PROPOSED CAPITAL IMPROVEMENT PROGRAM FY 2019-2021

CITY OF OAKLAND

FY 2019-21 PROPOSED CAPITAL IMPROVEMENT PROGRAM

Mayor

Libby Schaaf

Members of the City Council

Rebecca Kaplan (At-Large)
Council President

Larry Reid (District 7)
Vice-Mayor

Dan Kalb (District 1)

Nikki Fortunato Bas (District 2)

Lynette Gibson McElhaney (District 3)

Sheng Thao (District 4)

Noel Gallo (District 5)

Loren Taylor (District 6)

City Administrator
Sabrina B. Landreth

Mission Statement

The City of Oakland is committed to the delivery of effective, courteous and responsible service. Citizens and employees are treated with fairness, dignity and respect.

Civic and employee pride are accomplished through constant pursuit of excellence and a workforce that values and reflects the diversity of the Oakland community.

CIP Prioritization Process

CIP Project Groups

Capital Improvement Program

Overview

The City of Oakland's Capital Improvement Program (CIP) guides the City's decisions regarding the construction, repair and/or replacement of many of the City's assets such as libraries, public safety facilities, recreation centers and swimming pools, and parks. Street improvements and sewer repairs, and even access ramps and bicycle paths are also part of the City's CIP. In the City of Oakland, a new CIP Budget is developed every two years and included in the overall City Budget. When the biannual budget is adopted, the CIP for those two years is also adopted. The assets identified for repair, replacement or purchase in a budget cycle become "CIP projects".

The CIP Budget represents a major investment in our infrastructure and assets. It reflects the overall priorities of the City and has an enormous impact on the health and vibrancy of our community. A CIP links long-range strategic plans and goals with current resources and needs. Capital Projects included in a CIP are defined as any long-term investment that build, replace or improves an asset (buildings, roads, parks, sewer and drainage lines, etc.), have a useful design life of at least ten years and a minimum cost of approximately \$100,000.

The FY 2019-21 CIP Budget seeks to balance the need to repair and replace existing assets and to also deliver new assets where they are most needed using available resources. In addition, this CIP reflects a new process to identify and prioritize community values, described fully in the section titled "CIP Development Process". The City of Oakland's previous CIP Prioritization Process established over a decade ago was limited, based on infrastructural conditions, regulatory mandates and project readiness. The updated CIP Development Process used to develop this FY 2019-21 CIP budget incorporates community and City values and offers additional social factors such as equity, economic opportunity and public health.

Like many older cities, Oakland has an aging infrastructure and a significant backlog of deferred maintenance. For example, key facilities such as aging fire stations, recreation facilities, libraries, parks and the Police Administration Building are in need of rehabilitation or complete replacement. With each budget cycle, there are more projects requested than there are resources available. In order to establish a transparent process for addressing the funding gap, staff developed a prioritization model, which weights factors based on community input.

In late 2017, a CIP Working Group (CIPWG) comprised of Oakland Public Works (OPW), Oakland Department of Transportation (OakDOT) and Oakland Department of Race and Equity (DRE) staff began developing a new process for Council consideration that would employ measurable standards to evaluate CIP projects and set additional criteria for prioritization. The desire was to have a process that merged quantitative and qualitative criteria and would ultimately

establish a long-term CIP process that is transparent, equitable and actionable in its funding of projects.

Policies

Several policy documents guided the overall preparation of the City's CIP. These include:

- Capital Improvement Program Prioritization Process (Resolution 87376 C.M.S., 2018)
- 2017 Infrastructure Bond, Approved CIP Projects (Resolution 86773 C.M.S., 2017)
- 2016 Infrastructure Bond, Measure KK (Resolution 86335 C.M.S., 2016)
- Park Project Prioritization List (Resolution 86003 C.M.S., 2016)
- Five Year Pavement Program (Resolution 85227 C.M.S., 2014)
- Sidewalk Prioritization Program (Resolution 81751 C.M.S., 2009)
- Regional East Bay Sewer Consent Decree 2014 (Case Nos. C09-00186 and 09-5684, 2014)

Oakland Department of Transportation (OakDOT)

OakDOT was established in June 2015 by City Council under Ordinance No. 13325 C.M.S. and approved in the FY 2016-17 budget. OakDOT's mission is to envision, plan, build, operate and maintain a transportation system for the City of Oakland. OakDOT's targeted mission and the subsequent reorganization of certain work units from OPW and Oakland Police Department (OPD) presents an opportunity to reimagine how city streets are used, with a focus on serving people, rather than simply moving vehicles. These organizational shifts occurred concurrently with significant developments in the availability of infrastructure funding in Oakland.

Infrastructure Bond

The 2016 local passage of Measure KK, a \$600 million Affordable Housing & Infrastructure Bond, earmarked funds for streets and roads (\$350 million), facilities (\$150 million), and affordable housing (\$100 million). Under section 2C of the Measure KK Infrastructure Bond Ordinance, the capital improvement projects selected for funding and implementation are to address elements of 1) social and geographic equity, 2) improvements to City's existing core capital assets, 3) maintaining or decreasing City's existing operations and maintenance costs and 4) improvements to energy consumption, resiliency and mobility. The previous CIP Development Process did not account for all the above elements.

CIP Development Process

The passage of Measure KK has elevated public engagement and advocacy around capital investment in the City. In the recent past, a relatively small set of factors were typically considered when determining which projects moved forward and received funding. The City Council, City Administrator and Department Directors considered several determinants, such as legal and regulatory requirements and asset conditions, along with limited funding availability to determine

which CIP projects would be included in a budget cycle. Moreover, the CIP process only allowed for public input during City Council meetings and hearings.

The FY 2017-19 CIP budget recognized the need for a more accessible and comprehensive approach to public input that also incorporated the mandates of the Measure KK Infrastructure Bond. The updated CIP Development Process provides a means to receive public requests for capital projects. In September 2017, the Capital Improvement Program Working Group (CIPWG) was established, comprised of OPW, OakDOT and DRE staff. CIPWG proceeded to develop and update the CIP Development Process. The goals of the CIPWG are as follows:

- Improve the quality and consistency of Departmental and Public input on capital projects;
- Improve the transparency of the CIP prioritization/decision-making process;
- Ensure that the process is data-driven by identifying, applying and adhering to clear, well-defined and consistent factors;
- Streamline the process to improve efficiency and expenditure of staff time and resources;
- Filter physical and programmatic needs through the lens of community values and City goals.

Factors Considered

The CIPWG reviewed available existing City documents including the Mayor and Council priority documents, General Plans and Specific Plans, Other Council adopted plans, Departmental Strategic Plans, Measure KK Guiding Principles, along with public input to formulate these nine Citywide Capital Prioritization Factors. Additionally, staff researched existing CIP processes from various cities and organizations to review best practices, challenges, lessons learned, and tools/software used to manage capital improvement programs.

Based upon this review, staff proposed the use of nine factors for capital prioritization: 1) Equity, 2) Health and Safety, 3) Economy, 4) Environment, 5) Improvement, 6) Existing Conditions, 7) Shovel Ready, 8) Collaboration and 9) Required Work.

The CIPWG also categorized the City's assets into eight asset categories: Streets and Sidewalk, Mobility and Fixed Transportation Assets, Signals and Streetlighting, Building and Facilities, Parks and Open Space, Sanitary Sewer System, Storm Drainage and Watershed, and Technology.

Department of Race & Equity (DRE) Guidance

The CIPWG partnered with DRE throughout FY 2017-18 on various elements of the prioritization process, ensuring that the updated CIP incorporates equity in a manner that is meaningful and in alignment with City objectives, as well as including subsequent performance measures to assess outcomes. The DRE has been consulted at significant milestones throughout the CIP Development Process and participates on the Capital Improvement Program Advisory Committee (CIPAC).

Consultations with DRE aligns the CIPWG mission and resulting CIP Prioritization Process to support racial equity goals:

- Eliminate systemic causes of racial disparities in City Government.
- Promote inclusion and full participation for all residents of the City.
- Reduce race-based disparities in our communities.

Community Outreach

Recognizing the City's commitment to inclusive public engagement, the City dedicated a Community Outreach Coordinator to work closely with the CIPWG to foster and encourage public outreach and involvement. In preparing for the CIP process for FY 2019-21, the CIPWG implemented public outreach in two phases:

Phase 1: Through a series of community meetings and on-line and paper surveys, the City gathered community input on the CIP process, determining shared City and community values and priorities. Phase I answered the question *“if we were to evaluate a potential project, what values or other considerations are most important?”*

The information collected in Phase 1 was used to weight the nine factors, resulting in a score card that is applied to proposed and existing capital projects. Phase 1 of community engagement was completed in July of 2018 to help develop the new CIP Prioritization factors and weighting.

Phase 2: Utilizing the adopted factors and weighting system to develop CIP Budget and continue community engagement was the goal of this phase, which launched after City Council's approval of the new CIP Prioritization Process in October 2018. For the FY 2019-21 budget process, public intake forms were distributed and received through the City's website, via email, standard mail, and in community meetings. The public form included five simplified questions about CIP Project requests, and was translated into Vietnamese, Chinese and Spanish.

Collaboration with City Departments

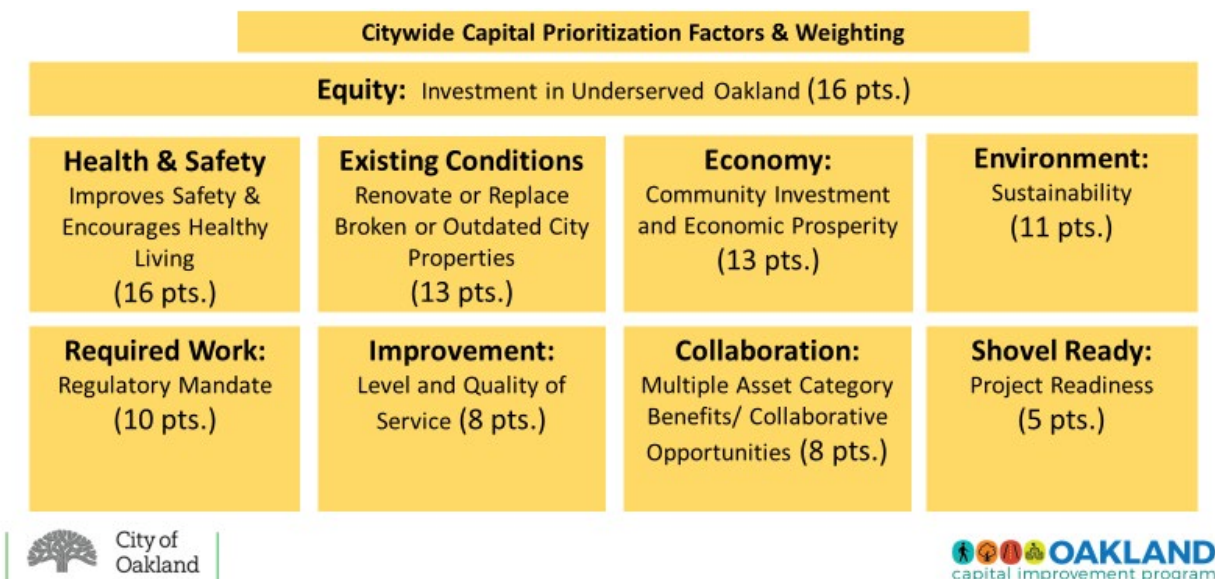

As part of this CIP Prioritization Development Process, the CIPWG recognized the need to include other departments in the process and thus established the Capital Improvement Program Advisory Committee (CIPAC). The CIPAC consists of a representative of each City department involved with capital projects, acting as advisors, a sounding board for priority factor development and reviewing milestones from the CIPWG. The CIPAC builds internal consensus and ensures consistency with Citywide and Department values, priorities, and goals. The CIPAC also serves as the consistent point of contact regarding CIP planning and disseminates information to department

management/staff.

The CIPAC convened six times to review the CIPWG development process, schedule, factors, performance measures, asset categories, public outreach process, public outreach outcomes/summary, factor weighting, and evaluation testing.

CIP Prioritization Process

The City of Oakland's previous CIP Prioritization Process established over a decade ago was limited, based on infrastructural conditions, regulatory mandates and project readiness. The updated CIP Prioritization Process used to develop this FY 2019-21 CIP budget incorporates the community and City values and offers additional social factors such as equity, economic opportunity and public health. The updated process aligns the CIP investments with City values and priorities emphasizing equitable and transparent decisions. The graphic below illustrates the new CIP Prioritization Process, and the new scoring factors with their respective weights.

OPW and OakDOT received over 500 submissions scored by staff members of the CIPWG. Projects recommended for funding in the proposed FY 2019-21 CIP Budget are ranked by the score received. The City will fund as many projects for which funding is available.

The projects included in the CIP reflect these priority policies and the constraints of existing funding sources. They place a priority on preserving the City's significant investment in existing infrastructure assets. The remaining requested, yet unfunded projects, are also included for reference in this document.

Key CIP Funding Sources

There are limited sources of internal funding available for capital improvements, typically with restrictions on their use within broad categories, which are described below. For this reason, grants are a significant additional source of funding for capital projects.

Internal Sources

The following are the major City sources of funding for capital investment in Oakland:

- **Sewer Service Fund (Fund 3100).** Limited to funding maintenance and capital improvements to the sanitary sewer collection system.
- **Measure B – Local Street and Road (Fund 2211).** Limited to funding improvements and maintenance of local streets and roads, sidewalks, traffic safety and related work within the public right-of-way.
- **Measure B - Bicycle and Pedestrian (Fund 2212).** Limited to funding bicycle and pedestrian safety and accessibility improvements within the public right-of-way.
- **Measure BB – Local Street and Road (Fund 2216).** Similar to Fund 2211, funded through the additional half-cent sales tax passed in November 2014.
- **Measure BB – Bicycle and Pedestrian (Fund 2216).** Similar to Fund 2212, funded through the additional half-cent sales tax passed in November 2014.
- **Measure KK – Infrastructure I-Bond (Fund 5330).** Limited to funding streets and sidewalk repairs, city facilities, parks and open space, and affordable housing.
- **Measure DD - 2002 Oakland Trust for Clean Water and Safe Parks (Fund 5322).** Limited to clean water, parks and open space.
- **Measure HH – 2017 Sugar-Sweetened Beverage Distribution Tax (Fund 1030).** Limited to funding projects and programs that: reduce the consumption of sugar-sweetened beverages; and that support health education and physical activity programs to improve the health of Oakland residents, especially for those most impacted by health disparities and the chronic diseases associated with the consumption of sugar.

Other CIP Funding Sources

The City continues to aggressively seek grants for a wide variety of needs and has been successful in this effort. While by their nature, these grants are only available for specific projects and purposes, and are often cyclical and competitive, they represent a significant addition to local funds. Grants are the most viable source to fund new improvements and allow internal funds to be kept available for existing assets. Internal funds are also necessary for leverage and match fund requirements of grants.

Oakland receives a significant amount of funding from sources outside the biennially adopted Capital Improvement Program. The total funding appropriated through the FY 17-19 Adopted Capital Improvement Program was \$119.8 million. However, in that same period, the total value

of projects planned, designed and delivered by OPW and OakDOT was over \$135 million. This total includes grants received after the CIP was adopted, as well as projects funded through previously approved sources and bonds, such as Measure DD, and the East Bay Regional Park District's Measure WW, Alameda County Transportation Commission, State of California, Metropolitan Transportation Commission, Federal Highway Administration, etc. These grants funded a wide array of projects, including parks, libraries, recreational facilities, bicycle and pedestrian facility improvements, bridge reconstruction and retrofit, transportation and safety projects, and projects associated with transit-oriented development.

Over the period including the last two fiscal years to date, staff successfully applied for and received approximately \$47.8 million in grants for more than 25 capital projects (DOT - \$8.65 for 8 capital projects). Staff will continue to seek grants whenever projects are competitive and meet the City's need to address unfunded priorities.

State parks and other grant fund opportunities are additional sources to augment City's CIP delivery. The proposed facilities and park funded projects in the I-Bond will be leveraged for additional grants to complete projects. In addition to competitive grants, grant funds based on per capita will be available to the City in this budget cycle, which will also contribute to the implementation of City's CIP.

Transportation Committed Grants

In the FY 19-21 budget, \$12 million in I-Bond funds for "Complete Streets Capital" will leverage nearly \$46 million in Committed Transportation Grant projects funded by the California Active Transportation Program (ATP), the One Bay Area Grant Program (OBAG), the Highway Safety Improvement Program (HSIP), which all utilize federal transportation funds, as well as the California Affordable Housing and Sustainable Communities (AHSC) grants.

CIP Project Groups

The proposed CIP is divided into several key categories for consideration. These include:

- Projects Recommended for Funding
- Mandatory Projects Recommended for Funding
- Unfunded Projects

Each is described in more detail below.

Projects Recommended for Funding

This category includes high scoring projects, grouped by program or asset category, and ranked by their score based on the adopted policies referenced above. It also includes current CIP projects that have partial funding available and were included in the adopted CIPs in fiscal years 2015-17 and 2017-19 budgets. There are 47 projects in this category totaling \$192 million.

Mandatory Projects Recommended for Funding

These are projects mandated by court order or other legislation (e.g., sanitary sewer capital improvements; construction of curb ramps) or projects that require local match from grants previously received and approved by the City Council.

Unfunded Projects

This category includes all other requests for capital projects for which a funding source is not presently known. This includes projects that replace or renovate assets that are either structurally or functionally obsolete or have deferred maintenance issues that negatively value the asset, for which no funding is available such as:

- Major projects that improve or replace key assets. Examples include: emergency services facilities such as the Police Administration Building and some fire stations that do not meet the mandate of essential service facilities (fully operational after an earthquake or similar disaster) or have significant deferred maintenance items that impact their operational status. Additionally, there are many older City owned buildings, such as the Main Library, that have surpassed their operational life expectancy
- Minor Capital Improvements, which would fund repairs or replacement of assets that are not planned, but are of an urgent nature, have been minimally funded through the previous Operating Budget at \$1 million annually. These include urgent projects such as roof repairs and replacement; hot water heater, chiller and boiler replacement; appliance replacement; mold, asbestos and lead paint abatement; HVAC major repair and/or replacement; electrical panel upgrades; sewer line/lateral replacements.
- Critically unfunded are projects with no available funding, that are described by departments as urgent. Examples of these projects include fire station facility improvements, parks and recreation restroom and facility renovations, overall storm drainage system improvements, and water quality/trash capture projects that are required to meet various regulations and requirements. Other types of projects include elevator upgrades, implementation of the American with Disabilities Act (ADA) Transition Plan, and the renovation of pool facilities and locker rooms. While no funding source has been identified, these projects are presented for consideration should funding become available. For instance, the proposed CIP Budget recommends funding the ADA Transition Plan Update in Fiscal Year 2019-21 budget through a General Purpose General Fund (1010) allocation.
- Requests from Prior Years. Staff has included unfunded project lists from the Fiscal Year 2017-19 Adopted CIP. OPW and OakDOT staff will engage with the public and internal

stakeholders regarding the relevance of any past unfunded projects not considered for this CIP submission.

Planning for the Future: Building an Effective Capital Improvement Program

With the passage of the 2016 Infrastructure Bond, the City undertook the updating of the CIP Prioritization Process. The updated process aligns the CIP investments with City values and priorities emphasizing equitable and transparent decisions. The City will continue to engage the community and will develop additional educational materials to provide a more comprehensive understanding of capital assets, their purpose, the need to preserve an asset's life cycle, and guide in preparing to renew or replace an asset.

The passage of the 2016 Infrastructure Bond also allows Oakland to significantly address the backlog of pavement rehabilitation and begin addressing some of the needs of key City facilities such as aging Fire Stations, Recreation Facilities, Libraries, and Parks over the life of the bond. However, as the CIP program grows it will be critical to build organizational capacity in both the DOT and OPW.

Long term capital project planning is required for the ongoing management of Oakland's complete inventory of assets. Many of our assets have reached the end of their useful life and need replacement. Others have historic value or other intrinsic value to the community.

A long-term plan requires a careful assessment of core services and the assets and facilities needed to support those services. The prioritization used to rank unfunded requests in this document is based on the prioritization criteria adopted by Council. However, the process of seeking input from departments and the public for the preparation of this CIP highlighted the fact that requests for capital investment continue to outweigh our capacity to fund them.

The proposed CIP Budget includes funding for a small portion of the backlog or need, and reflects the limits of existing fund sources. Because of this, a strategic approach to prioritizing the remaining unmet needs is essential. Such an approach will require an assessment of core City programs, the assets needed to deliver those programs, a condition assessment of those City assets, development of preliminary project scope and determine budget need, and a long-term funding approach to address those assets considered critical to core functions and future growth. This approach will also need to consider further funding, including the possibility of an additional General Obligation Bond or other revenue measures.

In addition to developing further CIP funding, the City must also build a comprehensive asset management system to provide key data and information on all City owned assets in order to design an effective maintenance and CIP investment strategy. Development of software systems for optimizing asset maintenance, repair, rehabilitation, and replacement will be essential to this effort.

In addition to creating an asset management system, the City must examine how to increase funding for routine maintenance in order to preserve and extend the life of the City's assets. Annual, ongoing maintenance is vital for maintaining the condition of assets. When ongoing maintenance is not fully funded, it increases deferred maintenance and capital costs. As assets continue to deteriorate, the cost for repair will exponentially increase and can result in peripheral damage. For example, deferring roof replacement could later result in needing to replace the roof structural members, walls, and floor of a building. Lack of maintenance painting not only looks bad, but can also result in the premature deterioration of underlying building components.

Building an effective and efficient Capital Improvement Program will require multiple process improvements. It is essential that Oaklanders have a high level of confidence that City public works and transportation projects will be completed in a timely and professional manner. In order to do this, streamlining measures should be undertaken to reduce contracting time and eliminate duplicative and redundant processes. These measures should include increased CIP professional and construction contracting thresholds, electronic review processes, and expanded resources for City OPW and DOT crews to implement small CIP projects.

Financial Summaries

Financial Summaries

Overview

Requests for capital investment continue to outweigh our capacity to fund them as there are limited sources for capital improvements. However, over the last two fiscal years, staff successfully applied for and received a total of \$47.8 million in grants for 25 capital projects. In the CIP FY 2017-19, Measure KK accounted for approximately \$62 million of the \$120 million CIP Budget.

Asset Categories

The FY 2019-21 Capital Improvement Program Budget is organized in the categories listed below.

Transportation: Projects here combine the initial CIP asset categories of Streets and Sidewalk, Mobility and Fixed Transportation Assets, Signals and Streetlighting. They include street paving and rehabilitation, streetscape projects, sidewalk repair, curb ramp construction, bridge repair, traffic calming, safe routes to schools, pedestrian safety, bicycle improvements, traffic signal and operations, and other into 12 CIP programs. These programs are designed to address the maintenance backlog of City streets and sidewalks and to improve the safety of all modes of travel: pedestrian, cyclist and automobile.

