Site History:	The site is occupied by Cruise America, which is a recreational vehicle rental facility. Two buildings exist on site and are surrounded by paved parking areas. Nearby properties are also commercial properties. Prior to Cruise America acquiring the site in August 1988, the site was occupied from 1957 to 1988 by McGuire Hester, a construction company. The site was reportedly was used as a slaughter and meat packing facility prior to 1956. Three underground storage tanks were removed from three separate tank pits in January 1987. T1 was a 1,000-gallon gasoline tank; T2 was a 5,000-gallon gasoline tank, and T3 was an 8,000-gallon diesel tank. Petroleum hydrocarbons as gasoline (TPHg) were detected in soil samples collected beneath T1 and T2 at concentrations up to 758 ppm. TPH as diesel (TPHd) was detected in soil samples collected beneath T3 at concentrations up to 492 ppm. Standing water in the tank pits had a visible hydrocarbon sheen and product odor. One monitoring well was installed adjacent to each former tank in January 1987 (AGS-MW-1, AGS-MW-2, and AGS-MW-3). TPHd was detected in soil samples from AGS-MW-3, which was adjacent to the diesel tank, at concentrations up to 1,750 ppm. Soil samples collected from borings AGS-MW-1 and

CRUISE AMERICA INC / MCGUIRE HESTER (Continued) **S101580082**

AGS-MW0-2 near the gasoline tanks contained minor concentrations of TPHg and BTEX. On February 17, 1988, Purcell, Rhoades, & Associates advanced three shallow borings and installed three temporary monitoring wells (B-4 through B-6 and PRA-MW-1 through PRA-MW-3). TPHg and TPHd were detected in soil at concentrations up to 270 and 74, ppm, respectively. Oil & Grease was detected in a soil sample from boring B-4 at a concentration of 32,000 ppm. Between May 25, 1988 and July 27, 1988, a total of 15 soil borings were advanced as part of a geotechnical investigation for construction of the Cruise America facility. A petroleum odor was noticed in several of the geotechnical borings. During the construction activities in 1988, contamination was observed in the area of the gasoline UST (presumed to be T4) and the existing waste oil tank currently located adjacent to the Repair Building. Remediation of these areas was recommended by Kaldveer Associates, the environmental consultant for the site in 1989; however, there is no documentation to indicate that remediation of these areas took place during the construction activities. Cleanup of the T4 area took place between 2002 and 2009. Although no cleanup has been conducted adjacent to the existing waste oil tank, one soil boring (SB-21) was advanced adjacent to the waste oil tank in 2009. TPHd and TPHmo were detected in soil from SB-21 at concentrations up to 180 ppm and 110 ppm, respectively. Based on the results from boring SB-21, the extent of contamination appears to be limited in the area of the waste oil tank. On July 11, 1988, eleven soil borings (B20 through B30) were advanced in the area surrounding the diesel tank pit. High boiling point hydrocarbons were detected in soil samples from the shallow borings at concentrations up to 42 ppm. As part of the July 1988 investigation, groundwater samples were collected from wells PRA-MW-1, PRA-M-2, and AGS-MW-3. High boiling point hydrocarbons were detected in groundwater at concentrations ranging from 720 to 60,000 ppb. Between July 28, 1988 and August 1, 1988, the former diesel tank (T3) pit area was excavated to a depth of 15 feet bgs. Soil with visible staining or odor outside the diesel tank pit was reportedly excavated to a depth of 5 feet bgs. Seven soil samples were collected from the base and sidewalls of the excavation (S-1 through S-7) following the initial excavation. Based on sample analytical results from samples, S-2 and S-4, the excavation was continued and three additional soil samples were collected on August 1, 1988 (S-8 through S-10). During the excavation, buried timbers with creosote were observed. The area of the diesel tank was backfilled with clean, imported fill. Following the exploratory excavation, an additional monitoring well, PRA-MW-4, was installed adjacent to the excavation area. Groundwater from PRA-MW-4 contained TPHd at a concentration of 2,300 ppb. On October 17, 1988, composite soil samples were collected from the stockpiled soil from the excavation. The stockpiled soil remained on site awaiting treatment or disposal. On November 1, 1998, a Notice of Violation was issued as a result of a site inspection by ACEH. Additional soil samples were collected from the soil stockpile on November 21, 1998 prior to off-site disposal. In July 2001, six soil borings (SB-1 through SB-6) were advanced in the area of the former gasoline tanks (T1 and T2) and the former diesel tank (T3) to assess whether residual soil or groundwater contamination remained from the former USTs that were removed in 1988. TPHg and TPHd were detected at low concentrations in groundwater but MTBE was detected at an elevated concentration of 650 ppb in a grab groundwater sample from boring SB-1. In September 2001, an additional five soil borings were

CRUISE AMERICA INC / MCGUIRE HESTER (Continued) **S101580082**

advanced (SB-7 through SB11) in order to find the source of high levels of MTBE found in SB-1. A groundwater sample collected from SB-7 did not contain MTBE at concentrations above reporting limits. MTBE concentrations varied from 630 ppb in SB-9 to 13,000 ppb in SB-10. Based on these data, a leak in the remaining 10,000-gallon UST on the southern portion of the property (T4) was interpreted to be the most likely source of MTBE. On November 30, 2001, the 10,000-gallon gasoline tank (T4) was removed. Soil samples collected from the tank pit and dispenser area contained TPHg at concentrations up to 280 ppm. Benzene and MTBE were detected at concentrations up to 53 and 13 ppm, respectively along the southern and eastern sidewalls of the excavation at a depth of approximately 6.5 feet bgs. TPHg and MTBE were detected in a groundwater sample from the tank pit excavation at 44,000 ppb and 42,000 ppb, respectively. In response to the contamination observed during removal of the gasoline tank (T4), a fuel leak case was opened by ACEH on May 21, 2002 and an Unauthorized Release Form was submitted on May 29, 2002. No case closure or other documentation was located for the investigation and excavation conducted prior to 2001. Therefore, this case closure also evaluates the results from the investigation and excavation conducted in 1987 and 1988 for the tanks T1 through T3. On September 6, 2002, six soil borings (SB-12 through SB-17) were advanced at the site. Data from the soil borings were used to locate five monitoring wells (MW-1 through MW-5), which were installed on September 19, 2002. Groundwater monitoring was conducted at the site from 2002 to 2008. A twelve-point ozone sparging system was installed around the area of the 10,000-gallon gasoline tank (T4) between May and July 2004. The sparging system operated through July 2006. The ozone sparging system remained off for several months to monitor possible rebound. In July 2008, five soil borings (SB-18 through SB-22) were advanced to confirm the effectiveness of the ozone sparging in reducing contaminant mass in the area of the former gasoline tank (T4). Significant concentrations of TPHg, MTBE, and TBA were detected in a groundwater sample from boring B-18. Based on the elevated concentrations of chemicals of concern detected in soil and groundwater from SB-18, excavation was recommended in the localized area of boring SB-18. On February 12, 2009, the soil around borings SB-13 and SB-18 were excavated to a depth of 6.5 feet bgs. Following receipt of analytical results, which showed TPHg in soil at a concentration of 160 ppm, the excavation was extended several feet northwest. During the excavation, a debris layer consisting of trash, wood, cardboard, and black-stained soil was observed in the lower part of the excavation. The debris and stained soil appears to have been emplaced with the fill material that was used to fill in low-lying wetlands areas at the site sometime prior to 1956. The source and content of the debris and black-stained fill material has not been evaluated as part of this fuel leak case.

between 1939 and 1946 based on review of historical aerial photographs. Based on review of historical Sanborn Maps, development included an abattoir (slaughterhouse) building as well as two unmarked buildings in the central and southwest portions of the site. The former Union Meat Company buildings were demolished and replaced with buildings associated with a new owner, McGuire & Hester Contractors. The site was reportedly occupied by McGuire & Hester Contractors from about 1950 to 1988. Development included a stand-alone contractor's equipment storage building and a larger service building that included equipment storage, an office, stock room, and a repair shop. These buildings replaced the former buildings associated with the Union Meat Company. By the late 1950s, two additional buildings had been constructed, which included an equipment warehouse along the northwest site boundary, and an office building just north of the contractor's equipment storage building. The site was subsequently purchased by Cruise America, a recreational vehicle rental facility, from the late 1980s until they vacated the site around 2011/2012.

Property Description:	Review of available historical information indicates the site was used as a slaughter and meat packing facility, listed as Union Meat Company, from at least the mid-1920s until sometime between 1939 and 1946 based on review of historical aerial photographs. Based on review of historical Sanborn Maps, development included an abattoir (slaughterhouse) building as well as two unmarked buildings in the central and southwest portions of the site. The former Union Meat Company buildings were demolished and replaced with buildings associated with a new owner, McGuire & Hester Contractors. The site was reportedly occupied by McGuire & Hester Contractors from about 1950 to 1988. Development included a stand-alone contractor's equipment storage building and a larger service building that included equipment storage, an office, stock room, and a repair shop. These buildings replaced the former buildings associated with the Union Meat Company. By the late 1950s, two additional buildings had been constructed, which included an equipment warehouse along the northwest site boundary, and an office building just north of the contractor's equipment storage building. The site was subsequently purchased by Cruise America, a recreational vehicle rental facility, from the late 1980s until they vacated the site around 2011/2012.

Property Description:	Review of available historical information indicates the site was used as a slaughter and meat packing facility, listed as Union Meat Company, from at least the mid-1920s until sometime between 1939 and 1946 based on review of historical aerial photographs. Based on review of historical Sanborn Maps, development included an abattoir (slaughterhouse) building as well as two unmarked buildings in the central and southwest portions of the site. The former Union Meat Company buildings were demolished and replaced with buildings associated with a new owner, McGuire & Hester Contractors. The site was reportedly occupied by McGuire & Hester Contractors from about 1950 to 1988. Development included a stand-alone contractor's equipment storage building and a larger service building that included equipment storage, an office, stock room, and a repair shop. These buildings replaced the former buildings associated with the Union Meat Company. By the late 1950s, two additional buildings had been

constructed, which included an equipment warehouse along the northwest site boundary, and an office building just north of the contractor's equipment storage building. The site was subsequently purchased by Cruise America, a recreational vehicle rental facility, from the late 1980s until they vacated the site around 2011/2012.

galllons of diesel fuel that is not included in the facility hazardous materials inventory. Also, approximately 8000 cubic feet of propane stored in cylinders was not noted in the hazardous materials inventory. Update CERS to reflect all hazardous materials stored onsite. Furthermore, information in the Emergency Response/Contingency Plan shows the City of Oakland as the agency of record. Update the document to reflect ACDEH as the CUPA for the facility. CERTIFICATION OF RETURN TO COMPLIANCE I certify that the violation(s) noted on the Notice to Comply and/or /Summary of Violations page(s) have been corrected. Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Site investigation and soil removal actions for PCBs in soil were conducted at the site in 1992 and 1993. Approximately 400 cubic yards of soil was removed and disposes off-site. One gasoline UST and associated pump island, piping, and storage shed was removed from the site in 1995. free-phase gasoline was observed on the water surface

PACIFIC ELECTRIC MOTOR (Continued) **U001599511**

in the tank excavation. Approximately 1,500 cubic yards of soil was removed and approximately 116,000 gallons of groundwater was pumped following UST removal. A 30-foot by 70-foot by 9-foot deep excavation was completed in April 2002 south of the original UST excavation. Approximately 219 tons of petroleum-contaminated soil was disposed off-site. Groundwater monitoring well installations followed. Additional subsurface investigations at the site revealed TPH-g, metals, and PCB contamination. Active remediation was performed. Verification monitoring is currently underway at the site. Building 200 is located adjacent to the southwest of the former gasoline UST excavation. Building 300 is located adjacent to the west of the former gasoline UST excavation. The interpreted groundwater flow direction has ranged from westward to southward. The estimated regional groundwater flow direction is to the west. The depth to groundwater is less than 5 feet. Building 200 consists of classrooms and Building 300 is a gymnasium. Building 200 includes a crawlspace over a "rat slab" emplaced over soil. The rat slab is an element of the site cap relative to residual PCB contamination in soils. Building 300 was constructed with a passive VMS. To address vapor intrusion concerns to restrooms and other enclosed spaces within Building 300, Aspire Schools has proposed upgrading the VMS to active mode. Additional groundwater sampling is proposed and will be used to evaluate residual impacts from the former gasoline UST system. Residual gasoline impacts and metals impacts to soil (including lead and arsenic) are anticipated to remain post-closure and on Operation, Monitoring, and Maintenance Plan is being prepared to manage residual contaminants in-place.

