), is listed on other databases and is a potential environmental risk to the site. An-Fo Manufacturing Company, which was listed twice at 3129 Elmwood Avenue, is listed as producing disinfectant, germicide, and/or sanitizer. No indications of violations were reported for this facility, therefore there is a low likelihood that it will pose an environmental risk to the site.

ICIS – Fifteen properties within the search area were listed on the ICIS database. The Earthgrains Company was listed three times at 955 Kennedy Street (A/3) under three similar names. Also listed at this address was Kilpatricks Bakeries Inc. Owens-Illinois Glass Container, Owens-Illinois Inc Oakland Plant, and Owens-Brockway Glass Container, were all listed at 3600 Alameda Avenue (C/18) (the latter name was listed six times). All were listed as having undergone a civil judicial enforcement action, and are a potential environmental risk to the site. The three remaining properties were listed at 715 46th Avenue, all under the

name Pacific Galvanizing. This property was listed as having undergone an enforcement action type of "RCRA 3008A AO For Comp and/or Penalty". No details were provided describing these enforcement actions. No indications of violations were reported for this facility, therefore there is a low likelihood that it will pose an environmental risk to the site.

FINDS – Ninety properties within the search area were listed on the FINDS database. Listing on this database is indicative of a listing on other environmental databases discussed in this section and is not in itself indicative of an environmental concern.

RAATS – Two properties within the search area were listed on the RAATS database. These properties are Esposito Plating and Polishing Company, located at 2904 Chapman Street (B/16), and Ameron Pole Products Division, located at 4417 Oakport Street. No information regarding hazardous materials or RCRA enforcement actions at these sites was provided for either of these properties on this database. Esposito is discussed in Table 9 and in the CERC-NFRAP database above. No violations were noted for Ameron, therefore there is a low likelihood that it will pose an environmental risk to the site.

HIST Cal-Sites – One property within the search area was listed on the HIST Cal-Sites database. The property is the Port of Oakland Embarcadero Cove, located at the corner of Dennison and Embarcadero Streets (A/2). This property is discussed in the ERNS database, above, and the CA BOND EXP. Plan, below.

CA BOND EXP. PLAN – Two properties within the search area were listed on the California Bond Expansion Plan database and include the Port of Oakland Embarcadero Cove facility, located at the corner of Dennison and Embarcadero Streets (A/2), and the former Ekotek Lube, located at 4200 Alameda Avenue (C/17). The Port of Oakland facility was listed as being in compliance with an order issued by the Department of Health Services. Pentachlorophenol, organochlorine pesticides, and solvents have been discovered in soil and groundwater at this facility. According to the database, the final phase of remedial investigation is under way, and upon its completion a Feasibility Study and Remedial Action Plan will be prepared. The former Ekotek Lube facility is discussed in the CERC-NFRAP section above. This property is

a former waste oil recovery and recycling facility that is currently undergoing remediation. According to the database, waste oil or solvents may contaminate soil on the property and may also contain benzene, toluene, phenol, and lead. Based on this information these properties pose a high risk of environmentally impacting the site.

SWF/LF – One property within the search area was listed on the SWF/LF database. The Dailey Body Company was located at 440 High Street and is listed as a closed facility formerly accepting asphalt singles, construction/ demolition waste, wood waste, and compost material. There were no details in the database for this property which would indicate a potential environmental concern for the site. Based on the information in this database this property poses a low risk of environmentally impacting the site.

CA WIDS – Eighteen properties within the search area were listed on the CA WIDS database. A listing on this database indicates a continuous or seasonal waste discharge under waste discharge requirements. Each facility on this database was operating under at least one active discharge permit and no violations were noted. Based on this information these properties pose a low risk of environmentally impacting the site.

Cortese – Sixty properties within the search area were listed on the Cortese database. No other information was provided and no violations were noted. Properties listed on this database were also listed on the LUST, SWF/LS, and/or Cal-Sites databases.

LUST – Sixty properties were listed within the search area on the LUST database. Thirty seven of those properties were listed as closed cases and therefore not indicative of potential environmental concerns for the site. An additional closed case, listed as an “orphan site” located approximately 500-feet northeast of the site, was also not indicative of a potential environmental concern for the site due to its distance from the site. The remaining facilities are open cases, nine of which were located off-site and far enough in distance away from the site that any contamination originating on these properties is not likely to pose a threat to the environmental integrity of the site.

Five of the open cases are discussed on other databases above (A/3, A/9, C/17, C/18, D/24) and in Table 9, and eight of the facilities are discussed in Table 9 under the following area/ID numbers: A/1, A/7, A/8, B/11, B/12, B/15, D/22, and D/23. The final listed facility is the Port of Oakland, located at 2700 7th Street. This address is approximately four miles west of the site and no other record of a Port of Oakland facility at this address was found during a file review at the Oakland Fire Department. Additionally, no records were found for this property on the Geotracker, AC-LOP, or Envirostor websites, discussed in Section 5.6. It is likely that this facility was erroneously put on this database by the compiler thinking it was 2700 *East* 7th Street.

CA FID UST – Forty nine properties were listed within the search area on the CA FID UST database. Thirty one of the facilities were listed as inactive USTs, and seven of the facilities that were listed with active USTs are not listed as open LUST or SLIC facilities, and are not included on the Cortese database. Therefore there is a low likelihood that these properties present the site with an environmental concern.Four of the facilities listed on this database were also listed as open LUST or cleanup program facilities but were located off-site, enough distance away from the site that any contamination originating on these properties is not likely to pose a threat to the environmental integrity of the site.

The seven remaining properties were open LUST or cleanup program facilities and are discussed in Table 9 (A/3, A/5, B/15, C/18, C/19, D/22, and D/24,). There is a high likelihood that these seven properties present the site with an environmental concern.

The listing of a property on this database only indicates the existence of a UST at that property prior to October 31, 1994, when this database ceased to be updated, and is not necessarily indicative of hazardous materials negatively impacting these properties.

SLIC – Twenty two properties were listed within the search area on the SLIC database. Nine of those properties were listed on the database as closed cases and therefore pose a low risk of environmentally impacting the site. Seven open cases (and one “orphan” case) are off site and also not likely to pose an environmental risk to the site.

The remaining six properties were still under assessment, and discussed in Table 9 under the following area/ID numbers: A/6 (this property was listed as Cryer-Steamvalve and also as Former Cryer Boatyard at the same address), A/5, B/13, C/17, C/19 (this property was listed as Arco/Unocal and also as Arco Bulk Terminal at the same address), and D/22. Properties A/5 and C/17 were discussed in other databases above. Based on this information these open SLIC cases have a high likelihood of impacting the site with hazardous materials.

Two additional "orphan sites" located on the site were included on this database as open SLIC cases. The first of these properties has a site name of "303 and 315 Derby Avenue" with an address given as "Derby Avenue". The database indicated that this property had potential COCs including metals, gasoline, diesel, and VOCs. This property is discussed in Table 9 with an address of 303 and 315 Derby Avenue with a facility name of Signature Properties (with an area/ID number of B/14). The second of these properties is Union Point Waterfront Park located at 2301 Embarcadero Road. No potential COCs were mentioned; however this property is discussed in Table 9 (with an area/ID number of A/4) as a property undergoing verification monitoring. Based on this information these two "orphan sites" have a high likelihood of impacting the site with hazardous materials.

CS – Fifty nine properties were listed within the search area on the CS database. Thirty four of those properties were listed on the database as closed CS, LUST, or cleanup program facilities, and therefore do not indicate an environmental concern for the site. Of the remaining 25 properties listed as open cases, 14 were open CS facilities listed in off-site locations and are not likely to present an environment risk to the site. The remaining 11 open cases were discussed in Table 9 under the following area/ID numbers A/1, A/6 (this property address is listed under Port of Oakland on this database but under Cryer Steamvalve on Table 9), A/8, A/10, B/11, B/12, C/17, C/18, D/22, D/23, and D/24. All properties, with the exception of A/10, are referenced in other databases above. Based on this information there is a high likelihood that these 11 properties present the site with an environmental concern.

UST – Ten properties were listed within the search area on the UST database. Five of those properties were listed on the LUST database as closed cases, and two were listed as open

off-site cases. An eighth property was Acker & Guerrero Roof Company, located at 1092 Calcot Place. This facility was not included on the LUST, SLIC, or Cortese databases. Based on this information there is a low likelihood that these properties present the site with an environmental concern. Two of the remaining properties were listed on the LUST database as open cases and included The Earthgrains Company, located at 955 Kennedy Street (A/3), and Oakland Cardlock, located at 421 23rd Street (the same address as Bay Area Diablo Petroleum) (A/8). These properties are both discussed in previous databases, and are included in Table 9, and based on their open LUST status there is a high likelihood that they present the site with an environmental concern.

HIST UST – The listing of a property on the HIST UST database only indicates the existence of a UST at that property and is not necessarily indicative of hazardous materials negatively impacting these properties. Fifty four properties were listed within the search area on the HIST UST database. Twenty four properties on this database are not open LUST or SLIC facilities, and are not included on the Cortese database, and seventeen of the properties were closed LUST or cleanup program facilities. Six properties were open off-site LUST, SLIC, or Cortese facilities. There is a low likelihood that these cases present the site with an environmental concern.

The seven remaining open HIST UST cases are discussed in Table 9 under the following area/ID numbers: A/5, B/15, B/16, C/18, C/19, D/22, and D/24. These cases were referenced in other databases above therefore there is a high likelihood that these properties present the site with an environmental concern.

SWEEPS UST – Fifty six properties were listed within the search area on the SWEEPS UST database. The listing of a property on this database only indicates the existence of a UST at that property prior to June 1, 1994, when this database ceased to be updated, and is not necessarily indicative of hazardous materials negatively impacting these properties. Twenty of those properties were closed LUST or cleanup program facilities, 23 properties on this database are not open LUST or SLIC facilities, and are not included on the Cortese database, and five cases were located off-site. Therefore, these facilities have a low likelihood

of negatively impacted the site. Eight open LUST or cleanup program facilities were discussed in Table 9 under the following area/ID numbers: A/5, A/8, B/15 (the facility name was recorded as Petro-Stop Inc. in the SWEEPS UST database), C/18, C/19, D/22, D/23, and D/24. These properties were referenced in other databases above. Therefore, there is a high likelihood that these properties present the site with an environmental concern.

CHMIRS – Fifty six incident addresses were listed within the search area on the CHMIRS database. Fifty three of those properties listed reports of spills or releases which were relatively minor and/or not indicative of a potential environmental concern for the site.

Three of the properties listed reported a significant spill or release which may be a potential environmental concern for the site. The first incident occurred at 715 46th Avenue, where a fire caused the release of 2,000-gallons of sulphuric acid to a storm drain. According to the database it is unknown if the spill was contained. The second incident occurred at 4801 Oakford Street, where 5-gallons of mineral oil was released from a pad mounted transformer into a storm drain. There is no Oakford Street in Oakland and the EDR map indicates this address should be 4801 Oakport Street. The release was reportedly contained. Based on this information there is a low likelihood that these facilities have negatively impacted the site. The third incident occurred in 1994 at 3801 East 8th Street (C/20) where a stop valve was removed from an electrical transformer resulting in the spillage of 750 gallons of mineral oil and petroleum. Based on this information there is a moderate likelihood that this facility has negatively impacted the site.