Buildings & Facilities: Projects in this category include new construction, expansion, and replacement or improvement of recreation centers, fire stations, community centers, and other City buildings, facilities, and structures.

Parks & Open Space: Projects in this category include improvements to playgrounds and tot lots, park and recreation facilities, sports fields, and City swimming pools; and improvements to Oakland's waterways.

Sanitary Sewers & Wastewater: Projects in this category primarily include reconstruction of sewer mains throughout the City as required by an Administrative Order issued to Oakland and other Bay Area communities by the United States Environmental Protection Agency and the State of California. The Order requires the City to plan and implement capital repairs and replacements to the aging sewer facilities and implement maintenance practices that prevent sewage discharges into creeks, lakes, and the San Francisco Bay. Funding for emergency repair and replacement of sewer facilities is also included.

Storm Drains & Watershed: Projects in this category primarily include reconstruction of failing storm drain facilities and implementation of projects that protect and improve watersheds throughout the City such as creek restoration, green infrastructure, and other stormwater pollution prevention projects to meet water quality regulations. Funding for emergency repair and replacement of storm drain facilities is also included.

Technology: Projects in this category primarily include technological systems or software projects, such as computers, servers, or enterprise systems and programs.

Impacts on Operating and Maintenance Costs

Transportation

The Transportation category provides funding for repair, replacement of existing transportation assets such as bridges, streets, curb ramps and sidewalks, street lights, traffic signals, and bicycle and pedestrian facilities, as well as the construction of new transportation infrastructure funded largely by discretionary grants or bonds. In the majority of cases there are no additional operating costs associated with these projects, and possibly are short term cost savings, because they are simply reviving assets that are at the end of their useful life when their on-going maintenance is most expensive. In limited cases, new transportation projects may add additional landscaping, lighting, street furniture, or other infrastructure that may have greater maintenance needs than the infrastructure it replaced.

Buildings and Facilities

The Buildings and Facilities category implements capital improvement projects to make improvement, upgrade, or construction new public buildings and facilities throughout the City, such as libraries, recreation centers, fire stations, pools, etc. The funding for the program is a non-recurring budget item as specific funds are identified for each project and the specified scope is typically a one-time improvement. Funding sources are typically capital grants from State and/or Federal level, voter-approved bond measures, or private fund sources. The improvements typically will preserve existing assets or extend the useful life of the facilities. Operational and maintenance cost impact may be an increase or decrease depending on the project scope. Improvements could reduce operational/maintenance cost by improving existing assets, but expanded or new facilities will have an increased cost impact.

Parks and Open Space

The Parks and Open Space program provides recreational amenities and public parks for public use, such as sports fields, tennis courts, tot lots, trails. Like Buildings and Facilities, the projects preserve City's assets as well as provide amenities serving the public. The funding for the program is a non-recurring budget item as specific funds are identified for each project and the specified scope is a one-time improvement. Funding sources are typically capital grants from State and/or Federal level, voter-approved bond measures, or private fund sources. Operational and maintenance cost impact may be an increase or decrease depending on the project scope.

Lincoln Recreation Center Expansion/Renovation

Asset Category: BUILDINGS & STRUCTURES

Department: Parks, Recreation & Youth Development

Description: Renovation/Expansion of existing Lincoln Square Park Rec. Ctr. (Fund request to initiate design).

The Lincoln Square Park Recreation Center (LSPRC) is 40 years old and in dire need of expansion and improvement. The current building is over capacity, as activities fill every room at nearly all hours. The restrooms are inadequate in number and deferred maintenance. Pressure for more space is mounting as new residents move into the 5,000+ new apartments in Downtown leasing over the next year. A recent architectural analysis concluded that the facility floor area needs to be doubled just to meet existing demand.

Friends of Lincoln Square Park (FOLSP) is a coalition of community leaders and volunteers including the Oakland Parks and Recreation Foundation, the Chinatown Chamber of Commerce, local churches, family associations, the Wa Sung Community Service Club and other community organizations. We are working with the rec center staff and the City to advocate, plan and fund the design and construction of an expanded and modernized rec center that will be the center of Chinatown. The FOLSP vision is a new three story rec center with an indoor basketball gym, multipurpose and class rooms, space that can be indoor/outdoor, and a relocated Chinatown Hall of Pioneers as a central foyer/gathering/performance/gallery space. This new building will have the space to host multiple simultaneous activities that bring together different generations and longtime and new Oaklanders.

LSPRC is the city's busiest rec center and park, with over 1,500 unique visitors each day, all day long. It is the only public recreation center in Downtown and serves residents of all ages, incomes and races from across the city and beyond.

Museum Collection Center Seismic Improvement

Asset Category: BUILDINGS & STRUCTURES

Department: Museum

Description: The City's vast collection of art, historic and scientific artifacts, and culturally significant objects is currently housed in a building that has evidence of significant structural defects and does not meet current seismic requirements. A structural survey from 2012 identifies severe cracking in wooden compression and tension joists that support the ceiling. It also calls for reinforcement of the exterior walls to prevent collapse. Work was undertaken in 2012 to repair the very worst of the structural timbers but there remains a number of trusses and support columns with cracks that compromise their load carrying capacity. Furthermore, anchoring of the exterior walls to the roof diaphragm are insufficient. To protect the City's irreplaceable collection and provide a safe and secure environment for the people who work in this building, repairs must be done to at least the most vulnerable truss members, the exterior walls, and their connection to the roof. The Museum has conducted four independent studies from structural engineers to determine the best approach to these repairs. A targeted approach to the joists that carry the most load and are in the worst condition, coupled with reinforcement of the exterior walls with steel columns is necessary to maintain the structural integrity of the building. As the owner of this building and its contents of nearly two million objects, the City is responsible for these repairs.

Oakland Animal Services - Floor Replacement/Drainage

Asset Category: BUILDINGS & STRUCTURES

Department: Oakland Animal Services

Description: Floor replacement - replace the existing 12x12 linoleum tile flooring in lobby, hallways, and work areas with sheet vinyl or other impervious flooring material with minimal joint spaces. This will cover approximately 1/2 of the existing flooring in the entire shelter. Drainage - 2 outdoor areas need drainage work: dog yard & ACO vehicle staging area. Both areas are basically non-functional. Grading, french drains needed in dog yard; unknown what will be needed for existing, non-functional vehicle staging area drain.

On-Call ADA Capital Improvement Program

Asset Category: BUILDINGS & STRUCTURES

Department: Transportation

Description: As mandated by Title II of the Americans Disabilities Act, this program implements flexible on-call construction contracts to respond to ADA physical access needs as they arise due to changing conditions, new requirements, and qualified requests for accommodations. It includes repairing wheelchair lifts, constructing access ramps, modifying restrooms, and installing accessible equipment.

This program does not include major ADA Transition Plan implementation activities, and it did not undergo the CIP Prioritization Scoring Process because it is not possible to predict which ADA projects will be needed.

NOTE: This is a 2-year CIP budget recommending funding for citywide transportation programs. Thus, it does not include estimates for years 2022-2024; programmatic funding needs for the 5-year planning horizon can be assumed to be similar to the 2-year budgeted amounts, but precise funding recommendations will be addressed in the next (FY 2021-23) CIP Process.

San Antonio Rec Center and Head Start CIP Requests

Asset Category: BUILDINGS & STRUCTURES

Department: Parks, Recreation & Youth Development

Description: San Antonio Rec Center Building Renovation: Update/Renovate existing Rec. Center/Head Start facilities for programs.

1. Leakage from Roof and old water tank (in turret section of the building) have caused peeling paint & possible mold and mildew to the building walls, ceiling and floors. Primarily along back wall of main room, hallway and bathroom.
2. Roof access by teens has additionally caused leakage through the roof and may be helped by a fence to prevent access.
3. Fencing around both buildings needs to be taller and more secured to protect the kids and staff and equipment.
4. Renovation of the kitchen for community & commercial use.
- or 5. Remove and replace entire building and replace with a larger more usable recreation center.

Head Start Building:

1. Needs children's bathroom renovations; children's toilets are leaking, sewage pipeline too small (technician suggested that need new toilets and pipeline for well flow drainage).
2. Gutters need to be replaced & install new with gutter guards (Existing gutters are damaged and rusted)
3. All windows glasses are old, foggy surface and need to be replaced with energy efficient dual pane windows to obtain noise reduction and to prevent transferring heat, cold for extreme weather changes.
4. The cracking of the exterior siding need to be patched and repainted

Project/CIP Funding Source	2019-20	2020-21	2021-22	2022-23	2023-24	TOTALS
2212 Measure B - Bicycle/Pedestrian	264,000	264,000	N/A	N/A	N/A	528,000
2216 Measure BB - ACTC	560,000	560,000	N/A	N/A	N/A	1,120,000
TOTAL	824,000	824,000				1,648,000

NOTE: This is a 2-year CIP budget recommending funding for citywide transportation programs. Thus, it does not include estimates for years 2022-2024; programmatic funding needs for the 5-year planning horizon can be assumed to be similar to the 2-year budgeted amounts, but precise funding recommendations will be addressed in the next (FY 2021-23) CIP Process.

Bridge Repair Program

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program fulfills the preventive maintenance and repairs recommended by Caltrans Bridge Inspection Reports for 38 City-owned bridges. It also includes the local match for major bridge seismic retrofit projects (*), largely funded by the federal Highway Bridge Program.

Despite scoring results of the CIP process, these projects include work required by Caltrans in order to preserve the safe operation of critical transportation infrastructure. OakDOT's priority projects for FY 2019-21 CIP are listed below. Each project has an average score reflective of the community's input into this budget process.

Prioritization Factors:

-  Equity
-  Health & Safety
-  Economy
-  Environment
-  Improvement
-  Existing Conditions
-  Shovel Ready
-  Collaboration
-  Required Work

Location/Address: Citywide, specific bridges listed below

Priority projects

Citywide Street Resurfacing

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program works on rehabilitation, reconstruction, and preventive maintenance of Oakland's 806 centerline miles of paved roadways to ensure that streets achieve an average Pavement Condition Index of 70 (Good) on a scale 0 to 100. Oakland's PCI is currently 57, one of the worst scores in the Bay Area.

The prioritization of the streets will follow the 2019 Three-Year Paving Plan adopted by Council (anticipated spring 2019). This work will also be coordinated with utility companies through cost-share agreements. OakDOT's priority projects for FY 2019-21 CIP are listed in a table below. Each project has an average score reflective of the community's input into this budget process.

Community-Based Transportation Planning

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program is a community-fueled planning and engagement effort led by OakDOT with the Planning Department and strong local stakeholder partnerships. It creates consensus on a transportation vision for the project area by leveraging previous planning studies to understand the community's ongoing and evolving needs.

The plans developed through this project will create a running list of community-supported and community-generated projects for grant funding and further development in OakDOT's Complete Streets Design team. OakDOT's priority projects for FY 2019-21 CIP are listed in a table below. Each project has an average score reflective of the community's input into this budget process.

Complete Streets Capital Program

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program implements transportation projects that meet complete street standards. It also allows the City to leverage local funds to obtain grants. In most cases, these are existing grant funded projects with local match needs previously approved by City Council. High ranking projects (>75) without grant (**) funding are recommended for funding from this program. OakDOT's priority projects for FY 2019-21 CIP are listed in a table below. Each project has an average score reflective of the community's input into this budget process.

Curb Ramps Program

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program will implement the Council-adopted 3-year ADA Curb Ramp Transition Plan and install curb ramps at locations requested by persons with disabilities, in coordination with the disabled parking zone program, and along the designated corridors in the Council-adopted Sidewalk Prioritization Plan.

Based on the Americans Disability Act (ADA) of 1990, Oakland is under a legal mandate to take proactive steps to improve ADA access in the public way. The average score below is reflective of the community's input into this budget process.

Emergency Roadway Repair Program

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program provides engineering design and construction services such as stabilizing collapsed roadways, building retaining walls along downhill lanes, completing backfill and compaction, and repaving to re-open affected roadways. This program also funds a large contract to resolve El Nino related storm damage. Based on the severity of the storm, this program allows OakDOT to match FEMA funds to complete work in the affected areas.

The average score below is reflective of the community's input into this budget process. Despite the relatively low scoring in the CIP process, this work is required to maintain basic function of city roadways and preserve life safety.

Intersection Safety Improvements Program

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program includes projects that can be implemented quickly to deliver safety benefits. Some improvements involve traffic signals; slowing speeding vehicles; adding a bicycle lane, visible crosswalks and yield markings; eliminating left turns; painting curb extensions and enlarging medians. OakDOT's priority projects for FY 2019-21 Capital Improvement Program (CIP) are listed below. Each project has an average score reflective of the community's input into this budget process.

Neighborhood Traffic Safety / Safe Routes to Schools

Asset Category: TRANSPORTATION

Department: Transportation

Description: This program implements tools to calm traffic based on adopted engineering standards and public support. OakDOT receives approximately 800 requests each year to improve traffic safety. OakDOT also participates with Alameda County Transportation Commission (ACTC) and the Oakland Unified School District (OUSD) in identifying school safety improvements around Oakland School sites (See map).

Slower and less traffic in neighborhoods enhance public safety and overall quality of life. All of these improvements are supported by Oakland's Council adopted Pedestrian Plan and Bicycle Plan. OakDOT's priority projects for FY 2019-21 CIP are listed in a table below. Each project has an average score reflective of the community's input into this budget process.

Sidewalk Repair Program

Asset Category: TRANSPORTATION

Department: Transportation

Description: This project will repair City-tree damaged sidewalks, sidewalk damage at City facilities, and facilitate private property sidewalk repairs. The average score below is reflective of the community's input into this budget process.

The Council-adopted Sidewalk Prioritization plan (2008) calls for sidewalk repairs along identified transit corridors, residential sidewalk repair, and incorporating a liability reduction program. This program will increase compliance, reduce trip and fall liability and proactively address sidewalk repairs through greater inspection, rather than relying on reactive responses to resident complaints.

Traffic Signal Management Program

Asset Category: TRANSPORTATION

Department: Transportation

Description: The program funds various safety, access and mobility capital projects, including the operation, modernization and upgrades of traffic signals, operation and maintenance of the Intelligent Transportation System (ITS), and responds to citizens and advocates' concerns. The average score below is reflective of the community's input into this budget process.

Transportation Grant Matching

Asset Category: TRANSPORTATION

Department: Transportation

Description: Local match funding is required for certain federal, state, and county transportation grants. This funding source can be used for existing grant funded projects or new grants received during FY 2019-21.

This program did not undergo the CIP Prioritization Scoring Process because it is not possible to predict which projects will be awarded grant funding during FY 2019-21. All future grant funded projects will be vetted by the CIP Prioritization Scoring Process.

City Attorney

2018 SEP 20 AM 11:55 RESOLUTION NO. 87876 C.M.S.

ADOPT A RESOLUTION TO APPROVE THE UPDATED CAPITAL IMPROVEMENT PROGRAM PRIORITIZATION PROCESS, ADOPT THE WEIGHTING SYSTEM AND AUTHORIZE THE CITY ADMINISTRATOR TO IMPLEMENT THE PROCESS BEGINNING BUDGET CYCLE FY2019-21

WHEREAS, the City Council passed Resolution No. 78747 C.M.S. in July 2004, establishing prioritization methods for the capital improvements to the City of Oakland's assets categories: facilities and structures, parks and open space, sewers, storm drains, streets, sidewalks and traffic improvement infrastructure; and

WHEREAS, the City desires to update the Capital Improvement Program (CIP) Prioritization Process to align with City's current policies and values to reflect citywide priorities of Equity, Health and Safety, Existing Conditions, Economy, Environment, Required Work, Improvement, Collaboration, and Shovel Ready; and

WHEREAS, the CIP will establish the prioritization strategy and financial plan to implement City's capital projects that maintain, improve, and build the City's valuable assets to serve Oakland's diverse economic, educational, and recreational needs; and

WHEREAS, because of substantial institutional reorganization with the establishment of the Oakland Department of Transportation in 2015 under Ordinance No. 13325 C.M.S. and expanded capital funding availability as a result of the passage of Measure KK Infrastructure Bond in 2016; and

WHEREAS, City Council approved Ordinances No. 13319 C.M.S. and No. 13326 C.M.S. creating the Department of Race and Equity (DRE) in 2015, establishing definitions and implementation steps related to a citywide strategy to create a fair and just city where the City maintains diversity, eliminates racial disparities, and achieves racial equity; and

WHEREAS, the City developed a strategy document in the 2016 Resilient Oakland Playbook focusing on themes to 1) build a more trustworthy and responsive government, 2) stay rooted and thrive in our town, and 3) build a more vibrant and connected Oakland; and

WHEREAS, the City's Department of Race & Equity published the Oakland's Equity Indicators Report in 2018 which "develops a baseline quantitative framework that can be used by City and community members to better understand the impact of race, measure inequalities and track changes in the disparities for different groups over time"; and

WHEREAS, the FY2017-19 CIP budget recognized the need for more accessible and standard approach to public input; and

WHEREAS, City staff, composed of a CIP Working Group from the Department of Transportation and the Department of Public Works, with the Department of Race and Equity, conducted public outreach and engaged community involvement in the development of the CIP Prioritization Process, and

WHEREAS, A page in the City of Oakland's website is dedicated to the CIP process, providing information on the program and update with relevant information, and

WHEREAS, a Capital Improvement Program Advisory Committee was established, consisting of a representative of each City department involved with capital projects, acting as advisors and a consistent point of contact regarding CIP planning and disseminates information to department management/staff, now, therefore be it

RESOLVED: That the City Council adopt a resolution approving the updated Capital Improvement Program Prioritization Process, adopting the weighting system and authorizing The City Administrator to Implement the Process Beginning Budget Year 2019-21 as set forth in the agenda report, Figure 5, accompanying this Resolution; and be it

FURTHER RESOLVED: That the City Council establishes that the nine factors and points distribution (out of 100) used to prioritize the City of Oakland's Capital Improvement Program shall be as follows: Equity (16 points), Health and Safety (16 points), Existing Conditions (13 points), Economy (13 points), Environment (11 points), Required Work (10 points), Improvement (8 points), Collaboration (8 points), and Shovel Ready (5 points); and be it

FURTHER RESOLVED: That this resolution shall be effective immediately upon passage.

REVISED BY PUBLIC WORKS COMMITTEE AT 10/14/14 MEETING

OAKLAND CITY COUNCIL

RESOLUTION No. 85227 C.M.S.

Introduced by Councilmember _____

RESOLUTION ESTABLISHING A PRIORITIZATION PLAN FOR THE CITY OF OAKLAND'S STREET PAVEMENT REHABILITATION PROGRAM

WHEREAS, the City of Oakland's street infrastructure is considered a significant asset that impacts the quality of life for those who live and work in Oakland; and

WHEREAS, the City of Oakland continues to use the Pavement Management Program (PMP) to the Metropolitan Transportation Commission (MTC) StreetSaver® pavement management software; and

WHEREAS, the City of Oakland completed a citywide pavement distress survey in the fall of 2012 to update its Pavement Management Program database; and

WHEREAS, the 3-year moving average pavement condition index (PCI) has increased from 57 in 2011 to 60 in 2013; and

WHEREAS, in this system, 100 represents brand new pavement and 0 represents a completely failed pavement; and

WHEREAS, the City of Oakland is required by MTC to maintain and update a Pavement Management Program in order to remain eligible for federal street rehabilitation funding; and

WHEREAS, the Pavement Management Program standardizes the optimization and distribution of available funding for street rehabilitation projects; and

WHEREAS, the City of Oakland has limited financial resources to fund its street rehabilitation program; and

WHEREAS, the anticipated annual funding level for street rehabilitation for the City of Oakland is estimated to be approximately \$5.7 million over the next five years; and

WHEREAS, the anticipated annual funding level for street rehabilitation for the City of Oakland is estimated to be approximately \$13.1 million over the next five years if Measure BB passes; and

WHEREAS, the City of Oakland has established criteria to be used to prioritize streets proposed for rehabilitation using the Pavement Management Program based on Pavement Condition Index (PCI), visual inspection, and cost effectiveness; and

WHEREAS, the Pavement Management Program is utilized to prioritize and identify candidate streets for street rehabilitation projects that represents the most optimum use of available funding; and

WHEREAS, the City of Oakland continues to look for emerging cost-effective pavement technologies such as cape seal; and

WHEREAS, the City's Pavement Program will continue to follow the ADA Title II requirements detailed in a joint technical assistance guidance (Technical Assistance) released by the United States Department of Justice (DOJ) and the Federal Highway Administration (FHWA) in June of 2013; and

WHEREAS, the City's Pavement Program will continue to follow the "Complete Street" design standards which is reflected in City Resolution No. 13153 C.M.S dated February 19, 2013; and

WHEREAS, the City of Oakland coordinates and screens all proposed streets for conflicts with sewer, storm drainage, gas, water, electrical, cable, and fiber optic replacement projects to insure that all underground rehabilitation work occurs prior to scheduled street rehabilitation projects; and

WHEREAS, the City Council of the City of Oakland continues to implement the "best-first" policy and the streets selected for the paving priority plan is provided in *Attachment A* and *Attachment B*; now, **therefore be it**

RESOLVED: That, in order to optimize resources to the extent possible, the City Council of the City of Oakland adopts and will use its PCI based Pavement Management Program to prioritize streets for rehabilitation; and be it

FURTHER RESOLVED: That a target of eighty percent (80%) of available street rehabilitation funds each year will be dedicated to rehabilitating streets that are identified by the Pavement Management Program, and that the remaining twenty percent (20%) of available funds will be dedicated to rehabilitating selected "worst streets" which is reflected in City Resolution No. 81039 C.M.S dated November 6, 2007.

RESOLUTION No. 81751 C.M.S.

