Christine Calabrese, ADA Programs Manager, PWA

**Re: Biannual Curb Ramp Activities Report: January 1, 2012 to June 30, 2012 [DRAFT]**

---

## INTRODUCTION

This report provides detailed information about City of Oakland curb ramp activities for the six-month period beginning January 1, 2012 and ending June 30, 2012. The report provides updates on implementation of the City's ADA Curb Ramp Transition Plan and construction or reconstruction of curb ramps by the City and others. The Public Works Agency (PWA), Department of Engineering and Construction (DEC), administers City curb ramp programs. The Right of Way Management (ROWM) Division is responsible for developing curb ramp standards that will be applicable to all public right of way improvements under the City's jurisdiction, including work performed by the City and by others (private developers, utility companies, etc.). ROWM administers the City's on-call and infill (corridor) curb ramp construction budgets, inspects curb ramp construction by the City or others, and maintains the City's curb ramp Geographic Information System (GIS) database. The ADA Programs Division and Mayor's Commission on Persons with Disabilities (MCPD) provide direct support, technical assistance, and oversight for DEC right-of-way access compliance programs.

## BACKGROUND

ADA Title II regulations stipulate that when structural changes to facilities are necessary to achieve program accessibility, a public entity that employs 50 or more persons must develop, within six months of January 26, 1992, a transition plan setting forth the steps necessary to complete such changes. That plan is to identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities; describe in detail the methods that will be used to make the facilities accessible; specify the schedule for taking the steps necessary to achieve compliance; and indicate the official responsible for implementation of the plan. In January 1996, the City prepared its transition plan with respect to buildings and facilities.

If a public entity has responsibility or authority over streets, roads, or walkways, then its ADA transition plan must include a schedule for providing curb ramps or other sloped areas where pedestrian pathways (sidewalks) cross curbs, giving priority to walkways serving entities covered by the ADA, including State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas [28 C.F.R. § 35.150(d)(2)].

The 1996 Buildings and Facilities Transition Plan included curb ramp needs for off-street facilities and priorities for curb ramp installation at existing street corners. The Buildings and Facilities Transition Plan incorporated by reference a citywide curb ramp survey completed in 1994. Another citywide curb ramp survey was completed in 2002. The City operated robust curb ramp programs from 1996 to

2007 but no formal changes were made to the 1996 Plan. Pursuant to *Fairfield v. Oakland* (2007), the ADA Programs Division developed a separate ADA Curb Ramp Transition Plan to formalize long-standing curb ramp policies, practices and procedures and to adopt new ones as necessary to substantially comply with federal mandates.

Soon after passage of the ADA, the City recognized that it would take some time to complete a curb ramp transition plan, which requires construction of ramps at approximately 18,047 locations (current total). Curb ramp locations are counted individually. Certain street corners will accommodate dual (two) directional ramps and will be counted as two locations. Other street corners will accommodate only one diagonal or directional ramp and will be counted as one location. The total number of possible curb ramp locations increases when existing diagonal curb ramps are replaced with dual directional ramps; when newly improved streets are added to the City's curb ramp database; and when corrections and updates are made to the original database.

In Fiscal Year 1990-91, the City launched the On-Call Curb Ramp Program to ensure access for people with disabilities living and working in Oakland during the lengthy transition period. The Program is currently funded by the City's general fund and state gas tax funds. The On-Call Curb Ramp Program constructs curb ramps on an individual basis in response to requests from qualified persons with disabilities. Generally, requests come from residents with disabilities who wish to get from their home or work place to transportation, school, medical facilities or other areas to accommodate their activities of daily living.

Under the Curb Ramp Transition Plan, the City commits to install 500 curb ramps, and anticipates that others will install 150 curb ramps, on an average annual basis. The City conducts curb ramp infill activities using a corridor-based approach. The following location (land use) priorities for curb ramp infill activities are based upon U.S. Department of Justice ADA Title II Regulations, the City of Oakland General Plan (1998), and best practices of other jurisdictions:

- Tier 1: Transit streets and centers
- Tier 2: Public facilities
- Tier 3: Privately-owned public accommodations
- Tier 4: Locations that do not fall into any of the above groups but are within 100 feet of a sidewalk route.
- Tier 5: Locations that do not fall into any of the above groups and are greater than 100 feet from a sidewalk route. These locations are neither counted as "possible locations" nor scheduled for improvement.

The City conducts various other capital improvement programs under which curb ramps are constructed or reconstructed, such as streetscape, street resurfacing, and sidewalk repair projects. Curb ramp construction and reconstruction is also completed through private improvements inspected by City staff.

## STATUS REPORTS

**Table 1: Citywide Curb Ramp Status All Locations**

The following summarizes the Citywide Curb Ramp Program status through June 2012. These numbers may not reflect current field conditions or include all curb ramps constructed or reconstructed to date. Surveying and data collection is ongoing. The numbers reported below differ from the April 2011 report due to recent database reconciliation efforts. Future reports will continue to display numbers from the master curb ramp GIS layer for improved integration with the Citywide Curb Ramp Program Update Map.

**Table 1: Citywide Curb Ramp Status All Locations**

	Dec 2011	Change	Jun - 2012	June 2012 Percent of Total Locations
Compliant Curb Ramp Locations	7,124	197	7,321	41%
Outdated Curb Ramp Locations	2,762	-61	2,701	15%
No Curb Ramp Locations	8,092	-67	8,025	44%
<b>Total Locations</b>	<b>17,978</b>	<b>69</b>	<b>18,047</b>	<b>100%</b>

NOTE: See attached Citywide Curb Ramp Program Update Map as of June 2012.

**Table 2: Summary of Curb Ramps Constructed or Reconstructed Annually**

Fiscal Year	City	Others	Total
2008-2009	300	216	566
2009-2010	435	140	575
2010-2011	553	6	559
2011-2012	478	0	478

NOTE: The total curb ramps reported in the above Table 2 represent confirmed locations. There is typically a lag time between the time curb ramps are constructed and the time they are reported and confirmed. In addition, the number of curb ramps reported by others includes constructed locations by private development, which is impacted by the current economic downturn.

**Table 3: Curb Ramps Constructed**