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info:	The K&L Plating-89th Avenue Site consisted of three parcels covered by several buildings and a storage yard. An electroplating company operated at the Site for at least four years. Poor management practices contaminated soil with volatile organic compounds (VOCs), acids caustics and metals, and contaminated groundwater with VOCs. Between 1992 and 1997, DTSC's Hazardous Waste Management Program inspected the site several times, finding continuing violations of hazardous waste control laws. The plating facility was shutdown in response to a court order issued by the Superior Court on July 16, 1997. The United States Environmental Protection Agency (U.S. EPA) conducted several removal activities to stabilize the Site, including: removal of approximately 56,000 gallons of plating tank contents and unused chemicals. All the chemicals stored in above-ground containers were removed. All equipment and debris from the plating operation were removed for either disposal or recycling. Soil sampling detected elevated levels of volatile organic compounds, nickel, chromium and cyanide. Groundwater samples detected dichloroethene, trichloroethene and total xylenes. Wipe samples from the inside of the buildings detected elevated metals on the walls and floors. In July 2001, offsite and onsite groundwater sampling detected tetrachloroethene; trichloroethene; cis-1,2-dichloroethene; vinyl chloride and benzene above maximum contaminant levels. Investigation of groundwater contamination is ongoing.

The 18.02-acre site was used by the Army as a housing site for personnel stationed or working at the Oakland Municipal Airport. DOD improvements on the site consisted of 60 buildings including barracks, dispensary, administration, recreation, utility buildings, mess hall, and theater. On 26 June 1946, the 18.02 acres was transferred to the Federal Public Housing Administration. Property once occupied by the Oakland Municipal Airport, Detachment Housing Site is currently owned by the City of Oakland and the Oakland Unified School District.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

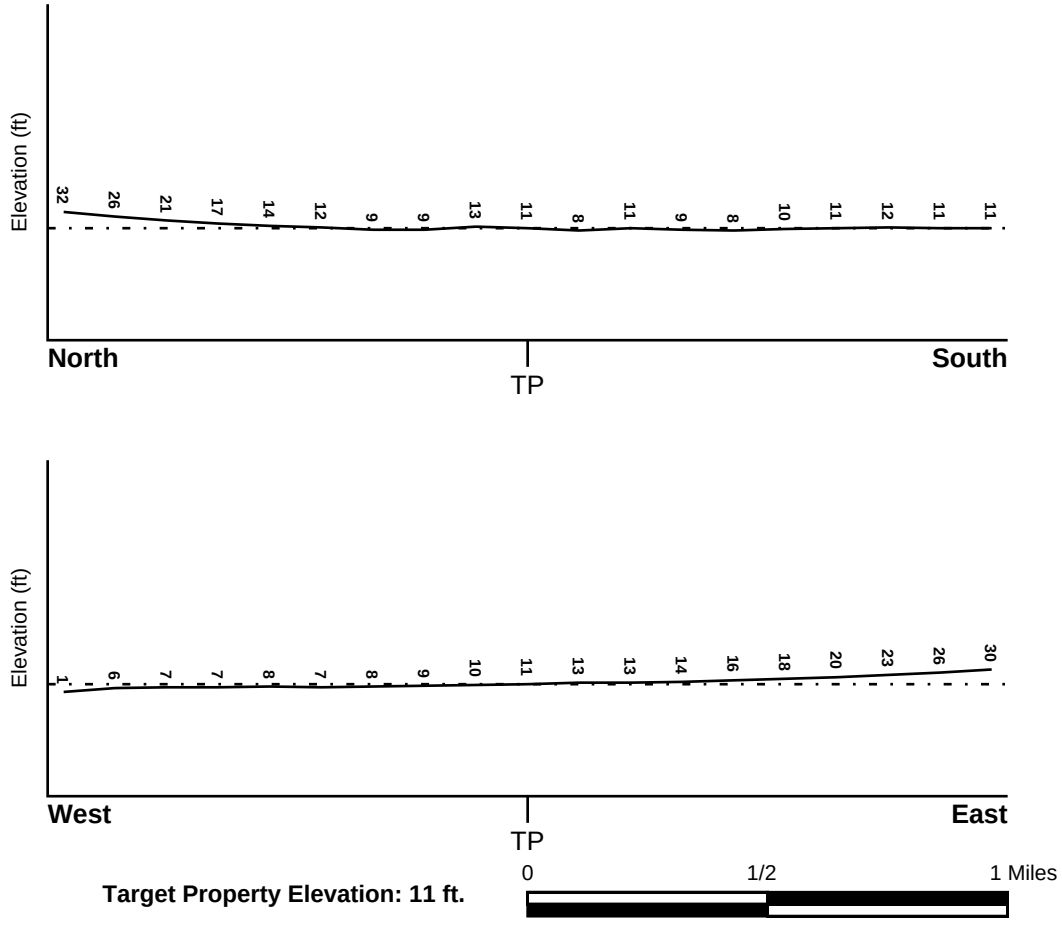
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 11 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Dear Ms. Javier:

On January 27, 2022, the Department of Toxic Substances Control (DTSC) received your e-mail requesting records under the Public Records Act. The DTSC Berkeley Regional Office has identified site records responsive to your request for **772 – 76th Ave.; 7825 San Leandro St., Oakland, CA 94621** and is in the process of gathering said records (please see the following paragraph pertaining to these records). DTSC Berkeley did not find records for the remaining site addresses.

Please contact us to schedule an appointment to review the available records. DTSC will notify you if any of the records will be withheld from disclosure under the Act.1 We recommend you bring a copier or arrange for a bonded copying service to make copies of the records. *Due to restrictions implemented by the State of California because of Covid-19, in-house public review appointments are not available at this time. An arrangement with a bonded copier service is still an option to obtain access to approved files. Please respond to the e-mail attached to this letter for more information at Berkeleyfileroom@dtsc.a.gov.*

In addition, the DTSC provides access to public records online via EnviroStor; a data management system that tracks our efforts in cleanup, permitting, enforcement, and investigation of known/suspected hazardous waste sites and facilities. The available data is updated in realtime. You can access Envirostor online at www.envirostor.dtsc.ca.gov. Navigate the website easily by clicking the "How to Use EnviroStor" tab, then selecting the option “Take a Tour”.

For information regarding public reports on hazardous waste shipments of generators, transporters, and TSDFs, you can access our Hazardous Waste Tracking System (HWTS) online at: https://hwts.dtsc.ca.gov/. Select the “Reports” tab for search options. If you are interested in retrieving detailed reports, please contact the HWTS unit via e-mail: Hwtsreports@dtsc.ca.govor

phone: 1-800-618-6942. Customized reports may require a fee. For copies of manifests, please send an e-mail to mcr@dtsc.ca.gov.

If you have any questions or would like further information regarding your request, please contact me via phone: 510-540-3800 or e-mail: Berkeleyfileroom@dtsc.a.gov.

Sincerely,

Carl Rose

Regional Records Coordinator

1Some of the records may be exempt from disclosure under the Public Records Act because they may be identified as follows: (1) preliminary drafts or notes (Government Code sections 6254(a)); (2) records pertaining to pending litigation (Government Code section 6254(b)); (3) personnel, medical, personal or private information (Government Code sections 6254(c), 6254(k), 6254.3; Civil Code section 1798, et seq.); (4) records pertaining to complaints or investigations or identification of confidential informant(Government Code section 6254(f)); (5) records covered by the attorney-client privilege (Government Code section 6254(k); Evidence Code section 954); (6) records covered by the attorney work product privilege (Government Code section 6254(k); Code of Civil Procedure section 2018.030); (7) records covered by the deliberative process privilege (Government Code sections 6254(k), 6255; Times Mirror Company v. Superior Court (1991) 53 Cal. 3d 1325); (8) records covered by the official information privilege (Government Code section 6254(k); Evidence Code section1040); and/or (9) records containing confidential business information or trade secrets (Government Code· section 6254(k); California Code of Regulations, title 22, section 66260.2; Evidence Code section 1060; Health and Safety Code sections 25173, 25185(d), 25358.2). (10) records containing geological and geophysical information (Government Code section 6254 (e)). This is not an exhaustive list and other exemptions may prevent disclosure of records.

Glossary of Terms & Qualifier Definitions

Client: AB & I Foundry
Project: Storm Water
WorkOrder: 2012851

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analysis Requested

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

ANNUAL REPORT

FOR STORM WATER DISCHARGES
ASSOCIATED WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2020 through June 30, 2021

Retain a copy of the completed Annual Report for your records.

Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers, and e-mail addresses of the Regional Board contacts, as well was the Regional Board office addresses, can be found at:

Question Information

1. Has the Discharger conducted monthly visual observations (including authorized and unauthorized Non-Storm Water Discharges and Best Management Practices) in accordance with Section XI.A.1?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

2. Has the Discharger conducted sampling event visual observations at each discharge location where a sample was obtained in accordance with Section XI.A.2?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

3. Did you sample the required number of Qualifying Storm Events during the reporting year for all discharge locations, in accordance with Section XI.B?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

4. How many storm water discharge locations are at your facility?

6

5. Has the Discharger chosen to select Alternative Discharge Locations in accordance with Section XI.C.3?

☐ Yes ☒ No

6. Has the Discharger reduced the number of sampling locations within a drainage area in accordance with the Representative Sampling Reduction in Section XI.C.4?

☐ Yes ☒ No

6.1. Has the Discharger reduced the frequency of sampling at the facility area in accordance with the Sample Frequency Reduction in Section XI.C.7?

☐ Yes ☒ No

7. Permitted facilities located within an impaired watershed must assess for potential pollutants that may be present in the facility's industrial storm water discharge. Using the table below, populated based on the facility's location, indicate the presence of the potential pollutant at the facility.

See Attachment 2 for the List of Identified Pollutants within the Impaired Watershed.

8. Has the Discharger included the above pollutants in the SWPPP pollutant source assessment and assessed the need for analytical monitoring for the pollutants?

☒ Yes ☐ No

If No, what date will the parameter(s) will be added to the SWPPP and Monitoring Implementation Plan?

9. Were all samples collected in accordance with Section XI.B.5?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

10. Has any contained storm water been discharged from the facility this reporting year?

☒ Yes ☐ No

If Yes, see Attachment 1, Summary of Explanation.

11. Has the Discharger conducted one (1) annual evaluation during the reporting year as required in Section XV?

☒ Yes ☐ No

If Yes, what date was the annual evaluation conducted? 04/01/2021

If No, see Attachment 1, Summary of Explanation.

12. Has the Discharger maintained records on-site for the reporting year in accordance with XXI.J.3?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

13. Did additional NAL exceedances occur in the same drainage area for the facility's Level 2 parameter(s) (if no Level 2 parameters, select No)?

☒ Yes ☐ No

14. Was the Level 2 ERA Technical Report updated (if no Level 2 parameters, select No)?

☐ Yes ☒ No

If No, explain:

Despite additional NAL exceedances, the Lev

If your facility is subject to Effluent Limitation Guidelines in Attachment F of the Industrial General Permit, include your specific requirements as an attachment to the Annual Report (attach as file type: Supporting Documentation).