Introduced by Councilmember _____

[Signature]
City Attorney
REVISED
3-16-09

RESOLUTION ESTABLISHING A FIVE YEAR PRIORITIZATION PLAN FOR THE CITY OF OAKLAND'S SIDEWALK REPAIR PROGRAM AND ALLOCATING SIDEWALK REPAIR FUNDS TO SPECIFIC CATEGORIES OF REPAIR EACH YEAR

WHEREAS, the City of Oakland's sidewalk infrastructure is considered a significant asset that impacts the quality of life for those who live and work in Oakland; and

WHEREAS, the City of Oakland completed a citywide sidewalk condition survey in 2006 to plan its citywide sidewalk repair program; and

WHEREAS, the City of Oakland has limited financial resources to fund its citywide sidewalk repair program; and

WHEREAS, the anticipated annual funding level for citywide sidewalk repair for the City of Oakland is estimated to be approximately \$700,000.00 over the next five (fiscal years beginning in Fiscal Year 09/10; and

WHEREAS, the City of Oakland has established criteria to be used to prioritize corridors proposed for citywide sidewalk repairs based on the following:

Tier Number 1: Transit streets and corridors with transit centers in the following order of priority:

1. Regional transit streets;
2. Transit centers;
3. Local transit streets.

Tier Number 2: Corridors with the highest density of public facilities in the following order of priority:

1. City buildings (city offices, museums, libraries, senior centers, recreation centers, fire stations, etc.)
2. State and county buildings, including county medical centers;
3. Schools (community colleges; high school, junior high and elementary school programs with magnet programs for children with disabilities; and all other public schools);

4. Large public housing (OHA) sites and critical homeless services;
5. City parks and open space.

Tier Number 3: Corridors with the highest density of privately owned public accommodations in the following order of priority. Zoning designations are per the City of Oakland General Plan and Zoning Map, January 2008:

1. Commercial zoning areas (C1-xx) and Kaiser (KX) — (with an emphasis on doctor, medical and health offices; service sites of disability organizations; and major employment sites);
2. Special zoning areas limited to medical centers not listed above (S1); transit oriented development (S15); and housing and business mix (HBX1-3);
3. Medium to high density housing and high rise apartments (R50 – R90);
4. Other public accommodations.

Tier Number 4: Locations that do not fall into any of the above groups including, but not limited to, other residential areas.

WHEREAS, the above prioritization criteria is intended to conform with the requirements of the Americans with Disabilities Act (ADA), reduce the City's liabilities from ADA complaints and trip and fall claims; and respond to the citizen demand for sidewalk repairs where pedestrian activity is highest; now, therefore be it

RESOLVED: That, in order to optimize resources for sidewalk repair to the extent possible, the City adopts and will use the above criteria to prioritize citywide sidewalk repairs; and be it

FURTHER RESOLVED: That a minimum of fifty percent (50%) of available citywide sidewalk repair funds each year will be dedicated to repair sidewalks that are identified by the above prioritization criteria on prioritized corridors, and that a minimum of ten percent (10%) of available citywide sidewalk repair funds each year will be dedicated to repair sidewalks that will reduce the City's liabilities from ADA complaints and trip and fall claims, and that the remaining forty percent (40%) of available funds will be dedicated to repairing selected low-priority sidewalk damages.

BE IT FURTHER RESOLVED: That within each Council District, not more than 15% of the resources dedicated to corridors may be shifted to residential sidewalks where there is a need. Prior to making such adjustments, the City Administrator will consult with the Council office for the district in question and if necessary bring the issue to the Council.

OAKLAND CITY COUNCIL

RESOLUTION No. 86003 C.M.S.

Introduced by Councilmember _____

RESOLUTION TO ADOPT THE UPDATED FY 2015-17 PARK PROJECT PRIORITIZATION LIST FOR CITY OF OAKLAND CAPITAL IMPROVEMENT PROJECTS AND AUTHORIZE THE CITY ADMINISTRATOR OR DESIGNEE TO APPLY FOR GRANT FUNDS FOR PROJECTS ON THE PRIORITIZATION LIST WITHOUT FURTHER COUNCIL ACTION

WHEREAS, in December 2007, City Council approved the FY 2007-09 Park Project Prioritization list and directed staff to return to Council on a two-year cycle concurrent with the budget to update the Park Project Prioritization list; and

WHEREAS, the Open Space, Conservation, and Recreation (OSCAR) Element of the Oakland General Plan serves as the official policy document addressing the management of open land, natural resources, recreation services, and parks in Oakland; and

WHEREAS, the Park Project Prioritization List is developed per criteria of the OSCAR and serves as the guiding plan for implementing parks and open space capital improvement program and allows the City of Oakland to effectively respond to grant and other funding opportunities for park projects; now, therefore, be it

RESOLVED, that the City of Oakland Council approve the Park Project Prioritization List attached hereto as **Attachment A** – FY2015-2017 Park Capital Improvement Project List (Rev. Feb. 9, 2016); and be it

FURTHER RESOLVED, that the Park Project Prioritization List continues to be reviewed and updated every two (2) years in conjunction with the budget process; and be it

FURTHER RESOLVED, that the City Administrator or designee is authorized to apply for, accept and appropriate grant funds for the approved park projects as funding opportunities become available; and be it

FURTHER RESOLVED, that the City Administrator or designee is authorized to enter into an agreement, execute, amend and other administration for awarded grants received for projects on the Park Project Prioritization List as necessary; and be it

FURTHER RESOLVED, that the City Administrator or designee is authorized to re-order the projects within a Council District upon conference among staff and confirmation with the respective Council Office to allow flexibility to address changes in priority within a district;

OAKLAND CITY COUNCIL

RESOLUTION NO. 86385 C.M.S.

INTRODUCED BY VICE MAYOR CAMPBELL WASHINGTON
AND COUNCILMEMBER GUILLEN

RESOLUTION ON THE CITY COUNCIL'S OWN MOTION SUBMITTING TO THE NOVEMBER 8, 2016 STATEWIDE GENERAL ELECTION, A PROPOSED ORDINANCE TO AUTHORIZE ISSUANCE OF \$600 MILLION GENERAL OBLIGATION BONDS TO FUND VARIOUS CITY INFRASTRUCTURE AND AFFORDABLE HOUSING PROJECTS; AND DIRECTING THE CITY CLERK TO FIX THE DATE FOR SUBMISSION OF ARGUMENTS AND PROVIDE FOR NOTICE AND PUBLICATION IN ACCORDANCE WITH THE NOVEMBER 8, 2016 STATEWIDE GENERAL ELECTION; ACTION TAKEN IN RELIANCE ON PREVIOUSLY CERTIFIED ENVIRONMENTAL IMPACT REPORTS AND CEQA EXEMPTIONS WITHOUT LIMITATION, CEQA GUIDELINES 15162, 15183, 15183.3 and 15378

WHEREAS, the City of Oakland has identified critically needed investment in streets and roads, public facilities and affordable housing as integral to ensuring public safety, quality of life for all Oaklanders and the City's long-term economic vitality; and,

WHEREAS, the City Council recognizes the need to enhance the City's streets, bike lanes, and related infrastructure in order to create a system that is more safe, reliable, and efficient, and meets future demands; and,

WHEREAS, the City Council recognizes that investment in the City's infrastructure, including parks, libraries, public safety buildings, recreation and senior centers is necessary to preserve and enhance the quality of life for all Oaklanders; and,

WHEREAS, Oakland is the one of the most expensive housing markets in the country, just behind San Francisco, New York and Boston, and with rising rents outpacing the increase in incomes faster than any other place in the country, protecting Oakland residents from displacement and providing affordable housing opportunities is necessary to preserve the quality of life for all City residents, to protect the City's low income families, seniors and persons with disabilities, and to ensure the City's long term economic vitality; and,

WHEREAS, pursuant to Article 34 of the California Constitution, voter approval is necessary in some cases to authorize the City to develop, construct and/or acquire "low rent housing", including housing that will be funded by a City general obligation bond; and

WHEREAS, the City has an unfunded capital need of approximately \$2.5 billion; and

WHEREAS, the City Council proposes a \$600 million general obligation bond to invest in vital infrastructure projects to improve public safety, protect and provide affordable housing, and preserve the quality of life in all neighborhoods throughout Oakland; and

WHEREAS, section 902(e) of the Charter of the City of Oakland provides that contracts for service shall not result in the loss of employment or salary by any person having permanent status in the City's competitive service and such Charter provisions remain applicable to projects funded by this bond measure; and

WHEREAS, this bond measure provides enhanced resources for the City's Public Works, Transportation and Parks & Recreation Departments, thereby creating the opportunity to expand the capacity of City staff to undertake various types of capital improvement work; and

WHEREAS, in compliance with the California Environmental Quality Act (CEQA), section 15162, the City has completed a review of the proposed projects (the "Projects") and

WHEREAS, the proposal relies on previously certified Final Environmental Impact Reports (EIRs) in accordance with, among other provisions CEQA Guidelines section 15162, prepared for planning-level policy documents including, without limitation, the City's General Plan, the Lake Merritt Station Area, Broadway-Valdez, West Oakland, and Central Estuary Specific Plans, and various Redevelopment Plans, and each as a separate and independent basis, is also exempt from CEQA on numerous bases, including, without limitation CEQA Guidelines sections 15183, 15183.3 and 15378, and,

WHEREAS, the City Council finds and determines that completion of the Projects is in the public interest and the cost of the Projects will require expenditures of at least \$600 million, an amount greater than the amount allowed by the annual tax levy of the City; and

WHEREAS, the City Council finds and determines it is in the best interests of the City of Oakland to submit to the voters this proposed ordinance to incur bonded indebtedness not to exceed \$600 million for the purpose of financing the Projects; now, therefore be it

RESOLVED, that the Oakland City Council finds and determines the forgoing recitals are true and correct and hereby adopts and incorporates them into this resolution; and be it

FURTHER RESOLVED, that the Oakland City Council does hereby submit to the voters, at the November 8, 2016, Statewide General Election, an Ordinance that reads as follows:

The people of the City of Oakland do ordain as follows:

Section 1. TITLE AND PURPOSE.

(A) Title. This Ordinance shall be referred to as the “2016 Infrastructure Bond.”

(B) Purpose. The object and purpose of the authorized indebtedness will be to acquire and make improvements to real property such as improvement and rehabilitation of streets, sidewalks and related infrastructure, renovation and rehabilitation of City facilities including libraries, public safety, recreation, and other buildings, and acquisition, improvement, rehabilitation, preservation, construction and repair of affordable housing.

Section 2. IMPROVEMENT PROJECT PLAN.

(A) Projects to be funded by the total \$600 million in bonds include the following:

1. Streets and Roads Projects, in the amount of \$350 million, including projects consistent with:

(a) Street paving and reconstruction

(b) Bicycle and pedestrian improvements; bikeways, sidewalks, paths, stairs, streetscape, curb ramps

(d) Traffic calming improvements

2. Facilities Projects in the amount of \$150 million, including projects consistent with:

(a) Fire facilities (in the amount of \$40 million)

(b) Police facilities (in the amount of \$40 million)

(c) Libraries (in the amount of \$15 million)

(d) Parks, Recreation and Senior Facilities (in the amount of \$35 million)

(e) Water, energy and seismic improvements consistent with the City’s Energy and Climate Action Plan (in the amount of \$20 million)

3. Anti-Displacement and Affordable Housing Preservation Projects in the amount of \$100 million:

(a) Funds may be spent on the acquisition, rehabilitation, or new construction of affordable housing as set forth in the Affordable Housing Bond Law Ordinance.

(B) Proceeds from the sale of the bonds authorized by this measure shall be used only for the purposes and projects set forth in Section 1. Proceeds of the bonds may be used to pay or reimburse the City for the costs of City staff when they are performing work on or necessary and incidental to the bond projects. The City may apply bond proceeds designated for affordable housing projects directly to acquire, rehabilitate, preserve or construct affordable housing and/or indirectly as loans, grants, or other disbursements to qualified individuals, non-profit business entities, corporations, partnerships, associations, and government agencies for such affordable housing projects.

(C) The City proposes to finance some or all of the projects described above with proceeds of the bonds. Projects will be completed as needed according to City Council established priorities, including those set forth within the City's Capital Improvement Plan and additionally, prior to each issuance of bonds, the City Council shall identify for the specific projects included in such issuance:

1. How the projects address social and geographic equity, provide greater benefit to under-served populations and in geographic areas of greatest need;

2. How the projects address improvements to the City's existing core capital assets;

3. How the projects maintain or decrease the City's existing operations and maintenance costs; and

4. How the projects address improvements to energy consumption, resiliency and mobility.

5. The order in which the projects appear in Section A above is not an indication of priority for funding or completion. The final cost of each project will be determined as plans are finalized, construction bids are awarded, and projects are completed. Certain construction funds expected from non-bond sources, including state or other grants for eligible projects, have not been secured. Until sources of funding and the costs of all projects are known, the City Council cannot determine the amount of bond proceeds that will be available to spend on each project, nor guarantee that the bonds will provide sufficient funds to allow completion of all described projects. Completion of some projects may be subject to additional environmental or other government approvals by state or local officials. For these reasons, inclusion of a project in the description above is not a guarantee that the project will be funded or completed.

(D) Contractors and City departments shall comply with all applicable City laws when awarding contracts or performing work funded with the proceeds of Bonds authorized by this measure.

(E) After ten (10) years from enactment of this measure, if the remaining funds designated in any of the categories set forth in Section 2(A) above have not been obligated or expended, a maximum of ten percent (10%) of the funds within each category can be transferred to any other categories included in this measure through a City Council Resolution.

Section 3. TAX AND INDEBTEDNESS.

To provide financing for the purposes and projects identified in Section 1 of this Ordinance, the City shall be authorized to issue and sell bonds in an amount up to Six Hundred Million Dollars (\$600,000,000) in aggregate principal amount subject to the accountability safeguards specified in Section 6. The City's first bond issuance will be for an amount no more than \$200 million.

The City's best estimate of the ad valorem tax rate required to be levied on all taxable property in the City to pay debt service on the total amount of the proposed bonds (\$600 million) is projected to average no more than \$69 per year per \$100,000 of assessed property valuation. Such estimation shall not be construed to limit the power and duty of the City Council to cause to be levied and collected a tax sufficient to pay debt service on the bonds in any fiscal year.

Section 4. DEPOSIT OF BOND PROCEEDS.

The net proceeds of the bonds shall be deposited into a special trust account with or established by the treasury of the City of Oakland and shall be allocated and expended at the direction of the City Council for purposes set forth in Section 1 of this Ordinance.

Section 5. FINANCIAL AUDITS AND CITIZEN OVERSIGHT.

As long as any authorized bond proceeds have not been spent, an annual audit shall be performed to ensure accountability and proper disbursement of the bond proceeds in accordance with the objectives stated herein and in compliance with California Government Code sections 53410(c), 53410(d) and 53411.

The City Council shall establish a new Board or Commission or assign to an existing Board or Commission the responsibility for citizen oversight of this measure. This Board or Commission shall review relevant financial and operational reports related to the expenditure of bond proceeds and provide reports to the City Council when necessary. In addition, the Board or Commission should evaluate the impacts and outcomes of bond expenditures on the bond measure's stated goals, including social equity, anti-displacement and affordable housing.

Section 6. DEBT-SERVICE FUND.

For the purpose of paying the principal and interest on the bonds, the City shall, annually levy and collect a tax sufficient to pay the annual interest on such bonds as it becomes due and such part of the principal that will become due before the proceeds of the next general tax levy is available for the payment of such principal. The City shall establish and separately maintain such collected tax revenues in a Debt-Service fund until the bonds and the interest thereon are fully paid, or until a sum is set apart to pay all amounts that will be due to cover the principal and interest on the bonds in the Treasury of the City of Oakland or held on behalf of the City.

Section 7. Blank

Section 8. ARTICLE 34 AUTHORIZATION.

Pursuant to Article 34 of the California Constitution, the City is authorized to develop, construct and/or acquire up to 2000 rental housing units for low-income households throughout the City if the City is assisting the development, construction and/or acquisition of such units in whole or in part using proceeds from the bonds authorized by this measure.

Section 9. CITY AFFORDABLE HOUSING BOND LAW.

The City shall issue the bonds pursuant to the rules and procedures established by City Affordable Housing Bond Law.

Section 10. EFFECTIVE DATE.

The taxes imposed by this Ordinance shall become effective on January 1, 2017.

Section 11. DUTIES OF THE DIRECTOR OF FINANCE.

It shall be the duty of the Director of the Finance to collect and receive all taxes imposed by this Ordinance. The Director of Finance is charged with the enforcement of this Ordinance and may adopt rules and regulations relating to such enforcement.

Section 12. TERM OF TAX IMPOSITION.

The ad valorem taxes enacted by this Ordinance shall be imposed and levied until the authorized indebtedness is fully paid. The City shall place delinquencies on subsequent tax bills.

Section 13. SAVINGS CLAUSE.

If a court of competent jurisdiction finds that any provision, sentence, clause, section or part of this Ordinance is unconstitutional, illegal or invalid, such unconstitutionality, illegality, or invalidity shall affect only such provision, sentence, clause, section or part of this Ordinance, and shall not affect or impair any of the remaining provisions, sentences, clauses, sections or parts of this Ordinance. It is hereby declared that the Council would have adopted this Ordinance if such unconstitutional, illegal or invalid provision, sentence, clause, section or part thereof was not included herein.

Section 14. COMPLIANCE

Under Section 53410 of the California Government Code, the bonds shall be for the specific purposes authorized in this Ordinance and the proceeds of such bonds will be applied only for such specific purposes. The City will comply with the requirements of Sections 53410(c) and 53410(d) of the California Government Code.

Section 15. REIMBURSEMENTS

The City shall be reimbursed for expenditures the City incurred or expected to incur prior to the issuance and sale of any series of the Bonds in connection with the Project. The City Council hereby declares the City's intent to reimburse the City with the proceeds of the bonds for expenditures with respect to the Project (the "Expenditures" or "Expenditure") that are made on and after the date that is no more than 60 days prior to the passage of the Ordinance. The City reasonably expects on the date hereof that it will reimburse the eligible Expenditures with the proceeds of the Bonds.

Each Expenditure was and will be either (a) of a type properly chargeable to a capital account under general federal income tax principles (determined in each case as of the date of the Expenditure), (b) a cost of issuance with respect to the bonds, (c) a nonrecurring item that is not customarily payable from current revenues, or (d) a grant to a party that is not related to or an agent of the City so long as such grant does not impose any obligation or condition (directly or indirectly) to repay any amount to or for the benefit of the City. The maximum aggregate principal amount of the Bonds expected to be issued for the Project is \$600 million. The City shall make a reimbursement allocation, which is a written allocation by the City that evidences the City's use of proceeds of the applicable series of bonds to reimburse an Expenditure, no later than 18 months after the later of the date on which the Expenditure is paid or the related portion of the Project is placed in service or abandoned, but in no event more than three years after the date on which the Expenditure is paid. The City may make exceptions for certain "preliminary expenditures," costs of issuance, certain de minimis amounts, expenditures by "small issuers" (based on the year of issuance and not the year of expenditure) and Expenditures for construction projects of at least 5 years.

Section 16. EFFECTIVE DATE.

This Ordinance shall be effective only if it is approved by two-thirds of the voters voting thereon and shall go into effect ten (10) days after the vote is declared by the City Council.

; and be it

FURTHER RESOLVED, that each ballot used at said election shall have printed therein, in addition to any other matter required by law, the following:

A PROPOSED ORDINANCE AUTHORIZING THE ISSUANCE OF
INFRASTRUCTURE BONDS IN AN AMOUNT NOT TO EXCEED \$600
MILLION TO IMPROVE PUBLIC SAFETY AND INVEST IN
NEIGHBORHOODS.

MEASURE _____

Measure _____. To improve public safety and invest in neighborhoods throughout Oakland by re-paving streets to remove potholes, rebuilding cracked and deteriorating sidewalks, funding bicycle and pedestrian safety improvements, funding affordable housing for Oaklanders, and providing funds for facility improvements, such as, neighborhood recreation centers, playgrounds, and libraries, shall the City of Oakland issue \$600 million in bonds, subject to independent citizen oversight and regular audits?	Yes	
	No	

; and be it

FURTHER RESOLVED, that the City Council does hereby submit to the qualified voters of the City, at the November 8, 2016 election, the ordinance and ballot measure set forth herein; and be it

FURTHER RESOLVED, that the City proposes to rehabilitate, renovate, acquire or construct the real property and real property improvements herein and to issue and sell general obligation bonds of the City of Oakland, in one or more series, in the maximum amount and for the objects and purposes set forth herein if two-thirds of all qualified voters voting on the ballot measure vote in favor thereof; and be it

FURTHER RESOLVED, that the bonds are to be general obligations of the City of Oakland payable and secured by taxes levied and collected in the manner prescribed by the laws of the State of California; and that all said bonds are to be equally and ratably secured, without priority, by the taxing power of the City; and be it

FURTHER RESOLVED, that the City Council hereby authorizes and directs the City Clerk of the City of Oakland (the "City Clerk") to file certified copies of this Resolution with the Alameda County Clerk at least 88 days prior to November 8, 2016; and be it

FURTHER RESOLVED, that the City Council does hereby request that the Board of Supervisors of Alameda County include on the ballots and sample ballots the

foregoing recitals and measure language to be voted on by the voters of the qualified electors of the City of Oakland; and be it

FURTHER RESOLVED, that the City Clerk hereby is directed to cause the posting, publication and printing of notices, pursuant to the requirements of the Charter of the City of Oakland, Chapter 3 of the Oakland Municipal Code, the Government Code and the Elections Code of the State of California; and be it

FURTHER RESOLVED, that in accordance with the Elections Code and the Oakland Municipal Code, the City Clerk shall fix and determine a date for submission of arguments for or against said proposed Ordinance and rebuttals, and said date shall be posted in the Office of the City Clerk; and be it

FURTHER RESOLVED, that upon approval by the voters certain sections of this Ordinance may be codified into the City of Oakland Municipal Code at the direction of the City Clerk; and be it

FURTHER RESOLVED, that this resolution shall be effective immediately upon approval by five members of the Council.