AST – Seven properties were listed within the search area on the AST database. No violations were reported for these facilities and therefore there is a low likelihood that being listed on this database has resulted in a negative impact to the site.

Notify 65 – Six properties were listed within the search area on the Notify 65 database. Three of those properties were also listed on the LUST database as closed sites and therefore there is a low likelihood that these properties present the site with an environmental concern. Of the remaining three properties, one was an open LUST facility (the facility name was re-

corded as "Service Station" in the Notify 65 database). However this facility, along with the remaining two properties, were located off-site, enough distance away from the site that any contamination originating from them would have a low likelihood of threatening the environmental integrity of the site.

DEED – One property, Port of Oakland – Embarcadero, located at the intersection of Dennison and Embarcadero Streets, was listed within the search area on the DEED database. This property is an open cleanup program facility and is discussed in other databases above, and on Table 9 as property A/2.

VCP – One property, Esposito Plating Corporation, located at 2904-2908 Chapman Street, was listed within the search area on the VCP database. This property is an open voluntary cleanup site and is discussed in databases above and Table 9 as property B/16.

RESPONSE – One property, Port of Oakland – Embarcadero, located at the intersection of Dennison and Embarcadero Streets, was listed within the search area on the Response database. This property is an open cleanup program facility and is discussed in other databases above, and as property A/2.

HAZNET – One hundred and eighty one properties were listed within the search area on the HAZNET database. Five additional properties that appear to be located on the site were included on the HAZNET database as "orphan sites". This database is provided by the DTSC and contains a listing of facilities that have filled out a hazardous waste manifest. Inclusion on this list is for permitting purposes and is not indicative of a release. Several of the HAZNET properties are listed in Table 9. HAZNET properties that are not listed with violations have a low likelihood of negatively impacting the site.

EMI – Sixty four properties were listed within the search area on the EMI database. An additional property that was located on the site was included on the EMI database as an "orphan site". This database is provided by the California Air Resources Board and contains a listing of quantities of measured air pollutants. Some of the properties listed on this data-

base are listed in Table 9 due to violations. EMI sites that are not listed in Table 9 have a low likelihood of negatively impacting the site.

ENVIROSTOR – Four properties were listed within the search area on the ENVIROSTOR database. All of these properties are open LUST or cleanup program sites and are discussed in Table 9 as properties A/2, B/16, C/17, and C/19. The properties are also referenced in other databases above. One of the facilities, Big B Lumberteria, is listed at 301, 401, and 411 High Street in this database but as Arco/Unocal located (property C/19) at 401 and 411 High Street in Table 9. According to the database, in 1983 23,000-gallons of toluene was spilled onto a railway spur at the northern end of 401 High Street (the Unocal property). Based on this information there is a high likelihood that these properties present the site with an environmental concern.

HAULERS – One property, All Tire Recycling, located at 3740 San Leandro Street, was listed within the search area on the HAULERS database. However, this property is off-site and greater than one-eighth of a mile northwest of the site. Based on this information there is a low likelihood that this property presents the site with an environmental concern.

5. REVIEW OF HISTORICAL INFORMATION

The following sections summarize the results of our review of historical sources including Sanborn Fire Insurance maps, aerial photographs, topographic maps, historical city directories, oil and gas maps, and online regulatory databases.

5.1. Sanborn Fire Insurance Maps

Sanborn Maps were compiled by the Sanborn Fire Insurance Company for use by all insurance companies in setting fire insurance rates based on building construction types. Sanborn maps were compiled from the late 1800s to the late 1960s, and include details regarding site development features at specific moments in time. Sanborn maps are particularly useful because in many cases they predate aerial photographs and environmental records and often

provide the only source of information regarding site development and use. Sanborn fire insurance maps were provided for review by Environmental Data Resources, Inc. (EDR).

The tables below summarize the information observed in the Sanborn maps. Each table discusses the information garnered from one of the four areas (A through D). Each area is depicted in figures 3 through 6.

Table 2 – Sanborn Fire Insurance Maps (Area A)

Sanborn Map Date or Range of Dates	Descriptions	Specific Concerns
1925	There were no Sanborn Maps available for review in this area.	Not applicable.
1950	I-880 was observed in its present location. A diesel engine manufacturing facility, a wire cloth manufacturing facility, an automotive fabric manufacturing facility, a cellophane bag factory, a printing facility, two machine shops, and a brass foundry were observed in the northern portion of the area. Two fuel distribution facilities with numerous ASTs were observed on the waterfront north of the Dennison Street Bridge. Two lumber facilities, a dipping shed, foundries, and an auto service facility were observed in the central portion of the area. Auto repair facilities, a diesel engine facility, a pet food manufacturing facility, the Contra Costa Laundry Co., a lumber company, a concrete company, railroad rights-of-way, and a scrap metal yard were observed in the southern portion of the area. A wood preservative manufacturer was observed off site on 27th Street just north of I-880.	Fuel storage locations near waterfront, machine shops in manufacturing facilities, the printing facility, the dipping shed near waterfront in lumber yard, a brass foundry, auto service facilities, a dry cleaning facility at the laundry company, spray painting/paint storage areas, lead kettles and an oil storage area at the Union Diesel Engine Co, the junk yard and a gas/oil AST in the scrap metal yard, and the wood preservative manufacturer.

1960	The northern portion of the area remained occupied by a wire manufacturing facility, foundries, a printing facility, a textile factory, and a fuel distribution facility. A cabinet shop was observed west of the textile factory on 22nd Street. The diesel engine factory was replaced by a plywood, hardwood, and veneer company. One of the two fuel oil distribution facilities was replaced by a wood treating chemical company. One diesel and one gasoline fuel tank were observed at the municipal pier. An asphalt lined cannery refuse holding reservoir was observed near the center of the waterfront. An auto repair facility was observed in the concrete company yard adjacent to 23rd Avenue. The Contra Costa Laundry Co was replaced by National Automotive Fibers Inc. A gas station was present between 23rd and 29th Avenues where the junk yard was located.	An oil storage warehouse in the textile factory, a spray painting area in the cabinet shop, diesel and gasoline fuel tanks at the municipal pier, the fuel distribution facility, the wood treating chemical company, a refuse holding reservoir, auto repair facilities, and a gas station.
1969	The northern portion of the area remained occupied by a metal-products manufacturing facility, foundries, a lumber company, a printing facility, a textile factory, woodworker, a fuel distribution facility, and a wood treating chemical company. A truck repair and two truck painting facilities were observed on King Street. A painting contractor was observed on 27th Avenue just north of I-880. The fuel distribution facility was no longer observed except for three remaining empty ASTs. A scrap metal yard was observed in a filled in area of the harbor where Diesel Street hits the waterfront. Auto repair facilities were observed on 23rd Avenue south of Chapman Street and on 7th Street near 23rd Avenue. A machine shop was observed on 7th Street.	The truck/auto repair and painting facilities, painting contractor, and a machine shop.

Properties of concern in Area A included the fuel oil distribution facilities, a gas station, lumber companies, foundries, machine shops, a concrete company, a scrap metal yard, a wood treating chemical company, a diesel engine facility, an asphalt lined cannery refuse holding reservoir, auto service facilities, and railroad rights-of-way. Associated chemicals of concern include, but are not limited to: fuels and lubricants containing petroleum hydrocarbons; wood preservatives containing polycyclic aromatic hydrocarbons (PAHs); maintenance and cleaning products containing solvents; herbicides; and metals.

Table 3 – Sanborn Fire Insurance Maps (Area B)

Sanborn Map Date or Range of Dates	Descriptions	Specific Concerns
1925	There were no Sanborn Maps available for review in this area	Not applicable
1950	Mixed residential and commercial/industrial properties were observed including a gas station, several truck/auto repair facilities, a stamping facility, an auto painting facility, several metal fabrication facilities/foundries/machine shops, a diesel engine company, a lubricants and oil company, a filter fabrication facility, a Shell Oil Co. Plant, an out-of-service power plant with a removed 55,000-barrel storage tank, and railroad rights-of-way.	Numerous machine shops and truck/auto repair facilities throughout the area, a gas station, an oil warehouse and incinerator at the stamping facility, a fuel AST and a transformer tower at the former power plant, fuel ASTs at the Shell facility and a 15,000-gallon oil UST on Glascock Street across from the Shell Facility.
1960	Several new machine shops were observed throughout the area. An oil and paint storage shed were observed near the waterfront southeast of 29th Avenue. The Shell fuel facility remains the same except the gasoline filling pumps and auto painting facility were removed. A can warehouse was observed on the waterfront and a large packing facility was observed on the former location of the power plant.	Fuel storage tanks located at the Shell facility, a 1,000-gallon gas UST located on the northwest side of the packing facility, and numerous machine shops, stamping facilities and foundries in the area.
1969	Buildings formerly occupied by a filter fabrication facility were occupied by a used machinery repair and storage facility and an electronic equipment factory. A building formerly occupied by the stamping company was occupied by an auto battery manufacturer. The Shell fuel facility remained the same. A metal treating facility was observed at Derby Avenue and Ford Street. The can warehouse and food packing facility remained the same. Several machine shops and metal fabrication facilities remain.	Fuel storage tanks at the Shell facility and numerous machine shops and metal fabrication facilities in the area.

Properties of concern in Area B included a gas station, a lubricant and oil company, a Shell Oil company plant, a 15,000-gallon oil UST, an incinerator, a transformer, machine shops, metal fabrication facilities, a used machinery repair and storage facility, an electronic equipment factory, railroad rights of way, facilities with fuel storage tanks, a 1,000-gallon

gasoline UST, and an out-of-operation power plant with a removed 55,000-barrel storage tank, a fuel AST, and a transformer tower. Associated chemicals of concern include, but are not limited to: fuels and lubricants containing petroleum hydrocarbons; cleaning and maintenance products containing solvents; transformers containing PCBs; PAHs and dioxins from incinerated materials; and metals from foundries.

Table 4 – Sanborn Fire Insurance Maps (Area C)

Sanborn Map Date Range	Descriptions	Specific Concerns
1925	Residential properties were observed northwest of 37th Avenue. A large can factory with adjacent warehouse was observed in the center of the area. The H.L. Call Lumber Co, a chemical manufacturer, Hutchinson Co General Contractors, and SF Bridge Co Yard were located to the south of Alameda Avenue and an oil reclamation facility was located on the north side of Alameda Avenue. Railroad rights-of-way were observed in the southern section of the area. The Clorox Chemical Corp manufacturing facility and chemical manufacturing facility were observed to the northeast of the site near East 8th Street and High Street.	Machine shop located in SF Bridge Co. Yard, oil warehouses in general contractor's facility, can factory and lumber yard, oil reclamation facility, chemical manufacturer, and a "benzol" (benzene) tank in the chemical manufacturing facility northeast of the site.
1950	The can factory was observed to have expanded towards the southeast. The oil reclamation facility also expanded with new ASTs. A paint factory was observed on the south side of Alameda Avenue in the former chemical manufacturer location. A glass manufacturing facility occupied the area adjacent to Fruitvale Avenue and Alameda Avenue. A grocery distribution warehouse, shelving manufacturer with a spray painting area, scrap metal yard, steel fabricator, and oil distribution plant were located south of Alameda Avenue. The Clorox chemical facility was still located just north of I-880 and west of High Street. An incinerator was observed on the south side of Alameda Avenue northeast of the grocery warehouse.	The paint factory, the lithographic and coating area, machine shop and paint/oil storage area of the can factory, dipping and painting areas of shelving company, a scrap metal yard, transformers at the glass facility, oil storage areas at the distribution plant, a can factory and oil reclamation facility, and an incinerator.
1960	There were no Sanborn Maps available for review.	Not applicable.