1.0 INTRODUCTION

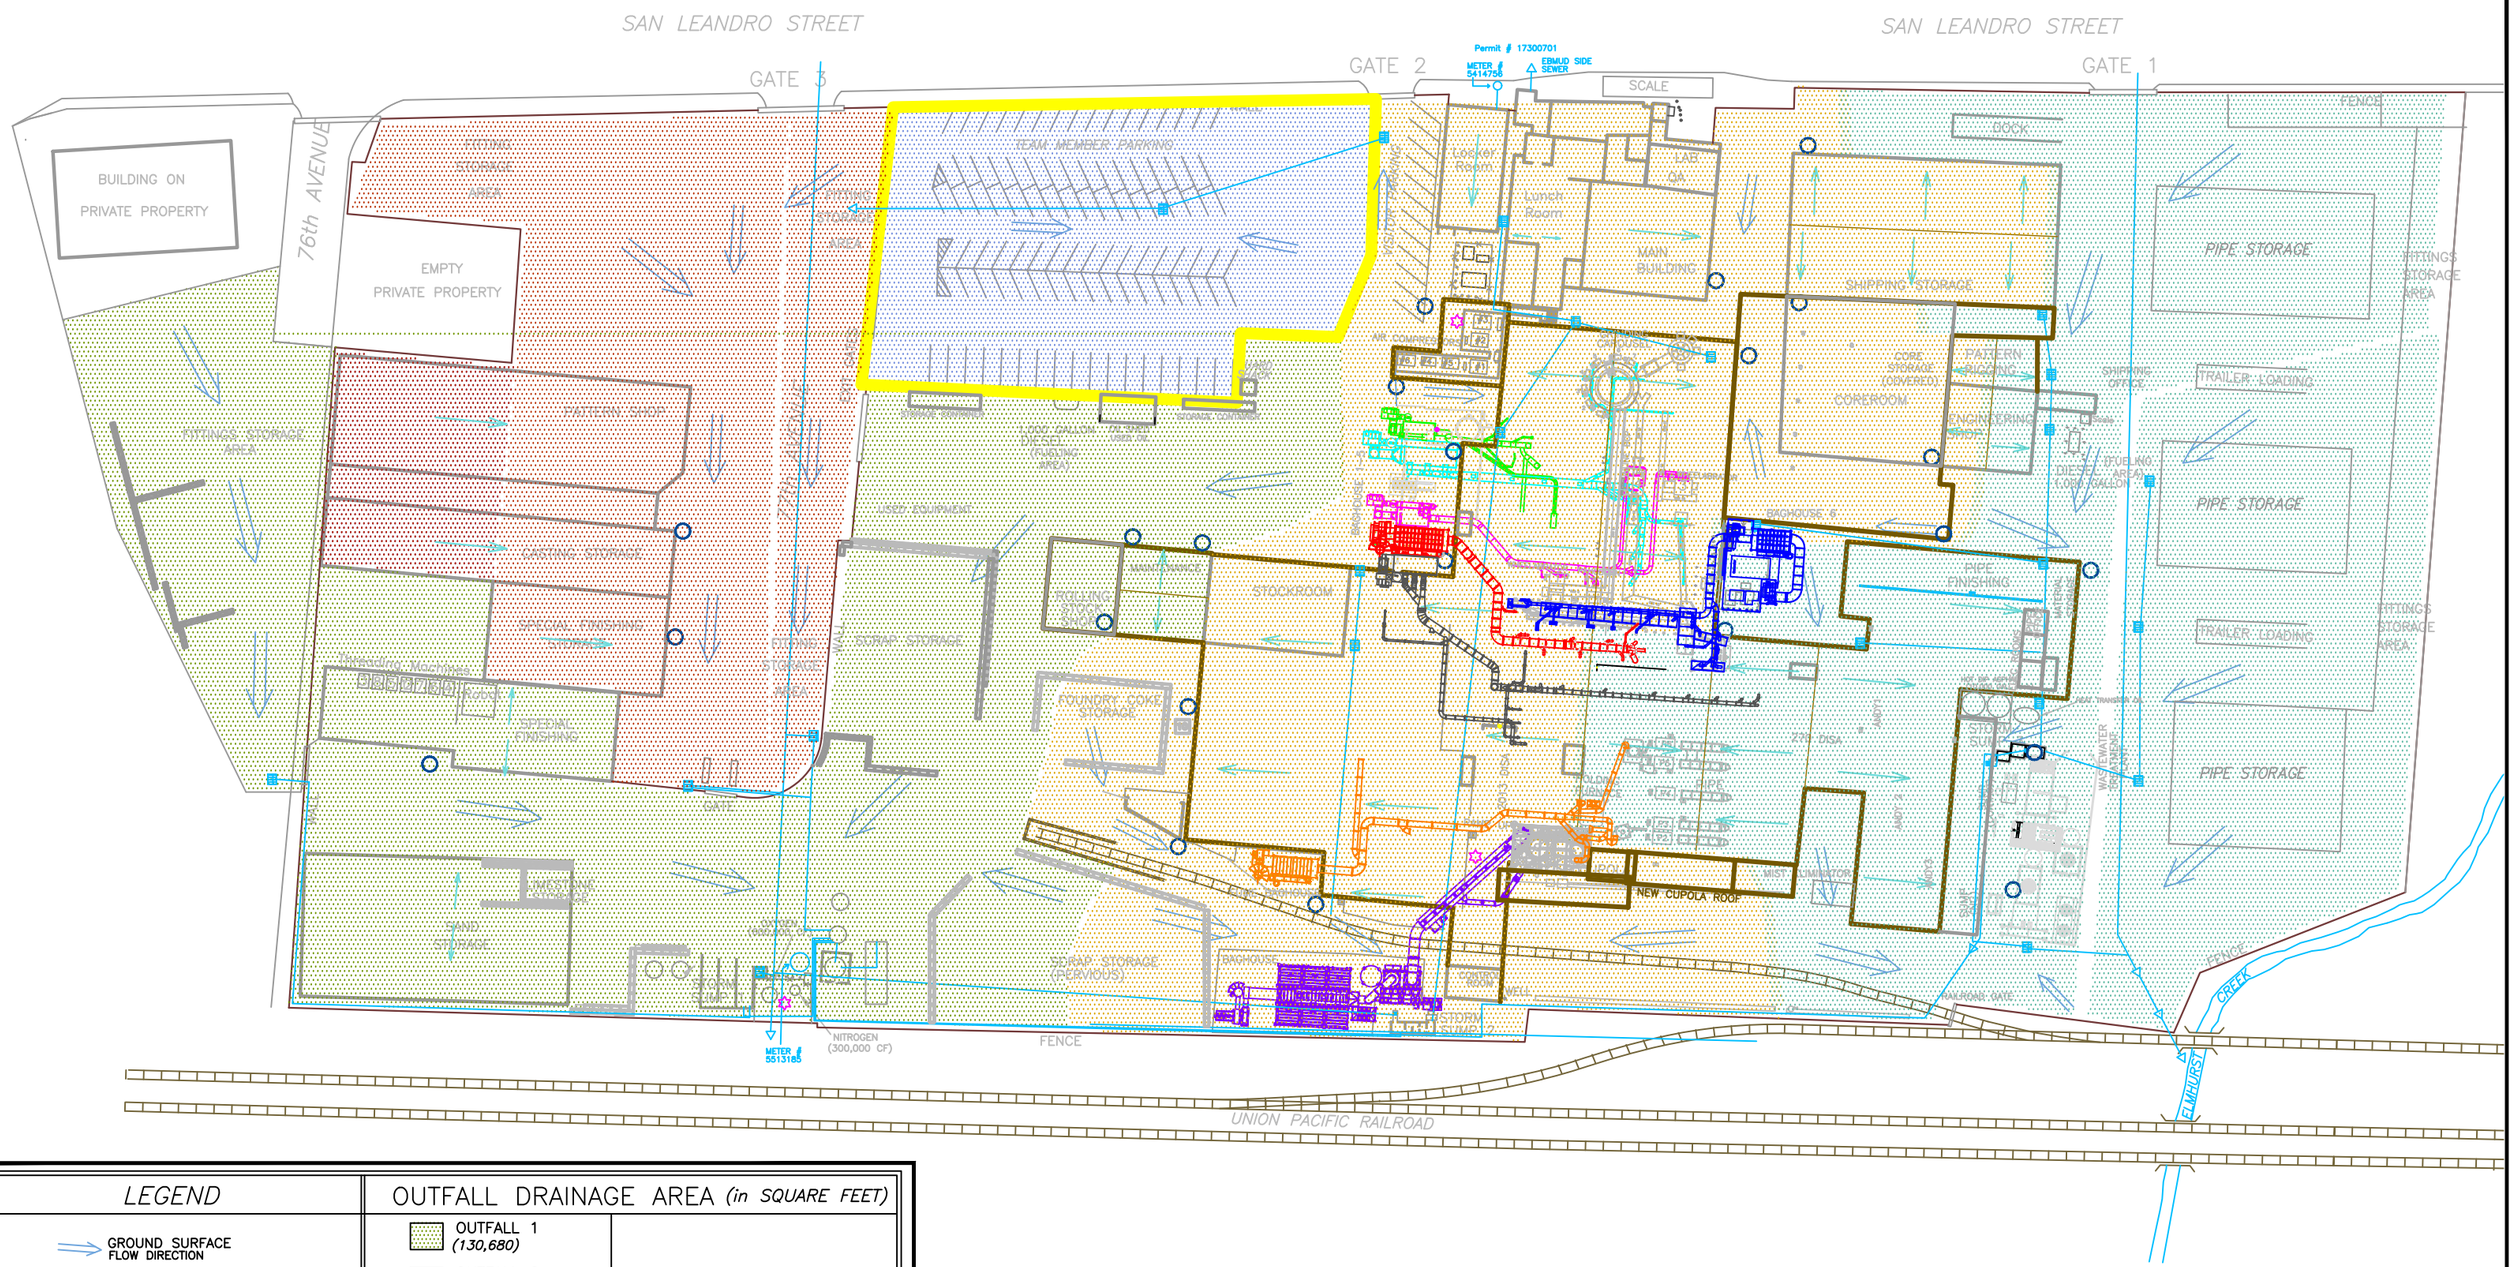
The following is the Industrial Activity Best Management Practices (BMP) Level 2 Exceedance Response Action (ERA) Technical Report for AB&I Foundry located at 7825 San Leandro Street, Oakland, CA 94621. This Demonstration Report was developed in accordance with the requirements set forth in California's Storm Water Industrial General Permit (IGP) (Order NPDES NO. CAS000001). As specified in Section XII.D.2 of the IGP, the Demonstration Report shall at a minimum address each drainage area with Level 2 Numeric Action Level (NAL) exceedance(s) and must include the following information:

- Description of industrial pollutant sources and corresponding industrial pollutants that are or may be related to the NAL exceedances;
- Evaluation of all pollutant sources associated with industrial activity that are or may be related to NAL exceedances;
- Description and analysis of all implemented BMPs that are expected to achieve compliance with the effluent limitations of the IGP and are expected to eliminate future NAL exceedances. In addition, specifically address the drainage areas where the NAL exceedance(s) responsible for the discharger's Level 2 status occurred; and
- If an alternative design storm standard for treatment control BMPs will achieve compliance with the effluent limitations, the discharger must provide an analysis describing the basis for the selection of the alternative design storm standard.

To evaluate and demonstrate the effectiveness of the Industrial Activity BMP Demonstration, outlined in the facility's Level 2 Action Plan, the following components of the storm water program were reviewed:

- Review of analytical data and SMARTS Ad Hoc Reports;
- Storm Water Pollution Prevention Plan (SWPPP) / Monitoring Implementation Plan (MIP);
- Level 1 ERA Report;
- Level 2 ERA Action Plan;
- Sampling procedures and monitoring program implementation;
- Existing or improved upon minimum BMPs, including: good housekeeping, preventive maintenance, spill response, material handling and waste management, erosion and sediment controls, employee training, and quality assurance/ recordkeeping;
- Additional investigation of potential pollutant sources, including contribution from non-industrial or natural background sources;
- Corrective actions on advanced BMPs at the facility, if applicable; and
- Implementation of additional advanced BMPs outlined in the facility's Level 2 Action Plan, including structural or treatment control BMPs.

2.0 SITE INFORMATION



The following table provides specific information related to the facility:

Table 1 - Facility General Information

Facility Name:	AB&I Foundry
Address:	7825 San Leandro Street, Oakland CA, 94621
WDID Number:	2 011002972
SIC Code	3321
Legally Responsible Person (LRP):	Kurt Winter
Site Contact Person:	Melisa Cohen
Phone Number:	510-632-3467
Email:	Melisa.cohen@abifoundry.com
Facility Size:	13.8 acres
Percent Site Impervious:	95%
Industrial Discharge Locations:	6
Business Description:	AB&I is an iron foundry that operates in Oakland, California. The foundry produces cast-iron pipe, pipe fittings, and custom castings. Iron and steel scrap is melted in a cupola furnace and the molten metal is transferred to an electric-induction holding furnace. The industrial operations at AB&I related to the production of pipe and fittings include: • 12 core machines • Cupola - scrap iron and coke • 5 Centrifugal pipe machines • 2 molding lines • 3 asphalt pipe coating lines • Fittings – grinding and asphalt coating carousel • Pipe and fittings storage yard • No-bake operations AB&I also operates a non-ferrous scrap metal recycling operation which includes the unloading, sorting and storage of non-ferrous scrap metals.
Current Analytical Suite:	Total Suspended Solids, Oil and Grease, pH, Aluminum (Al), Copper (Cu), Iron (Fe), Lead (Pb), Magnesium (Mg), Zinc (Zn), Chemical Oxygen Demand (COD).

IGP Level Status Description:	On July 1st, 2017 AB&I entered Level 1 for Magnesium (Mg). On July 1st, 2018 AB&I entered Level 2 for Magnesium. Results from the 2018-2019, 2019-2020, and 2020-2021 reporting years require the facility to remain in Level 2 status for Magnesium. The facility also moved to Level 1 status for Iron (Fe) and Aluminum (Al) on July 1st, 2019. On July 1st, 2020 AB&I entered Level 2 for Aluminum and will continue with a Level 2 designation for Aluminum during the 2021-2022 reporting year. **Baseline Parameters:** Total Suspended Solids (TSS), pH, Oil and Grease (O&G), Lead (Pb), Iron (Fe), Copper (Cu), Chemical Oxygen Demand (COD), Zinc (Zn) **Level 1 Parameters:** None **Level 2 Parameters:** Magnesium (Mg) and Aluminum (Al)
Receiving Water/TMDL Implications:	Storm water from AB&I is conveyed via the City of Oakland Municipal storm sewer system ultimately draining to Elmhurst Creek. AB&I has reviewed the TMDLs located in Attachment E of the Industrial General Permit and 303(d) listed parameters for its receiving waters and has found no additional requirements.