OAKLAND CITY COUNCIL

Approved as to Form and Legality

City AttorneyRESOLUTION NUMBER ~~86773~~ 86773 C.M.S.**RESOLUTION IDENTIFYING AND APPROVING THE CAPITAL IMPROVEMENT PROJECTS THAT ARE AUTHORIZED FOR FUNDING WITH PROCEEDS OF THE CITY OF OAKLAND GENERAL OBLIGATION BONDS (MEASURE KK), SERIES 2017A-1 AND 2017A-2; ALLOCATING BOND PROCEEDS IN THE AMOUNT NOT TO EXCEED \$63,000,000 FOR THE APPROVED PROJECTS**

WHEREAS, an Ordinance authorizing the issuance of infrastructure bonds in an amount not to exceed \$600 Million in general obligation bonds to fund various City infrastructure and affordable housing projects ("Measure KK") was approved by more than two-thirds of the qualified voters of the City at the November 8, 2016, Statewide General Election; and

WHEREAS, this City Council intends to issue City of Oakland General Obligation Bonds (Measure KK), Series 2017A-1 and 2017A-2 (the "Bonds") pursuant to Measure KK and the City of Oakland Affordable Housing and Infrastructure Bond Law, Oakland Municipal Code, Chapter 4.54 (the "Bond Law"); and

WHEREAS, pursuant to Section 2(C) of the Measure KK voter approved Ordinance ("the Ordinance"), prior to issuance of the bonds, Council shall identify how the projects authorized for funding with Measure KK bond proceeds address social and geographic equity, address improvements to the City's existing core capital assets, maintain or decrease the City's existing operations and maintenance costs, and address improvements to energy consumption, resiliency and mobility; and

WHEREAS, pursuant to Section 2 of the Ordinance, bond funds will be used to acquire and make improvements to real property such as improvement and rehabilitation of streets, sidewalks and related infrastructure, renovation and rehabilitation of City facilities including libraries, public safety, recreation and other buildings, and acquisition, improvement, rehabilitation, preservation, construction and repair of affordable housing; and

WHEREAS, in compliance with Section 2(C), Exhibit A to this Resolution reflects the results of the investigation conducted by staff of the capital improvement projects proposed for funding with the Bonds, and identifies how the projects address social and geographic equity, address improvements to the City's existing core capital assets, maintain or decrease the City's existing operations and maintenance costs, and address improvements to energy consumption, resiliency and mobility; and

WHEREAS, the capital improvement projects to be funded with the Bonds, and the facts and analysis in support thereof, are identified in the Agenda Report and set forth in Exhibit A hereto; and

WHEREAS, the projects as set forth in Exhibit A meet the criteria established under Section 2(C) of the Ordinance and are eligible activities as described in the Bond Law; and

WHEREAS, the requirements of the California Environmental Quality Act (CEQA), the CEQA Guidelines as prescribed by the Secretary for Resources, and the provisions of the Environmental Review Regulations of the City of Oakland have been satisfied; now, therefore, be it

RESOLVED, That the City Council finds and determines that the foregoing recitals are true and correct and are hereby incorporated herein as findings and determinations of the City Council; and be it

FURTHER RESOLVED, That the City Council hereby approves the capital improvement projects as set forth in Exhibit A to make improvements to real property including City streets, sidewalks and related infrastructure, as well as City facilities including but not limited to parks, libraries and fire stations; and be it

FURTHER RESOLVED, That the City Council hereby authorizes allocation of \$63 million of the proceeds of the Bonds to fund the capital improvement projects as set forth in Exhibit A; and be it

FURTHER RESOLVED, That the funding is being appropriated through the FY 2017 – 2019 budget in Fund 5330 Measure KK: Infrastructure and Affordable Housing; and be it

FURTHER RESOLVED: That the City Council has independently reviewed and considered this environmental determination, and Council finds and determines, based on the information provided in the staff report accompanying this Resolution, that this action complies with CEQA because it is exempt from CEQA pursuant to Section 15183 (projects consistent with community plan or zoning), Section 15183.3 (streamlining infill project), Section 15378 (project), Section 15301 (minor alterations to existing facilities), Section 15302 (replacement or reconstruction of existing structures), Section 15303 (new construction of small structures), and Section 15061(b)(3) (no significant effect on the environment) of the CEQA Guidelines; and be it

FURTHER RESOLVED, That this resolution shall be effective immediately upon passage.

JUN 19 2017

IN COUNCIL, OAKLAND, CALIFORNIA, _____

PASSED BY THE FOLLOWING VOTE:

AYES - BROOKS, CAMPBELL WASHINGTON, GALLO, GIBSON MCELHANEY, GUILLEN, KALB, KAPLAN, AND PRESIDENT REID — 8

NOES - 0

ABSENT - 0

ABSTENTION - 0

FY 2017-2019 PROPOSED CAPITAL IMPROVEMENT PROGRAM INFRASTRUCTURE BOND (MEASURE KK) PROJECT COST SUMMARY AND ANALYSIS

Project Cost Summary	pgs. K2-4
Facilities Projects Analysis	pgs. K5-11
Transportation Projects Analysis	pgs. K12-14
Maps	pgs. K15 -17

PROJECT COST SUMMARY

DEPARTMENT	CATEGORY	PROJECT TITLE	PROJECT COST	DEPARTMENT SUBTOTAL
<u>FIRE</u>	<u>BUILDINGS AND FACILITIES</u>	Feasibility Studies, Right of Way Acquisition Options, and Preliminary Design for New Fire Stations 4 and 29	\$1,000,000	\$6,237,500
		Apron and Hardscape Replacement for Six Stations and Training Center	\$1,000,000	
		Roof Assessment and Replacement	\$1,087,500	
		Telescopic Apparatus Door Replacement	\$150,000	
		Fire Stations Citywide Renovations - Top Four Priority Stations	\$3,000,000	
<u>POLICE</u>	<u>BUILDINGS AND FACILITIES</u>	Phase II Feasibility Study, Right of Way Acquisition Options for Police Administration Building (PAB)	\$200,000	\$200,000
<u>LIBRARY</u>	<u>BUILDINGS AND FACILITIES</u>	2-3 Branch Renovations - West Oakland, Asian, Brookfield Branches proposed (includes electrical and data infrastructure upgrades to meet current requirements and code, safety and accessibility enhancements)	\$2,025,000	\$4,375,000
		Main Library Improvements	\$2,350,000	
<u>PARKS & RECREATION</u>	<u>BUILDINGS AND FACILITIES</u>	Dimond Park – Lions Pool Improvement	\$1,015,000	\$9,265,000
		Head Start at Brookfield Recreation Center - Room Upgrade	\$375,000	
		Head Start Fac. - Arroyo Viejo Rec. Ctr. Renovation/remodel	\$375,000	
		Head Start Playgrounds Replacement at Arroyo Viejo, Brookfield, Manzanita, and San Antonio Rec. Ctr.	\$480,000	
		Head Start Renovation at Manzanita Rec. Ctr. - Flooring & new restroom	\$600,000	
		Rainbow Rec Ctr & Pk Expansion/Addition	\$5,000,000	
		Tassafaronga Gymnasium Upgrade	\$420,000	
	<u>PARKS & OPEN SPACE</u>	Ballfield Wiring Hazard Mitigation - multiple locations (Lowell, Tassafaronga, Golden Gate, and Curt Flood)	\$1,000,000	
Subtotal Facilities				\$20,077,500

PROJECT COST SUMMARY

DEPARTMENT	CATEGORY	PROJECT TITLE	PROJECT COST	DEPARTMENT SUBTOTAL
<u>TRANSPORTATION</u>	<u>GREAT STREETS</u>	Paving Program	\$25,000,000	\$35,600,000
		ADA 30-year Curb Ramp Transition Plan	\$3,600,000	
		Citywide Sidewalk Construction	\$2,000,000	
		Complete Streets Projects (Infrastructure bond fund as local match to existing grants), including:	\$5,000,000	
		(ATP - Active Transportation Program)		
		(HSIP - Highway Safety Improvement Program)		
		(OBAG - One Bay Area Grant)		
		(Strategic Growth Council)		
		ATP1 International Blvd BRT-supportive Ped		
		ATP2 Telegraph Complete Streets		
		ATP3 Fruitvale Alive Gap Closure		
		ATP3 14th Street Safe Routes in the City		
		ATP2 19th Street BART to Lake Merritt Greenway		
		HSIP7 Telegraph Avenue Safety Improvements		
		HSIP7 Market Street/ San Pablo Safety Improvements		
		HSIP7 Downtown Intersection Safety Improvements		
		HSIP7 Shattuck Av & Claremont Safety Improvements		
		HSIP8 Bancroft Avenue Safety Improvements		
		HSIP8 Fruitvale Avenue Safety Improvements		
		HSIP8 High Street Safety Improvements		
		HSIP8 35th Avenue Safety Improvements		
		HSIP8 Downtown Pedestrian Safety Improvements		
		HSIP8 Citywide Guardrails Program Improvements		
		OBAG1 7th Street West Oakland Phase 2		
		SGC 2 10th Street Pedestrian Improvements		
	<u>SAFE STREETS</u>	Bicycle Master Plan Implementation, including:	\$3,000,000	\$5,000,000
		Bike Street Paving, Bikeway Striping, Bikeway Signage		
		Paving: 104th Ave, 38th Ave, 55th St, 69th Ave, Bellevue, Camden St, E.7th St, Genoa St, West St, Kennedy St.		
		Bike Striping: 38th Ave, Embarcadero/E. 7th St, MacArthur Blvd, E. 18th St., Bancroft Ave.		

PROJECT COST SUMMARY

DEPARTMENT	CATEGORY	PROJECT TITLE	PROJECT COST	DEPARTMENT SUBTOTAL
	<u>SAFE STREETS (Cont'd)</u>	Safe Routes to Schools, including: Chabot Elementary United for Success Academy Montclair & Thronhill Elementary Community Unites Elementary/Futures Elementary International Community School Edna Brewer Middle School Achieve/World Academy New Highland Academy	\$2,000,000	
		Subtotal Transportation		\$40,600,000
<u>HUMAN SERVICES</u>	<u>BUILDINGS AND FACILITIES</u>	Henry Robinson Multi-Service Center - Air Conditioning Replacement	\$257,500	\$257,500
<u>ANIMAL SERVICES</u>		Animal Shelter - Replace HVAC and Energy Management Sys.	\$1,650,000	\$1,650,000
<u>WATER, ENERGY & SEISMIC</u>		Subtotal Water Energy & Seismic		\$1,907,500
PROPOSED I-BOND FUND (FIRST ISSUE)				\$62,585,000

PROJECTS ANALYSIS

The projects below are recommended for I-Bond funding from the first bond sale. The I-Bond Ordinance requires that prior to issuance of bonds, the City Council shall identify for the specific projects included in such issuance:

1. How the projects address social and geographic equity, provide greater benefit to under-served populations and in geographic areas of greatest need;
2. How the projects address improvements to the City's existing core capital assets;
3. How the projects maintain or decrease the City's existing operations and maintenance costs; and
4. How the projects address improvements to energy consumption, resiliency and mobility.

The investment equity of the I-bond program was analyzed using the Oakland Equity Index (OEI), a metric developed by City of Oakland staff for use in measuring equitable distribution of infrastructure projects. Every census block in the city was assigned an OEI score based on the average of the percentages of the block population that are minorities[1], low-income[2], and youth under 10 respectively. Blocks are then assigned the designations of "very low", "low", "medium", "high" or "very high" disadvantage based on what quintile of census tracts their score places them in. Very High and High quintiles are concentrated in East Oakland and West Oakland while Low and Very Low quintiles are concentrated in hills neighborhoods, North Oakland and around Lake Merritt. (See Map "Equity by Population").

Projects were overlaid and evaluated on their geographic reach into areas with higher levels of disadvantage. The maps "Expenditure and Equity" for both Transportation and Building and Facilities identify projects proposed for I-bond funding by their equity status.

The information below provides the analysis required by the Bond Ordinance.

(1) Minorities are defined as persons who identify as any of the following groups defined by the Census Bureau: American Indian or Pacific Islander alone, Asian alone, Black or African American alone, Hispanic or Latino of any race, Native Hawaiian or Pacific Islander alone, Some Other Race or Two or More Races. (2) Low-income is defined as those making at or below 200% of the Federal Poverty Level

FACILITIES

FIRE

BUILDINGS AND FACILITIES

The replacements, renovations, and improvements proposed for OFD are necessary to remedy facility issues which impact OFD's emergency response and to provide firefighters with facilities that are safe and sanitary places for them to live and train while they are on duty serving the residents and visitors of the City of Oakland.

Social and Geographical Equity:

The proposed OFD's facility replacements, renovations and improvement are necessary for OFD to maintain its network of fire stations and facilities while maintaining a consistent level of service throughout the City of Oakland. Additionally, they are necessary to remedy facility issues which impact OFD's emergency response and to provide firefighters with facilities that are safe and sanitary places for them to live and train while they are on duty serving all the residents and visitors of the City of Oakland. The proposed station replacements No. 4 and No. 29 serve high and very high disadvantaged neighborhoods.

Preservation of Capital Assets:

OFD facilities are core capital assets that are tied to OFD's emergency response capabilities for all Oakland Citizens. The OFD station replacements, renovations and improvements will keep these core capital assets functional well into the future.

Maintenance:

By addressing years of deferred maintenance, all the proposed projects will decrease maintenance costs well into the future. The **Apron and Hardscape Replacement** at six stations and the Training Center will make these facilities safer and accessible for continued use. The **Roof Replacements** at four stations will keep stations functional and will prevent severe and long term water damage to the facilities. The Replacement of **Telescopic Apparatus Doors** allows speedy and safe egress of fire apparatus and improves energy consumption by sealing out heat, cold, and inclement weather. The **Feasibility Study, Right of Way Acquisition Options and Preliminary Design** for replacement of Fire Stations Nos. 4 and 29 are required as the current facilities cannot be brought up to current firefighting/emergency response standards as stipulated by the National Fire Protection Association (NFPA).

Energy Consumption, Resiliency and Mobility:

The proposed projects are an opportunity to improve OFDs aging building stock to not only improve firefighting/emergency response capabilities, but also to implement changes that would bring the buildings in line with current California's Building Energy Efficiency Standards (California Code of Regulations, Title 24), the 2016 Update to the Energy and Climate Action Plan, and would therefore have a potential to reduce energy consumption in OFD Fire Stations.

Fire stations serve as the "base" for OFDs emergency response, be it an incident involving a single person/structure, or an incident or disaster such as the Loma Prieta Earthquake and the Oakland Hills Firestorm. Delaying these repairs increases risks to both OFD personnel and the residents of Oakland, as well as impacts the City's and the greater Oakland community's ability to respond and recover from a large scale disaster.

The purpose of the City of Oakland 2016-2021 Local Hazard Mitigation Plan is "for the City to become more resilient and disaster-safe" additionally, one of the goals of the Plan is to "protect the health and safety of Oakland residents and others in the city by minimizing potential loss of life and injury caused by safety hazards." The projects identified with the Oakland Fire Department are consistent with the goal and purpose of the Local Hazard Mitigation Plan, and with several strategies highlighted therein, including: "Green Infrastructure Planning", "Assessment and retrofits of Critical Facilities and Infrastructure/Infrastructure Operators", "Implement Energy Assurance Plan", and "Continuity of Operations Planning".

The "resilience values" as stated in Resilient Oakland also align to OFDs projects. The Fire Station improvement projects would "improve the continuity of critical services". Moreover, the OFDs planning efforts for the OFD Training Center and Fire Stations 4 and 29 are in alignment with the resilience value of "fostering long-term and integrated planning".

POLICE

BUILDINGS AND FACILITIES

The existing Police Administration Building (PAB) is inadequate and does not meet the requirements of an essential facility. Phase I of the feasibility study which includes the determination of OPD program and space requirements will complete in June/July 2017. The proposed Phase II Feasibility Study will survey potential real estate acquisition options.

Social and Geographic Equity:

The proposed Phase II Feasibility Study for a new PAB will support the OPD's public safety efforts citywide.

Preservation of Capital Assets:

The PAB is a core capital assets that supports OPD's public safety capabilities for all of Oakland. The existing PAB does not meet the Essential Services Seismic Safety Act of 1986. A new PAB will meet the Essential Services requirement while providing an updated contemporary building that provides the required space for public safety service.

Maintenance:

A new PAB will provide an up to date building that with ample space for both the existing Eastmont Substation and the PAB while meeting the Essential Services Seismic Safety Act of 1986, and significantly reducing will maintenance needs currently present at both existing buildings.

Energy, Consumption, Resiliency and Mobility:

A new PAB will provide a contemporary facility that will meet LEED standards and therefore reduce energy consumption while meeting Essential Services Seismic Safety requirements and the space needs of OPD.

LIBRARY

BUILDINGS AND FACILITIES

The proposed **Library Branch Improvements - Asian, Brookfield, West Oakland, and Main** - are essential to keeping these core capital assets safe, accessible and able to meet the needs of Oakland's residents.

Social and Geographical Equity:

The Asian Branch Library is in a highly underserved low income, limited English speaking, and high density area of the downtown region serving a larglet Asian American community. It is over 21 years old and is the 2nd busiest branch in the system. The Brookfield Branch is in one of the most isolated neighborhoods in East Oakland serving a largley African American and growing Spanish speaking community that is low-income and primarily renters. The West Oakland Branch is in a very high underserved area of Oakland, large quantity of single-parent families, racially and economically diverse and transitioning, low-income and geographically isolated by I-880, I-980, and I-580 freeways. The Main Library is over 65 years old and serves all of the city's residents at a systemwide level. The immediate neighborhood is a mixed race/ethnicity population, close to Chinatown and has limited English proficiency. Households, again are mixed between lower-income renters and higher-income condominium owners. Few households in this area have vehicles.

Preservation of Capital Assets:

These four library branches are core community and capital assets that range in age from 21-65 years. All four branches require a variety of renovations including upgrades to lighting, safety, access, and to all electrical and data infrastructure to meet new technological needs, and code requirements. These renovations will ensure that these libraries remain open, provide up-to-date library services and increase accessibility and safety for residents and staff well into the future.

Maintenance:

By addressing years of deferred maintenance, the proposed library renovations will decrease maintenance costs well into the future. The renovations include upgrades to lighting, safety, access, and to all electrical and data infrastructure to meet new technological needs, and code requirements. The enhancements will decrease the City's operational and maintenance costs due to breakage and replacement of panels, circuit breakers, painting of graffiti, overall maintenance

Energy Consumption, Resiliency and Mobility:

The proposed library renovations will help to bring the facilities in line with current California's Building Energy Efficiency Standards (California Code of Regulations, Title 24), and will provide electrical and technological infrastructure upgrades and efficiencies, providing up-to-date library services, while increasing accessibility and safety for residents and staff well into the future.

PARKS & RECREATION

BUILDINGS AND FACILITIES

The proposed Park and Recreation facility renovations and improvements include three recreation facilities, **Rainbow Recreation Center, Tassafaronga Recreation Center Gym, Lions Pool at Diamond Park**, and four **Head Start facilities at Brookfield, Arroyo, Manzanita and San Antonio** recreation centers. The improvements are addressing deferred maintenance, growing programming needs, and federally mandated safety criteria that have rendered some of the facilities inoperable. The renovations will also provide the opportunity for additional services.

Social and Geographical Equity:

The **Rainbow and Tassafaronga Recreation Centers** are located in an areas of high ethnic diversity, low income, limited English speaking neighborhoods. the Center is aged, in need of upgrades, and has been previously identified for an expansion project that has gone through a robust community engagement process. This project requires additional funding for construction of the replacement of the facility that will allow for increased services to the community. In the case of **Lions Pool**, it is one of three pools in Oakland that is open year-around. It is therefore used by Oakland residents, adults and youth, City wide for swim instruction, rehabilitation for those who are disabled or injured, and general swimming recreation. **The Head Start Program facilities** serve Oakland's most vulnerable families. The sites proposed for improvements are located in east and central Oakland neighborhoods that have some of the highest child poverty rates in the city: **Brookfield** (94606 – Child Poverty Rate: 39.6%); **Manzanita** and **San Antonio Park** (94603 – Child Poverty Rate: 28.7%) and **Arroyo Viejo** (94605 – Child Poverty Rate: 30.5%). In addition, the zip code areas of 94603 and 94605 have among the highest incidences of crime, according to a recent community assessment, and are neighborhoods of vulnerability and greatest need.

Preservation of Capital Assets:

The proposed projects will provide renovations and improvements to core capital assets that provide a high volume of programming and events for underserved communities. The **Rainbow Recreation Center** project will replace a majority of the facility that will allow for increased services to the community and provide a new building that will serve the community well into the future. The improvements at the **Tassafaronga Gym, Lions Pool and four Head Start facilities** will address years of deferred maintenance that have either caused the closure or threatens the closure of these resources. The improvements will provide safe, useable facilities that will extend the useful life of each and in some cases provide capacity for additional programming.

Maintenance:

After years of deferred maintenance, the renovations and improvements of these OPR facilities will address many significant needs and prevent further damage to the facilities. The **Rainbow Recreation Center** project will improve and modernize the facility, which will decrease maintenance needs. Currently the condition of **Lions Pool** presents hazards to users that have resulted in litigation. The pool deck has many large breaks and is uneven. The site is slated for closure due to infrastructure instability. Fixing the roof and current water damage at the **Tassafaronga Gym** will prevent further water damage. The proposed **Head Start** facility renovations will address deteriorating facilities and years of deferred maintenance by replacing play structures, safety surfacing, flooring, windows, fencing and providing new toddler restrooms, which in turn will allow the facilities to stay open and decrease maintenance costs. Additionally, the improvements will in some cases lower operations cost by removing hazards and liability risks.

Energy Consumption, Resiliency and Mobility:

Modern infrastructure at Rainbow Recreation Center and park will incorporate energy efficiencies and stormwater treatment that will reduce resource consumption, clean stormwater, and will be compliant with current accessibility laws. At Lions Pool new pool technology as it relates to heating, filtration and water quality will lend to reduction of energy costs and resource consumption. The project will also bring the pool into ADA compliance. Improvements to the Tassafaronga Gym will allow the facility to be reopened, which will provide the this very underserved neighborhood a safe place for youth to gather, deliver opportunities for fitness and health as well social engagement. Improvements to the Head Start facilities will increase water and energy efficiencies in renovated/new restrooms, and replaced windows. In addition, investments in the Head Start facilities will support the Mayor's cradle-to-career community initiative. The Oakland Promise. Ensuring the proposed improvements are made will not only provide greater access to high-quality, safe, and nurturing learning and recreation environments, but will be a further investment in the city's core "human and social" assets – its diverse families and children.

PARKS & OPEN SPACE The four athletic fields proposed for lighting upgrades are **Curt Flood, Golden Gate, Lowell, and Tassafaronga**. The project will replace the wiring and light fixtures that have been vandalized and stolen.

Social and Geographical Equity:

The **Ballfield Wiring** projects are located at four ballfields (Curt Flood, Golden Gate, Lowell, and Tassafaronga) in highly underserved areas of west and east Oakland in neighborhoods of high ethnic diversity and primarily low income. These fields provide sorely needed recreational opportunities for youth and adults in these neighborhoods.

Preservation of Capital Assets:

Functional lighting will allow for night play decreasing negative use of fields such as encampments, drinking and vandalism, and thereby decreasing vandalism and sustaining the condition of the fields.

Maintenance:

The project will provide functional lighting at four ballfields with anti-theft technology reducing future maintenance and replacement costs.

Energy Consumption, Resiliency and Mobility:

The project will provide energy efficient light fixtures and allow access to the fields for night games, which will help to decrease crime and blight, while providing opportunity for night time recreation.

HUMAN SERVICES

BUILDINGS AND FACILITIES

The Henry Robinson Multi Service Center (HRMSC) located in the Touraine Hotel at 559 – 16th Street, serves over 300 literally homeless adults annually, many directly from encampments or places not fit for human habitation.

Social and Geographic Equity:

The **Henry Robinson Multi Service Center (HRMSC)** located in the Touraine Hotel at 559 – 16th Street, in a highly underserved area. A profile of the clients show: 60% are male; 34% are between the ages of 45 – 54; 83% are African-American; and 48% have mental illness, with over 40% have 2+ physical/mental conditions. In addition, the Henry Robinson Multi Service Center program serves clients that are at a higher risk of infectious diseases and other health conditions than the general public.