Table 4 – Sanborn Fire Insurance Maps (Area C)

Sanborn Map Date Range	Descriptions	Specific Concerns
1969	The can factory and glass production facility remained the same except for the addition of a lift truck repair shop at the glass facility and a warehouse between the original glass facility and 37th Avenue. The oil distribution facility with storage tanks remained present. A mineral spirit distribution facility with four large solvent ASTs, two polyvinyl acetate ASTs, chemical and solvent drum storage areas, and 91 solvent USTs was observed between the oil distribution facility and the waterfront. The scrap metal yard expanded towards the northwest. The grocery warehouse, oil reclamation facility, paint factory and Clorox facility remained present. The oil reclamation facility was observed to have more ASTs. A gas/oil filling location was observed on the south side of Alameda Avenue northeast of the grocery warehouse.	Fuel ASTs in the oil distribution plant, solvent storage areas at the mineral spirit facility, the scrap metal yard, paint spraying area of the shelving facility, paint warehouse at the paint factory, and oil reclamation facility storage tanks.

Properties and areas of concern in Area C included a truck repair shop, a lumber company, a can factory, a paint factory, a spray painting area, a scrap metal yard, a mineral spirit distribution facility, a chemical manufacturer, facilities with fuel storage tanks, a steel fabrication yard, facilities with solvent storage tanks, lithographic processes, an oil distribution plant, machine shops, incinerators, transformers, and railroad rights-of-way. Associated chemicals of concern include, but are not limited to: fuels and lubricants containing petroleum hydrocarbons; PCBs from transformers; dioxins and PAHs from incinerated materials; metals from wrecking yards; solvents from paint manufacturing, parts washing, and maintenance; and PAHs, metals, and pesticides from wood preserving.

Table 5 – Sanborn Fire Insurance Maps (Area D)

Sanborn Map Date Range	Descriptions	Specific Concerns
1925	Several industrial complexes were observed near the water. The largest complex, located in the southern corner of the area, was the National Mill & Lumber Co. and the Pacific Pipe & Tank Co. Other on-site facilities included a general contractor, a building materials complex, and a box factory. A Standard Oil Co Yard was observed east of the	Fuel bins, rooms for oil storage, transformers, varnishing, glazing, auto repair, tar dipping vats and a tar tank at the Lumber Company, an oil storage

Table 5 – Sanborn Fire Insurance Maps (Area D)

Sanborn Map Date Range	Descriptions	Specific Concerns
	intersection of High Street and Alameda Avenue adjacent to the site, and a cleaning and dying company was observed slightly further northwest on High Street. A PG&E substation was observed on the northeast side of the I-880 northeast of the southeast corner of the site. A railroad spur was observed in the center of the area and railroad rights-of-way were observed on the northeast side of the I-880.	shed and auto repair facility in the general contractor yard, oil ASTs, oil warehouses and loading racks in the Standard Oil Yard, the cleaning and dying facility including a benzene room.
1950	The High Street Homes federal housing project was observed in the center of the area. Two lumber yards were observed northwest of the housing project. The businesses in the area remained similar, including a general contractor, a building material facility, a lumber company, and a box factory. A gas pump was observed at the lumber company near Tidewater Avenue. An asphalt plant with oil tanks was observed in the contractor yard. A gas station and truck repair facility were observed on the south side of High Street near State Route I-880. A 10,000,000-cubic foot storage tank labeled as a PG&E gasholder, a gasoline AST and an oil distribution facility were observed east of I-880.	Machine shop, paint shop and refuse burner in the box factory, a gas pump on Tidewater Avenue, a gas station/truck repair shop, the oil tanks in the contractor yard, an auto repair facility near the building materials facility, the PG&E storage tank, gas AST, and an oil distribution facility east of I-880.
1960	There were no Sanborn Maps available for review.	Not applicable.
1969	The High Street Homes housing project was replaced with numerous commercial/industrial properties including a printing facility. A gas pump was observed adjacent to a wood pallet manufacturing facility on Tidewater Avenue. A gas station was observed on High Street and Howard Street. A PG&E service center was observed in the southeastern portion of the area. Several buildings which were part of the large lumber mill were removed; however the lumber mill and a warehouse were still present. An auto painting facility was observed in the former location of the oil distribution facility east of I-880. The PG&E storage tank was still present. An auto wrecking facility was observed east of I-880 and south of High street. A small plating facility was observed east of I-880 and north of the large PG&E storage tank. The general contractor facility remained near the water and the building materials facility was changed to a sand and gravel business.	The auto wrecking facility, the auto painting facility, the PG&E storage tank, the small plating facility, auto repair facilities near the contractor and building materials yards, a gas pump, a gas station, truck and transformer service facilities and a paint vault in the PG&E service center, and a refuse burner and machine shop at the lumber mill.

Properties of concern in Area D included a pipe and tank manufacturing company, an asphalt plant with oil tanks, lumber yards, the Standard Oil company yard, a truck repair facility, an oil distribution facility, railroad rights-of-way, a steel fabrication facility, a cleaning and dying company (including a benzene room), two gasoline stations, a railroad spur, and a PG&E service center. In addition a PG&E sub-station, a gasoline AST, an auto painting facility, an auto wrecking facility, an oil distribution facility, and railroad rights-of-way were observed northeast of the area across the I-880. Associated chemicals of concern include, but are not limited to: PCBs from transformers; fuels and lubricants containing petroleum hydrocarbons; dioxins and PAHs from refuse burner; solvents from paint facilities, parts washing, and maintenance; PAHs and metals from plating facility, and metals and pesticides from the lumber company.

5.2. Aerial Photograph Review

Aerial photographs have been collected for the continental United States since the 1920s, with variable coverage and frequency (generally based on an area's importance to national defense). Aerial photographs offer an opportunity for direct observation of the site's conditions across a period of time. These observations may include the locations of tank pits, drums, pits, ponds, lagoons, stained/stressed vegetation, or other development features that can indicate potential contaminant sources.

Aerial photographs of the project area were provided by EDR Inc. For this study, Ninyo & Moore reviewed aerial photographs taken in 1939, 1946, 1958, 1965, 1982, 1993, 1998, and 2005. The photographs reviewed varied in scale and clarity, and were taken from various altitudes.

The aerial photograph review served to verify information gained from other sources, and in some cases, served as the primary source of information. Information that was gathered from aerial photographs is summarized in Table 6. Since the project area is large, the tables include limited data in the interest of brevity. The data are limited primarily to parcels of potential concern as revealed by our regulatory data review and/or our site reconnaissance.

Table 6 – Historical Aerial Photo Review (Areas A, B, C, and D)

Map Year	Area A	Area B	Area C	Area D
1939	The area was occupied primarily by industrial facilities and associated storage yards west of 23rd Avenue and residential and commercial/industrial properties east of 23rd Avenue. Train tracks were observed adjacent to the northeast side of the site. Across the train tracks are commercial/industrial properties. Several ASTs were observed near the waterfront just north of the Dennison Street Bridge and an AST was observed between 23rd and 39th Avenue near the waterfront. A pond/lagoon was observed further north on the waterfront.	The area was occupied primarily by residential properties northeast of Chapman Street and commercial/industrial properties southwest of Chapman Street. Train tracks were observed adjacent to Fruitvale Avenue. An approximately 100 foot diameter circular AST was observed near the waterfront west of Fruitvale Avenue and three ASTs were observed near the center of the waterfront. A large industrial facility was noted just north of the future I-880 location.	The area was primarily occupied by two large industrial facilities. Residential properties were observed to the north of and between the industrial facilities. Train tracks were observed adjacent to Alameda Avenue. An industrial facility was observed south of Alameda Avenue. The area north of the future I-880 location was primarily occupied by residential properties and several industrial facilities located near the train tracks and High Street.	The area was observed to be occupied by several industrial facilities and undeveloped land. A large lumber yard was observed in the southwest corner of the area. A very large PG&E gas AST was observed northeast of the future I-880 location and west of 50th Avenue.
1946	The area appeared very similar to the previous aerial photo. The pond/lagoon observed on the waterfront in the previous aerial photo was observed to be filled in.	The AST was no longer observed near the train tracks and Fruitvale Avenue. A storage yard was observed on the waterfront which was previously undeveloped land.	Several new buildings were observed near High Street. Several new ASTs were observed at a facility on Alameda Avenue. A junk yard was observed between Alameda Avenue and the waterfront.	Several buildings near High Street and Tidewater Avenue were removed. The High Street federal housing project was observed in the center of the area, which was previously undeveloped.

Table 6 – Historical Aerial Photo Review (Areas A, B, C, and D)

Map Year	Area A	Area B	Area C	Area D
1958	The I-880 and the 23rd Avenue interchange were observed. Two new unidentified large buildings and a few unidentified smaller buildings were observed in the center of the area. The AST between 23rd and 29th Avenues was no longer observed.	Two large buildings, noted as the California Packing Corporation in the Sanborn Maps, were observed near the waterfront and Fruitvale Avenue. One smaller building owned, according to the Sanborn Maps, by Dorr-Oliver Inc., was developed near the Park Street bridge. The 29th Avenue overpass and associated ramps were observed to be constructed.	A large building, observed during the site reconnaissance as Owens Brockway Glass (C/18) was observed in the center of the area replacing a block of residential property. A large unidentified building was observed between Alameda Avenue and 8th Avenue on previously undeveloped land. Several new ASTs were observed at the facility on Alameda Avenue. A facility identified in the Sanborn Maps as the Richfield Oil Corporation, Construction and Maintenance Supply Depot, was observed with seven ASTs and small structures near the waterfront and High Street.	A few new small buildings were observed on High Street near the I-880. Some structures were observed to have been removed from the lumber facility and a few small buildings and associated storage yards were observed in the southern portion of the area.
1965	The area appeared similar to the previous aerial photo. A new large industrial building (observed during the site reconnaissance but not identified) was observed near the center of the area.	No significant changes from the previous aerial photo were observed.	An small building was observed to have been replaced with a scrap metal yard on the southern side of Alameda Avenue at the waterfront. No other significant changes from the previous aerial photo were observed.	The High Street federal housing complex was no longer observed in the center of the area. A few new small buildings were observed near High Street. Four new large PG&E Oakland Service Center buildings and associated surrounding parking areas were observed in the southeast portion of the area.
1982	Poor resolution made site features difficult to discern. The large industrial facility in the northwest portion of the area was no longer observed. The	Poor resolution made site features difficult to discern.	Poor resolution made site features difficult to discern. No significant changes from the previous aerial photo were observed.	Poor resolution made site features difficult to discern. Several new unidentified structures were observed in the center of the area. The area of the East Creek

Table 6 – Historical Aerial Photo Review (Areas A, B, C, and D)

Map Year	Area A	Area B	Area C	Area D
	ASTs and four small buildings on the waterfront north of the Dennison Street Bridge were no longer observed and has been vacant until the present (noted as vacant during site reconnaissance).			Slough was filled in and the slough was redirected further southeast.
1993	Two new residential structures (also noted during site reconnaissance) were observed in the northwest portion of the area. No other significant changes from the previous aerial photo were observed	The ASTs were no longer observed near the waterfront. No other significant changes from the previous aerial photo were observed	Owens Brockway Glass was observed in the center of the area which replaced a parking lot and smaller structure. A large unidentified building was observed between Alameda Avenue and the waterfront. ASTs were no longer observed near the waterfront and High Street.	Two new buildings of Tidewater Business Park (as noted during the site reconnaissance) were observed between Tidewater Avenue and the waterfront. The large PG&E AST was no longer observed to the northeast of the area.
1998	No significant changes from the previous aerial photo were observed.	No significant changes from the previous aerial photo were observed.	The industrial facility located between Alameda Avenue and I-880 was observed to have been replaced by a single large unidentified structure and large parking area.	No significant changes from the previous aerial photo were observed.
2005	Not Available	Residential units and a crew boathouse, observed during the site reconnaissance, were observed to have replaced structures along the waterfront. These properties are the locations of properties B/12, B/13, and B/14 discussed in Table 9. A new docking area was also observed.	A small unidentified building located west of High St on the waterfront was observed to have been replaced with a storage facility building (as observed during site reconnaissance).	Not Available

The review of aerial photos did not reveal specific areas of concern beyond those noted or revealed by other data sources or our site reconnaissance.

