RE: Errata to the 1431 Franklin Street Residential Project CEQA Analysis

Urban Planning Partners has prepared this Errata to the 1421 Franklin Street Residential Project CEQA Analysis published December 2022. This Errata Memorandum corrects some erroneous errors in Section V.D, Cultural and Historic Resources. The following pages are revised as shown in the attached pages. Revisions are highlighted by a vertical line in the margin and new text is shown with <u>underline</u> and deleted text is shown as <u>strikethrough</u>.

- Pages 88-90, 153, and 156 have been revised for correction and clarification.
- Attachment H is replaced in its entirety.

None of the revisions modify any of the findings of the CEQA analysis as they do not trigger the need to modify any Standard Conditions of Approval, result in the need for any new mitigation measures or different impact findings.

D. CULTURAL AND HISTORIC RESOURCES

Surrounding Historic Resources

The project site is located at mid-block on the west side of Franklin Street, between 14th Street (south) and 15th Street (north) in downtown Oakland, within the Downtown Historic District and API. The city block containing the subject property includes 12 buildings, 10 of which are identified as contributors to the National Register-listed Downtown Historic District and API.

A radius of 0.25-mile from the project site was selected for identification of nearby individual resources, historic districts, and age-eligible properties. This radius includes the entirety of the Downtown Historic District and API, as well as other APIs, Areas of Secondary Importance (ASIs), and individual resources.

Attachment H lists individual, age-eligible properties within 0.25-mile of the project site which are listed on the Local Register, or which are identified as Potential Designated Historic Properties (PDHPs)), and/or are within an API or ASI. Those resources which meet the City of Oakland Thresholds of Significance Guidelines for historical resources under CEQA are noted (Figure 4). Of 113164 properties meeting these criteria identified within the 0.25-mile radius, 65 are 117 are considered historical resources for the purposes of CEQA. Most individual CEQA resources within the 0.25-mile radius are also located in an API or ASI; only seven individually eligible historical resources are located outside of an API or ASI.

APIs and ASIs within 0.25-mile of the project site are described in the following paragraphs-and depicted on Figure V.D-4. APIs and ASIs provide the City of Oakland with a framework for evaluating properties within specific groupings or neighborhoods associated with significant property types and events in the city's history. There is at total of 55 APIs within the City of Oakland (Figure V.D-5). Of these, eight are within, or substantially within, a 02.5-mile radius of the project site (Figure V.D-4). One additional API overlaps slightly with the 0.25-mile radius. There is a total of 332 ASIs within the City of Oakland. Of these, five are within, or substantially within, a 0.25-mile radius of the project site. Two additional ASIs overlap slightly with the 0.25-mile radius.

PDHPs which are located within APIs are included in the Local Register and are thus historical resources under CEQA. Location within an ASI does not confer status as a historical resource under CEQA. However, some properties individually listed on the Local Register due to status as Designated Historic Properties, or OCHS ratings of "A" or "B", and which are therefore considered historical resources under CEQA, are also located within ASIs.

FIGURE V.D-4. Individual resources, APIS, AND ASIS WITHIN 0.25-MILE RADIUS OF THE PROJECT SITE.

Numbers on APIs and ASIs correspond to text descriptions.

TABLE V.K-7 VIBRATION CRITERIA TO PREVENT DISTURBANCE – RMS (VDB)

| Land Use Category | Frequent Events ^a | Occasional Events ^b | Infrequent Events ^c |
|--|---------------------------------|-----------------------------------|-----------------------------------|
| Buildings where vibration would interfere with interior operations | 65 | 65 | 65 |
| Residences and buildings where people normally sleep | 72 | 75 | 80 |
| Institutional land uses with primarily daytime use | 75 | 78 | 83 |

^a More than 70 vibration events of the same kind per day or vibration generated by a long freight train.

Source: FTA, 2018. Transit Noise and Vibration Impact Assessment Manual. FTA Report No.0123, September.

Land use information is based on the review of Oakland's Planning and Zoning Map. Available at: http://oakgis.maps.arcgis.com/apps/webappviewer/index.html?id=3676148ea4924fc7b75e7350903c7224, accessed August 28, 2020.

^{2.} Information related to historic resources was provided by UPP.

^b Between 30 and 70 vibration events of the same kind per day.

^c Fewer than 30 vibration events of the same kind per day.

the 36-month period of construction of the project. As a result, the potential for construction generated vibration to disturb occupants of adjacent residential buildings is less than significant.

Vibration Damage

According to the buffer distances calculated in Table V.K-9, a vibratory roller would have the potential to generate vibration levels in excess of the 0.12-in/sec PPV threshold for historic resources located within 36 feet and 0.3-in/sec PPV threshold for other buildings located within 20 feet. Based on the distances in Table V.K-6, potential damage could occur at the following buildings:

- Historic buildings: 1411 Franklin Street; 420 14th Street; 436 14th Street; 1440 Broadway; 449 15th Street; 425 15th Street; 421 15th Street; 1441 Franklin Street; 405 15th Street; 401 15th Street; 425 15th Street; 421 15th Street; 1441 Franklin Street; 405 15th Street; 401 15th Street; 405 15th Street; 401 15th Street; 401 15th Street; 420 14th Street; 436 14th Street; 436 14th Street; 445 15th Street; 449 15th Street; 440 15th Street; 440
- Other buildings:1411 Franklin Street, 420 14th Street.

Construction of the project would be subject to SCA-NOI-7: Vibration Impacts on Adjacent Structures or Vibration-Sensitive Activities (#69). SCA-NOI-7 requires design means and methods of construction to be included in a Vibration Analysis that shall be utilized in order to reduce the potential to exceed the thresholds. Potential means and methods could involve the following restrictions to reduce potential vibration impacts to adjacent buildings at which vibration damage could occur:

- No vibratory rollers would be allowed to operate within 36 feet from the adjacent historic buildings or within 20 feet from the other buildings.
- Within 20 feet from adjacent historic buildings or 11 feet from the other adjacent buildings, the size of all bulldozers used during any construction phase activities could be limited to D5 dozers or smaller (i.e., those with horsepower (hp) less than 105 hp and operating weight less than 24,000 pounds).
- No loaded trucks would be allowed to operate within 18 feet of the adjacent historic buildings or 10 feet of the other adjacent buildings.
- No bulldozers of any size would be allowed to operate within 2 feet from the adjacent buildings.
- Should site conditions require the use of any of the equipment described above within the buffer distances identified in Table V.K-9, the project applicant should notify the City, identify appropriate measures to reduce vibration impacts and comply with any additional City recommendations.

With implementation of SCA-NOI-7: Vibration Impacts on Adjacent Structures or Vibration-Sensitive Activities (#69), impacts related to vibration damage to adjacent buildings would be reduced to a less-than-significant level.

ATTACHMENT H: SUMMARY OF CULTURAL RESOURCES WITHIN A 0.25-MILE RADIUS