Preservation of Capital Assets:

The inside temperature at HRMSC is often extreme during summer months, making work nearly impossible for the homeless and service staff. The replacement of the degraded 20-ton HVAC system will provide a comfortable environment and complement the \$1.5 million in capital improvements completed in 2012.

Maintenance:

In FY 2015 and FY 2016 the maintenance and repair costs for the current HVAC system at HRMSC was close to \$35,000 on top of the service agreement costs. Having a system that does not require such costly repairs each year will create savings for the City.

Energy Consumption, Resiliency and Mobility:

A new HVAC system at HRMSC will address the swings in temperature, reduce yearly maintenance/repair costs and provide a more livable/workable environment for clients and service staff. The new system will be more energy efficient than the current HVAC system which is over 20 years old.

ANIMAL SERVICES

BUILDINGS AND FACILITIES

Social and Geographic Equity:

Oakland Animal Services provides services to animals and animal owners across Oakland. The shelter is Oakland's only "open admissions" shelter that accepts homeless, injured, orphaned, unwanted, lost, abandoned and mistreated animals.

Preservation of Capital Assets:

The proposed HVAC and Energy Management System replacement project will allow air quality and temperature control that will help to prevent the spread of communicable diseases between animals and staff, thereby making the facility useable into the future.

Maintenance:

The current HVAC and EMS are at the end of their useful life and do not work properly. They require constant maintenance and adjustments. Replacement of these systems will improve air quality in the 27,000 s.f. building and decrease maintenance costs.

Energy Consumption, Resiliency and Mobility:

The new HVAC and EMS will be more energy efficient and provide healthier environment for the animals and staff.

TRANSPORTATION

Transportation projects funded by the Infrastructure Bond include both "Great Streets" and "Safe Streets" projects. Great Streets includes paving and complete streets projects, and Safe Streets projects include Bicycle Master Plan and Safe Routes to Schools projects. Most of the bond proceeds proposed to fund Transportation projects (\$25 million) directly address Pavement Resurfacing by expediting the completion of the existing five year paving plan. The remainder of the Transportation portion of the bond proceeds (\$15.6 million) fund CIP projects for curb ramps installation, sidewalk construction, and complete street, bicycle master plan, and safe routes to schools projects. More importantly, this latter category funds the local match for grants received for complete streets and street safety projects throughout the City. Finally, Pavement Program funds, Transportation Matching Grant funds and Streetscape funds will also be used for installation of Water Quality Control Board full trash capture systems as appropriate.

Social and Geographic Equity:

The investment equity of the I-bond program was analyzed using the Oakland Equity Index (OEI), a metric developed by City of Oakland staff for use in measuring equitable distribution of infrastructure projects. Every census block in the city was assigned an OEI score based on the average of the percentages of the block population that are minorities^[1], low-income^[2], and youth under 10 respectively. Blocks are then assigned the designations of "very low", "low", "medium", "high" or "very high" disadvantage based on what quintile of census tracts their score places them in. Very High and High quintiles are concentrated in East Oakland and West Oakland while Low and Very Low quintiles are concentrated in hills neighborhoods, North Oakland and around Lake Merritt. (See Map "Equity by Population").

Projects were overlaid and evaluated on their geographic reach into areas with higher levels of disadvantage. The map "Expenditure and Equity" identifies transportation projects proposed for I-bond funding by their equity status. Projects are presented in two categories, Paving Projects and Transportation CIP Projects. Mapping analysis shows that the majority of projects are located in Very High and High quintiles, and the smallest percentage is located in the Very Low quintile. However, projects are distributed through all neighborhoods in Oakland.

Paving projects are typically scattered throughout Oakland based on paving need, while Transportation CIP projects, particularly those funded by grants, are focused in high and very high quintiles. Some of the largest grant funded projects, such as the International Blvd. BRT-Supportive Pedestrian Improvements, the Fruitvale Alive Gap Closure, and the Highway Safety Improvement Program (HSIP) projects reach deep into parts of East Oakland that score the most disadvantaged on the Oakland Equity Index. Others, such as 14th St. Safe Routes to the City, provide a gateway from West Oakland to job and resource centers downtown.

(1) Minorities are defined as persons who identify as any of the following groups defined by the Census Bureau: American Indian or Pacific Islander alone, Asian alone, Black or African American alone, Hispanic or Latino of any race, Native Hawaiian or Pacific Islander alone, Some Other Race or Two or More Races. (2) Low-income is defined as those making at or below 200% of the Federal Poverty Level

Preservation of Capital Assets:

The City's streets are a core capital asset that allows for the safe, efficient movement of people and goods throughout Oakland. All of the I-bond funds for transportation will directly address preservation of, or an improvement to these core capital assets. The majority of bond proceeds proposed for transportation (\$25 million) will fund expedited completion of the 5 year Pavement Resurfacing Program, and also will fund Paving of Bicycle Plan Streets. Funds will also repair the City's existing Sidewalks and install ADA compliant Curb Ramps. Bond funds will also leverage grant funded projects that will improve existing streets; these projects will increase safety for bicyclists, pedestrians, and drivers by installation of crossing signals, signage, bike lanes, pedestrian crossing improvements, paving, etc. Finally, this program will implement Safe Routes to Schools improvements near up to eight elementary and middle schools in Oakland.

Maintenance:

The transportation projects proposed in the I-bond will decrease the City's operations and maintenance cost by repairing street infrastructure to a "new" condition. In the case of Pavement Resurfacing, Operations & Maintenance (O&M) and capital costs both increase exponentially as pavement quality decreases. By expediting completion of the citywide street resurfacing program, it will decrease the long term capital costs by resurfacing streets that are in fair/good condition before they fall into poor conditions that can drastically increase the cost for repair. Likewise the O&M costs on poor/failing streets are much higher than recently resurfaced ones, which require more pothole repair and other labor intensive "band aids. On a citywide basis the total O&M need will decrease. While it is very unlikely that the City's O&M needs will decrease below current O&M budgets (because they are currently relatively small), it is likely that a greater percentage of O&M budgets can be devoted to system preservation enhancements (such as crack sealing and skim coating) rather than short term solutions to catastrophic failures such as pothole patching.

Energy Consumption:

Investment in the City's streets infrastructure generally, and in the proposed I-bond projects specifically, has a neutral to positive impact on overall energy consumption for the following reasons:

- a. Investment in resurfacing city streets benefits not only autos, but also low energy consuming transit and bicycle transportation options.
- b. Most of the non-paving investments explicitly improve the safety and ease of the pedestrian, bicycle and transit environment, and increase the mode share of transportation alternatives to the single occupant vehicle.
- c. Investments are concentrated in areas of highest density and highest non-auto mode share.

Resiliency:

The maintenance and improvement of a multi-modal transportation network builds resiliency into the system by promoting transportation options. In addition, while maintenance (including street resurfacing) occurs throughout the City, no large new transportation projects are proposed in areas of high fire danger or sea-level rise danger.

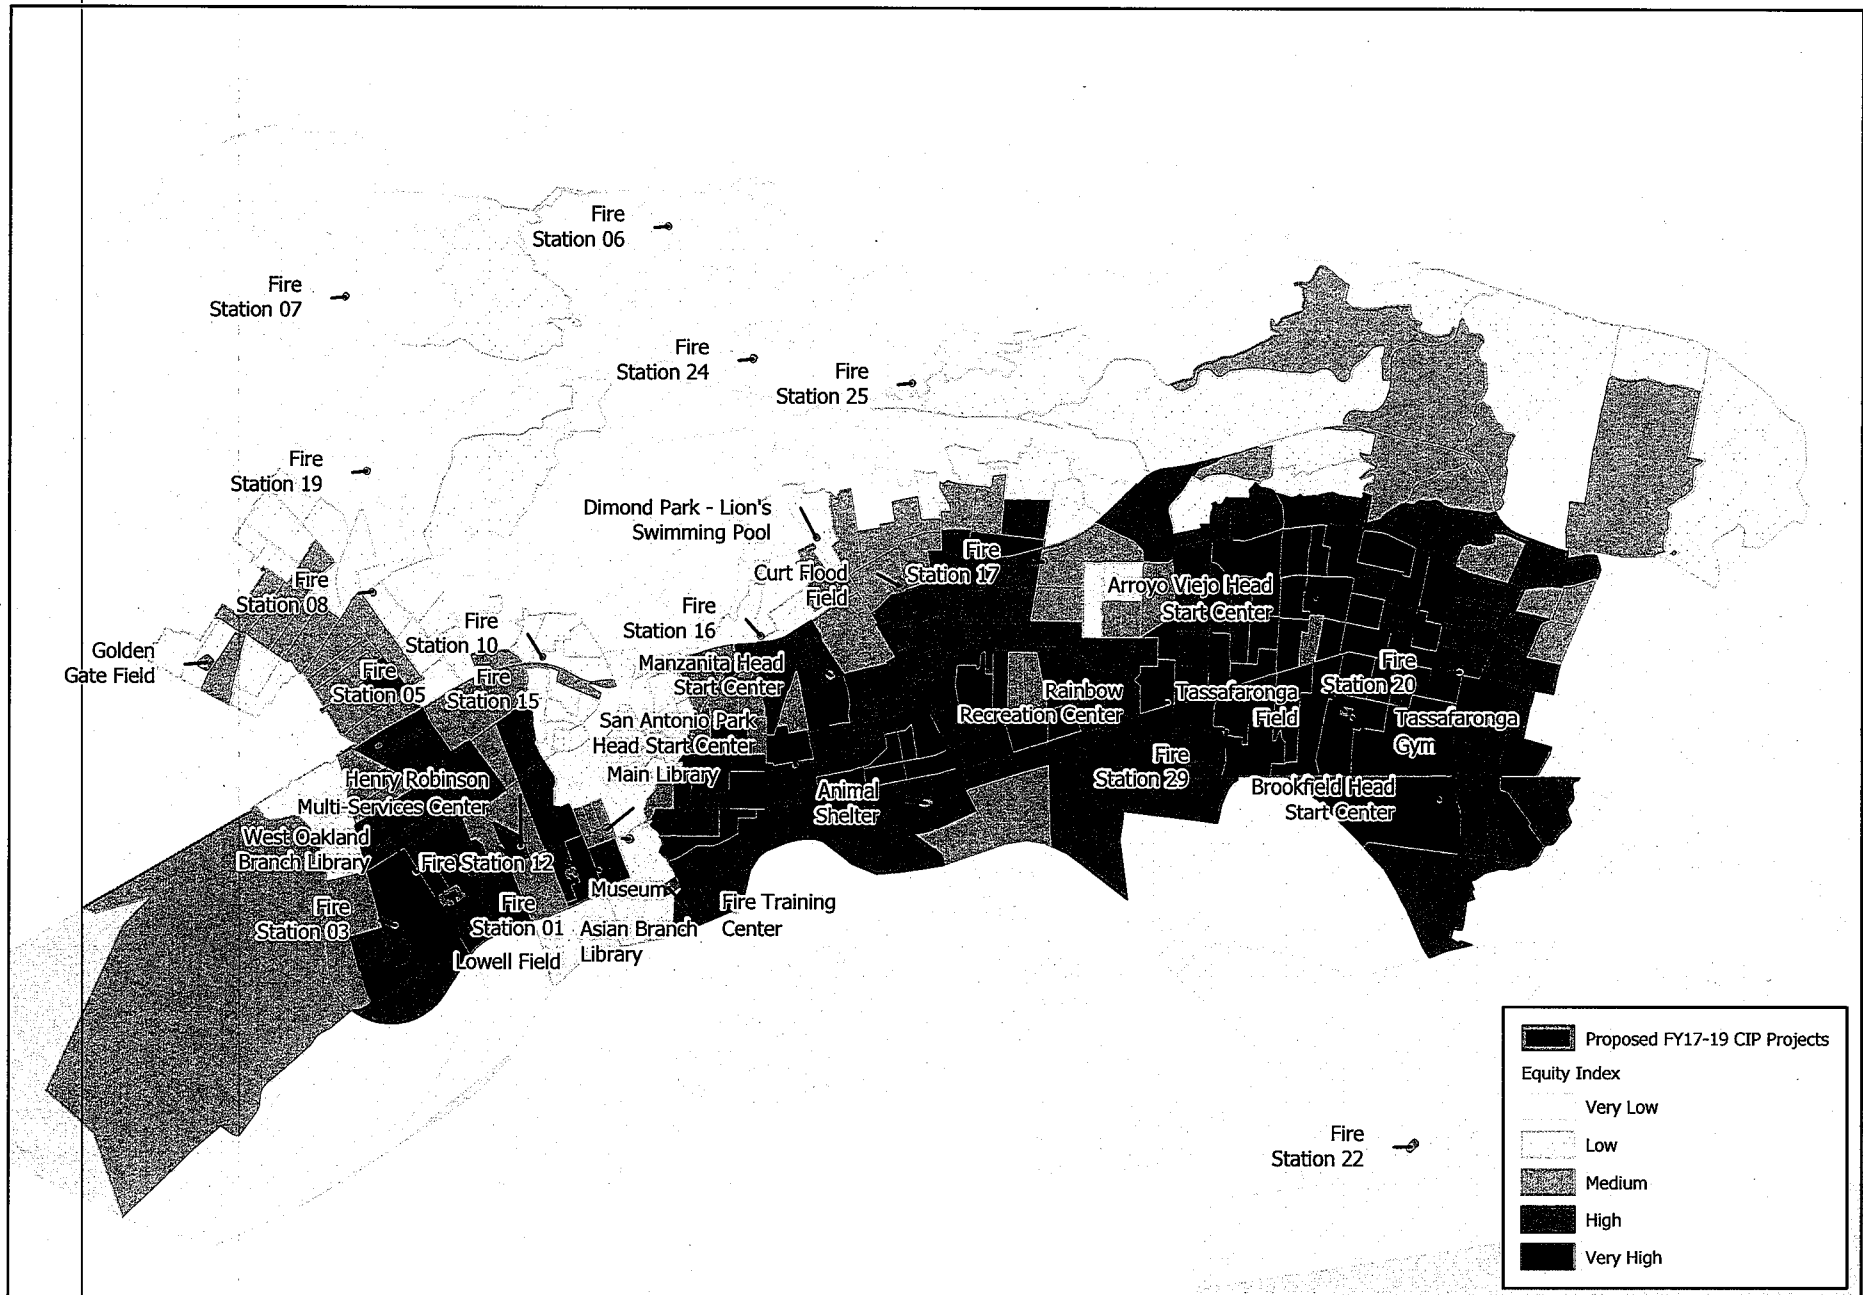

Mobility:

The projects proposed for I-bond funding likewise enhance mobility for all Oaklanders in all neighborhoods for the following reasons:

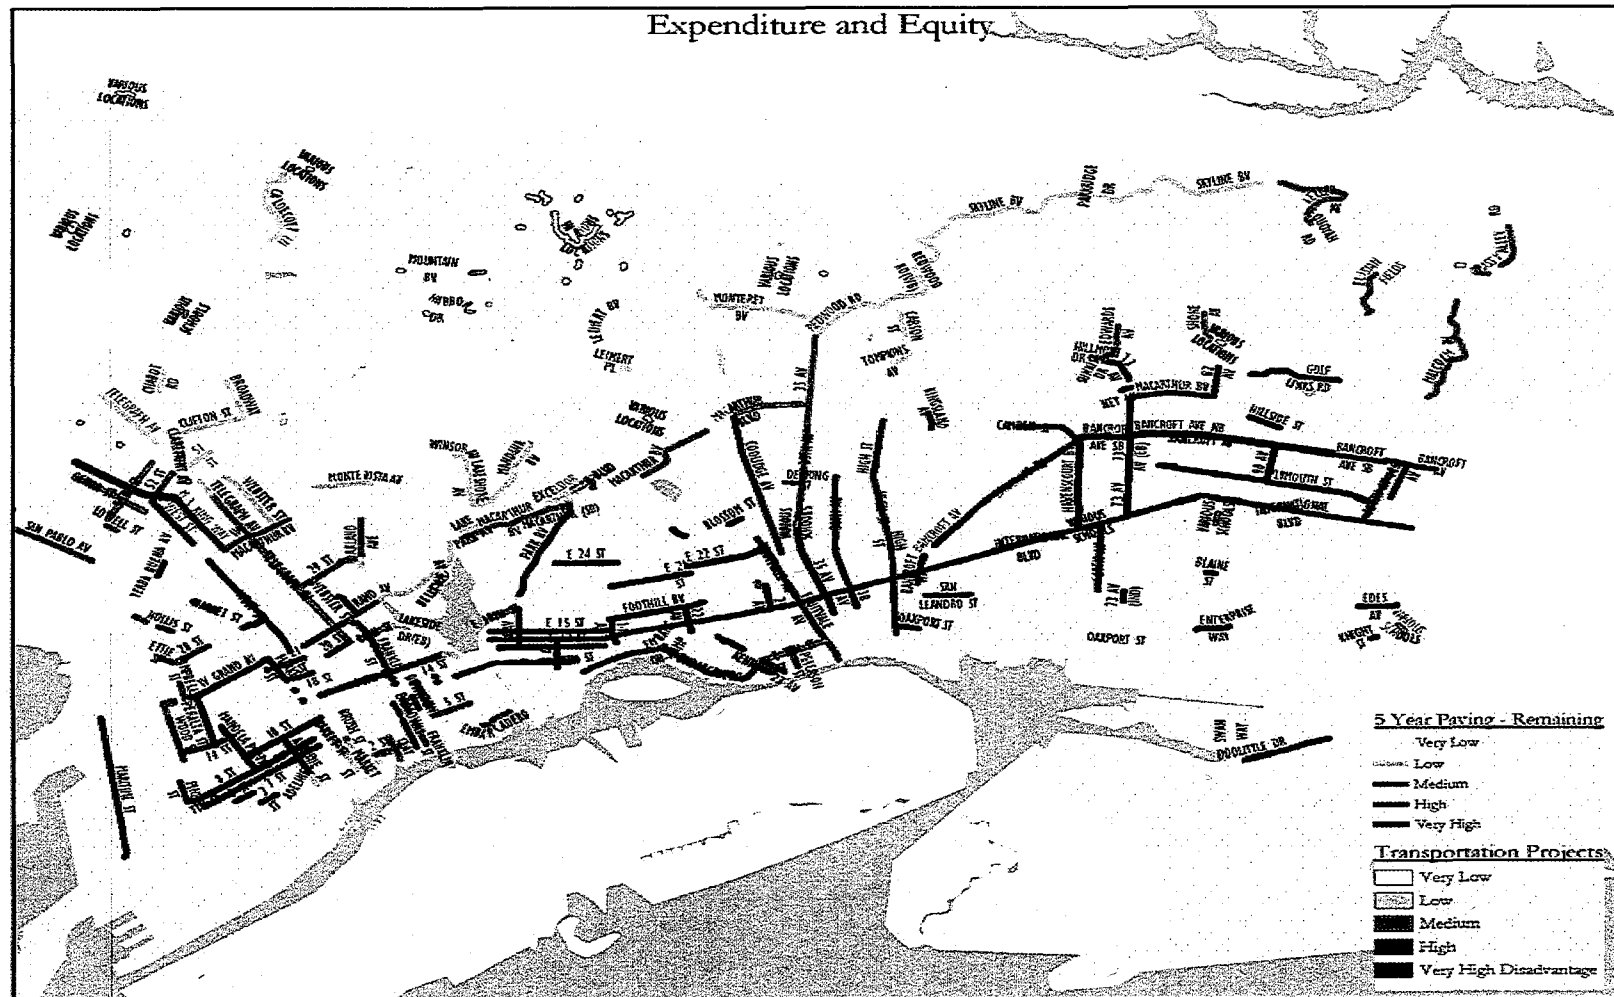

Pavement Resurfacing improvements are planned for all neighborhoods to enhance mobility for all modes, not only autos, but also the bicyclists and transit vehicles that use these roads, and the pedestrians who use the sidewalks and curb ramps that are also improved as a part of any paving project.

Other Transportation investments, particularly complete streets, bicycle master plan, and pedestrian investments, are concentrated in areas of high density and along corridors well served by transit. These projects explicitly seek to increase the safety, utility and appeal of walking, biking and using transit as a valid alternative to driving.