5.3. Topographic Maps

Ninyo & Moore obtained historical topographic maps from EDR for the years 1915, 1948, 1949, 1959, 1968, 1973, and 1980. The following is a brief description of the site based on review of the historical topographic maps.

1915 – Poor resolution makes site features difficult to discern in this photograph. The body of water located adjacent to, and west and south of the site, was identified as the Oakland Harbor. A few large buildings were observed in the northwestern portion of the site. The Southern Pacific and Western Pacific railroads were observed to the northeast of the site trending northwest-southeast. The most southern portion of the site was observed to be a wetland.

1948 - The body of water located adjacent to, and west and south of the site, was identified as the Brooklyn Basin. Government Island was observed to the west of the site in the Brooklyn Basin. Several large buildings were observed throughout the site. The most southern portion of the site, noted as a wetland in the previous map, was observed to be filled in and developed.

1949 – The channel between the site and Alameda Island was identified as the Tidal Canal. A body of water located at the southern end of the site was identified as the East Creek Slough. A tank was observed to the east of the southern portion of the site.

1959 – The Nimitz (State Route I-880) Freeway was observed running adjacent to the north-east side of the site. A water tank was observed near the center of the site and another water tank was observed adjacent to a large industrial building southeast of the center of the site. The tank observed in the previous topographic map was identified as a gas tank. A feature identified as “Substation 9” was present to the east of the south end of the site.

1968 – Small round features which may be storage tanks were observed near the waterfront in several areas of the site. These included: four potential tanks observed at the northwest end of the site, four potential tanks observed near the center of the site, two potential tanks observed on the south side of a building near the center of the site, and seven potential tanks observed southeast of the center of the site. Several new buildings were observed in the southeastern portion of the site.

1973 - No significant changes from the previous topographic map were observed.

1980 – New buildings were observed throughout the site, particularly in the northwestern portion of the site.

5.4. Historical City Directories

Ninyo & Moore obtained historical city directories for the site from EDR for the years 1920 through 2006 at approximately five year intervals. Table 7 lists properties historically located on the site that pose a potential environmental threat to the site based on the potential use or storage of hazardous materials and hazardous waste.

Table 7– Historical City Directory Review (Areas A, B, C, and D)

Year	Address and Facility Name	Potential Hazardous Materials
1933	3109 Elmwood Ave: West Coast Welding & Brazing 3129 Elmwood Ave: An-Fo Manufacturing Company - Insecticides.	Solvents Insecticides, Pesticides
1943	3129 Elmwood Ave: An-Fo Manufacturing Company - Insecticides.	Insecticides, Pesticides
1945	Madewell Motor Company: 3125 East 7th St	Waste Oil
1950	Madewell Motor Company: 3125 East 7th St 3129 Elmwood Ave: An-Fo Manufacturing Company	Waste Oil Insecticides, Pesticides
1962	3129 Elmwood Ave: An-Fo Manufacturing Company	Insecticides, Pesticides
1970	3129 Elmwood Ave: An-Fo Manufacturing Company 3120 Chapman Way: Brownebuilt Body & Wrecker Company	Insecticides, Pesticides Solvents and Waste Oil
1975	3129 Elmwood Ave: An-Fo Manufacturing Company	Insecticides, Pesticides

Table 7– Historical City Directory Review (Areas A, B, C, and D)

Year	Address and Facility Name	Potential Hazardous Materials
1980	3129 Elmwood Ave: An-Fo Manufacturing Company 3120 Chapman Way: Oakland Autobody	Insecticides, Pesticides Solvents and Waste Oil
1986, 1991, and 1992	3129 Elmwood Ave: An-Fo Manufacturing Company Gold Seal Plating: 3125 East 7th St	Insecticides, Pesticides Solvents
1996	3233 East 8th St: Primo's General Repair & Tire Service 3129 Elmwood Ave: An-Fo Manufacturing Company Gold Seal Plating: 3125 East 7th St	Solvents and Waste Oil Insecticides, Pesticides Solvents
2000 and 2006	3129 Elmwood Ave: An-Fo Manufacturing Company Gold Seal Plating: 3125 East 7th St	Insecticides, Pesticides Solvents

5.5. Oil and Gas Maps

According to the Regional Wildcat Map W3-10, obtained from the State of California, Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR), the site does not lie on an active oil field. The nearest oil field, according to the map, is approximately 25 miles southeast of the site. The nearest reported well is the plugged and abandoned dry hole, designated "Lavagetto" drilled by Fredrick Libby. This well was located approximately 2 miles southeast of the site. A copy of the Regional Wildcat Map W3-10 is provided in Appendix C.

Petroleum product pipeline maps requested from Kinder Morgan (KM) for the site were reviewed by Ninyo & Moore. The maps included drawings for line sections 41 and 42, sheets 7 through 11, depicting the general alignment of KMs 12-inch and 10-inch high pressure refined petroleum products pipelines adjacent to the I-880. The maps were dated between March 18, 2002 and May 5, 2004. All pipelines were shown to be at least 180 feet north of the site and therefore are not likely to be an environmental concern for the site.

5.6. Review of Online Regulatory Databases

Ninyo & Moore performed a review of three available online environmental databases including Geotracker, the California State Water Resources Control Board's database, Envirostor, the California Department of Toxic Substances Control database, and the Alameda County Department of Environmental Health's Local Oversight Program Records database (AC-LOP). Information from these websites on properties of potential environmental concern to the site is included in Table 9.

5.7. Oakland Fire Department Records

The online regulatory agency databases discussed above failed to provide enough information to determine the status of hazardous materials at nine properties listed on those databases as open LUST or open cleanup program facilities. Therefore records relating to this HMA were requested from the Oakland Fire Department (OFD) for the following properties: 4575 Tidewater Avenue; 744 High Street; 315 Derby Avenue; 2915 Ford Street; 333 Kennedy Street; 2201 East 7th Street; 2700 East 7th Street; 2301 Embarcadero Road; and 2124 Livingston Street. The OFD had no records for 744 High Street, 315 Derby Avenue, or 2301 Embarcadero Road. Information found relating to the remaining six properties is included in Table 9 and throughout this HMA.

6. SITE RECONNAISSANCE

A site reconnaissance was conducted to provide specific current information about the site that is not obtainable through an environmental records review or aerial photograph review. Ninyo & Moore performed a site reconnaissance of the site area on March 17, 2009. The inspection included a reconnaissance of the site from public rights-of-way. Photographs of the site are presented in Appendix B.

During the site reconnaissance, we looked for several indicators of potential environmental impacts to the project including, but not limited to, significant staining or degraded pavement, USTs, ASTs, storage of hazardous materials and wastes, groundwater monitoring wells and

remediation systems, dry cleaning facilities, transformers, pesticide use, industrial facilities, current or historic gasoline stations, distressed vegetation, and the presence of pits, ponds, or lagoons. The presence of features such as ASTs, USTs, or chemical storage areas alone is not cause to classify a property as Moderate or High with regard to risk. Evidence of a release, such as significant staining, groundwater monitoring wells, or remediation equipment, would be cause to classify a property as Moderate or High.

The following table summarizes observations made at properties where environmental risk indicators were noted by the field assessor. In general, properties were viewed from public rights-of-way; interviews with property personnel were not conducted. The table which follows is an observation checklist for the properties of concern. In addition, eight concrete-pad mounted transformers were observed. No staining was observed adjacent to the transformers and all looked to be in good condition.

Table 8 – Site Reconnaissance (Areas A, B, C, and D)

Area	Address/ General Location (Figure/I.D. Number if applicable)	Business Name	Site Use	Chemical Storage Areas	Dumped, Burned Material	Hydraulic Equipment (Lifts)	Bermed, Recessed, or Diked Areas	Chemical/Pesticide Mixing Areas	Sumps, Pits, Ponds, Lagoons, Clarifiers	Discharges/Disposal Areas	Groundwater Monitoring Wells or Other Wells	Remediation Equipment/Evidence or Remediation	Discolored or Polluted Water	Storage Tanks (Underground or Aboveground)	Drums	Stressed Vegetation	Discolored/Stained Soils	Degraded/Heavy Stained Pavement

Notes:
Y – Yes
N – No
U – Unknown
* Not directly observed but assumed to be present

Of the four auto-service facilities observed, three were listed on environmental databases discussed in Section 4.1. These included: East Bay Transmission, located at 501 23rd Avenue, listed on the HAZNET database as PX Service Station and noted as having hazardous waste manifests for waste oil, oxygenated solvents, and liquids with halogenated organic compounds; Excel Auto, located at 2939 East 7th Street listed on the HAZNET database as Hondaland and noted as having hazardous waste manifests for halogenated organic compounds; and ACY, located at 3024 East 7th Street,

listed on the HIST UST, CA FID UST, and SWEEPS UST databases as Alameda County Mosquito Abatement and noted as having inactive USTs. No violations were found for these facilities and therefore they pose a low threat to the environmental integrity of the site

Additionally railway sidings were observed in all areas of the site except Area D. Minor hydrocarbon staining was generally observed adjacent to the tracks. The lack of plant life adjacent to the tracks implied the use of pesticides. These releases constitute a low to moderate risk to the environmental integrity of the site.

7. SPECIFIC PROPERTIES OF CONCERN

Based on the review of information found on regulatory agency websites, review of the environmental database, inquiries at the Oakland Fire Department, and our site reconnaissance, properties of concern were evaluated with regard to the potential for detrimental impacts during future construction activities at the site. Specific Properties of High or Moderate risk are presented in Table 9. Properties in Table 9 were evaluated based on the information obtained and the likelihood that hazardous materials might impact soil and/or groundwater likely to be disturbed during construction.