4.0 NUMERIC ACTION LEVEL EXCEEDANCES

The following table summarizes AB&I Foundry's numeric action level (NAL) exceedances for the past two monitoring periods, resulting in continued ERA Level 2 Status. A detailed summary of analytical results for the 2015-2016, 2016-2017, 2017-2018, 2018-2019, and 2020-2021 reporting periods for each discharge location is included in Appendix A.

Table 3 - Summary of NAL Exceedances

Parameter	NAL Value (mg/L)[1]	2019-2020 Analytical Value (mg/L)[2]	2020-2021 Analytical Value (mg/L)[2]	ERA Status	Outfall/ Drainage Area Contributing to ERA Level 2 NAL Exceedance
Al	0.75	1.573	*1.148*	*AB&I will remain in ERA Level 2 for Aluminum based on 2020-2021 analytical results. Original Level 2 ERA Action Plan was submitted to SMARTS on 12/30/2020.*	*Analytical results for outfalls 1, 2, 3, 7, and 8 indicate that these drainage areas contributed to the NAL exceedances for Aluminum.*

1. NAL value summarized on Table 2 of Industrial General Permit.
2. These values are the calculated average of all sampling results for the reporting year.

5.0 EVALUATION AND DISCUSSION OF POTENTIAL POLLUTANT SOURCES

The following table provides a brief summary of the drainage areas/outfalls at the site, a discussions of pollutant sources potentially contributing to the NAL exceedance, and BMPs implemented during the 2020-2021 reporting period for each drainage area. Additional information related to BMPs implemented during the 2020-2021 reporting period can be found in the SWPPP. Although the evaluation focused on the drainage areas where the NAL exceedances occurred, all industrial drainage areas were assessed.

Table 4 - Evaluation/ Identification of Potential Pollutant Sources

Drainage Area/ Outfall	Drainage Area Discussion	Pollutant Source Discussion	BMP Implementation (including Level 2 Action Plan implemented BMPs)	Discussion of Contribution to ERA Level 2 Exceedance
Outfall 1	Outfall 1 drains 130,680 square feet (See Figure 1 for more details). The following industrial activities and materials in this area include: • Scrap Handling and Storage • Foundry Coke, Limestone, Ferrous Slag and Silicon Carbide Storage • Core Sand and Core Storage • Diesel/Gasoline Fueling and Storage • Oil Storage and Dispensing • Used Oil Storage • Flammable Waste Storage • Pattern Shop and Special Finishing Shop Filing • Truck Loading • Mixing Waste Sand • Used Cores Disposal • Baghouse 1-5 Dust	All industrial activities in this area are not exposed to storm water except for scrap handling/storage, coke storage, silicon carbide storage, fueling, equipment storage (boneyard) and the transfer of materials/waste to and from the Sand Storage building. There is the possibility for the mobilization of metals pollutants from the scrap storage area during heavy rains. There is also the potential for tracking as trucks enter and exit the area. Potential pollutants from these activities include metals and TSS. There is a potential for diesel/gasoline spilling during fueling. Potential pollutants from these activities include oil and grease. Coke and Silicon Carbide Bricks are stored outside. Potential pollutants from this activity includes TSS.	The following industrial materials and activities are not exposed to storm water and occur under the cover of a permanent structure: Core sand and core storage, used oil storage, flammable waste storage, pattern shop and special finishing filings, mixing waste sand, used core disposal, mobile equipment maintenance and air compressors. Concrete containment blocks contain pollutants and divert storm water away from this area. Storm Water Treatment System treats water from all industrial drainage areas: outfall 1, 2, 3, 7, and 8 once the process water recycling and containment capacity is met and if flows are at or below 0.2 inches/hour. Diesel fuel is stored in a double-contained storage tank. Spill kits are easily accessible.	Analytical results for Outfall 1 indicate the discharge point and drainage area contributed to the annual NAL exceedance for Aluminum (Al).

	• Sludge Disposal (bin transfer) • Mobile Equipment Maintenance • Air Compressors • Coated Pipe and Castings storage • Equipment Storage	Used Equipment is stored outside, potential pollutants may include oil and grease. There is a potential for tracking of waste sand as trucks exit/enter or unload waste in the Sand Storage building. Potential pollutants from these activities include metals and TSS.	Gasoline is stored under cover. Silicon Carbide bricks are wrapped in plastic and stored on pallets. Before equipment is stored outside, it is drained of oil. All waste materials are stored in roll off bins or under cover and are picked up regularly. Particulate matter and dust generated under cover is mitigated by Baghouse 1-6. Daily sweeping and housekeeping procedures aided by vacuum sweeper.	
Outfall 2	Outfall 2 is 156,816 square feet (See Figure 1 for more details). 6.0 LEVEL 2 ERA ACTION PLAN SUMMARY

As required in Section XII.D of the IGP, the Level 2 ERA Action Plan for Aluminum (Al) was submitted on 12/30/2020. The following table describes the Level 2 ERA parameters and the BMPs and other improvements identified and implemented in response to the Level 2 exceedance and outlined in the Level 2 ERA Action Plan.

Table 5 - Level 2 ERA Action Plan Summary

Drainage Area/Outfall	General Strategy for Drainage Area	Selected BMPs/Site Modifications from Level 2 Action Plan	Schedule
Outfall 1	To mitigate the risk of potential pollutants from being mobilized by storm water, the facility will eliminate a potential pollutant causing operation, create space in the Sand Storage building to minimize tracking, divert water around high risk area, improved sweeping, and add a Storm Water storage and processing tank.	AB&I was operating a metals recycling center and shut down the operation which will lower the amount of potential pollutants mobilized by storm water. Metals recycling included non-ferrous metals (Aluminum). • Alterations to Operations, removal of potential pollutant sources.	Completed 1-1-21
		A 21,000-gallon Storm Water storage tank was purchased and is being used for storing and processing storm water. • Stormwater Treatment / Reuse	Completed 10-3-19
		Old Equipment being stored in the Sand Storage Building has been removed. This allows for material to be stored further from the egress to minimize tracking. • Structural Overhead Coverage	Completed 6/24/21
		Water from the old recycling center area will be piped around the backside of the Sand Storage Building. This will minimize the flows of water at the egress of the sand storage building where there is the potential for pollutants to be tracked out and mobilized. • Re-routing of Stormwater Conveyance	Completed 6/24/21
Foundry-Wide	(Pertains to all industrial drainage areas).	New riding vacuum sweeper was purchased and has improved sweeping throughout the foundry. • Supplemental Housekeeping BMPs	Completed 3/27/20

7.0 BMP DISCUSSION AND SPECIFICATIONS

This Demonstration Report documents how AB&I has designed, installed, or implemented advanced BMPs to reduce or prevent pollutants in industrial storm water discharges as specified in Section XII.D of the IGP.

In consultation with our registered QISP, AJ Hezlep and former employee / QISP, Jesse Tom, AB&I identified treatment, storage, and reuse of storm water as the advanced BMPs to best reduce or prevent the discharge of industrial pollutants. AB&I has also increased structural overhead coverage for stored materials and reduced potential pollutant sources on site. These changes have been achieved through removing old equipment previously stored inside of the sand storage building to allow for more complete overhead coverage and stormwater exposure minimization of spent molding sand, and eliminating a major source of Aluminum onsite by ending non-ferrous metal recycling center operations as of 1/1/2021.

Treatment and control BMPs must meet design standards established in the IGP (Section X.H.6), based on the State Water Board IGP Order NPDES NO. CAS000001, which are generally expected to be protective of water quality and to be effective for most pollutants, including Aluminum (Al). The treatment BMP was designed based on the 85th percentile 24-hour Design Storm Event by a professional third-party contractor (Storm Water Systems). Historical rainfall records from the 2003 CASQA California Storm Water BMP Handbook Appendix D were used to model storm water capture and discharge reduction based on site-specific conditions (see Appendix B).

Complete design specifications and diagrams of the system are unavailable due to the third party contractor's proprietary intellectual property information, "Notice: this diagram contains proprietary information and it shall not be used or reproduced or its contents disclosed in whole or in part, without prior written consent" (Storm Water Systems Diagram, Design Specifications).

As such, specifications on the treatment system can be found below:

Water from the drainage area where AB&I previously performed non-ferrous metals recycling has been re-routed around the backside of the sand storage building to storm sump 1 (see figure 1).

STORAGE AND RESUSE:

AB&I has evaluated its water usage and determined that capturing and reusing storm water is a feasible option to reduce discharges of aluminum (Al). The facility purchased a 21,000-gallon storm water storage tank that is used to process and store stormwater that would otherwise be discharged to the city of Oakland's municipal separate storm sewer system. The additional stormwater storage vessel allows AB&I to conserve and reuse up to 21,000 gallons of stormwater generated from a typical qualifying storm event. Stormwater from the 21,000-gallon tank is conveyed to the process water treatment system on site to be reused as process water that is utilized in daily operations. By reusing stormwater in facility processes, AB&I will reduce our reliance on city provided water, while preventing discharge of stormwater containing potential pollutants. In addition, AB&I has purchased and installed a sludge filter press to increase process water reuse efficiency. Additional information on the filter press is provided in Section 8.

It should also be noted that the 21,000-gallon storage tank will not hold enough stormwater to completely eliminate stormwater discharge from the facility. AB&I has concluded that purchasing and implementing a stormwater storage system that would prevent discharge from the maximum historic storm event, or series of events, using precipitation data collected from NOAA would be both logistically and economically infeasible, due to sizing and operational constraints.

Proof of purchase and additional tank information is available in Appendix B.

STRUCTURAL OVERHEAD COVERAGE

AB&I has evaluated its storm water discharge and determined that utilizing additional structural coverage is another feasible option to prevent discharge of aluminum (Al). In order to eliminate storm water contact with industrial activity, AB&I has removed old and unused equipment from the waste sand storage building located in drainage area 1, in the northwestern portion of the facility. By removing previously stored equipment off site AB&I has been able to move stored materials further back in the building, limiting exposure to stormwater and minimizing material tracking. This increased structural overhead coverage capacity is largely beneficial to stormwater quality particularly because of the proximity of the sand storage building to storm sump 1, which is located in a drainage area that is linked to past aluminum exceedances.

Maps are available in Figures 1 and 2, to demonstrate location of the sand storage building.

SITE OPERATIONS ALTERATIONS- Removal of potential pollutant sources

As of January 1st, 2021 AB&I officially stopped operating a small-scale metals recycling operation. The former metals recycling operation is now used as a pipe fittings storage area and can be viewed in Figure 1 as the northwest "fittings storage area". AB&I stopped purchasing non-ferrous metals for recycling in September 2020, and all related materials were cleared from the facility on 1/1/21. The metals recycling operation involved storing non-ferrous metals, including aluminum, outdoors exposed to stormwater. By removing this industrial activity, and clearing out previously stored materials, the facility has effectively reduced a large portion of potential pollutant sources containing aluminum.

Pictures demonstrating closure of the metals recycling operation are available in appendix C.

OTHER IMPLEMENTED ADVANCED BMPs- Housekeeping Upgrades

AB&I purchased a Tennant 800 vacuum sweeper on 3/27/20 in order to supplement housekeeping activities on site. The Tennant 800 vacuum is fitted with a quad-filtering system which allows for housekeeping staff to remove fine accumulated particulate down to 4 microns. The vacuum sweeper is used on a daily basis throughout all accessible industrial areas on site. All vacuum sweeper activity is documented, and partial records for vacuum sweeper use can be viewed in Appendix B. Sweeping records for the first week of the 2021-2022 reporting year are provided, as attaching all sweeping logs would be excessive.

Photos and additional specifications of the sweeper are available in Appendix B and Appendix C.

8.0 ADDITIONAL BMPs/CORRECTIVE ACTIONS TAKEN

In addition to implementation of storm water treatment, storage and reuse, increase in structural coverage, and removal of potential pollutant sources on site, the following additional BMPs or improvements to existing BMPs were implemented to further control pollutants generated from onsite industrial activities:

Table 7 - BMPs Implemented and Corrective Actions on Existing BMPs

Parameter Exceeded	Discharge Points or Area	Potential/Source Activity Generating Exceedance	Additional BMPs or Corrective Actions on existing BMPs or Site Modifications	Date Implemented
Aluminum (Al)	Entire Facility	Material tracking, sediment accumulation from transfer of dry materials.	Purchased a Tennant 800 vacuum sweeper for daily use throughout the facility to increase housekeeping.	[3-27-20]
Aluminum (Al)	Drainage Area 1, Drainage Area 4	Process water sludge generation.	AB&I purchased, installed, and operates a filter press system to process solids generated and filtered by the stormwater and process water treatment systems. With AB&I's upgraded stormwater storage capacity, a larger quantity of stormwater is stored and conveyed for re-use into the facility's process water treatment system. Solids and sludge generated through process water treatment are filtered, pressed, and processed by a M.W. WATERMARK FILTER PRESS MODEL FP800G32L-47-25ASC. Although operation of the filter press does not necessarily remove potential pollutant exposure, it does allow for increased process water recycling efficiency. Due to confidentiality agreements, AB&I is unable to provide design specifications and diagrams of the M.W. WATERMARK FILTER PRESS MODEL FP800G32L-47-25ASC.	Purchased: [06-14-19] Installed, and operational as of: [6-29-21]

9.0 SELECTED BMP DISCUSSION

In order to address the industrial sources of Aluminum on site, AB&I has completed the following:

- Discontinued non-ferrous metals recycling operations.
    - Removed stored materials, waste, and cleared this portion of facility to be utilized for pipe fittings storage.
- Installed a 21,000-gallon storm water storage tank to allow for additional processing and storage of stormwater to be reused in the plant's process water system.
- Removed equipment previously stored inside of the sand storage building, to minimize exposure of materials to stormwater, and increasing structural overhead coverage capacity.
- Altered conveyance of stormwater from the backside of the sand storage building to minimize stormwater flows where there is a possibility of potential pollutants to be tracked out and exposed to stormwater.
- Purchased a Tennant 800 industrial ride-on sweeper with quad-filtration system to improve and supplement additional housekeeping activities.