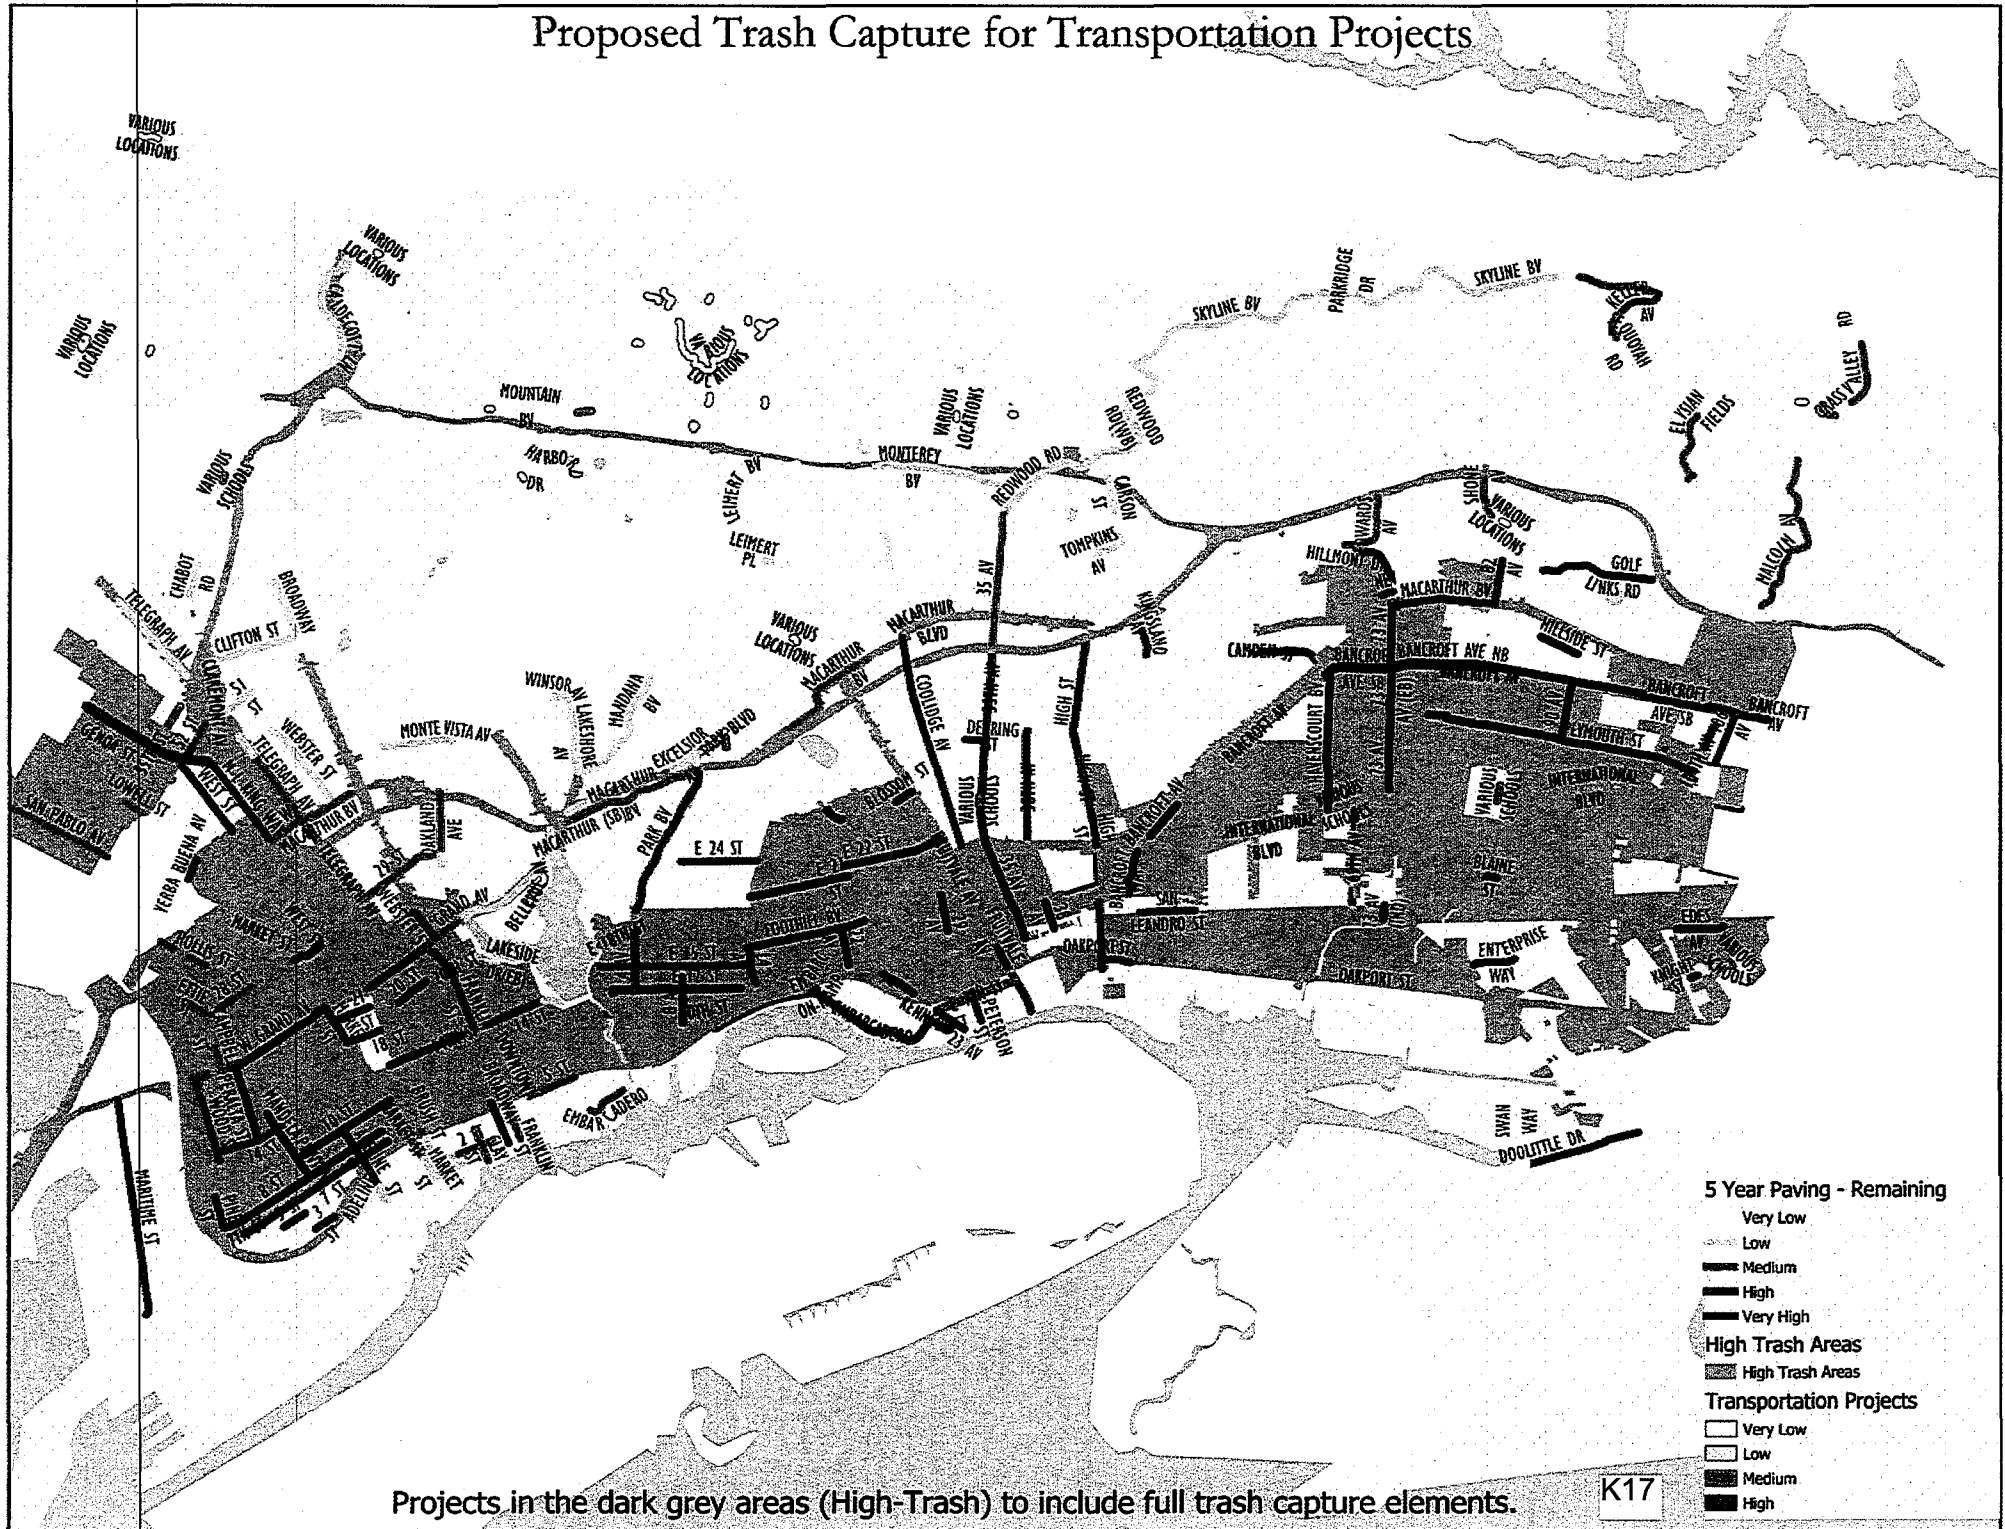

Proposed FY17-19 CIP Projects - Facilities and Parks

Proposed Trash Capture for Transportation Projects

OAKLAND CITY COUNCIL

17 JUL 25 PM 2:02

City Attorney

RESOLUTION NO. 86815 C.M.S.**RESOLUTION IDENTIFYING AND APPROVING ALTERNATE CAPITAL IMPROVEMENT PROJECTS THAT ARE AUTHORIZED FOR FUNDING WITH PROCEEDS OF THE CITY OF OAKLAND GENERAL OBLIGATION BONDS (MEASURE KK), SERIES 2017A-1 AND 2017A-2**

WHEREAS, an Ordinance authorizing the issuance of infrastructure bonds in an amount not to exceed \$600 Million in general obligation bonds to fund various City infrastructure and affordable housing projects ("Measure KK") was approved by more than two-thirds of the qualified voters of the City at the November 8, 2016, Statewide General Election; and

WHEREAS, this City Council intends to issue City of Oakland General Obligation Bonds (Measure KK), Series 2017A-1 and 2017A-2 (the "Bonds") pursuant to Measure KK and the City of Oakland Affordable Housing and Infrastructure Bond Law, Oakland Municipal Code, Chapter 4.54 (the "Bond Law"); and

WHEREAS, pursuant to Section 2(C) of the Measure KK voter approved Ordinance ("the Ordinance"), prior to issuance of the bonds, Council shall identify how the projects authorized for funding with Measure KK bond proceeds address social and geographic equity, address improvements to the City's existing core capital assets, maintain or decrease the City's existing operations and maintenance costs, and address improvements to energy consumption, resiliency and mobility; and

WHEREAS, pursuant to Section 2 of the Ordinance, bond funds will be used to acquire and make improvements to real property such as improvement and rehabilitation of streets, sidewalks and related infrastructure, renovation and rehabilitation of City facilities including libraries, public safety, recreation and other buildings, and acquisition, improvement, rehabilitation, preservation, construction and repair of affordable housing; and

WHEREAS, in compliance with Section 2(C), Exhibit 1 to this Resolution reflects the results of the investigation conducted by staff of the capital improvement projects proposed for possible funding with the Bonds, and identifies how the projects address social and geographic equity, address improvements to the City's existing core capital assets, maintain or decrease the City's existing operations and maintenance costs, and address improvements to energy consumption, resiliency and mobility; and

WHEREAS, the capital improvement projects that can be funded with the Bonds, and the facts and analysis in support thereof, are identified in the Agenda Report and set forth in Exhibit 1 hereto; and

WHEREAS, the projects as set forth in Exhibit 1 meet the criteria established under Section 2(C) of the Ordinance and are eligible activities as described in the Bond Law; and

WHEREAS, The requirements of the California Environmental Quality Act (CEQA), the CEQA Guidelines as prescribed by the Secretary for Resources, and the provisions of the Environmental Review Regulations of the City of Oakland have been satisfied; now, therefore be it

RESOLVED, That the City Council finds and determines that the foregoing recitals are true and correct and are hereby incorporated herein as findings and determinations of the City Council; and be it

FURTHER RESOLVED, That the City Council hereby approves the capital improvement projects set forth in **Exhibit 1** as alternate projects to those projects identified in Resolution No. 86773 C.M.S. to make improvements to real property including City streets, sidewalks and related infrastructure, as well as City facilities including but not limited to parks, libraries and fire stations should those projects identified in Resolution No. 86773 C.M.S. be unable to proceed or should surplus funds remain after projects are completed; and be it

FURTHER RESOLVED, That each of the Measure KK capital improvement projects identified in this resolution shall comply with the requirements of Oakland ~~Municipal Code Chapter 15.70~~ Public Art Ordinance No. 11086 C.M.S., except to the extent the City Council determines to exclude one or more such capital improvement projects pursuant to a request of the City Administrator; and be it

FURTHER RESOLVED, That the City Council has independently reviewed and considered this environmental determination, and Council finds and determines based on the information provided in the staff report accompanying this Resolution, that this action complies with CEQA because it is exempt from CEQA pursuant to Section 15183 (projects consistent community plan or zoning), Section 15183.3 (streamlining infill project), Section 15378 (replacement or reconstruction of existing structure), Section 15303 (new construction of small structures), Sections 15162-15164 (subsequent, supplement or addenda to a Negative Declaration) and Section 15061(b)(3) (no significant effect on the environment) of the CEQA Guidelines; and be it

FURTHER RESOLVED, That this resolution shall be effective immediately upon passage.

PROJECT COST SUMMARY

DEPARTMENT	CATEGORY	PROJECT TITLE	PROJECT COST	DEPARTMENT SUBTOTAL
PARKS & RECREATION	BUILDINGS AND FACILITIES	Lincoln Square Recreation Center Feasibility Study	\$400,000	\$4,970,000
		Jack Lond Aquatic Center Dock Improvements	\$800,000	
		San Antonio Synthetic Field Replacement	\$750,000	
		Peralta Hacienda Historical Park Improvments Phase 4A (matching funds)	\$170,000	
		Dimond Park ADA Improvements	\$1,500,000	
		Malonga Casquelord Center Studio Floors	\$250,000	
		Arroyo Viejo Synthetic Field	\$1,100,000	
		Subtotal Facilities		\$4,970,000
TRANSPORTATION	SAFE STREETS	Pedestrian Master Plan: Priority Projects	\$7,181,310	\$7,181,310
		Subtotal Safe Streets	\$7,181,310	\$7,181,310

FACILITIES

PARKS & RECREATION

BUILDINGS AND FACILITIES

The proposed Exhibit 1 Park and Recreation facility renovations and improvements include **Jack London Aquatic Center Dock Improvements, Lincoln Square Recreation Center Feasibility Study, Malonga Casquelord Center Studio Floors, Peralta Hacienda Historical Park, Dimond Park ADA Improvements, San Antonio Synthetic Field Replacement and Arroyo Viejo New Synthetic Field**. The improvements are addressing deferred maintenance, growing programming needs, and community identified needs.

Social and Geographical Equity:

The **Lincoln Square Recreation Center Feasibility Study, Peralta Hacienda Historical Park Improvements, San Antonio Synthetic Field Replacement and Arroyo Viejo New Synthetic Field** are located in an areas of high ethnic diversity, low income, and in mostly limited English speaking neighborhoods. The **Lincoln Recreation Center** is aged, crowded, in need of upgrades, and has been previously identified for an expansion project that has gone through numerous robust community engagement processes. The center serves over 2000 daily users and the surrounding community is steadily increasing with additional housing putting more pressure on an already undersized facility. **Peralta Hacienda Historical Park** is a six-acre historic park housing the historic house of the Peralta settlement in early California. Located in the Fruitvale District, it is a cultural museum, arts and educational hub for local families and youth, and a regional center for historical inquiry and discovery. In the case of **San Antonio and Arroyo Viejo synthetic field projects**, these fields are the only outdoor, public, team sport recreational facilities in these neighborhoods. The **San Antonio Park Field** is the first synthetic field for the City that's been in place almost 20 years serving a neighborhood with child poverty Rate of 28.7%. In the **Arroyo Viejo** community the child poverty rate is 30.5%. In addition, these neighborhoods have among the highest incidences of crime, according to a recent community assessment, and are neighborhoods of vulnerability and greatest need. **Malonga Casquelord Center** dance studios and **Jack London Aquatic Center** docks are community based art and aquatic facilities that serve all of Oakland as well as the entire Bay Area. These centers offer low cost and often free services to youth and adults who in many cases would not have the opportunity to participate in art and boating activities. **Dimond Park** includes Lions Pool, open all year around, and trail connections to Joaquin Miller Park and East Bay Regional Park trails, which attract residents from all over Oakland and the broader Bay Area. The federally mandated **Dimond Park ADA Improvements** will ensure that the park can be accessed by all, including the elderly and those with disabilities.

Preservation of Capital Assets:

The proposed projects will provide renovations and improvements to core capital assets that provide a high volume of programming and events for underserved communities. The **Lincoln Square Recreation Center Feasibility Study** will provide the information needed to begin design on a new center that will replace all, or the majority of, the existing facility and allow for increased services to the community in a new building that will serve the community well into the future. The **Peralta Hacienda project** will restore and preserve historical features of the park that have not been maintained. The synthetic field improvements at **Arroyo Viejo and San Antonio Parks** will provide up-to-date sports fields that will be usable well into the future. The **Malonga Casquelord Center Studio Floors** and **Jack London Aquatic Center Dock Improvements** will address years of deferred maintenance that threaten the closure of these resources. The improvements will provide safe, useable facilities that will extend their useful life. The **Dimond Park ADA Improvements** will bring the park up to state and federal code and provide safe access for all.

Maintenance:

After years of deferred maintenance, the renovations and improvements of these parks, sports fields, recreational and art centers will address many significant maintenance needs and prevent further damage to the already degraded facilities. Operations & Maintenance (O&M) and capital costs both increase exponentially as the City's facilities age and are subject to years of deferred maintenance. Implementing the proposed improvements before these facilities go into further disrepair, which can drastically increase costs of repair, will decrease O&M and long term capital costs overall for these facilities.

Energy Consumption, Resiliency and Mobility:

Modern infrastructure at **Lincoln Recreation Center** and park will incorporate energy efficiencies and stormwater treatment that will reduce resource consumption, clean stormwater, and will be compliant with current accessibility laws. The **Peralta Hacienda Historical Park Project** will help to rescue and interpret the history of this historic site. The project includes an outdoor seating area that will provide this underserved community an outdoor space for education, gatherings and events. At **Arroyo Viejo** and **San Antonio Parks** new synthetic fields will reduce water consumption and deliver opportunities for fitness and health as well social engagement in these highly underserved communities. The **Dimond Park ADA Improvements** will address access deficiencies and federally mandated standards, and provide safe access to the park for all Oaklanders, including the elderly and those with disabilities. The **Jack London Aquatic Center Docks** and the **Malonga Casquelord Center Studio Floor Improvements** will increase the life of these facilities and provide access to high quality arts and boating education and recreational activities. Users and advocates from all over Oakland have been lobbying the City for these improvements because both facilities are highly valued by a broad range of Oakland communities.

TRANSPORTATION

SAFE STREETS The proposed Exhibit 1 Transportation projects consist of priority projects identified in the Pedestrian Master Plan Update. The projects address identified pedestrian safety needs on high collision streets throughout the City.

Social and Geographical Equity:

The Pedestrian Master Plan Priority Projects were prioritized based upon an analysis of three factors: Safety, Equity and Walkability. The equity analysis was based upon the Metropolitan Transportation Commission's (MTC) definition of "Communities of Concern" from which seven demographic characteristics were used. These were: Race/Ethnicity, Low Income, Limited English Proficiency, Zero-Vehicle Households, Seniors 75 and Over, Population with a Disability, and Single-Parent Families. Projects are scattered throughout the City.

Preservation of Capital Assets:

The proposed projects will provide functional and safety improvements to core capital assets, such as sidewalks, ADA curb ramps, street and roadways, thereby prolonging their useful life. Other pedestrian safety amenities such as traffic signals and crossing devices can be folded into the inventory of existing devices.

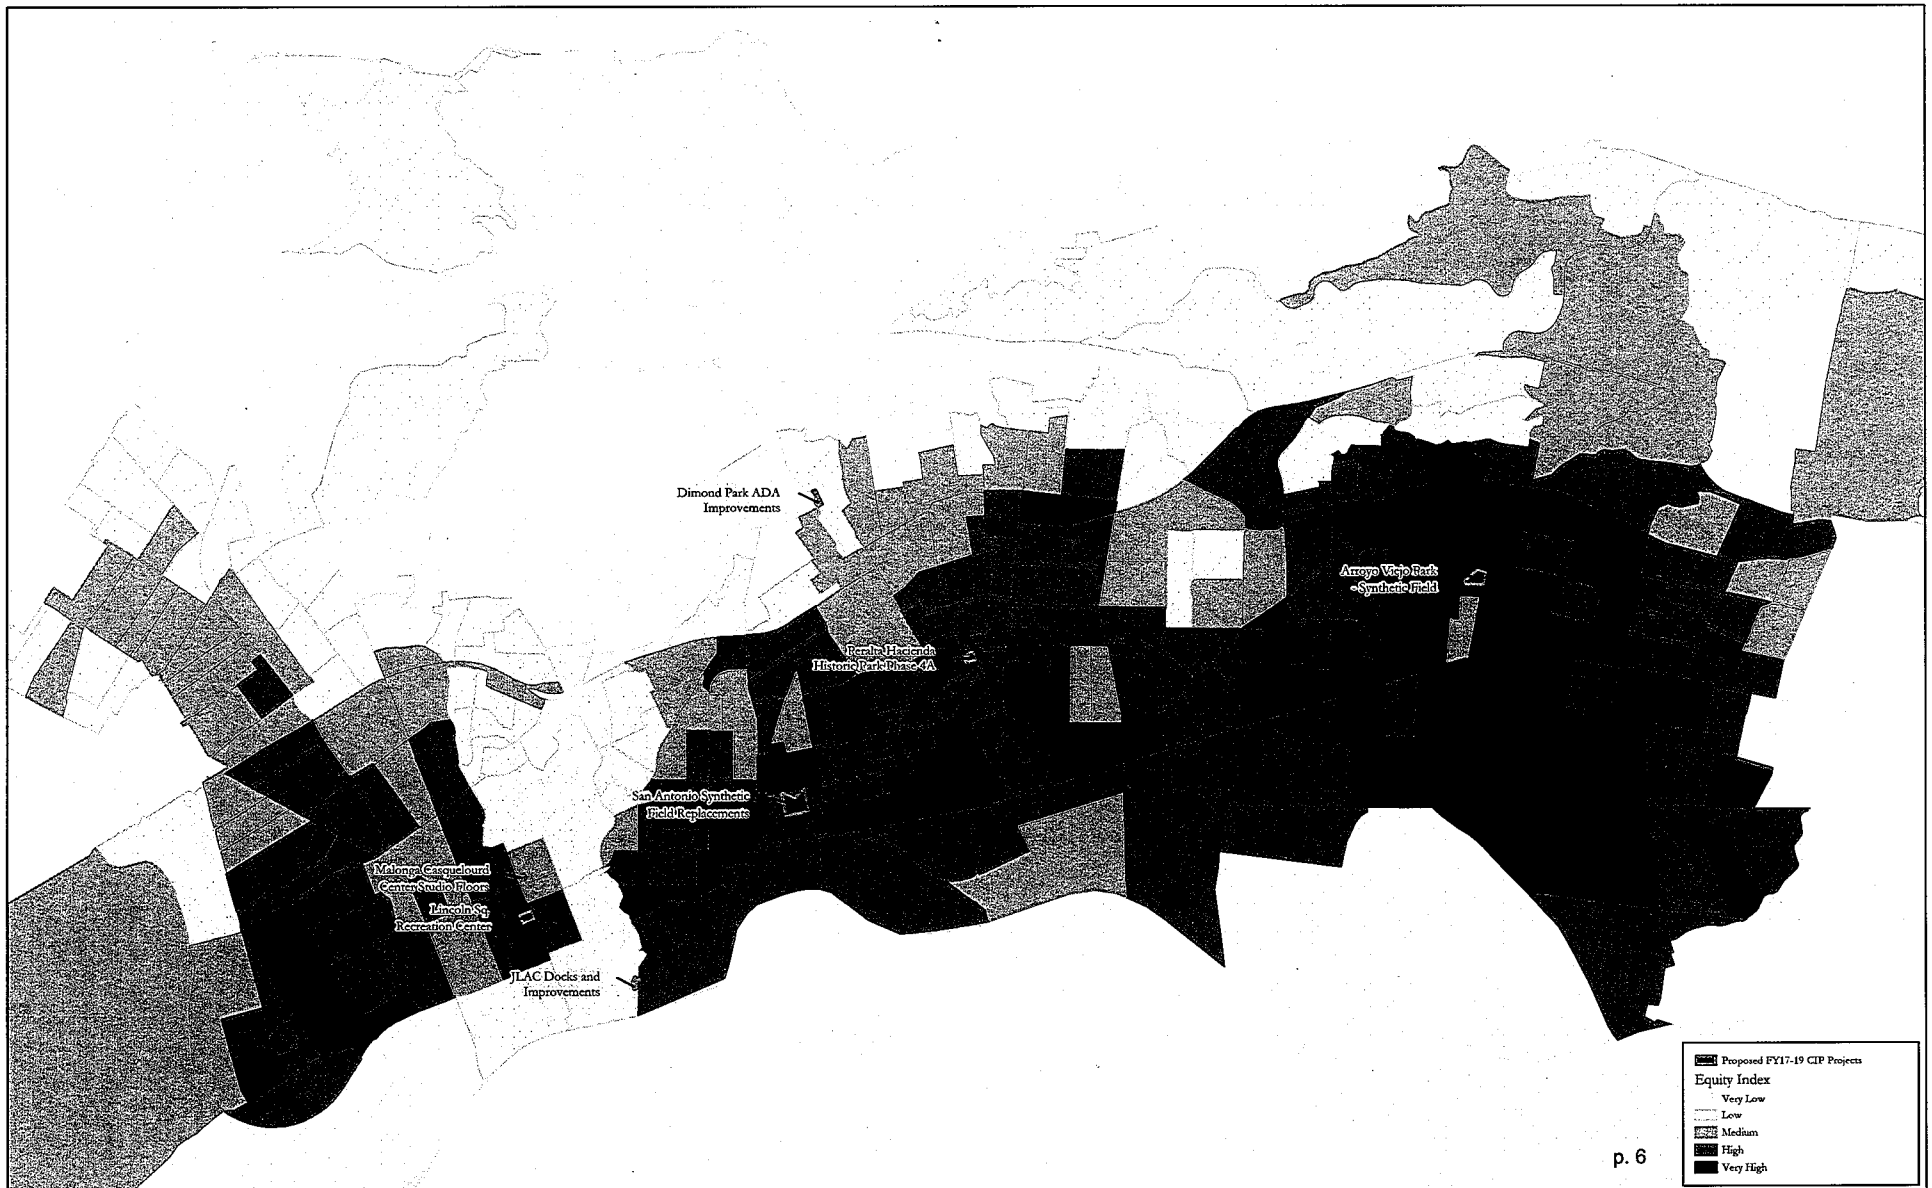

Maintenance:

Projects identified under the Pedestrian Master Plan as priorities represent enhancements that either prolong the existing infrastructure, e.g. sidewalk and roadway repair, upgraded or replacement pedestrian signal heads, or that can be incrementally added to the City's infrastructure operations and maintenance programs.