8. NON-SPECIFIC AREAS OF CONCERN

The following are non-specific concerns within the site areas. These concerns include widespread industrial-type operations that occurred and/or currently occur in the noted areas. The sources for these non-specific concerns include the Sanborn maps, aerial photographs, topographic maps, and the site reconnaissance.

- **Area A** – A diesel engine manufacturing facility, two machine shops, a wood treating chemical company, and a foundry were observed in the northern portion. Two fuel distribution facilities with numerous ASTs were observed on the waterfront north of the Dennison Street Bridge. An asphalt lined cannery refuse holding reservoir was observed near the center of the waterfront. Two lumber facilities, a dipping shed, foundries, a scrap metal yard, a truck painting facility, and an auto service facility were observed in the central portion of the area. Auto repair facilities, a diesel engine facility, the Contra Costa Laundry Co., a lumber company, a machine shop, a concrete company, railroad rights-of-way, and a junk yard were observed in the southern portion of the area. A gasoline station was observed at the corner of

23rd and 29th Avenues. A wood preservative manufacturer was observed off site on 27th Street just north of I-880.

- **Area B** – A gas station, several truck/auto repair facilities, a stamping facility, an auto painting facility, several metal fabrication facilities/foundries/machine shops, a diesel engine company, a welding company, an insecticide manufacturing company, a wrecking yard, a lubricants and oil company, a filter fabrication facility, a Shell Oil Co. Plant, a 15,000-gallon oil UST, a used machinery repair and storage facility, an electronic equipment factory and railroad rights-of-way and spurs on the western portion of the area. A 1,000-gallon gasoline UST and an out-of-operation power plant with a removed 55,000-barrel storage tank, a fuel AST, and a transformer tower were observed in the southeast corner of the area.

- **Area C** – A large glass manufacturing facility with transformers and a truck repair shop were observed in the western portion of the area. An auto repair service in the northwest portion of the area. A large can factory with an adjacent warehouse was observed in the center of the area. A lumber company, a paint factory, a shelving manufacturer with a spray painting area, a scrap metal yard, a steel fabricator, an oil distribution plant with fuel ASTs, a mineral spirit distribution facility with solvent storage areas, and a chemical manufacturer were located in the southern portion of the area, and an oil reclamation facility was located on the eastern portion of the area, north of Alameda Avenue. Railroad rights-of-way were observed in the southern section of the area. A chemical manufacturing facility with a benzene tank was observed northeast of the site on High Street across the I-880.

- **Area D** – A large lumber company (with fuel bins, rooms for oil storage, transformers, varnishing, glazing, auto repair, tar dipping vats and a tar tank) and a pipe and tank manufacturing company were observed on the southern portion of the area. Two additional lumberyards, an asphalt plant with oil tanks, and a gasoline pump were observed on the northwest portion of the area. A Standard Oil Co Yard, two gasoline stations, a truck repair facility, and an oil distribution facility were observed in the northern corner of the area, and a cleaning and dying company including a benzene room was observed north of the area across the I-880 on High Street. A PG&E service center was observed in the southeastern portion of the area. A PG&E sub-station was observed on the northeast side of the I-880 northeast of the area. A gasoline AST, an auto painting facility, an auto wrecking facility, an oil distribution facility, and railroad rights-of-way were observed north of the area across the I-880.

9. HAZARDOUS MATERIAL IMPACTS

Based on the results of this HMA, Ninyo & Moore has identified the following Hazardous Material Impacts (HMI) to the site.

9.1. Hazardous Materials Impacts

- **HMI-1** – Demolition of structures built prior to 1980 may result in the exposure of the public and/or the environment to asbestos containing materials (ACMs) and/or lead based paint (LBP).

- **HMI-2** – Construction activities may encounter previously unidentified USTs, hazardous materials, petroleum hydrocarbons, or hazardous or solid wastes and may result in the exposure of the public and/or the environment to hazardous materials.

- **HMI-3** – Construction activities, including demolition, may encounter or generate hazardous or solid wastes and debris and may result in the exposure of the public and/or the environment to hazardous materials.

- **HMI-4** – Construction activities may result in exposure of the public and/or the environment to contaminated soil at the properties listed in Table 9.

- **HMI-5** – Construction activities may result in exposure of the public and/or the environment to contaminated groundwater at the properties listed in Table 9.

- **HMI-6** – Construction activities along existing and former railway lines may result in exposure of the public and/or the environment to soil contaminated with herbicides petroleum hydrocarbons and metals.

- **HMI-7** – Construction activities may include demolition of large ASTs at fueling and chemical manufacturing facilities, which may result in exposure of the public and/or the environment to contaminants including, but not limited to, chemicals, fuels, oils, lubricants, and metals.

9.2. Additional Specific Property HMI

The Port of Oakland Embarcadero Cove facility and the Signature Properties facility discussed in Table 9 are subject to land-use restrictions imposed by the DTSC. Because of this, prior to implementing the previously listed mitigation measures, it will be necessary to negotiate with the DTSC conditions for remediation and construction at this property.

10. PRELIMINARY MITIGATION MEASURES

The following are the proposed preliminary mitigation measures for each HMI:

- **HMI-1** – Prior to construction activities, an evaluation of all buildings (built prior to 1980) to be demolished will be conducted to evaluate the presence of asbestos-containing building materials and lead-based paint. Remediation will be implemented in accordance with the recommendations of these evaluations.

- **HMI-2** – Prior to construction activities, hazardous materials contingency plans will be prepared addressing the potential for discovery of unidentified USTs, hazardous materials, petroleum hydrocarbons, or hazardous or solid wastes encountered during constructions. The contingency plans will address UST decommissioning, field screening and materials testing methods, mitigation and contaminant management requirements, and health and safety requirements.

- **HMI-3** – Construction contractors will dispose of all hazardous or solid wastes and debris encountered or generated during construction and demolition activities in accordance with all federal, state, and local laws and regulations.

- **HMI-4** – Contractors will prepare soil management plans prior to construction and will implement them during all phases of construction. Disturbed soils, and/or any soil stockpiles or debris piles discovered before or during construction activities, will be monitored for visual evidence of contamination (e.g., staining or discoloration). Soil will also be monitored for the presence of VOCs using appropriate field instruments such as organic vapor measurement with photoionization detectors or flame ionization detectors. If the monitoring procedures indicate the possible presence of contaminated soil, a contaminated soil contingency plan will be implemented and will include procedures for segregation, sampling, and chemical analysis of soil. Contaminated soil will be profiled for disposal and will be transported to the appropriate hazardous or non-hazardous waste or recycling facility licensed to accept and treat the type of waste indicated by the profiling process. The contaminated soil contingency plan will be developed and in place during all construction activities. If these processes generate any contaminated groundwater that must be disposed of outside of East Bay Municipal Utilities District (EBMUD) regulatory requirements, the groundwater will be profiled, manifested, hauled, and disposed of in the same manner.

  Alternatively, preparation of a Phase II Environmental Site Assessment (ESA) will be prepared. In general, the Phase II ESA includes the following:

  - A work plan that includes the number and locations of proposed soil/monitoring wells, sampling intervals, drilling and sampling methods, analytical methods, sampling rationale, site geohydrology, field screening methods, quality control/quality assurance, and reporting methods. Where appropriate, the work plan is approved by a regulatory agency such as the Oakland Fire Department or the RWQCB.

  - A site-specific health and safety plan signed by a Certified Industrial Hygienist.

  - Necessary permits for encroachment, boring completion, and well installation.

- A traffic safety plan.
- Sampling program (fieldwork) in accordance with the work plan and health and safety plan. Fieldwork is completed under the supervision of a State of California registered geologist.
- Hazardous materials testing through a state-certified laboratory.
- Documentation including a description of filed procedures, boring logs/well construction diagrams, tabulations of analytical results, cross-sections, an evaluation of the levels and extent of contaminants found, and conclusions and recommendation regarding the environmental condition of the site and the need for further assessment. Recommendations may include additional assessment or handling of the contaminants found though the contaminated soil contingency plan. If the contaminated soil contingency plan is inadequate for the contamination found, a remedial action plan will be developed.
- Disposal process including transport by a state-certified hazardous material hauler to a state-certified disposal or recycling facility licensed to accept and treat the identified type of waste.

- **HMI-5** – Prior to dewatering activities, EBMUD should be contacted regarding sanitary sewer discharge criteria. The groundwater may have to be treated prior to sanitary sewer discharge.
- **HMI-6** – Soil along and immediately adjacent to existing and former railway lines which will be disturbed during construction should be assessed for the presence of herbicides, petroleum hydrocarbons, and metals. This assessment should be completed as described under HMI-4.
- **HMI-7** – Demolition of chemical/fuel storage facilities will include decommissioning and removal of USTs and ASTs in accordance with local and state regulatory agencies. These agencies will likely require soil and groundwater sampling. This sampling should be conducted in accordance with local and state regulatory agency requirements.

11. RECOMMENDATIONS

Ninyo & Moore has identified six properties and one particular area where additional investigation is recommended. The particular area of concern is a section of Area D where residential housing may be developed, and where two properties of concern (D/21 and D/24) and historical lumber yard operations are located. The section of Area D where this development is proposed is southwest of Tidewater Avenue, southeast of and including Tidewater Business Park (D/21), and north of the waterfront. Ninyo & Moore recommends that a detailed investigation be conducted involving a review of previous environmental investigations that have occurred in this area.

Ninyo & Moore also recommends a review of previous environmental investigations at six additional properties on the site listed on regulatory databases as open LUST, cleanup program, or verification monitoring cases, where information regarding the present or recent status of these facilities was not found. The six properties include:

- Union Point Waterfront Park, located at 2301 Embarcadero Road (A/4);
- Conagra Inc., located at 2201 East 7th Street (A/7);
- Rhodes and Jamieson Batch Plant, located at 333 Kennedy Street (A/9);
- Atwood Industries Inc., located at 2915 Ford Street (B/13);
- Tidewater Business Park, located at 4703 Tidewater Avenue (D/21); and
- ABF Freight Systems, located at 4575 Tidewater Avenue (D/22)

Additionally, Ninyo & Moore recommend a limited Phase II ESA be conducted at the potential future residential area and these six locations in order to fill any data gaps revealed by the review of previous environmental investigations. This will involve the collection and analysis of soil and groundwater samples in accordance with Ninyo & Moore's solicitation and cost estimate dated August 22, 2008.