These BMPs employed together demonstrated a marked improvement in stormwater quality versus previous years of stormwater sampling. During the 2020-2021 reporting year the first two samples collected on 12/13/2020 and 1/4/2021 yielded aluminum results of 0.095 mg/L and 0.049 mg/L respectively. These two sample results are well below the established NAL for Aluminum of 0.75 mg/L. The sample collected on 2/19/2021 resulted in an Aluminum result of 3.3 mg/L, which is above the NAL, bringing the annual average for Aluminum to 1.148 mg/L. There is a noticeable trend of higher aluminum results from qualifying storm events in the second half of the reporting year, which is why additional "mid-season" control measures will be implemented. During the 2020-2021 reporting year, the only elevated aluminum sample result was from February, which is similar to the 2019-2020 reporting year where the only elevated aluminum sample results were observed in the second half of the reporting year. Going back to the 2018-2019 reporting year, aluminum concentrations were noticeably higher in the second half of the reporting year, when compared to samples collected early in the rain season. While the stormwater treatment system and all BMPs are inspected at least monthly, and prior to rain events, this report establishes a standard operating procedure of "mid-rain-season" maintenance inspections. This additional in-depth maintenance procedure will help ensure that our stormwater treatment system and additional control measures are functioning properly and will yield higher quality stormwater discharge. See Appendix B for documentation of the new "Mid-Rain-Season Maintenance Inspection".

10.0 SUMMARY/CONCLUSIONS

In conclusion, the Demonstration Report by AB&I describes the design and implementation of storm water treatment, storage and reuse, increases in structural coverage, and other BMPs to reduce or prevent the discharge of industrial pollutants. The advanced BMPs implemented in response to Aluminum Level 2 status have not completely eliminated the need for AB&I to further treat or control industrial storm water discharges that exceed the NALs set for in the IGP. As such, AB&I will remain in Level 2 Status for Aluminum (Al) for the 2021-2022 stormwater reporting year.

In addition to the currently implemented advanced BMPs described in this report, AB&I will be drastically altering on site industrial activities by ending molding operations. The facility currently operates two molding lines that contribute to potential pollutant accumulation on site including baghouse dust and generation of waste materials. Molding lines take up a significant amount of structural overhead coverage capacity in outfall 2, and generates waste stored in outfall 1. By removing molding operations from AB&I's industrial activities, a significant portion of potential pollutants contributing to past NAL exceedances will be eliminated. A comprehensive SWPPP update will be completed to describe alterations to operations relating to the removal of molding, according to the CA Industrial General Stormwater Permit. As of December 2021, AB&I plans on ending molding production in June 2022 and will be removing related materials throughout the summer of 2022.

Analysis Requested

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analysis Requested

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Tennant 800 Vacuum Sweeper Specifications

CREATING A CLEANER, SAFER, HEALTHIER WORLD.

EQUIPMENT

800

LARGE, INDUSTRIAL RIDER SWEEPER

- Ideal for harsh environments with large capacity hopper with corrosion resistant bottom and a quad filtering dust-containment system
- Maximum cleaning productivity with wide sweeping path and operator-friendly features
- Long-term performance for effectively capturing everything from cement dust to rocks, paper and glass

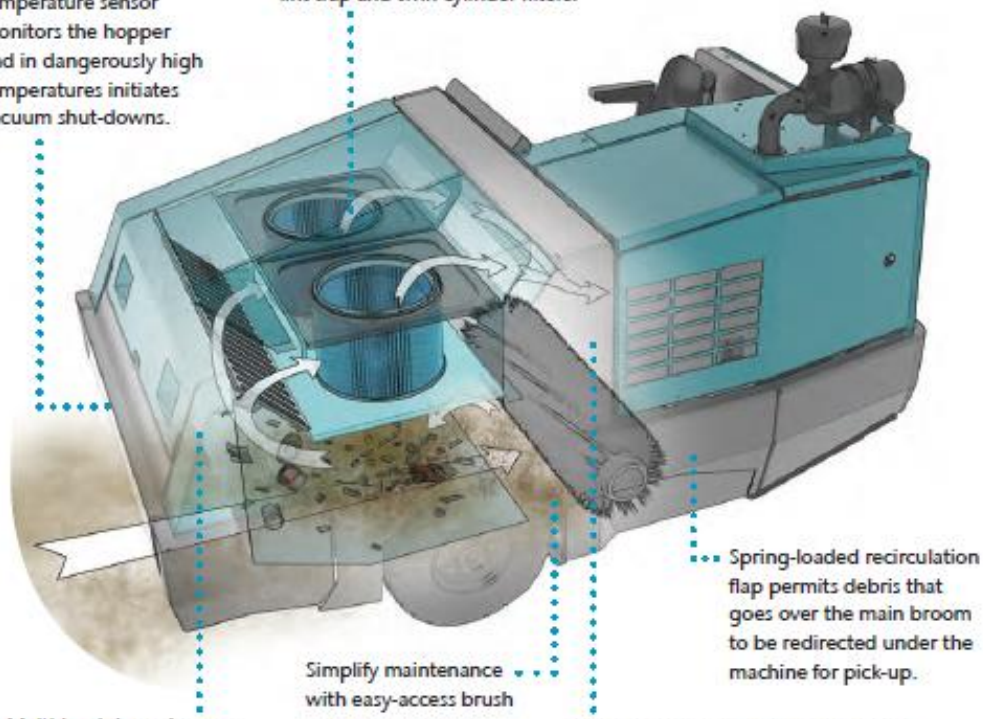
UNRIVALED SIZE AND PERFORMANCE TO CLEAN THE MOST SEVERE ENVIRONMENTS

The 800 is the largest and most powerful machine in its class – designed to sweep heavy concentrations of industrial debris, pellets, rocks and glass found in the harshest industrial and manufacturing environments, both indoors and out.

LONG-LASTING DURABILITY FOR INDUSTRIAL ENVIRONMENTS

Rely on consistent performance, despite harsh and demanding environments, with the 800 sweeper's rugged steel T-beam superstructure, bend-resistant steel back wheel bracket and optional heavy-duty tower bumpers. Our custom solutions engineering group can design extra protection features or other options to meet your application needs.

MAXIMUM FILTRATION REDUCES AIRBORNE DUST



The 800's quad filtering system includes four high-efficiency filters that trap particles capturing virtually all airborne dust. Plus, quickly knows when to address occasional filter clogs with the indicator light and timed shaker.

OPERATOR FRIENDLY FOR GREATER PRODUCTIVITY

The 800 is tough on litter but easy on operators. Clean in comfort with a deluxe suspension operator seat and power steering with tilt wheel.

INSIDE THE

800

DELIVERING RUGGED ENDURANCE

The multi-level dump hopper empties debris into containers as high as 6 ft / 1.8 m, and its huge capacity allows for more continuous cleaning time.

KEY OPTIONS

Extend cleaning reach with the vacuum wand, or help dislodge or reposition debris in front of the machine with the blower attachment.

Stainless-steel hopper bottom withstands the most demanding and abusive sweeping environments.

Pressurized cab with heating and air conditioning for increased operator comfort and safety.

TENNANT*TRUE*® PARTS, SERVICE AND FINANCE SOLUTIONS

- Reduce rework, labor and safety costs by using only Tennant*True* parts and service.
- Ensure optimal cleaning performance by selecting a Tennant*True* Service program provided by a network of over 400 factory-trained Tennant service representatives.
- Improve uptime by leveraging Tennant*True* parts and service.
- Simplify budgeting by bundling Tennant*True* service plans, including parts, into the purchase or financing of your machine.

Lease. Pre-Owned. Rent. Tennant has flexible options that get you the machines you need, however you need them.

INSPECTION REPORT - SUMMARY OF VIOLATIONS AND COMMENTS

Fa l ty a e ABI Foundry **C RS ID** 10238632 **In e t on Ty e** Routine **Date** 06/24/2019
Addre 7825 San Leandro ST , Oakland, CA 94621

A o e round etroleu Stora e A t - on- ual ed

1 - SPCC has been prepared
O er at on Certified by PE on 4/3/2019.

31 - Appropriate (general) containment/diversionary structures/equipment have been provided
O er at on Integrity test certification by SPC Corp says that the Diesel generator has a secondary containment. There are unusual wholes in the top of what appears to be the secondary containment. ACDEH recommends looking into this as it may affect the integrity of the tank s secondary containment.
Code Se t on HSC 6.67 25270.4.5(a); 40 CFR 1 112.7(c)

60 - Records maintained of drainage from diked areas
O er at on Failure to maintain adequate records (or NPDES permit records) of drainage from diked areas. The facility has a weekly inspection form that does have the question if containment/diked areas are free of liquid, but the personnel are draining it and answering yes without the date.
Cla MINOR VIOLATION
Code Se t on HSC 6.67 25270.4.5(a); 40 CFR 1 112.8(c)(3)(iv)
Corre t e A t on Maintain adequate records (or NPDES permit records) of drainage from diked areas.

63 - Tanks inspected and tested by qualified person in accordance with industry standards
O er at on Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards. During the inspection, ACDEH asked how the secondary containment was inspected during monthly inspections of the 1000 gallon Convault tanks and it did not appear or seem like anyone inspected the interstitial space/secondary containment of the convault 1000 gallon diesel tanks.
Cla MINOR VIOLATION
Code Se t on HSC 6.67 25270.4.5(a); 40 CFR 1 112.8(c)(6)
Corre t e A t on Ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards. Provide ACDEH with an update on tank inspection procedures to show that the tank interstitial space will be inspected.

5 - Updated within 30 days of 100 increase or new haz; change of address/owner/name; or change in ops
O er at on The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material; a change of business address, business ownership, or business name; or a substantial change in the handler s operations that requires modification to any portion of the business plan. Observed 2640 cubic feet of compressed gas Argon, while the chemical inventory currently reports 660 cubic feet.
Cla MINOR VIOLATION

olat on Ty e Repeat
Corre t e A t on Update all submittal elements effected by the change in Argon inventory and electronically submit the update within 30 days.

Add t onal Co ent Onsite to conduct the Hazardous Waste Generator inspection at AB&I Foundry - 7825 San Leandro St., Oakland, CA. Met with Melisa Cohen,

Generator is a RCRA Large Quantity Generator that generates over 270 gallons of hazardous waste per month.

4 - Contingency plan contains all required content

O er at on Contingency Plan is currently on an old form, but primary emergency contact is posted around facility. Alameda County Env. Health CUPA phone number (510)567-6700 should be added to emergency contacts.

a ardou a te RCRA L	
5 -	Trained facility personnel annually and maintained required documentation until closure **O er at on** As demonstrated by the hazardous waste violations observed at the time of inspection, proper training documentation requirements has not been maintained. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description, duties of facility personnel assigned to each position and a written description of the type and amount of both introductory and continuing training that will be given to each person filing a position. Generator has training documentation, but it is missing the job titles, job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filing a position. **Cla** MINOR VIOLATION **Code Se t on** 22 CCR 12 66262.34(a)(4); 22 CCR 15 66265.16 **Corre t e A t on** Document training according to the requirements of 22 CCR 15 66265.16(d). Submit a copy of the documentation to the CUPA.
14 -	Owner/Operator retained copy of manifest or bill of lading for spent lead acid batteries for 3 years **O er at on** Facility does not dispose of 9 or more lead acid batteries.
Add t onal Co ent	Onsite to conduct the Hazardous Materials Business Plan inspection at AB&I Foundry - 7825 San Leandro St., Oakland, CA. Met with Melisa Cohen,

This inspection report is a "NOTICE TO COMPLY". Please correct all violations immediately and submit proof of correction to ACDEH. ACDEH may re-inspect your facility to verify compliance.

Minor violations that are uncorrected 30 days after the date of inspection, and Class I and Class II violations are subject to formal enforcement action. Enforcement may include civil and/or criminal penalties under applicable local, state and/or federal laws or regulations. Formal enforcement action and/or penalty assessment may be initiated at any time without further notice and penalties may be calculated from the date of the violation.