Energy Consumption, Resiliency and Mobility:

Investment in the City's transportation infrastructure generally, and in the case of the proposed additional/alternate projects, have a neutral to positive impact on energy, in that they encourage non-vehicular transportation, i.e. walking and using transit. Further, maintaining, improving and making streets safer builds resiliency into the system by promoting transportation options.

RESOLUTION NO.

86816

C.M.S.

RESOLUTION AMENDING RESOLUTION NO. 86773 C.M.S. WHICH IDENTIFIED AND APPROVED THE CAPITAL IMPROVEMENT PROJECTS THAT ARE AUTHORIZED FOR FUNDING WITH PROCEEDS OF THE CITY OF OAKLAND GENERAL OBLIGATION BONDS (MEASURE KK), SERIES 2017A-1 AND 2017A-2 TO ADD REFERENCE TO OAKLAND MUNICIPAL CODE CHAPTER 15.70 ORDINANCE NO. 11086 C.M.S.

WHEREAS, an Ordinance authorizing the issuance of infrastructure bonds in an amount not to exceed \$600 Million in general obligation bonds to fund various City infrastructure and affordable housing projects ("Measure KK") was approved by more than two-thirds of the qualified voters of the City at the November 8, 2016, Statewide General Election; and

WHEREAS, at its special City Council meeting of June 19, 2017 the City Council approved Resolution No. 86773 C.M.S. approving certain capital improvement projects for real property including City streets, sidewalks and related infrastructure, as well as City facilities including but not limited to parks, libraries and fire stations (**Exhibit A**); and

WHEREAS, said capital improvement projects are to be funded with City of Oakland General Obligation Bonds (Measure KK), Series 2017A-1 and 2017A-2 (the "Bonds") issued pursuant to Measure KK and the City of Oakland Affordable Housing and Infrastructure Bond Law, Oakland Municipal Code, Chapter 4.54 (the "Bond Law"); and

WHEREAS, ~~Oakland Municipal Code Section 15.70.120(A)~~ Ordinance No. 11086 C.M.S., adopted by the City Council on February 28, 1989 provides: "All appropriations for City capital improvement projects, including all bond projects and all other capital projects funded from other sources excluding sewer repairs funded from sewer service charge fees shall include an amount equal to of the total capital improvement project cost to be dedicated to the Public Art Project Account. Funds appropriated will be used for design services of artists, for the selection, acquisition, purchase, commissioning, installation, examination and/or display of original artworks, for the maintenance of artworks, for educating the public about the artwork and the Cultural Arts Division administrative costs to manage the program"; and that "[t]he one-and-one-half (1.5%) percent appropriation shall include but not be limited to General Fund funded capital improvements, gas tax funded capital improvements, Measure B funded capital improvements, off street parking funded capital improvements and any and all other capital improvements funded from other revenues including grants which may be so appropriated"; and

WHEREAS, ~~Oakland Municipal Code Section 15.70.120(D)~~ Ordinance No. 11086 C.M.S., Section 3(D) excludes capital improvement projects from the ~~Section 15.70.120(A)~~ 3.A 1.5% appropriation requirement if the source funding, or applicable laws or regulations prohibit or restrict use of the funds for the project; and

WHEREAS, Pursuant to Oakland ~~Municipal Code Section 15.70.120(F)~~ Ordinance No. 11086 C.M.S. Section 3(F) - Waiver, at the request of the City Administrator, the City Council may exclude certain capital improvement projects from the provisions of this Article IV by the passage of a resolution authorizing such a waiver; now therefore be it

RESOLVED, That the City Council finds and determines that the foregoing recitals are true and correct and are hereby incorporated herein as findings and determinations of the City Council; and be it

FURTHER RESOLVED, That each of the Measure KK capital improvement projects identified in Resolution No. 86773 C.M.S. shall comply with the requirements of Oakland ~~Municipal Code Chapter 15.70~~ Ordinance No. 11086 C.M.S., except to the extent the City Council determines to exclude one or more such capital improvement projects pursuant to a request of the City Administrator; and be it

FURTHER RESOLVED, That this resolution shall be effective immediately upon passage.

OAKLAND CITY COUNCIL

Approved as to Form and Legality

City Attorney

RESOLUTION NUMBER **86773** - C.M.S.**RESOLUTION IDENTIFYING AND APPROVING THE CAPITAL IMPROVEMENT PROJECTS THAT ARE AUTHORIZED FOR FUNDING WITH PROCEEDS OF THE CITY OF OAKLAND GENERAL OBLIGATION BONDS (MEASURE KK), SERIES 2017A-1 AND 2017A-2; ALLOCATING BOND PROCEEDS IN THE AMOUNT NOT TO EXCEED \$63,000,000 FOR THE APPROVED PROJECTS**

WHEREAS, an Ordinance authorizing the issuance of infrastructure bonds in an amount not to exceed \$600 Million in general obligation bonds to fund various City infrastructure and affordable housing projects ("Measure KK") was approved by more than two-thirds of the qualified voters of the City at the November 8, 2016, Statewide General Election; and

WHEREAS, this City Council intends to issue City of Oakland General Obligation Bonds (Measure KK), Series 2017A-1 and 2017A-2 (the "Bonds") pursuant to Measure KK and the City of Oakland Affordable Housing and Infrastructure Bond Law, Oakland Municipal Code, Chapter 4.54 (the "Bond Law"); and

WHEREAS, pursuant to Section 2(C) of the Measure KK voter approved Ordinance ("the Ordinance"), prior to issuance of the bonds, Council shall identify how the projects authorized for funding with Measure KK bond proceeds address social and geographic equity, address improvements to the City's existing core capital assets, maintain or decrease the City's existing operations and maintenance costs, and address improvements to energy consumption, resiliency and mobility; and

WHEREAS, pursuant to Section 2 of the Ordinance, bond funds will be used to acquire and make improvements to real property such as improvement and rehabilitation of streets, sidewalks and related infrastructure, renovation and rehabilitation of City facilities including libraries, public safety, recreation and other buildings, and acquisition, improvement, rehabilitation, preservation, construction and repair of affordable housing; and

WHEREAS, in compliance with Section 2(C), Exhibit A to this Resolution reflects the results of the investigation conducted by staff of the capital improvement projects proposed for funding with the Bonds, and identifies how the projects address social and geographic equity, address improvements to the City's existing core capital assets, maintain or decrease the City's existing operations and maintenance costs, and address improvements to energy consumption, resiliency and mobility; and

WHEREAS, the capital improvement projects to be funded with the Bonds, and the facts and analysis in support thereof, are identified in the Agenda Report and set forth in Exhibit A hereto; and

WHEREAS, the projects as set forth in Exhibit A meet the criteria established under Section 2(C) of the Ordinance and are eligible activities as described in the Bond Law; and

WHEREAS, the requirements of the California Environmental Quality Act (CEQA), the CEQA Guidelines as prescribed by the Secretary for Resources, and the provisions of the Environmental Review Regulations of the City of Oakland have been satisfied; now, therefore, be it

RESOLVED, That the City Council finds and determines that the foregoing recitals are true and correct and are hereby incorporated herein as findings and determinations of the City Council; and be it

FURTHER RESOLVED, That the City Council hereby approves the capital improvement projects as set forth in Exhibit A to make improvements to real property including City streets, sidewalks and related infrastructure, as well as City facilities including but not limited to parks, libraries and fire stations; and be it

FURTHER RESOLVED, That the City Council hereby authorizes allocation of \$63 million of the proceeds of the Bonds to fund the capital improvement projects as set forth in Exhibit A; and be it

FURTHER RESOLVED, That the funding is being appropriated through the FY 2017 – 2019 budget in Fund 5330 Measure KK: Infrastructure and Affordable Housing; and be it

FURTHER RESOLVED: That the City Council has independently reviewed and considered this environmental determination, and Council finds and determines, based on the information provided in the staff report accompanying this Resolution, that this action complies with CEQA because it is exempt from CEQA pursuant to Section 15183 (projects consistent with community plan or zoning), Section 15183.3 (streamlining infill project), Section 15378 (project), Section 15301 (minor alterations to existing facilities), Section 15302 (replacement or reconstruction of existing structures), Section 15303 (new construction of small structures), and Section 15061(b)(3) (no significant effect on the environment) of the CEQA Guidelines; and be it

FURTHER RESOLVED, That this resolution shall be effective immediately upon passage.

<u>WATER, ENERGY & SEISMIC</u>		Subtotal Water Energy & Seismic		\$1,907,500
		PROPOSED I-BOND FUND (FIRST ISSUE)		\$62,585,000

PROJECTS ANALYSIS

The projects below are recommended for I-Bond funding from the first bond sale. The I-Bond Ordinance requires that prior to issuance of bonds, the City Council shall identify for the specific projects included in such issuance:

1. How the projects address social and geographic equity, provide greater benefit to under-served populations and in geographic areas of greatest need;
2. How the projects address improvements to the City's existing core capital assets;
3. How the projects maintain or decrease the City's existing operations and maintenance costs; and
4. How the projects address improvements to energy consumption, resiliency and mobility.

The investment equity of the I-bond program was analyzed using the Oakland Equity Index (OEI), a metric developed by City of Oakland staff for use in measuring equitable distribution of infrastructure projects. Every census block in the city was assigned an OEI score based on the average of the percentages of the block population that are minorities^[1], low-income^[2], and youth under 10 respectively. Blocks are then assigned the designations of "very low", "low", "medium", "high" or "very high" disadvantage based on what quintile of census tracts their score places them in. Very High and High quintiles are concentrated in East Oakland and West Oakland while Low and Very Low quintiles are concentrated in hills neighborhoods, North Oakland and around Lake Merritt. (See Map "Equity by Population").

Projects were overlaid and evaluated on their geographic reach into areas with higher levels of disadvantage. The maps "Expenditure and Equity" for both Transportation and Building and Facilities identify projects proposed for I-bond funding by their equity status.

The information below provides the analysis required by the Bond Ordinance.

(1) Minorities are defined as persons who identify as any of the following groups defined by the Census Bureau: American Indian or Pacific Islander alone, Asian alone, Black or African American alone, Hispanic or Latino of any race, Native Hawaiian or Pacific Islander alone, Some Other Race or Two or More Races. (2) Low-income is defined as those making at or below 200% of the Federal Poverty Level

FACILITIES

FIRE

BUILDINGS AND FACILITIES

The replacements, renovations, and improvements proposed for OFD are necessary to remedy facility issues which impact OFD's emergency response and to provide firefighters with facilities that are safe and sanitary places for them to live and train while they are on duty serving the residents and visitors of the City of Oakland.

Social and Geographical Equity:

The proposed OFD's facility replacements, renovations and improvement are necessary for OFD to maintain its network of fire stations and facilities while maintaining a consistent level of service throughout the City of Oakland. Additionally, they are necessary to remedy facility issues which impact OFD's emergency response and to provide firefighters with facilities that are safe and sanitary places for them to live and train while they are on duty serving all the residents and visitors of the City of Oakland. The proposed station replacements No. 4 and No. 29 serve high and very high disadvantaged neighborhoods.

Preservation of Capital Assets:

OFD facilities are core capital assets that are tied to OFD's emergency response capabilities for all Oakland Citizens. The OFD station replacements, renovations and improvements will keep these core capital assets functional well into the future.

Maintenance:

By addressing years of deferred maintenance, all the proposed projects will decrease maintenance costs well into the future. The **Apron and Hardscape Replacement** at six stations and the Training Center will make these facilities safer and accessible for continued use. The **Roof Replacements** at four stations will keep stations functional and will prevent severe and long term water damage to the facilities. The Replacement of **Telescopic Apparatus Doors** allows speedy and safe egress of fire apparatus and improves energy consumption by sealing out heat, cold, and inclement weather. The **Feasibility Study, Right of Way Acquisition Options and Preliminary Design** for replacement of Fire Stations Nos. 4 and 29 are required as the current facilities cannot be brought up to current firefighting/emergency response standards as stipulated by the National Fire Protection Association (NFPA).

Energy Consumption, Resiliency and Mobility:

The proposed projects are an opportunity to improve OFDs aging building stock to not only improve firefighting/emergency response capabilities, but also to implement changes that would bring the buildings in line with current California's Building Energy Efficiency Standards (California Code of Regulations, Title 24), the 2016 Update to the Energy and Climate Action Plan, and would therefore have a potential to reduce energy consumption in OFD Fire Stations.

Fire stations serve as the "base" for OFDs emergency response, be it an incident involving a single person/structure, or an incident or disaster such as the Loma Prieta Earthquake and the Oakland Hills Firestorm. Delaying these repairs increases risks to both OFD personnel and the residents of Oakland, as well as impacts the City's and the greater Oakland community's ability to respond and recover from a large scale disaster.

The purpose of the City of Oakland 2016-2021 Local Hazard Mitigation Plan is "for the City to become more resilient and disaster-safe" additionally, one of the goals of the Plan is to "protect the health and safety of Oakland residents and others in the city by minimizing potential loss of life and injury caused by safety hazards." The projects identified with the Oakland Fire Department are consistent with the goal and purpose of the Local Hazard Mitigation Plan, and with several strategies highlighted therein, including: "Green Infrastructure Planning", "Assessment and retrofits of Critical Facilities and Infrastructure/Infrastructure Operators", "Implement Energy Assurance Plan", and "Continuity of Operations Planning".

The "resilience values" as stated in Resilient Oakland also align to OFDs projects. The Fire Station improvement projects would "improve the continuity of critical services". Moreover, the OFDs planning efforts for the OFD Training Center and Fire Stations 4 and 29 are in alignment with the resilience value of "fostering long-term and integrated planning".

POLICE

BUILDINGS AND FACILITIES

The existing Police Administration Building (PAB) is inadequate and does not meet the requirements of an essential facility. Phase I of the feasibility study which includes the determination of OPD program and space requirements will complete in June/July 2017. The proposed Phase II Feasibility Study will survey potential real estate acquisition options.

Social and Geographic Equity:

The proposed Phase II Feasibility Study for a new PAB will support the OPD's public safety efforts citywide.

Preservation of Capital Assets:

The PAB is a core capital assets that supports OPD's public safety capabilities for all of Oakland. The existing PAB does not meet the Essential Services Seismic Safety Act of 1986. A new PAB will meet the Essential Services requirement while providing an updated contemporary building that provides the required space for public safety service.

Maintenance:

A new PAB will provide an up to date building that with ample space for both the existing Eastmont Substation and the PAB while meeting the Essential Services Seismic Safety Act of 1986, and significantly reducing will maintenance needs currently present at both existing buildings.

Energy, Consumption, Resiliency and Mobility:

A new PAB will provide a contemporary facility that will meet LEED standards and therefore reduce energy consumption while meeting Essential Services Seismic Safety requirements and the space needs of OPD.

LIBRARY

BUILDINGS AND FACILITIES

The proposed **Library Branch Improvements - Asian, Brookfield, West Oakland, and Main** - are essential to keeping these core capital assets safe, accessible and able to meet the needs of Oakland's residents.

Social and Geographical Equity:

The Asian Branch Library is in a highly underserved low income, limited English speaking, and high density area of the downtown region serving a larglet Asian American community. It is over 21 years old and is the 2nd busiest branch in the system. The Brookfield Branch is in one of the most isolated neighborhoods in East Oakland serving a largley African American and growing Spanish speaking community that is low-income and primarily renters. The West Oakland Branch is in a very high underserved area of Oakland, large quantity of single-parent families, racially and economically diverse and transitioning, low-income and geographically isolated by I-880, I-980, and I-580 freeways. The Main Library is over 65 years old and serves all of the city's residents at a systemwide level. The immediate neighborhood is a mixed race/ethnicity population, close to Chinatown and has limited English proficiency. Households, again are mixed between lower-income renters and higher-income condominium owners. Few households in this area have vehicles.

Preservation of Capital Assets:

These four library branches are core community and capital assets that range in age from 21-65 years. All four branches require a variety of renovations including upgrades to lighting, safety, access, and to all electrical and data infrastructure to meet new technological needs, and code requirements. These renovations will ensure that these libraries remain open, provide up-to-date library services and increase accessibility and safety for residents and staff well into the future.

Maintenance:

By addressing years of deferred maintenance, the proposed library renovations will decrease maintenance costs well into the future. The renovations include upgrades to lighting, safety, access, and to all electrical and data infrastructure to meet new technological needs, and code requirements. The enhancements will decrease the City's operational and maintenance costs due to breakage and replacement of panels, circuit breakers, painting of graffiti, overall maintenance

Energy Consumption, Resiliency and Mobility:

The proposed library renovations will help to bring the facilities in line with current California's Building Energy Efficiency Standards (California Code of Regulations, Title 24), and will provide electrical and technological infrastructure upgrades and efficiencies, providing up-to-date library services, while increasing accessibility and safety for residents and staff well into the future.

PARKS & RECREATION

BUILDINGS AND FACILITIES

The proposed Park and Recreation facility renovations and improvements include three recreation facilities, **Rainbow Recreation Center, Tassafaronga Recreation Center Gym, Lions Pool at Diamond Park**, and four **Head Start facilities at Brookfield, Arroyo, Manzanita and San Antonio** recreation centers. The improvements are addressing deferred maintenance, growing programming needs, and federally mandated safety criteria that have rendered some of the facilities inoperable. The renovations will also provide the opportunity for additional services.

Social and Geographical Equity:

The **Rainbow and Tassafaronga Recreation Centers** are located in an areas of high ethnic diversity, low income, limited English speaking neighborhoods. the Center is aged, in need of upgrades, and has been previously identified for an expansion project that has gone through a robust community engagement process. This project requires additional funding for construction of the replacement of the facility that will allow for increased services to the community. In the case of **Lions Pool**, it is one of three pools in Oakland that is open year-around. It is therefore used by Oakland residents, adults and youth, City wide for swim instruction, rehabilitation for those who are disabled or injured, and general swimming recreation. **The Head Start Program facilities** serve Oakland's most vulnerable families. The sites proposed for improvements are located in east and central Oakland neighborhoods that have some of the highest child poverty rates in the city: **Brookfield** (94606 – Child Poverty Rate: 39.6%); **Manzanita** and **San Antonio** Park (94603 – Child Poverty Rate: 28.7%) and **Arroyo Viejo** (94605 – Child Poverty Rate: 30.5%). In addition, the zip code areas of 94603 and 94605 have among the highest incidences of crime, according to a recent community assessment, and are neighborhoods of vulnerability and greatest need.

Preservation of Capital Assets:

The proposed projects will provide renovations and improvements to core capital assets that provide a high volume of programming and events for underserved communities. The **Rainbow Recreation Center** project will replace a majority of the facility that will allow for increased services to the community and provide a new building that will serve the community well into the future. The improvements at the **Tassafaronga Gym, Lions Pool and four Head Start facilities** will address years of deferred maintenance that have either caused the closure or threatens the closure of these resources. The improvements will provide safe, useable facilities that will extend the useful life of each and in some cases provide capacity for additional programming.

Maintenance:

After years of deferred maintenance, the renovations and improvements of these OPR facilities will address many significant needs and prevent further damage to the facilities. The **Rainbow Recreation Center** project will improve and modernize the facility, which will decrease maintenance needs. Currently the condition of **Lions Pool** presents hazards to users that have resulted in litigation. The pool deck has many large breaks and is uneven. The site is slated for closure due to infrastructure instability. Fixing the roof and current water damage at the **Tassafaronga Gym** will prevent further water damage. The proposed **Head Start** facility renovations will address deteriorating facilities and years of deferred maintenance by replacing play structures, safety surfacing, flooring, windows, fencing and providing new toddler restrooms, which in turn will allow the facilities to stay open and decrease maintenance costs. Additionally, the improvements will in some cases lower operations cost by removing hazards and liability risks.