Hazardous Materials Assessment, Central Estuary, Oakland

Area/ ID Number	Facility Name	Facility Address	Environmental Database Listings[1]	COCs[2]	Background Information [Source]	Recent Activities [Information Source]	Assumed GW Depth/Gradient	Risk Class[3]/ Source(s) Indicating Concern[4]	Reason For Environmental Concern
A/1	West Coast Vending Inc.	2124 Livingston St	Cortese, LUST, CS, HAZNET	TPH(g)	A 2,000-gallon gas UST removed in 4/98. Workplan prepared for ACEHD to evaluate extent of hydrocarbon impacted soil/GW [4/25/00 workplan found on AC-LOP]. No further relevant information on GT, AC-LOP, Env, or at OFD	ACEHD requests owner to "claim" the site on GT. [7/3/08, Letter from ACEHD to owner found on GT]. 11/12/08 unidentified phone log found on AC-LOP indicates the case may be reviewed in 2009	GW depth:10 to 15 feet/no gradient information found	H/D	Listed as an open LUST case with contaminated soil and GW on GT and AC-LOP
A/2	Port of Oakland Embarcadero Cove (currently an empty lot)	Northwest corner of Dennison and Embarcadero Streets	Cortese, CA Response, DEED, Env, HIST Cal-Sites	VOCs, SVOCs, dioxins, furans, PCBs, and pesticides	Past uses include manufacturing lumber/wood products, oil companies and pesticide, insecticide, and rodenticide storage [Env]	Contamination is contained by vertical and surface HDPE barrier and land use restrictions are in place. Annual GW sampling [8/1/08 Annual Technical Report found on Env]	GW depth:3-15 feet/ there is no gradient due to a vertical barrier surrounding the	H/D,H	Listed as an open CPF case with contaminated soil and GW on GT and Env. Land use restrictions are in place.
A/3	Earthgrains Baking Company	955 Kennedy St	ICIS, LUST, UST, HAZNET, EMI	TPH(d) and TPH(g)	8 USTs operated 1967-2005 with contents including gasoline, diesel, and waste oil. Diesel impacted soil and GW at property [11/18/08 GW MW installation Plan found on GT]	Site assessment to determine horizontal and vertical extent of GW contamination [11/18/08 GW MW installation Plan found on GT]	GW depth: 9-24 feet / gradient to west-southwest	H/D	Listed as an open LUST case with contaminated soil and GW on GT. Soil contamination is also present adjacent to the facility
A/4	Union Point Waterfront Park	2301 Embarcadero Rd	ERNS	N/A	Opened for site assessment in 2002 [GT]	Undergoing verification monitoring [GT] No additional information in GT, AC-LOP, Env,or at OFD	No information	H/D	Listed as an open Verification Monitoring site on GT
A/5	Bytech Chemical	1905 Dennison St	FTTS, Hist FTTS, CA FID UST, SLIC, Hist UST, SWEEPs UST	Solvents, slag, and TPH impacted soil	Former boat repair facility with slag, slag-impacted soil, and TPH-impacted soil [1/5/06 Revised Corrective Action Plan found on GT]	Corrective Actiion Plan for excavation submitted. Soil contamination not present offsite [1/5/06 Revised Corrective Action Plan found on GT]	GW depth: Approx 5 feet / gradient to west	H/D	Listed as an open CPF case with slag-impacted and TPH-impacted soil on GT
A/6	Cryer Steamvalve	1899 Dennison St	EMI, SLIC	Metals and TPH	A notice of violation from the ACEHD indicated that this property is being combined together with Bytech Chemical facility listed above. The violation was for not completeing a required combined risk assessment for these 2 properties. Listed as an Open Cleanup Program Site [7/21/98 Second Notice of Violation found on AC-LOP]	See above	GW depth: Approx 5 feet /gradient to west	H/D	Listed as an open CPF case on GT
A/7	Conagra Inc.	2201 E. 7th St	FINDS, CA WDS, Cortese, LUST, HAZNET, EMI	TPH(g)	Opened for site assessment in 1989 [GT]	No additional information found on GT, AC-LOP, or Env. OFD only has site inspection forms	No information	H/D	Listed as an open LUST case on GT
A/8	Former Bay Area Diablo Petroleum (currently Golden Gate Petroleum)	421 23rd Ave	RCRA-NonGen, FINDS, Cortese, LUST, CS, Sweeps UST, HAZNET	TPH(g)	associated piping removed from property. 1,300 cubic yards of petroleum-impacted soil removed from property along with 28,000-gallons of petroleum-impacted GW and floating product. Seven monitoring wells on- and off-site [11/17/00 GW monitoring report from AC-LOP]	Site closure being requested by consultant, although MTBE appears to have migrated offsite and exceed ESLs. Awaiting response from ACEHD [2/10/09 Soil Gas Survey and Soil Sampling Report found at AC-LOP]	GW depth: 8-10 feet /gradient to southwest	H/D,R	Listed as an open LUST case on GT and an open CPF on AC-LOP. Contamination appears to have migrated offsite and exceeds ESLs, despite this consultant is requesting site closure

Table 9 - Identified Specific Properties of Concern
Hazardous Materials Assessment, Central Estuary, Oakland

Area/ ID Number	Facility Name	Facility Address	Environmental Database Listings[1]	COCs[2]	Background Information [Source]	Recent Activities [Information Source]	Assumed GW Depth/Gradient	Risk Class[3]/ Source(s) Indicating Concern[4]	Reason For Environmental Concern
A/9	Sea Power Marine	333 Kennedy St	Cortese, LUST	Diesel	A site assessment began in 1985 [GT]	No additional information found in GT, AC-LOP. or Env. OFD only has site inspection forms	No information	H/D	Listed as an open LUST case on GT
A/10	Hans and Gunter Roofing Co.	2834 E. 7th St	CS	TPH(g) and VOCs	In 2002 two gasoline USTs were removed from the property [1/30/04 Contaminated Site Case Transfer Form, OFD to ACEHD]	Consultant (Pangea) requesting closure of facility from ACEHD due to detected COC concentrations not posing a significant threat to human health [10/22/08 Additional Information Report]	No information	M/D	Listed as an open contaminated site case with contaminated soil and GW on AC-LOP
B/11	Lemoine Cold Storage	630 29th Ave	Cortese, LUST, CS, HAZNET	TPH(g) and VOCs (including benzene and TCE)	1,000-gallon gasoline UST, dispenser, and associated piping removed in 1996; 13 MWs installed on-site	ACEHD is requesting further assessment be conducted to determine source of VOCs. A plume containing VOCs and TPH(g) is migrating off the property 200-feet in WSW direction [11/12/2008 ACEHD comment response found in AC-LOP]	GW depth: 6-11 feet / gradient to west	H/D	Listed as an open LUST case on GT.
B/12	Glascock Ave Warehouse	Listed as 2901 Glascock Avenue in GT but actual location is 2901 Glascock Street	Cortese, LUST, SLIC, CS, HAZNET	TPH(g), TPH(d), TPH(mo)	LUST discovered 1993 [GT]. 10/9/03 letter from ACEHD to owner discusses future work including soil and GW sampling near existing wells. 4/5/04 Letter discusses transferal of case to RWQCB [AC-LOP]	Most recent information given in background information. Note: A letter from AC Health Care Services dated 8/24/94 indicates No Further Action for the Glascock Properties case located at this address. However, the Glascock Avenue Warehouse case remained open [AC-LOP]. The Glascock Properties facility was listed on GT as a closed CPF	GW depth: -3 to 4 feet above mean sea level / gradient south/southwest	H/D	Listed as an open LUST case on GT and AC-LOP. However, no information provided since 1994.
B/13	Atwood Industries Inc. (noted as Gilro Machine Company on Sanborn Maps and during site reconnaissance)	2915 Ford St	SLIC	None listed	Site Assessment began in 2001. RWQCB is lead agency.	No additional information found in GT, AC-LOP. or Env. OFD only has site inspection forms	No information	H/D	Listed as an open CPF case on GT
B/14	Signature Properties (current use is residential and as a boathouse). Described in consultants letter to RWQCB found in AC-LOP as "The Estuary… formerly known as 303 and 315 Derby Ave and 2901 and 2909 Glascock St"	303 and 315 Derby Ave	RCRA-SQG, FINDS, Cortese, LUST, AST, HAZNET	TPH(g), BTEX, and MTBE	Soil/GW impacted by petroleum-related constituents from historical industrial operations on the property. In 2003 Soil remediated w/RWQCB oversight to residential standards. 17 monitoring wells on and adjacent to property [March 2009 Pilot Study Design and Implementation Work Plan]	Submittal of soil vapor sampling workplan to RWQCB. GW sampling ongoing. [March 2009 Pilot Study Design and Implementation Work Plan]. Land use restriction are in place for this property [GT]	GW depth: -3 to 4 feet above mean sea level / gradient south/southwest	H/D	Listed on GT as an open CPF case with contaminated soil, GW, and soil-vapor, and land use restrictions
B/15	Simmons Oil Corporation	315 Derby Ave	RCRA-SQG, RCRA Non-Gen, FINDS, Cortese, LUST, CA FID UST, Hist UST, Sweeps UST	TPH(g)	Site assessment began 1990 [GT]. No additional information provided on GT, AC-LOP, Env, or at OFD	No information found for this site. Likely to be the southeastern portion of Signature Properties site, described on AC-LOP as "The Estuary… formerly known as 303 and **315 Derby Ave** and 2901 and 2909 Glascock St". Site map and site description in Signature Properties reports show 315 Derby to be encompassed by that property (see above)	No information	H/D	Listed as an open LUST case on GT

Table 9 - Identified Specific Properties of Concern
Hazardous Materials Assessment, Central Estuary, Oakland

Area/ ID Number	Facility Name	Facility Address	Environmental Database Listings[1]	COCs[2]	Background Information [Source]	Recent Activities [Information Source]	Assumed GW Depth/Gradient	Risk Class[3]/ Source(s) Indicating Concern[4]	Reason For Environmental Concern
B/16	Esposito Plating Corporation	2904-2908 Chapman St	CERC-NFRAP, RCRA-SQG, FINDS, RAATS, Hist UST, VCP, HAZNET, EMI, Envirostor	TPH(mo), TPH(d), VOCs, metals	Former metal plating facility. Contaminated soil and GW	Waiting on notice to proceed from client for additional site investigation approved by DTSC. Contaminants have migrated offsite [9/15/08 Remedial Investigation Workplan found on Env]	Nearby properties (including 2901 Glascock St, described above) indicated GW depth:3-10 feet /gradient to south-southwest	H/D	Listed as a voluntary cleanup site with with contaminated soil and GW on Env
C/17	Former Ekotek Lube and Bayside Oil Company (currently a vacant lot)	4200 Alameda Ave	ERNS, RCRA SQG, FINDS, CA Bond Exp Plan, Cortese, LUST, SLIC, CS, HAZNET, Envirostor	Waste-oil, TPH(mo), lubricating-oil, and hydraulic-oil for LUST case and separate phase hydrocarbons for CPF case	This is a former waste oil and solvent recycling facility. First GW monitoring wells installed in 1995. Site assessment began 1996. [GT]	Ongoing collection and removal of separate phase hydrocarbons from 10 active monitoring wells. [2/15/2009 GW Monitoring and Product Removal Report found on GT]. 3 unidentified 55-gallon drums observed onsite during Ninyo & Moore's site reconnaissance.	GW depth: 5-11 feet / GW gradient to south	H/D,R	Listed as an open LUST case as well as an open CPF case with contaminated GW on GT.
C/18	Owens Brockway Glass	3600 Alameda Ave	RCRA-LQG, TRIS, FTTS, ICIS, CA WDS, Cortese, LUST, CA FID UST, SLIC, CS, Hist UST, Sweeps UST, HAZNET, EMI	TPH(g) and TPH(d)	2 UST areas with 3 fuel-oil and four additional USTs (at least one containing gasoline) formerly existed at this facility. After removal, oil and gasoline observed released to subsurface. [12/22/2008 GW Monitoring Report found on AC-LOP]	Ongoing GW monitoring well sampling. Two plumes appear stable, extending "slightly" offsite [12/22/2008 GW Monitoring Report found on AC-LOP]	GW depth: 8-13 feet / GW gradient to SW	H/D,H, R	Listed as an open LUST case on GT and AC-LOP
C/19	Former Arco/Unocal (currently leased by First Transit Company)	401-411 High St	SLIC, HAZNET, EMI	TPH(g), TPH(d), BTEX, VOCs	The site was formerly occupied by a bulk transfer facility used for storage, shipment, and receipt of petroleum products. 8 solvent USTs removed in 1994. Soil vapor extraction and ozone sparging systems were installed at the site in 2006. [1/30/09 GW Sampling and O&M Report found on GT]	Ongoing GW monitoring well sampling and operations & maintenance of ozone injection system [1/30/09 GW Sampling and O&M Report found on GT]	GW depth: 3-11 feet / gradient to SW	H/D,H	Listed as an open CPF case on GT
C/20	No facility name. Address only.	3801 East 8th Street	CHMIRS	TPH(g)	In 1994 a stop valve was removed from an electrical transformer resulting in the spillage of 750 gallons of mineral oil and petroleum [2/20/2009 Environmental Data Resources DataMap™ Area Study]	No additional information found for this spill	No information	M/D	Large spill of TPH(g) ocurred at this address.
D/21	Tidewater Business Park (TBP)	Listed on GT with an address of "Unknown Tidewater Ave"	Cortese, SLIC	Waste-oil, motor-oil, hydraulic-oil, and lubricating-oil	Assessment began 1990 [GT].	No follow up documentation found.	No information	H/D	USTs at adjacent property impacting this property.Listed as an open LUST case on GT