Overall Inspection Comments:

Initial APSA inspection of ABI Foundry located at 7825 San Leandro St., Oakland, CA with S. De. Facility access for inspection was granted by Mike Olvera (Environmental Manager). Monica Perez (Metallurgical Engineer) and Jimmy Dileo (Environmental Specialist) were also present during the facility inspection.

CERTIFICATION OF RETURN TO COMPLIANCE
I certify that the violation(s) noted on the Notice to Comply and/or /Summary of Violations page(s) have been corrected. I have personally examined any documentation attached to the certification to establish that the violations have been corrected.

OBSERVATION:

Stormwater is exposed to facility processes/storage, collected and treated before discharge.

Contact water from process (hot dip water spray, pipe slurr) is collected in contact water sump, treated and re-used in the process.

Foundry generates slag which is disposed as solid waste.

CORRECTIVE ACTION: Submit waste analysis including acute aquatic toxicity (fish bioassay) for the collected stormwater before treatment and the foundry slag waste for hazardous waste determination to CUPA within 30 days.

Violation Code Definition/Section:

"Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements:
1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and
2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed.
3) Constructed of or lined with materials that are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation (including stresses from nearby vehicular traffic);
4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift;
5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours;
6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24 hours.
7) Secondary containment for tanks shall include one or more of the following devices:
a) A liner (external to the tank); b) a vault; c) a double-walled tank; or d) an equivalent device as approved by the Department.
8) The secondary containment systems shall satisfy the following requirements:
a) External liner systems shall be designed or operated to contain 100 percent of the capacity of the largest tank within its boundary; or
b) Designed or operated to prevent run-on and infiltration of precipitation into the secondary containment system unless the collection system has sufficient excess capacity to contain run-on and infiltration. Such additional capacity shall be sufficient to contain run-on and infiltration of precipitation from a 25-year, 24-hour rainfall event;
c) Free of cracks or gaps; and
d) Designed and installed to completely surround the tank and to cover all surrounding earth likely to come into contact with the waste if released from the tank(s) (i.e., capable of preventing lateral as well as vertical migration of the waste).
9) Vault systems shall be:
a) Designed or operated to contain 100 percent of the capacity of the largest tank within its boundary;
b) Designed or operated to prevent run-on and infiltration of precipitation into the secondary containment system unless the collection system has sufficient excess capacity to contain run-on and infiltration. Such additional capacity shall be sufficient to contain run-on and infiltration of precipitation from a 25-year, 24-hour rainfall event;
c) Constructed with chemical-resistant water stops in place at all joints (if any);
d) Provided with an impermeable interior coating or lining that is compatible with the waste being transferred, stored or treated and that will prevent migration of waste into the concrete;
e) Provided with a means to protect against the formation of and ignition of vapors within the vault, if the waste being transferred, stored or treated.
f) Provided with an exterior moisture barrier or be otherwise designed or operated to prevent migration of moisture into the vault if the vault is subject to hydraulic pressure.
10) Double-walled tanks shall be:
a) Designed as an integral structure (i.e., an inner tank within an outer shell) so that any release from the inner tank is contained by the outer shell;
b) Protected, if constructed of metal, from both corrosion of the primary tank interior and the external surface of the outer shell; and
c) Provided with a built-in, continuous leak detection system capable of detecting a release within 24 hours or at the earliest practicable time, if the owner or operator can demonstrate to the Department, and the Department concurs, that the existing leak detection technology or site conditions will not allow detection of a release within 24 hours.
11) Ancillary equipment shall be provided with full secondary containment (e.g., trench, jacketing, double-walled piping) that meets the requirements of subsections 4), 5) and 6) of this section except for:
(1) Aboveground piping (exclusive of flanges, joints, valves, and connections) that are visually inspected for leaks on a daily basis;
(2) Welded flanges, welded joints, and welded connections that are visually inspected for leaks on a daily basis;

a) General emergency procedures as required in section 66265.56.
b) Cessation of use; prevention of flow or addition of wastes into the tank system or secondary containment system and inspect the system to determine the cause of the release.
c) Removal of waste from tank system or secondary containment system:
1) If the release was from the tank system, the owner or operator shall, within 24 hours after detection of the leak or, if the owner or operator demonstrates that that is not possible, at the earliest practicable time remove as much of the waste as is necessary to prevent further release of hazardous waste to the environment and to allow inspection and repair of the tank system to be performed.
2) If the release was to a secondary containment system, all released materials shall be removed within 24 hours or in as timely a manner as is possible to prevent harm to human health and the environment.
d) The owner or operator shall immediately conduct a visual inspection of the release and, based upon that inspection:
1) Prevent further migration of the leak or spill to soils or surface water; and
2) Remove, and properly dispose of, any visible contamination of the soil or surface water.
e) Notifications, reports;
1) Any release to the environment, except as provided in subsection e)2) of this section, shall be reported within 24 hours of detection.
2) A leak or spill of hazardous waste is exempted from the requirements of subsection (e) of this section, but is not exempted from the requirements of section 66265.56, if it is:
A) less than or equal to a quantity of one (1) pound, and
B) Immediately contained and cleaned-up.
3) Within 30 days of detection of a release to the environment, a report containing the following information shall be submitted:
A) Likely route of migration of the release;
B) Characteristics of the surrounding soil (soil composition, geology, hydrogeology, climate);
C) Results of any monitoring or sampling conducted in connection with the release, (if available). If sampling or monitoring data relating to the release are not available within 30 days, these data shall be submitted as soon as they become available;
D) Proximity to downgradient drinking water, surface water, and population areas; and
E) Description of response actions taken or planned.
f) Provision of secondary containment, repair, or closure.
1) Unless the owner or operator satisfies the requirements of subsections f)2) through 4) of this section, the tank system shall be closed in accordance with section 66265.197.
2) If the cause of the release was a spill that has not damaged the integrity of the system, the owner/operator may return the system to service as soon as the released waste is removed and repairs, if necessary, are made.
3) If the cause of the release was a leak from the primary tank system into the secondary containment system, the system shall be repaired prior to returning the tank system to service.
4) If the source of the release was a leak to the environment from a component of a tank system without secondary containment, the owner/operator shall provide the component of the system from which the leak occurred with secondary containment that satisfies the requirements of section 66265.193 before it can be returned to service, unless the source of the leak is an aboveground portion of a tank system. If the source is an aboveground component that can be inspected visually, the component shall be repaired and may be returned to service without secondary containment as long as the requirements of subsection g) of this section are satisfied. If a component is replaced to comply with the requirements of this subsection, that component shall satisfy the requirements for new tank systems or components in sections 66265.192 and 66265.193. Additionally, if a leak has occurred in any portion of a tank system component that is not readily accessible for visual inspection (e.g., the bottom of an inground or onground tank), the entire component shall be provided with secondary containment in accordance with section 66265.193 prior to being returned to use.
g) If the owner or operator has repaired a tank system in accordance with subsection f) of this section, and the repair has been extensive (e.g., installation of an internal liner; repair of a ruptured primary containment or secondary containment vessel), the tank system shall not be returned to service unless the owner/operator has obtained a certification by an independent, qualified, professional engineer that the repaired system is capable of handling hazardous wastes without release for the intended life of the system. 22 CCR 15 66265.196

"Failure to meet hazardous waste requirements, as a generator, when handling, storing, and transporting more than 10 lead acid batteries at any one time. 22 CCR 16 66266.81(a)(1)"

Violation Comments:

OBSERVATION: No manifest/bill of lading for spent lead acid battery for the past 3 years was available during inspection. Facility tops off sulfuric acid (2x32 oz) in batteries. A battery was on a dolly. No proper storage for spent batteries was observed during inspection.

CORRECTIVE ACTION: Submit documentation (manifest/bill of lading, photograph of proper storage) to CUPA within 30 days.

DIRECTIONS FOR FILLING OUT PAGE 1 OF THE WASTE TIRE SURVEY & INSPECTION REPORT (SURVEY FORM)

Please print neatly within the provided boxes and fill in all the applicable bubbles and/or boxes.

Use a blue or black ink pen only.

PART A - SURVEY

Business Profile

TPID: The complete TPID (Tire Program Identification Number) including the suffix is an essential part of the inspection form. If the location under investigation needs a TPID and does not have one, the inspector is to call 1-866-896-0600 and help the operator obtain a TPID.

Local Identifier: This space has been included to provide the grantees with an opportunity to link the inspection form to their local database. If you don't have a local number to fill in this space, leave it blank.

Business or Facility Name & Physical Address: Include the business name and physical address in this section (please print neatly).

Business Rep: This is the person that was contacted and authorized the inspection/visit.

Tire Count: Use whole tire counts/Passenger Tire Equivalents (1 PTE = 20 lbs.) or both. Tire pieces all the way down to ¼" in size are regulated and should be included in the tire count. Do not count tires that meet the rack and stack criteria.

GPS: Take a reading using a Global Positioning System (GPS) unit or obtain the coordinates from a map program using the facility/site address and record the readings in this section. Record the latitude/longitude in decimal degrees.

Inspection Details

Inspection Type: Fill the bubble that describes the inspection type. A **Routine** or periodic inspection or visit is prompted by regulation (e.g. minor waste tire facility permits are required to be inspected at least every 30 months and majors are to be inspected annually) or by the inspectors schedule, set to insure periodic visits of each location within their jurisdiction. A **Re-inspection** is always preceded by an inspection in which a violation was cited. The Inspection Type will be considered a re-inspection until the violation is corrected. **Observation** is an Inspection Type that is spontaneous. (e.g. The inspector is in the field and sees a tire facility, a pile of tires or anything that causes them to inspect the site.) A **Referral** Inspection Type is prompted by the CHP, CalRecycle, a Complaint, an Educational Visit request from the CalRecycle Hauler Unit, or by some Other agency. If the **Referral** box is checked, the inspector is to also select the corresponding **Referral Type**. Always try to find out from the referrer the appropriate Referral Type. If the Other (Referral Type) bubble is selected, name the referring agency (any local, state or federal agency) in the comment section of the report. The Educational Visit Referral Type is prompted by the Waste Tire Manifesting System database (WTMS) when multiple manifesting errors are detected over a set period of time. The WTMS Educational Visit is a Referral Type that prompts a focused inspection/visit to provide manifest training to a hauler, generator, or end use facility.)

Inspected By/Inspector: The inspector's name and the applicable county or state code are to be recorded in this section. The county code begins with the traditional county number and ends with an assigned three-digit number.

Inspection Dates and Times need to be completed to provide the site's history of compliance. This information is vital for agenda items and court hearings.

Operational Status: **Active:** Active tire operation; **Closed:** All the tires have been removed and operations are no longer, or never were, conducted at this location; **Inactive:** Tires are present but operations are not active; **Planned:** Location where waste tire activities are proposed.

Tire Type: Fill in applicable tire types stored on-site. OTR = off the road tires

Business Role & Storage Type: Fill in all that apply. Specific standards are associated with indoor (14 CCR 17356) and outdoor (14 CCR 17354) tire storage.

Business Type: A business may conduct multiple activities (or business types) at one location. If the list of business types on the survey form does not contain the business type conducted at the location of the visit, choose other and print in the appropriate business type.

PART B - INSPECTION OF WASTE TIRE DEALER GENERATOR, HAULER AND END-USE FACILITY

V = Violation A = Area of Concern—considered a warning, not a violation

PRC § 42951: Use to cite **unregistered haulers**.
PRC § 42953: Cite the person(s) that **contract or use unregistered haulers** to transport 10 or more waste or used tires.
PRC § 42956: Cite haulers for missing or improperly placed **decals** or **certificates**.
14 CCR § 18459: Cite **exempt** or registered haulers, facilities or generators for not completing, signing, or using logs and/or manifests.
14 CCR § 18459.1: Choose this section to cite anyone who's **TPID #** is not posted or other subsections as necessary.
14 CCR § 18459.2.1: Cite for exceeding **manifest** document **submittal time** limit (90 days).
14 CCR § 18459.3: Cite if records are not retained for 3 years.
14 CCR § 18460.2: Cite **registered haulers** for not showing proof that the vehicle is registered, incomplete manifests, not carrying copies of manifests and trip logs in the vehicle, not leaving a copy of manifests anywhere tires are dropped off or picked up, hauling waste tires to unauthorized locations, not reporting generators or end use facilities that do not use or properly complete the manifests, transporting tires without completed manifest forms and/or trip logs.
14 CCR § 18461: Cite the **end use** facility for manifest violations, record retention, mailing forms.
14 CCR § 18462: Cite **tire dealers** or waste **tire generators** for manifesting violations, contracting or making arrangements with unregistered haulers.
Other: Cite CalRecycle laws or regulations that are not listed on the inspection report in this space. Cite any applicable (tire related) local code violation in the comment section. Do **not** fill the Other bubble **for local code** violations or record local code violations in this section.