Energy Consumption, Resiliency and Mobility:

Modern infrastructure at Rainbow Recreation Center and park will incorporate energy efficiencies and stormwater treatment that will reduce resource consumption, clean stormwater, and will be compliant with current accessibility laws. At Lions Pool new pool technology as it relates to heating, filtration and water quality will lend to reduction of energy costs and resource consumption. The project will also bring the pool into ADA compliance. Improvements to the Tassafaronga Gym will allow the facility to be reopened, which will provide the this very underserved neighborhood a safe place for youth to gather, deliver opportunities for fitness and health as well social engagement. Improvements to the Head Start facilities will increase water and energy efficiencies in renovated/new restrooms, and replaced windows. In addition, investments in the Head Start facilities will support the Mayor's cradle-to-career community initiative. The Oakland Promise. Ensuring the proposed improvements are made will not only provide greater access to high-quality, safe, and nurturing learning and recreation environments, but will be a further investment in the city's core "human and social" assets – its diverse families and children.

PARKS & OPEN SPACE The four athletic fields proposed for lighting upgrades are **Curt Flood, Golden Gate, Lowell, and Tassafaronga**. The project will replace the wiring and light fixtures that have been vandalized and stolen.

Social and Geographical Equity:

The **Ballfield Wiring** projects are located at four ballfields (Curt Flood, Golden Gate, Lowell, and Tassafaronga) in highly underserved areas of west and east Oakland in neighborhoods of high ethnic diversity and primarily low income. These fields provide sorely needed recreational opportunities for youth and adults in these neighborhoods.

Preservation of Capital Assets:

Functional lighting will allow for night play decreasing negative use of fields such as encampments, drinking and vandalism, and thereby decreasing vandalism and sustaining the condition of the fields.

Maintenance:

The project will provide functional lighting at four ballfields with anti-theft technology reducing future maintenance and replacement costs.

Energy Consumption, Resiliency and Mobility:

The project will provide energy efficient light fixtures and allow access to the fields for night games, which will help to decrease crime and blight, while providing opportunity for night time recreation.

HUMAN SERVICES

BUILDINGS AND FACILITIES

The Henry Robinson Multi Service Center (HRMSC) located in the Touraine Hotel at 559 – 16th Street, serves over 300 literally homeless adults annually, many directly from encampments or places not fit for human habitation.

Social and Geographic Equity:

The **Henry Robinson Multi Service Center (HRMSC)** located in the Touraine Hotel at 559 – 16th Street, in a highly underserved area. A profile of the clients show: 60% are male; 34% are between the ages of 45 – 54; 83% are African-American; and 48% have mental illness, with over 40% have 2+ physical/mental conditions. In addition, the Henry Robinson Multi Service Center program serves clients that are at a higher risk of infectious diseases and other health conditions than the general public.

Preservation of Capital Assets:

The inside temperature at HRMSC is often extreme during summer months, making work nearly impossible for the homeless and service staff. The replacement of the degraded 20-ton HVAC system will provide a comfortable environment and complement the \$1.5 million in capital improvements completed in 2012.

Maintenance:

In FY 2015 and FY 2016 the maintenance and repair costs for the current HVAC system at HRMSC was close to \$35,000 on top of the service agreement costs. Having a system that does not require such costly repairs each year will create savings for the City.

Energy Consumption, Resiliency and Mobility:

A new HVAC system at HRMSC will address the swings in temperature, reduce yearly maintenance/repair costs and provide a more livable/workable environment for clients and service staff. The new system will be more energy efficient than the current HVAC system which is over 20 years old.

ANIMAL SERVICES

BUILDINGS AND FACILITIES Social and Geographic Equity:

Oakland Animal Services provides services to animals and animal owners across Oakland. The shelter is Oakland's only "open admissions" shelter that accepts homeless, injured, orphaned, unwanted, lost, abandoned and mistreated animals.

Preservation of Capital Assets:

The proposed HVAC and Energy Management System replacement project will allow air quality and temperature control that will help to prevent the spread of communicable diseases between animals and staff, thereby making the facility useable into the future.

Maintenance:

The current HVAC and EMS are at the end of their useful life and do not work properly. They require constant maintenance and adjustments. Replacement of these systems will improve air quality in the 27,000 s.f. building and decrease maintenance costs.

Energy Consumption, Resiliency and Mobility:

The new HVAC and EMS will be more energy efficient and provide healthier environment for the animals and staff.

TRANSPORTATION

Transportation projects funded by the Infrastructure Bond include both "Great Streets" and "Safe Streets" projects. Great Streets includes paving and complete streets projects, and Safe Streets projects include Bicycle Master Plan and Safe Routes to Schools projects. Most of the bond proceeds proposed to fund Transportation projects (\$25 million) directly address Pavement Resurfacing by expediting the completion of the existing five year paving plan. The remainder of the Transportation portion of the bond proceeds (\$15.6 million) fund CIP projects for curb ramps installation, sidewalk construction, and complete street, bicycle master plan, and safe routes to schools projects. More importantly, this latter category funds the local match for grants received for complete streets and street safety projects throughout the City. Finally, Pavement Program funds, Transportation Matching Grant funds and Streetscape funds will also be used for installation of Water Quality Control Board full trash capture systems as appropriate.

Social and Geographic Equity:

The investment equity of the I-bond program was analyzed using the Oakland Equity Index (OEI), a metric developed by City of Oakland staff for use in measuring equitable distribution of infrastructure projects. Every census block in the city was assigned an OEI score based on the average of the percentages of the block population that are minorities^[1], low-income^[2], and youth under 10 respectively. Blocks are then assigned the designations of "very low", "low" "medium" "high" or "very high" disadvantage based on what quintile of census tracts their score places them in. Very High and High quintiles are concentrated in East Oakland and West Oakland while Low and Very Low quintiles are concentrated in hills neighborhoods, North Oakland and around Lake Merritt. (See Map "Equity by Population").

Projects were overlaid and evaluated on their geographic reach into areas with higher levels of disadvantage. The map "Expenditure and Equity" identifies transportation projects proposed for I-bond funding by their equity status. Projects are presented in two categories, Paving Projects and Transportation CIP Projects. Mapping analysis shows that the majority of projects are located in Very High and High quintiles, and the smallest percentage is located in the Very Low quintile. However, projects are distributed through all neighborhoods in Oakland.

Paving projects are typically scattered throughout Oakland based on paving need, while Transportation CIP projects, particularly those funded by grants, are focused in high and very high quintiles. Some of the largest grant funded projects, such as the International Blvd. BRT-Supportive Pedestrian Improvements, the Fruitvale Alive Gap Closure, and the Highway Safety Improvement Program (HSIP) projects reach deep into parts of East Oakland that score the most disadvantaged on the Oakland Equity Index. Others, such as 14th St. Safe Routes to the City, provide a gateway from West Oakland to job and resource centers downtown.

(1) Minorities are defined as persons who identify as any of the following groups defined by the Census Bureau: American Indian or Pacific Islander alone, Asian alone, Black or African American alone, Hispanic or Latino of any race, Native Hawaiian or Pacific Islander alone, Some Other Race or Two or More Races. (2) Low-income is defined as those making at or below 200% of the Federal Poverty Level

Preservation of Capital Assets:

The City's streets are a core capital asset that allows for the safe, efficient movement of people and goods throughout Oakland. All of the I-bond funds for transportation will directly address preservation of, or an improvement to these core capital assets. The majority of bond proceeds proposed for transportation (\$25 million) will fund expedited completion of the 5 year Pavement Resurfacing Program, and also will fund Paving of Bicycle Plan Streets. Funds will also repair the City's existing Sidewalks and install ADA compliant Curb Ramps. Bond funds will also leverage grant funded projects that will improve existing streets; these projects will increase safety for bicyclists, pedestrians, and drivers by installation of crossing signals, signage, bike lanes, pedestrian crossing improvements, paving, etc. Finally, this program will implement Safe Routes to Schools improvements near up to eight elementary and middle schools in Oakland.

Maintenance:

The transportation projects proposed in the I-bond will decrease the City's operations and maintenance cost by repairing street infrastructure to a "new" condition. In the case of Pavement Resurfacing, Operations & Maintenance (O&M) and capital costs both increase exponentially as pavement quality decreases. By expediting completion of the citywide street resurfacing program, it will decrease the long term capital costs by resurfacing streets that are in fair/good condition before they fall into poor conditions that can drastically increase the cost for repair. Likewise the O&M costs on poor/failing streets are much higher than recently resurfaced ones, which require more pothole repair and other labor intensive "band aids. On a citywide basis the total O&M need will decrease. While it is very unlikely that the City's O&M needs will decrease below current O&M budgets (because they are currently relatively small), it is likely that a greater percentage of O&M budgets can be devoted to system preservation enhancements (such as crack sealing and skim coating) rather than short term solutions to catastrophic failures such as pothole patching.

Energy Consumption:

Investment in the City's streets infrastructure generally, and in the proposed I-bond projects specifically, has a neutral to positive impact on overall energy consumption for the following reasons:

- a. Investment in resurfacing city streets benefits not only autos, but also low energy consuming transit and bicycle transportation options.
- b. Most of the non-paving investments explicitly improve the safety and ease of the pedestrian, bicycle and transit environment, and increase the mode share of transportation alternatives to the single occupant vehicle.
- c. Investments are concentrated in areas of highest density and highest non-auto mode share.

Resiliency:

The maintenance and improvement of a multi-modal transportation network builds resiliency into the system by promoting transportation options. In addition, while maintenance (including street resurfacing) occurs throughout the City, no large new transportation projects are proposed in areas of high fire danger or sea-level rise danger.

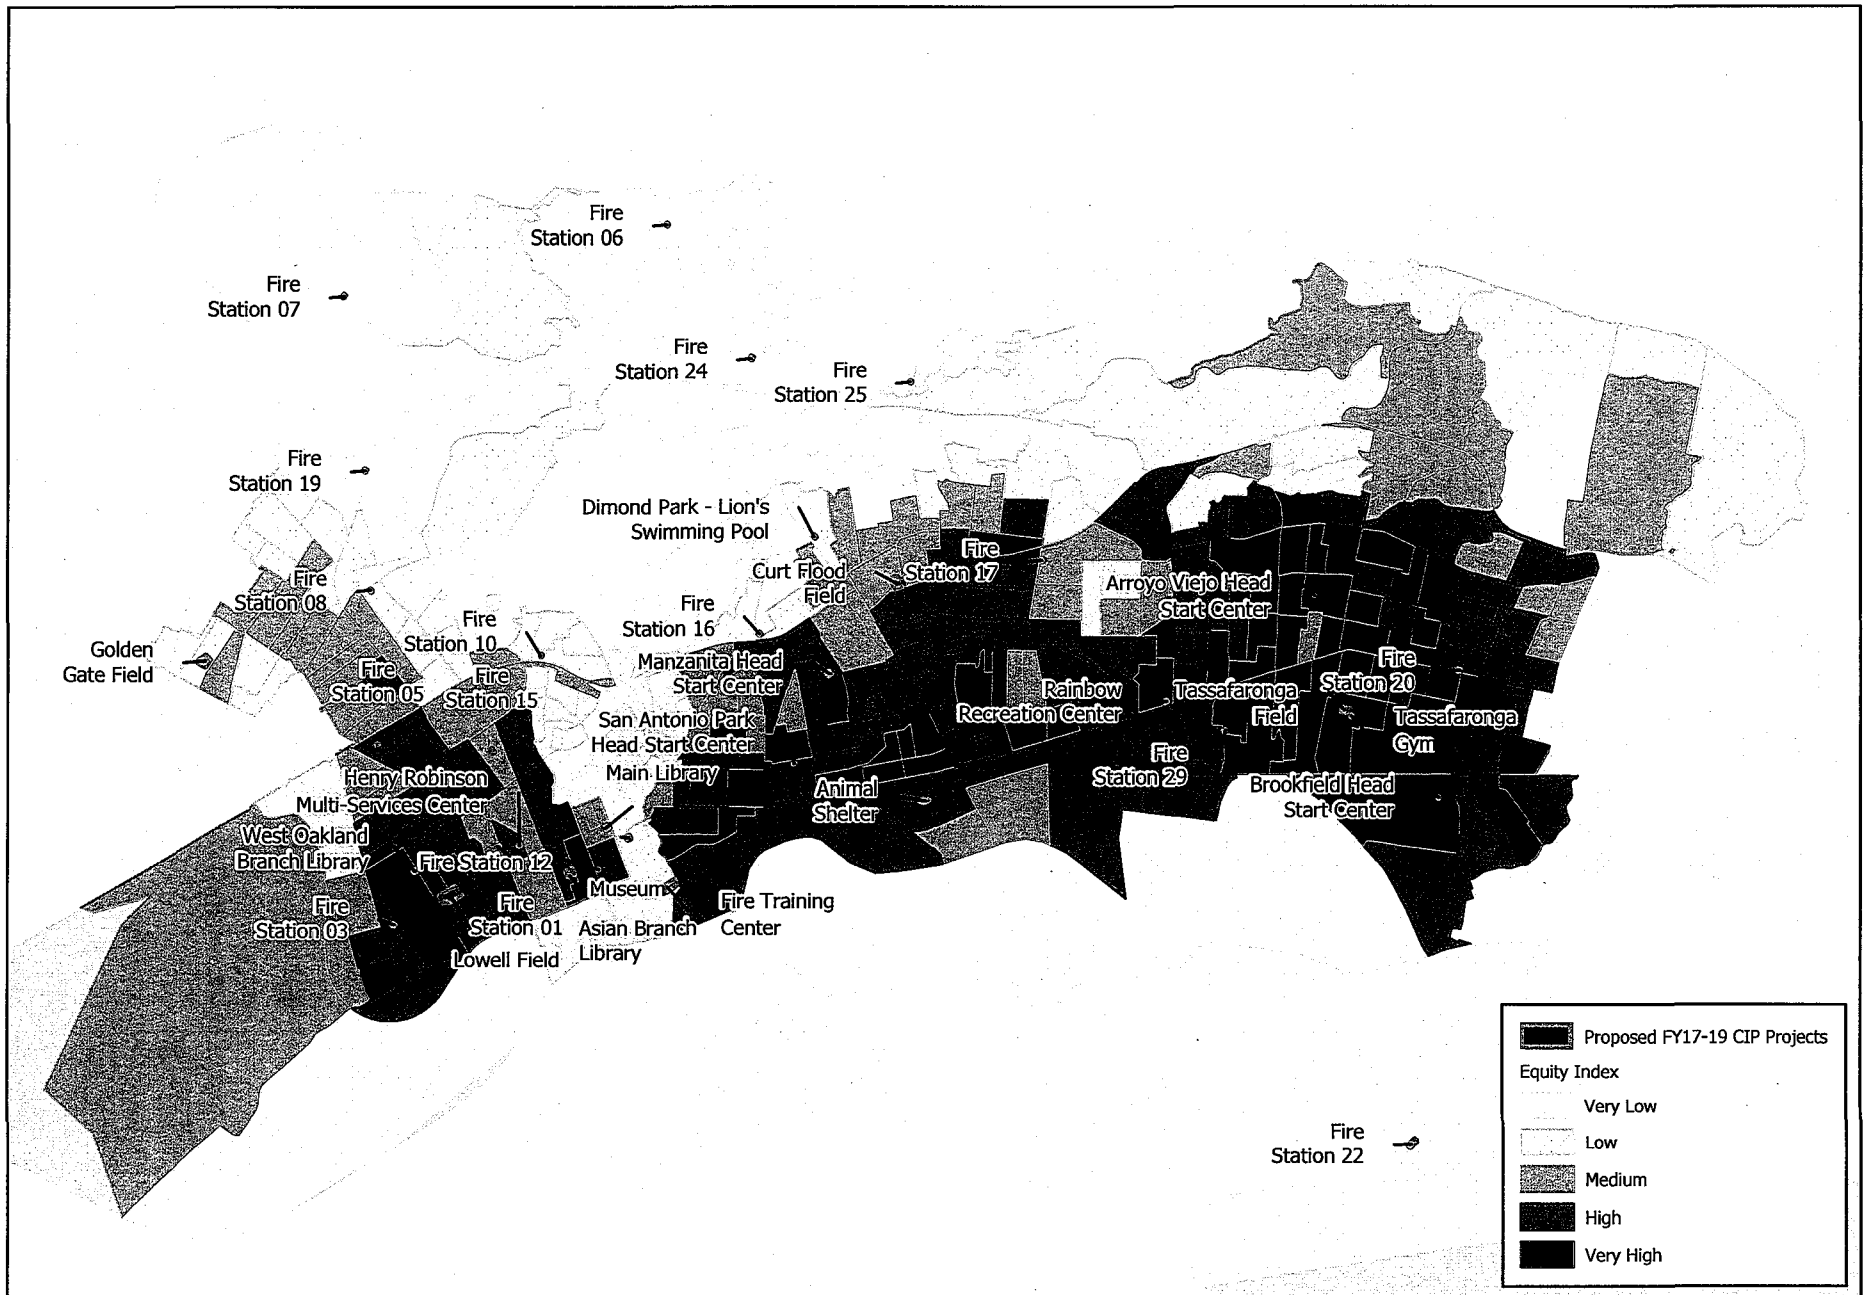

Mobility:

The projects proposed for I-bond funding likewise enhance mobility for all Oaklanders in all neighborhoods for the following reasons:

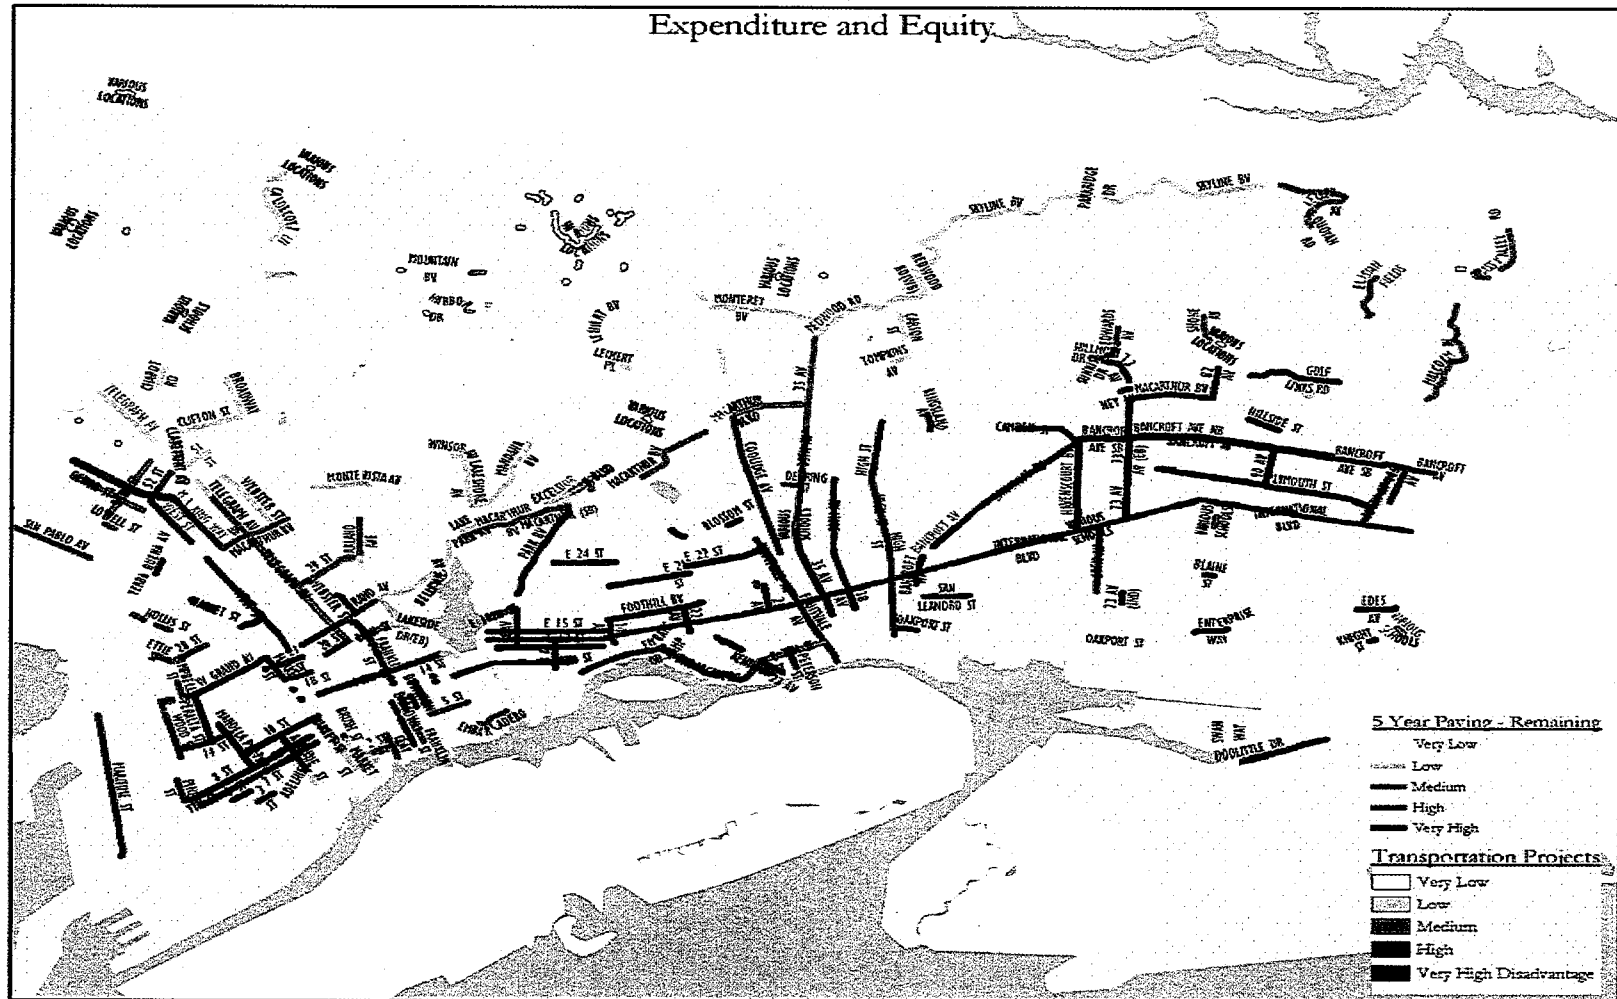

Pavement Resurfacing improvements are planned for all neighborhoods to enhance mobility for all modes, not only autos, but also the bicyclists and transit vehicles that use these roads, and the pedestrians who use the sidewalks and curb ramps that are also improved as a part of any paving project.

Other Transportation investments, particularly complete streets, bicycle master plan, and pedestrian investments, are concentrated in areas of high density and along corridors well served by transit. These projects explicitly seek to increase the safety, utility and appeal of walking, biking and using transit as a valid alternative to driving.

Proposed FY17-19 CIP Projects - Facilities and Parks