Table 9 - Identified Specific Properties of Concern
Hazardous Materials Assessment, Central Estuary, Oakland

Area/ ID Number	Facility Name	Facility Address	Environmental Database Listings[1]	COCs[2]	Background Information [Source]	Recent Activities [Information Source]	Assumed GW Depth/Gradient	Risk Class[3]/ Source(s) Indicating Concern[4]	Reason For Environmental Concern
D/22	ABF Freight Systems and Tidewater Business Park (TBP) both listed at this address in GT (no further information on GT)	4575 Tidewater Ave	RCRA-SQG, ERNS, HMIRS, CA WDS, FINDS, Cortese, LUST, CA FID, SLIC, CS, Hist UST, Sweeps UST, HAZNET	TPH(d)	Site Assessment began in 1986 [GT]. According a UST removal report, TBP is located adjacent and to the southwest of the ABF property (and an assessors parcel map found on the AC-LOP website indicates this TBP address is 4703 Tidewater Ave). One 10,000-gallon diesel, one 800-gallon waste oil , and one 800-gallon new oil USTs were removed from the ABF property at 4757 Tidewater Ave prior to 1987. A fueling station and a 10,000-gallon diesel UST were still in place in February 1987. Two GW monitoring wells were installed at the facility [2/25/87 UST Removal Report found at OFD]. ABF property's USTs have impacted shallow GW and soil at the ABF and TBP properties [6/15/1988 Soil Sampling Activities found on AC-LOP]	No additional information found on GT, AC-LOP, Env, or at OFD for either 4575 or 4703 Tidewater Ave.	No information	H/D	ABF facility listed as an open LUST case and Tidewater Business Park listed as an open CPF case on GT, both at this address.
D/23	El Monte RV Center	4341 Howard St	Cortese, LUST, CS, Sweeps UST	Solvents, VOCs, TPH(g)	2000 workplan details proposed GW investigation. In 1991 a 1,000-gallon gasoline UST was removed from the facility and TPH(g) impacted soil was discoved beneath it. GW monitoring well installed in 1993 downgradient from UST [7/25/00 Groundwater Investigation Workplan found on AC-LOP]	AC letter dated 9/15/06 indicates further soil and GW investigation of halogenated solvent release necessary prior to site closure [Letter from ACEHD to property owner found on AC-LOP].	GW depth: 4-8 feet / gradient to west	H/D	Listed as an open LUST case with contaminated soil and GW on GT and AC-LOP.
D/24	Di Salvo Trucking	4919 Tidewater Ave	RCRA-SQG, HMIRS, FINDS, CA WDS, Cortese, LUST, CA FID UST, CS, Hist UST, Sweeps UST, AST, HAZNET	TPH(d), TPH(g), BTEX	Site Assessment began in 1986 [GT]. One 10,000- and one 5,000-gallon diesel, one 280-gallon used oil, and one 550-gallon (contents unknown) USTs removed from facility March 1989, along with fill and dispenser lines. TPH detected in soil and diesel impacted GW observed in GW from excavation. 4 GW monitoring wells installed in 1994 [1/19/09 Site Assessment Report found on AC-LOP]	Ongoing GW sampling of 4 monitoring wells, TPH(d) present in shallow soil and GW . TPH(d) GW plume migrating offsite to north, south, and west [1/19/09 Site Assessment Report found on AC-LOP]	GW depth: 2-4 feet / gradient west to south-southwest	H/D	Listed as an open LUST case with contaminated soil and GW on GT and AC-LOP.

Notes:
[1] The acronyms included here are described in Table 1 of the text
[2] Constituents of Concern
[3] H = high, M = moderate
[4] D=Database, R=Reconnaissance, H=Historical Documentation
ACEHD = Alameda County Environmental Health Department
OFD = Oakland Fire Department
HMI = Hazardous Materials Impact
GW = groundwater
GT = GeoTracker website
AC-LOP = Alameda County Department of Environmental Health Local Oversight Program Records website
Env = Envirostor website
UST = Underground Storage Tank
LUST = Leaking UST
CPF = Cleanup Program Facility
TPH = total petroleum hydrocarbons; g = gasoline; d = diesel; mo = motor oil; VOC = volatile organic compounds; SVOC = semi-volatile organic compounds; BTEX = benzene, toluene, ethyl benzene, and xylene; PCE = tetrachloroethylene; TCE = trichloroethene; and MTBE = metyl tert butyl ether; PCB = Polychlorinated Biphenyls

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there are 3 CERC-NFRAP sites within the searched area.

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/10/2008 has revealed that there is 1 RCRA-TSDF site within the searched area.

AMERICAN NATIONAL CAN CO	***3801 EAST 8TH ST***	***77***	***453***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/10/2008 has revealed that there are 5 RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2008 has revealed that there are 48 RCRA-SQG sites within the searched area.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 09/10/2008 has revealed that there

are 8 RCRA-NonGen sites within the searched area.

TSCA: The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. The United States Environmental Protection Agency has no current plan to update and/or re-issue this database.

A review of the TSCA list, as provided by EDR, and dated 12/31/2002 has revealed that there is 1 TSCA site within the searched area.

Site	Address	Map ID	Page
M&N WAREHOUSE	450 LANCASTER ST.	78	472

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 10/08/2008 has revealed that there are 10 FTTS sites within the searched area.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS

database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 9 HIST FTTS sites within the searched area.

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2006 has revealed that there are 3 SSTS sites within the searched area.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 56 SWEEPS UST sites within the searched area.

VOLVO GM HEAVY TRUCK CORP.	750 50TH AVE.	109	748

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

A review of the DEED list, as provided by EDR, and dated 12/30/2008 has revealed that there is 1 DEED site within the searched area.

Site	Address	Map ID	Page
PORT OF OAKLAND - EMBARCA	***DENNISON / EMBARCADERO***	***27***	***128***

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 11/25/2008 has revealed that there is 1 VCP site within the searched area.

Site	Address	Map ID	Page
ESPOSITO PLATING CORPORATION	***2904-2908 CHAPMAN STREE***	***56***	***304***

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 11/25/2008 has revealed that there is 1 RESPONSE site within the searched area.

Site	Address	Map ID	Page
PORT OF OAKLAND - EMBARCA	***DENNISON / EMBARCADERO***	***27***	***128***

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2006 has revealed that there are 181 HAZNET sites within the searched area.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/25/2008 has revealed that there are 4 ENVIROSTOR sites within the searched area.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Registry ID: 110013309614

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Off-site waste receiver:	Commercial status unknown

Hazardous Waste Summary:

Waste code:	D000
Waste name:	Not Defined

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The Port of Oakland owns the site and is in compliance with an order issued by DHS. Monsanto Company has also been identified as a potentially responsible party by DHS. DHS has budgeted $50,000 for oversight/monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.
Site Description:	The site is located on Embarcadero Street at the foot of Dennison Street in Oakland. For 60 to 70 years, the 1.3 acre site was leased to industrial tenants, including oil companies and formulators of pesticides and wood preservatives. It is now a vacant lot.
Hazardous Waste Desc:	Pentachlorophenol (PCP), organochlorine pesticides and solvents have been discovered in soil and ground water at this site. About 8,000 cubic yards of soil and an unknown amount of ground water is contaminated. Dioxins and furans, impurities of PCP,have been found in low levels in soil and ground water.
Threat To Public Health & Env:	Residential, industrial, commercial, recreational and military areas are adjacent to the site. The population within a three-mile radius is estimated at 215,331 persons. PCP was not detected in shoreline sediment samples or at the box culvert outletin the Bay at Dennison Street. The closest domestic well is about three-quarters of a mile away.
Site Activity Status:	The final phase of remedial investigation is being conducted. Upon completion of that work, the feasibility study and RAP will be prepared.

Comments:	Recommended cleanup includes, installation of a cap over the contaminated area, installation of HDPE cutoff wall around the site boundary to isolate groundwater, operation of well skimmer to remove free petroleum products, deed restriction, site andNo major problems were noted. Follow-up on missing decorative rocks which are used for erosion control and ponding outside of the fence area will need to take place.Completed Site Screening requiring additional information on site chemicals.This report was prepared to study the variability in dioxin concentrations over the second five year review period. The sample preparation method for the analysis of dioxin was changed in 2001 and over the last several years dioxin concentrations haCompleted Five-Year Review. Soil and groundwater continue to be protective of human health and environment. Groundwater results have either become stable or decreased.Approved O&M Plan. An Operation and Maintenance Plan was approved for the cap, barrier wall and groundwater monitoring system at the site.Completed Remedial Action. Approval of Implementation Report. The final remedial action required the installation of the following: a geosynthetic clay liner and high density barrier around the perimeter of the site; a multimedia cap over 1.3 acreFinal design documents for remedial action approved.