Enforcement Status: If a violation is documented, fill in the **Notice Of Violation (NOV)** bubble and assign a Compliance Deadline (give the operator the Standardized NOV and the appropriate law or regulation handout). The **Compliance Deadline Date** (CDD) is normally around 30 days. However, the inspector may exercise their discretion when assigning a CDD. If an **Extension** of the CDD date is granted, fill in the bubble and record the new CDD. If the site/operator is **referred** for/or **already under CalRecycle Enforcement** or if the site/operator is referred to some other agency, fill the referred/CalRecycle bubble. Note the entity to whom the case was referred in the comment section. If there are no violations found during the inspection, fill in the **In Compliance-No Violation** bubble.

Comments: Summarize the inspection. Capture specific details that may be useful in case prosecution or simply to convey information about the site, operator, or the violation. **If a violation is cited**, be sure to **note that the NOV** and applicable handouts were distributed to the Business Representative.

Page bubble: (Lower Left) Fill in the bubble indicating if the inspection form and/or extra comment form is included with the survey (page 1) form. Use page two, Inspection Form, for permitted & exempt facilities or when an excluded facility is in violation of the Waste Tire Storage & Disposal Standards.

Signatures: Sign the form and have the Business Representative that authorized the inspection sign the form.

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Census Block Group EJ Indexes (percentile)	
Particulate Matter (PM 2.5)	93
Ozone	85.1
NATA Diesel PM	86.7
NATA Air Toxics Cancer Risk	86
NATA Respiratory Hazard Index (HI)	87.9

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

COVENANT AND ENVIRONMENTAL RESTRICTION
ON PROPERTY

AB&I Foundry
7825 San Leandro Street
Oakland, California

This Covenant and Environmental Restriction on Property (this "Covenant") is made as of the 21st day of September, 2011__ by McWane, Inc. ("Covenantor") who is the Owner of record of that certain property situated at 7825 San Leandro Street , in the City of _ Oakland _____, County of Alameda _____, State of California, which is more particularly described in Exhibit A attached hereto and incorporated herein by this reference (such portion hereinafter referred to as the "Burdened Property"), for the benefit of the Alameda County Environmental Health Services (the "County"), with reference to the following facts:

A. The Burdened Property and groundwater underlying the property contains hazardous materials.

B. Contamination of the Burdened Property. Soil at the Burdened Property was contaminated by previous industrial operations, including but not limited to the manufacture of cast pipe and fittings and warehousing operations and by releases from six underground fuel storage tanks formerly present at the Burdened Property. These operations resulted in contamination of soil and groundwater with organic chemicals including petroleum hydrocarbons, primarily benzene, toluene, ethylbenzene, and xylene; and chlorinated solvents, primarily 1,1,1-TCA, 1,1-dichloroethane (1,1-DCA), 1,1-dichloroethene (1,1-DCE), chloroethane, cis-and trans-1,2-dichloroethene (1,2-DCE), and vinyl chloride. These constituents constitute hazardous materials as that term is defined in Health & Safety Code Section 25260. To treat and control migration of contaminated soil and groundwater, several remedial actions were conducted at the Burdened Property including excavation and off-site disposal of contaminated

soil in the immediate vicinity of the UST areas and implementation of an enhanced biodegradation injection program.

C. Exposure Pathways. The contaminants addressed in this Covenant are present in soil and groundwater on the Burdened Property. Without the mitigation measures which have been performed on the Burdened Property, exposure to these contaminants could take place via exposure during future soil excavation resulting in dermal contact, inhalation, or ingestion by humans.. The risk of public exposure to the contaminants has been substantially lessened by the remediation and controls described herein.

D. Adjacent Land Uses and Population Potentially Affected. The Burdened Property is used for the manufacture of cast pipe and fittings and warehousing operations and is adjacent to industrial and commercial land uses and is adjacent to industrial and commercial land uses land uses.

E. Full and voluntary disclosure to the County of the presence of hazardous materials on the Burdened Property has been made and extensive sampling of the Burdened Property has been conducted.

F. Covenantor desires and intends that in order to benefit the County, and to protect the present and future public health and safety, the Burdened Property shall be used in such a manner as to avoid potential harm to persons or property that may result from hazardous materials that may have been deposited on portions of the Burdened Property.

ARTICLE I
GENERAL PROVISIONS

1.1 Provisions to Run with the Land. This Covenant sets forth protective provisions, covenants, conditions and restrictions (collectively referred to as "Restrictions") upon and subject to which the Burdened Property and every portion thereof shall be improved, held, used, occupied, leased, sold, hypothecated, encumbered, and/or conveyed. The restrictions set forth in Article III are reasonably necessary to protect present and future human health and safety or the environment as a result of the presence on the land of hazardous materials. Each and all of the Restrictions shall run with the land, and pass with each and every portion of the Burdened Property, and shall apply to, inure to the benefit of, and bind the respective successors in interest thereof, for the benefit of the County and all Owners and Occupants. Each and all of the Restrictions are imposed upon the entire Burdened Property unless expressly stated as applicable to a specific portion of the Burdened Property. Each and all of the Restrictions run with the land pursuant to section 1471 of the Civil Code. Each and all of the Restrictions are enforceable by the County.

1.2 Concurrence of Owners and Lessees Presumed. All purchasers, lessees, or possessors of any portion of the Burdened Property shall be deemed by their purchase, leasing, or possession of such Burdened Property, to be in accord with the foregoing and to agree for and among themselves, their heirs, successors, and assignees, and the agents, employees, and lessees of such owners, heirs, successors, and assignees, that the Restrictions as herein established must be adhered to for the benefit of the County and the Owners and Occupants of the Burdened Property

and that the interest of the Owners and Occupants of the Burdened Property shall be subject to the Restrictions contained herein.

1.3 Incorporation into Deeds and Leases. Covenantor desires and covenants that the Restrictions set out herein shall be incorporated in and attached to each and all deeds and leases of any portion of the Burdened Property. Recordation of this Covenant shall be deemed binding on all successors, assigns, and lessees, regardless of whether a copy of this Covenant and Agreement has been attached to or incorporated into any given deed or lease.

1.4 Purpose. It is the purpose of this instrument to convey to the County real property rights, which will run with the land, to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

ARTICLE II
DEFINITIONS

2.1 County. "County" shall mean the Alameda County Environmental Health Services and shall include its successor agencies, if any.

2.2 Improvements. "Improvements" shall mean all buildings, roads, driveways, regradings, and paved parking areas, constructed or placed upon any portion of the Burdened Property.

2.3 Occupants. "Occupants" shall mean Owners and those persons entitled by ownership, leasehold, or other legal relationship to the exclusive right to use and/or occupy all or any portion of the Burdened Property.

2.4 Owner or Owners. "Owner" or "Owners" shall mean the Covenantor and/or its successors in interest, who hold title to all or any portion of the Burdened Property.

ARTICLE III
DEVELOPMENT, USE AND CONVEYANCE OF THE BURDENED PROPERTY

3.1 Restrictions on Development and Use. Covenantor promises to restrict the use of the Burdened Property as follows:

a. Development of the Burdened Property shall be restricted to industrial;

b. No residence for human habitation shall be permitted on the Burdened Property;

c. No hospitals shall be permitted on the Burdened Property;

d. No schools for persons under 21 years of age shall be permitted on the Burdened Property;

e. No day care centers for children or day care centers for Senior Citizens shall be permitted on the Burdened Property;

f. No Owners or Occupants of the Property or any portion thereof shall conduct any excavation work on the Property, unless expressly permitted in writing by the County. Any contaminated soils brought to the surface by grading, excavation, trenching, or backfilling shall be managed by Covenantor or his agent in accordance with all applicable provisions of local, state and federal law. Notwithstanding the foregoing, Covenantor may perform routine landscaping and maintenance of surface improvements thereon;

g. All uses and development of the Burdened Property shall be consistent with any applicable County Cleanup Order or Risk Management Plan, each of which is hereby incorporated by reference including future amendments thereto. All uses and development shall preserve the integrity of any cap, any remedial measures taken or remedial equipment installed, and any groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, unless otherwise expressly permitted in writing by the County.

h. With the exception of the use of the one existing onsite water supply well for industrial water supply, no Owners or Occupants of the Property or any portion thereof shall drill, bore, otherwise construct, or use a well for the purpose of extracting water for any use, including but not limited to, domestic, potable, or industrial uses, unless expressly permitted in writing by the County.

i. The Owner shall notify the County of each of the following: (1) The type, cause, location and date of any disturbance to any cap, any remedial measures taken or remedial equipment installed, and of the groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, which could affect the ability of such cap or remedial measures, remedial equipment, or monitoring system to perform their respective functions and (2) the type and date of repair of such disturbance. Notification to the County shall be made by registered mail within ten (10) working days of both the discovery of such disturbance and the completion of repairs;

j. The Covenantor agrees that the County, and/or any persons acting pursuant to County cleanup orders, shall have reasonable access to the Burdened Property for the purposes of inspection, surveillance, maintenance, or monitoring, as provided for in Division 7 of the Water Code.

k. No Owner or Occupant of the Burdened Property shall act in any manner that will aggravate or contribute to the existing environmental conditions of the Burdened Property. All use and development of the Burdened Property shall preserve the integrity of any capped areas.

l. No Owner or Occupant of the Burdened Property shall use the Burdened Property to grow fruits or vegetables for consumption.

3.2 Enforcement. Failure of an Owner or Occupant to comply with any of the restrictions, as set forth in paragraph 3.1, shall be grounds for the County, by reason of this Covenant, to have the authority to require that the Owner modify or remove any Improvements constructed in violation of that paragraph. Violation of the Covenant shall be grounds for the County to file civil actions against the Owner as provided by law.

3.3 Notice in Agreements. After the date of recordation hereof, all Owners and Occupants shall execute a written instrument which shall accompany all purchase agreements or leases relating to the property. Any such instrument shall contain the following statement:

> The land described herein contains hazardous materials in soils and in the ground water under the property, and is subject to a deed restriction dated as of _____, 2011, and recorded on _____, 2011, in the Official Records of _____ County, California, as Document No. _____, which Covenant and Restriction imposes certain covenants, conditions, and restrictions on usage of the property described herein. This statement is not a declaration that a hazard exists.

ARTICLE IV
VARIANCE AND TERMINATION

4.1 Variance. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or any portion thereof may apply to the County for a written variance from the provisions of this Covenant.

4.2 Termination. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or a portion thereof may apply to the County for a termination of the Restrictions as they apply to all or any portion of the Burdened Property.

4.3 Term. Unless terminated in accordance with paragraph 4.2 above, by law or otherwise, this Covenant shall continue in effect in perpetuity.

ARTICLE V
MISCELLANEOUS

5.1 No Dedication Intended. Nothing set forth herein shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Burdened Property or any portion thereof to the general public.

5.2 Notices. Whenever any person gives or serves any notice, demand, or other communication with respect to this Covenant, each such notice, demand, or other communication shall be in writing and shall be deemed effective (1) when delivered, if

personally delivered to the person being served or official of a government agency being served, or (2) three (3) business days after deposit in the mail if mailed by United States mail, postage paid certified, return receipt requested:

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Census Block Group EJ Indexes (percentile)	
Particulate Matter (PM 2.5)	93
Ozone	85.1
NATA Diesel PM	86.7
NATA Air Toxics Cancer Risk	86
NATA Respiratory Hazard Index (HI)	87.9
Traffic Proximity	93.2

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

COVENANT AND ENVIRONMENTAL RESTRICTION
ON PROPERTY

AB&I Foundry
7825 San Leandro Street
Oakland, California

This Covenant and Environmental Restriction on Property (this "Covenant") is made as of the 21st day of September, 2011__ by McWane, Inc. ("Covenantor") who is the Owner of record of that certain property situated at 7825 San Leandro Street , in the City of _ Oakland _____, County of Alameda _____, State of California, which is more particularly described in Exhibit A attached hereto and incorporated herein by this reference (such portion hereinafter referred to as the "Burdened Property"), for the benefit of the Alameda County Environmental Health Services (the "County"), with reference to the following facts:

A. The Burdened Property and groundwater underlying the property contains hazardous materials.

B. Contamination of the Burdened Property. Soil at the Burdened Property was contaminated by previous industrial operations, including but not limited to the manufacture of cast pipe and fittings and warehousing operations and by releases from six underground fuel storage tanks formerly present at the Burdened Property. These operations resulted in contamination of soil and groundwater with organic chemicals including petroleum hydrocarbons, primarily benzene, toluene, ethylbenzene, and xylene; and chlorinated solvents, primarily 1,1,1-TCA, 1,1-dichloroethane (1,1-DCA), 1,1-dichloroethene (1,1-DCE), chloroethane, cis-and trans-1,2-dichloroethene (1,2-DCE), and vinyl chloride. These constituents constitute hazardous materials as that term is defined in Health & Safety Code Section 25260. To treat and control migration of contaminated soil and groundwater, several remedial actions were conducted at the Burdened Property including excavation and off-site disposal of contaminated

soil in the immediate vicinity of the UST areas and implementation of an enhanced biodegradation injection program.

