Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Honorable Planning Commissioners

Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Honorable Planning Commissioners

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Maria Victoria Ornela

We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

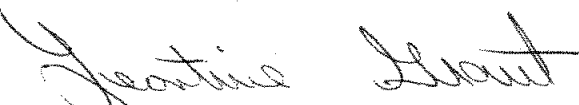

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Honorable Planning Commissioners

Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Honorable Planning Commissioners

Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Marga Morales

Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May – essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP – would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Mr & Mrs Eugene D. Smith
Amie

Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Honorable Planning Commissioners

Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May – essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.

I am concerned that my community's health will continue to suffer from an accumulation of pollution burdens that seems to be dumped in East Oakland. East Oakland is in the midst of a transformation. As residents, we are visioning a livable, vibrant community. However, if human crematoriums are not required to obtain a CUP, the community has no opportunity for voicing our concerns, having appropriate environmental review, and putting a check on operations like crematoriums. I do not want this facility to locate in close proximity to food and other retail establishments, and within a mile of schools, churches and residential neighborhoods. As the Alameda County Public Health Department stated, a 'CUP process is necessary to protect community health.'

If the City makes the Emergency Ordinance permanent, all crematoriums would be required to first obtain a Conditional Use Permit, exactly what the Emergency Ordinance was meant to do. This will allow public notice and broader public process. Additionally, it would effectively stop crematorium from operating and emitting Mercury and Dioxins without first undergoing an environmental review under the California Environmental Quality Act ("CEQA"). These processes would provide the City and the affected public with critical information about the facility, including the effects it may have on the environment, public health, and the local economy.

We urge you to make the Emergency Ordinance permanent, thus requiring any crematorium wishing to operate in Oakland to first obtain a Major Conditional Use permit.

Sincerely,

Honorable Planning Commissioners

Re: Make the Interim Ordinance Permanent

Dear Vice Mayor Reid, and Honorable Councilmember's:

I want to thank you for taking the responsible action and your unanimous vote on the May 15th 2012 Interim Control Ordinance around Crematorium Activity in the City of Oakland. The community must be assured that staff is adhering to the legislation as it relates to Crematorium activities in Oakland and the impact on our communities. We as members of the community and in closest proximity to the proposed activity would urge that the next steps be taken quickly to ensure our quality of life is not compromised. We also are concerned about decisions made in the dark and without our input.

The City Council adopted an important Emergency Ordinance in May 2012, saying very clearly that if a crematorium wants to begin operating in Oakland, it has to get a Conditional Use Permit (CUP). The City intends to make the Emergency Ordinance permanent before it expires in May 2013, and I am writing today to urge the City to do so without delay.

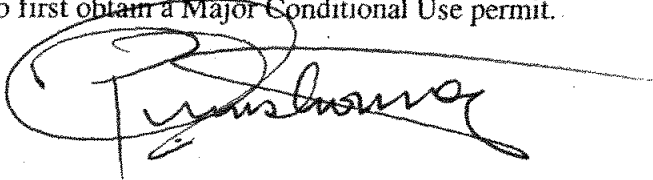

On August 29, 2012, the Oakland City Planning Commission heard an appeal by Stewart Enterprises, which argued that the Emergency Ordinance did not apply to its plan to begin human cremation in East Oakland. As a community member and resident of Oakland, I want to thank you for denying that appeal. I understand that since then, Stewart Enterprises has sued the City in another attempt to move forward with its crematorium without allowing my community a chance to understand the impacts or to have reasonable conditions put on the crematorium's operations. I write to express my continued concern. Allowing the Emergency Ordinance to expire this May -- essentially allowing any crematorium in Oakland to move in without first obtaining a Major CUP -- would be a travesty of environmental justice.