PORT OF OAKLAND - EMBARCA (Continued) **S100833252**

The final remedy required a multimedia cap, a high-density polyethylene cutoff wall around the entire boundary and a well skimmer to remove petroleum product.Order amended to include Operations and Maintenance of the Site.Recorded Deed Restriction to ensure its commercial, industrial use and to protect the remedial system.Certified Site.Negative Declaration and Remedial Action Plan approved.Dept. of Health Services issued a Remedial Action Order to Port of Oakland, Embarcadero Cove, to investigate and clean up the soil and groundwater contamination at the site.Site Discovery.Completed PA. As part of site invetigation, pentachlorophenol (PCP), organochlorine pesticides and solvents were discovered in soil and groundwater.Agreement was amendment to include submittals in electronic format.The cap was observed to be in good condition. A section of fence was damaged.PCP and tetrachlorophenol (TeCP), pesticides, dioxins and furans were detected in soils and groundwater.A temporary chip seal was constructed over the site surface contaminated with PCP until implementation of the final remedial action.Results of chemical analyses of groundwater samples collected during this reporting period show that concentrations remain within historical ranges.DTSC concludes that site remain protective of human health and environment.Dioxin data shows variability due to change in analytical procedure for dioxin. Submittal of an addendum to the Five-Year Review Report with the reassessed dioxin data is required.Groundwater contamination appears to be consistent with historic ranges. Cap in in good condition. Damaged permineter fence has been repaired.Groundwater contamination appears to be consistent with historic ranges.Fence repair was completed.s; and a skimming program to remove free petroleum hydrocarbons products. Construction was initiated in July 1995 and was completed in December 1995.ve increased or fluctuated significantly in some wells. This report documents that the variability of dioxin concentration was related the change in the analytical procedure.groundwater use restrictions, and periodic groundwater monitoring.

Alternate City,St,Zip:	OAKLAND, CA 94606
Alternate Address:	DENNISON AND EMBARCADERO STREETS
Alternate City,St,Zip:	OAKLAND, CA 94606
Background Info:	Since the earlier 1900's, the 1.3-acre site was leased to industrial tenants, including oil companies and formulators of pesticides and wood preservatives. As part of site investigation pentachlorophenol (PCP), organochlorine pesticides and solvents were discovered in soil and groundwater.
Comments Date:	01291997
Comments:	Approved O&M Plan. An Operation and Maintenance Plan was

27 ROCHESTER MIDLAND BYTECH CHEMICAL DIVISION **FINDS 1004442433**
1905 DENNISON ST. **SSTS N/A**
OAKLAND, CA 94606

FINDS:
Other Pertinent Environmental Activity Identified at Site

Registry ID: 110002147178

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

KILPATRICKS BAKERIES INC (Continued) **1000905134**

California - Hazardous Waste Tracking System - Datamart

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste code:	D001

SHELL SERVICE STATION (Continued) **1006805544**

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transporter:	No
Off-site waste receiver:	Commercial status unknown

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D039
Waste name: TETRACHLOROETHYLENE

SEA POWER MARINE (Continued) **1004676328**

Violation Status: No violations found

FINDS:

Other Pertinent Environmental Activity Identified at Site

Registry ID: 110012250955

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

Reclamation:	Not reported
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Corrective Action Summary:
Event date: 09/01/1991
Event: RFA Completed, Assessment was a PA-Plus.

Event date: 09/19/1991
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 09/19/1991
Event: CA029EP

Event date: 09/19/1991
Event: CA049PA

Event date: 02/28/1992
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 02/28/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 01/01/1994

AMERICAN NATIONAL CAN CO (Continued) **1000360806**

Event: Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).

Event date: 07/01/1995
Event: Stabilization Construction Completed

Event date: 01/01/1996
Event: RFI Imposition

Event date: 06/01/1996
Event: RFI Approved

Event date: 09/25/1997
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 09/25/1997
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 09/25/1997
Event: CA210WB

Event date: Not reported
Event: CA048RC

FINDS:
Other Pertinent Environmental Activity Identified at Site

Registry ID: 110000737837

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

OWENS BROCKWAY GLASS CONTAINERS (Continued) **1000319786**

redesign to support facility operating permits required under Title V of the Clean Air Act.

California - Hazardous Waste Tracking System - Datamart

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and

OWENS BROCKWAY GLASS CONTAINERS (Continued) **1000319786**

disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Date form received by agency: 11/21/1995
Facility name: HOME DEPOT USA INC HD 1007
Site name: SUPER KMART NO 4944
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: D016
Waste name: 2,4-D

Waste code: D018
Waste name: BENZENE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

HOME DEPOT USA INC HD 1007 (Continued) **1001075622**

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

INTEGRATED ENVIRONMENTAL SYSTEMS (Continued) **1000214893**

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Violation Status: No violations found

90 **EKOTEK LUBE (FORMER)** **CA BOND EXP. PLAN** **S100833502**
4200 ALAMEDA AVENUE **SLIC** **N/A**
OAKLAND, CA **ENVIROSTOR**

CA BOND EXP. PLAN:
Reponsible Party: BACKLOG SITE CLEANUP PLANNING REPORT
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: This site is projected to be remediated by the responsible parties with reimbursement to DHS for its oversight and monitoring costs. If the RPs are unable to pay for remediation, another source of funds will need to be identified.
Site Description: Ekotek is a waste oil recovery and recycling facility. Waste oil and Stoddard's solvent were treated and stored onsite. Some of the hazardous waste may have spilled onto the soil.
Hazardous Waste Desc: Waste oil or solvents may contaminate soil and may contain benzene, toluene, phenol and lead.
Threat To Public Health & Env: Over 100,000 people live within a two mile radius of the site. A coastal wetland is located 4,000 feet away. Arrowhead Marsh is 1.4 miles away. The depth to ground water is from 5 to 28 feet. Approximately 18 irrigation and industrial wells are within 3 miles. The site is securely fenced and posted.
Site Activity Status: The RP has indicated an interest in rehabilitating the facility as a unit for treatment of oily waste water.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

California - Hazardous Waste Tracking System - Datamart

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments:	SF RWQCB has issued a CAO #90-133 for properties at 301, 411 & 401 High Street, Oakland. The 411 High Street site was formerly an ARCO Products Company bulk transfer facility for petroleum products. The 301 High Street site was formerly used by ARON CORTESE LIST SAMPLE RESULTS PRELIMINARY SOIL & GROUNDWATER SAMPLES RESULTS INDICATE SOIL & GROUNDWATER CONTAMINATION WITH TOLUENE (24 PPM SOIL, 1.7 PPM WATER), BENZENE (0.7 PPM WATER), XYLENE (3.7 PPM WATER), 1,1 DICHLOROETH- ANE (0.1 PPM WATER) & NEPHTALENE (29 PPM SOIL). NEIGHBORING PROPERTIES: UNOCAL CHEM AT 401 HIGH STREET AND THE LEARNER CHEM AT 3675 ALAMEDA STREET ALSO HAVE SOIL AND GROUND WATER

BIG B LUMBERTERIA (Continued) **S102008155**

CONTAMINATION. SITE SCREENING DONE PENDING: SF BAY RWQCB WILL ISSUE CLEAN- UP & ABATECO for equipment maintenance & storage. The property at 301 & 411 is currently owned by Koch Trust and is currently occupied by Big B Lumberteria. The property at 401 High St is currently owned and operated by Unocal Chemical Division as a bulk cheMENT ORDERS TO ALL 3 SITESmical transfer facility. In June 1983, approx 23,000 gallons of toluene was spilled during rail car off loading on a rail spur located along the northern part of Unocal facility.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 07/14/1986
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State Contractor/Grantee

FINDS:
Other Pertinent Environmental Activity Identified at Site

Registry ID: 110010059541

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RACT/BACT/LAER Clearinghouse (RBLC) data base contains case-specific information on the 'Best Available' air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). This information has been provided by State and local permitting agencies. The Clearinghouse also contains a regulation data base that summarizes EPA emission limits required in New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP), and Maximum Achievable Control Technology (MACT) standards.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

104 **4501 TIDEWATER AVE OAKLAND** **CA WDS** **S104586535**
4501 TIDEWATER AVE **N/A**
OAKLAND, CA 94601

CA WDS:

Facility ID:	San Francisco Bay 019216001
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAA030147 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	9254264051
Facility Contact:	Larry Appleton
Agency Name:	HANSON AGGREGATES
Agency Address:	PO BOX 580
Agency City,St,Zip:	PLEASANTON 94566
Agency Contact:	Larry Appleton
Agency Telephone:	9254264051
Agency Type:	Private
SIC Code:	1442
SIC Code 2:	Not reported
Primary Waste:	Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type)
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No
Off-site waste receiver:	Commercial status unknown

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS

DESIGN WORKSHOPS (Continued) **1001492870**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

California - Hazardous Waste Tracking System - Datamart

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2005

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN

OAK HARBOR FREIGHT LINES (Continued) **1001481053**

OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:
Other Pertinent Environmental Activity Identified at Site

Registry ID: 110002926807

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Generated waste on-site: No

Waste type: Thermostats
Accumulated waste on-site: No
Generated waste on-site: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Violation Status: No violations found

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/29/2008
Date Data Arrived at EDR: 10/10/2008
Date Made Active in Reports: 11/19/2008
Number of Days to Update: 40

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2008
Date Data Arrived at EDR: 10/10/2008
Date Made Active in Reports: 11/19/2008

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/29/2008

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Next Scheduled EDR Contact: 05/18/2009
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/07/2008
Date Data Arrived at EDR: 10/16/2008
Date Made Active in Reports: 12/08/2008
Number of Days to Update: 53

Last EDR Contact: 01/30/2009
Next Scheduled EDR Contact: 04/13/2009
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007
Date Data Arrived at EDR: 12/06/2007

Next Scheduled EDR Contact: 03/16/2009
Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 08/19/2008
Date Data Arrived at EDR: 08/29/2008

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2008
Date Data Arrived at EDR: 09/23/2008
Date Made Active in Reports: 10/16/2008

Data Release Frequency: Quarterly

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2008
Date Data Arrived at EDR: 09/23/2008
Date Made Active in Reports: 10/16/2008

Next Scheduled EDR Contact: 02/16/2009
Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/10/2008
Date Data Arrived at EDR: 09/23/2008
Date Made Active in Reports: 10/16/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2008
Date Data Arrived at EDR: 09/23/2008

Data Release Frequency: Varies

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Varies

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/01/2008
Date Data Arrived at EDR: 10/31/2008

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 10/01/2008

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: No Update Planned

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/30/2008

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EDR® Environmental Data Resources Inc

The complete Sanborn Library collection has been searched by EDR, and fire insurance maps covering the target property location provided by Ninyo & Moore were identified for the years listed below (selected maps only*). The certified Sanborn Library search results in this report can be authenticated by visiting www.edrnet.com/sanborn and entering the certification number. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by Sanborn Library LLC, the copyright holder for the collection.

Certified Sanborn Results:

Site Name: Central Estuary
Address: Fruitvale Avenue/Chapman Street
City, State, Zip: Oakland, CA 94601
Cross Street:
P.O. # 401525001
Project: Central Estuary
Certification # 0C80-4956-A329

* Environmental Data Resources, Inc. has been instructed by Ninyo & Moore to print ONLY the Sanborn Maps for the years listed below:

1969 (27)
1960 (14)
1950 (27)
1925 (15)

Total Maps: 83

Sanborn® Library search results
Certification # 0C80-4956-A329

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✔ Library of Congress
- ✔ University Publications of America
- ✔ EDR Private Collection

Limited Permission To Make Copies

Ninyo & Moore (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

SUMMARY

- ***City Directories:***

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

This report compiles information by geocoding the subject properties (that is, plotting the latitude and longitude for such subject properties and obtaining data concerning properties within 1/8th of a mile of the subject properties). There is no warranty or guarantee that geocoding will report or list all properties within the specified radius of the subject properties and any such warranty or guarantee is expressly disclaimed. Accordingly, some properties within the aforementioned radius and the information concerning those properties may not be referenced in this report.