C. Exposure Pathways. The contaminants addressed in this Covenant are present in soil and groundwater on the Burdened Property. Without the mitigation measures which have been performed on the Burdened Property, exposure to these contaminants could take place via exposure during future soil excavation resulting in dermal contact, inhalation, or ingestion by humans.. The risk of public exposure to the contaminants has been substantially lessened by the remediation and controls described herein.

D. Adjacent Land Uses and Population Potentially Affected. The Burdened Property is used for the manufacture of cast pipe and fittings and warehousing operations and is adjacent to industrial and commercial land uses and is adjacent to industrial and commercial land uses land uses.

E. Full and voluntary disclosure to the County of the presence of hazardous materials on the Burdened Property has been made and extensive sampling of the Burdened Property has been conducted.

F. Covenantor desires and intends that in order to benefit the County, and to protect the present and future public health and safety, the Burdened Property shall be used in such a manner as to avoid potential harm to persons or property that may result from hazardous materials that may have been deposited on portions of the Burdened Property.

ARTICLE I
GENERAL PROVISIONS

1.1 Provisions to Run with the Land. This Covenant sets forth protective provisions, covenants, conditions and restrictions (collectively referred to as "Restrictions") upon and subject to which the Burdened Property and every portion thereof shall be improved, held, used, occupied, leased, sold, hypothecated, encumbered, and/or conveyed. The restrictions set forth in Article III are reasonably necessary to protect present and future human health and safety or the environment as a result of the presence on the land of hazardous materials. Each and all of the Restrictions shall run with the land, and pass with each and every portion of the Burdened Property, and shall apply to, inure to the benefit of, and bind the respective successors in interest thereof, for the benefit of the County and all Owners and Occupants. Each and all of the Restrictions are imposed upon the entire Burdened Property unless expressly stated as applicable to a specific portion of the Burdened Property. Each and all of the Restrictions run with the land pursuant to section 1471 of the Civil Code. Each and all of the Restrictions are enforceable by the County.

1.2 Concurrence of Owners and Lessees Presumed. All purchasers, lessees, or possessors of any portion of the Burdened Property shall be deemed by their purchase, leasing, or possession of such Burdened Property, to be in accord with the foregoing and to agree for and among themselves, their heirs, successors, and assignees, and the agents, employees, and lessees of such owners, heirs, successors, and assignees, that the Restrictions as herein established must be adhered to for the benefit of the County and the Owners and Occupants of the Burdened Property

and that the interest of the Owners and Occupants of the Burdened Property shall be subject to the Restrictions contained herein.

1.3 Incorporation into Deeds and Leases. Covenantor desires and covenants that the Restrictions set out herein shall be incorporated in and attached to each and all deeds and leases of any portion of the Burdened Property. Recordation of this Covenant shall be deemed binding on all successors, assigns, and lessees, regardless of whether a copy of this Covenant and Agreement has been attached to or incorporated into any given deed or lease.

1.4 Purpose. It is the purpose of this instrument to convey to the County real property rights, which will run with the land, to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

ARTICLE II
DEFINITIONS

2.1 County. "County" shall mean the Alameda County Environmental Health Services and shall include its successor agencies, if any.

2.2 Improvements. "Improvements" shall mean all buildings, roads, driveways, regradings, and paved parking areas, constructed or placed upon any portion of the Burdened Property.

2.3 Occupants. "Occupants" shall mean Owners and those persons entitled by ownership, leasehold, or other legal relationship to the exclusive right to use and/or occupy all or any portion of the Burdened Property.

2.4 Owner or Owners. "Owner" or "Owners" shall mean the Covenantor and/or its successors in interest, who hold title to all or any portion of the Burdened Property.

ARTICLE III
DEVELOPMENT, USE AND CONVEYANCE OF THE BURDENED PROPERTY

3.1 Restrictions on Development and Use. Covenantor promises to restrict the use of the Burdened Property as follows:

a. Development of the Burdened Property shall be restricted to industrial;

b. No residence for human habitation shall be permitted on the Burdened Property;

c. No hospitals shall be permitted on the Burdened Property;

d. No schools for persons under 21 years of age shall be permitted on the Burdened Property;

e. No day care centers for children or day care centers for Senior Citizens shall be permitted on the Burdened Property;

f. No Owners or Occupants of the Property or any portion thereof shall conduct any excavation work on the Property, unless expressly permitted in writing by the County. Any contaminated soils brought to the surface by grading, excavation, trenching, or backfilling shall be managed by Covenantor or his agent in accordance with all applicable provisions of local, state and federal law. Notwithstanding the foregoing, Covenantor may perform routine landscaping and maintenance of surface improvements thereon;

g. All uses and development of the Burdened Property shall be consistent with any applicable County Cleanup Order or Risk Management Plan, each of which is hereby incorporated by reference including future amendments thereto. All uses and development shall preserve the integrity of any cap, any remedial measures taken or remedial equipment installed, and any groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, unless otherwise expressly permitted in writing by the County.

h. With the exception of the use of the one existing onsite water supply well for industrial water supply, no Owners or Occupants of the Property or any portion thereof shall drill, bore, otherwise construct, or use a well for the purpose of extracting water for any use, including but not limited to, domestic, potable, or industrial uses, unless expressly permitted in writing by the County.

i. The Owner shall notify the County of each of the following: (1) The type, cause, location and date of any disturbance to any cap, any remedial measures taken or remedial equipment installed, and of the groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, which could affect the ability of such cap or remedial measures, remedial equipment, or monitoring system to perform their respective functions and (2) the type and date of repair of such disturbance. Notification to the County shall be made by registered mail within ten (10) working days of both the discovery of such disturbance and the completion of repairs;

j. The Covenantor agrees that the County, and/or any persons acting pursuant to County cleanup orders, shall have reasonable access to the Burdened Property for the purposes of inspection, surveillance, maintenance, or monitoring, as provided for in Division 7 of the Water Code.

k. No Owner or Occupant of the Burdened Property shall act in any manner that will aggravate or contribute to the existing environmental conditions of the Burdened Property. All use and development of the Burdened Property shall preserve the integrity of any capped areas.

l. No Owner or Occupant of the Burdened Property shall use the Burdened Property to grow fruits or vegetables for consumption.

3.2 Enforcement. Failure of an Owner or Occupant to comply with any of the restrictions, as set forth in paragraph 3.1, shall be grounds for the County, by reason of this Covenant, to have the authority to require that the Owner modify or remove any Improvements constructed in violation of that paragraph. Violation of the Covenant shall be grounds for the County to file civil actions against the Owner as provided by law.

3.3 Notice in Agreements. After the date of recordation hereof, all Owners and Occupants shall execute a written instrument which shall accompany all purchase agreements or leases relating to the property. Any such instrument shall contain the following statement:

> The land described herein contains hazardous materials in soils and in the ground water under the property, and is subject to a deed restriction dated as of _____, 2011, and recorded on _____, 2011, in the Official Records of _____ County, California, as Document No. _____, which Covenant and Restriction imposes certain covenants, conditions, and restrictions on usage of the property described herein. This statement is not a declaration that a hazard exists.

ARTICLE IV
VARIANCE AND TERMINATION

4.1 Variance. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or any portion thereof may apply to the County for a written variance from the provisions of this Covenant.

4.2 Termination. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or a portion thereof may apply to the County for a termination of the Restrictions as they apply to all or any portion of the Burdened Property.

4.3 Term. Unless terminated in accordance with paragraph 4.2 above, by law or otherwise, this Covenant shall continue in effect in perpetuity.

ARTICLE V
MISCELLANEOUS

5.1 No Dedication Intended. Nothing set forth herein shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Burdened Property or any portion thereof to the general public.

5.2 Notices. Whenever any person gives or serves any notice, demand, or other communication with respect to this Covenant, each such notice, demand, or other communication shall be in writing and shall be deemed effective (1) when delivered, if

personally delivered to the person being served or official of a government agency being served, or (2) three (3) business days after deposit in the mail if mailed by United States mail, postage paid certified, return receipt requested:

5.3 Partial Invalidity. If any portion of the Restrictions or terms set forth herein is determined to be invalid for any reason, the remaining portion shall remain in full force and effect as if such portion had not been included herein.

5.4 Article Headings. Headings at the beginning of each numbered article of this Covenant are solely for the convenience of the parties and are not a part of the Covenant.

5.5 Recordation. This instrument shall be executed by the Covenantor and by the Director of Environmental Health Services. This instrument shall be recorded by the Covenantor in the County of _____ within ten (10) days of the date of execution.

5.6 References. All references to Code sections include successor provisions.

5.7 Construction. Any general rule of construction to the contrary notwithstanding, this instrument shall be liberally construed in favor of the Covenant to effect the purpose of this instrument and the policy and purpose of the Water Code. If any provision of this instrument is found to be ambiguous, an interpretation consistent with the purpose of this instrument that would render the provision valid shall be favored over any interpretation that would render it invalid.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

COVENANT AND ENVIRONMENTAL RESTRICTION
ON PROPERTY

AB&I Foundry
7825 San Leandro Street
Oakland, California

This Covenant and Environmental Restriction on Property (this "Covenant") is made as of the 21st day of September, 2011__ by McWane, Inc. ("Covenantor") who is the Owner of record of that certain property situated at 7825 San Leandro Street , in the City of _ Oakland _____, County of Alameda _____, State of California, which is more particularly described in Exhibit A attached hereto and incorporated herein by this reference (such portion hereinafter referred to as the "Burdened Property"), for the benefit of the Alameda County Environmental Health Services (the "County"), with reference to the following facts:

A. The Burdened Property and groundwater underlying the property contains hazardous materials.

B. Contamination of the Burdened Property. Soil at the Burdened Property was contaminated by previous industrial operations, including but not limited to the manufacture of cast pipe and fittings and warehousing operations and by releases from six underground fuel storage tanks formerly present at the Burdened Property. These operations resulted in contamination of soil and groundwater with organic chemicals including petroleum hydrocarbons, primarily benzene, toluene, ethylbenzene, and xylene; and chlorinated solvents, primarily 1,1,1-TCA, 1,1-dichloroethane (1,1-DCA), 1,1-dichloroethene (1,1-DCE), chloroethane, cis-and trans-1,2-dichloroethene (1,2-DCE), and vinyl chloride. These constituents constitute hazardous materials as that term is defined in Health & Safety Code Section 25260. To treat and control migration of contaminated soil and groundwater, several remedial actions were conducted at the Burdened Property including excavation and off-site disposal of contaminated

soil in the immediate vicinity of the UST areas and implementation of an enhanced biodegradation injection program.

C. Exposure Pathways. The contaminants addressed in this Covenant are present in soil and groundwater on the Burdened Property. Without the mitigation measures which have been performed on the Burdened Property, exposure to these contaminants could take place via exposure during future soil excavation resulting in dermal contact, inhalation, or ingestion by humans.. The risk of public exposure to the contaminants has been substantially lessened by the remediation and controls described herein.

D. Adjacent Land Uses and Population Potentially Affected. The Burdened Property is used for the manufacture of cast pipe and fittings and warehousing operations and is adjacent to industrial and commercial land uses and is adjacent to industrial and commercial land uses land uses.

E. Full and voluntary disclosure to the County of the presence of hazardous materials on the Burdened Property has been made and extensive sampling of the Burdened Property has been conducted.

F. Covenantor desires and intends that in order to benefit the County, and to protect the present and future public health and safety, the Burdened Property shall be used in such a manner as to avoid potential harm to persons or property that may result from hazardous materials that may have been deposited on portions of the Burdened Property.

ARTICLE I
GENERAL PROVISIONS

1.1 Provisions to Run with the Land. This Covenant sets forth protective provisions, covenants, conditions and restrictions (collectively referred to as "Restrictions") upon and subject to which the Burdened Property and every portion thereof shall be improved, held, used, occupied, leased, sold, hypothecated, encumbered, and/or conveyed. The restrictions set forth in Article III are reasonably necessary to protect present and future human health and safety or the environment as a result of the presence on the land of hazardous materials. Each and all of the Restrictions shall run with the land, and pass with each and every portion of the Burdened Property, and shall apply to, inure to the benefit of, and bind the respective successors in interest thereof, for the benefit of the County and all Owners and Occupants. Each and all of the Restrictions are imposed upon the entire Burdened Property unless expressly stated as applicable to a specific portion of the Burdened Property. Each and all of the Restrictions run with the land pursuant to section 1471 of the Civil Code. Each and all of the Restrictions are enforceable by the County.

1.2 Concurrence of Owners and Lessees Presumed. All purchasers, lessees, or possessors of any portion of the Burdened Property shall be deemed by their purchase, leasing, or possession of such Burdened Property, to be in accord with the foregoing and to agree for and among themselves, their heirs, successors, and assignees, and the agents, employees, and lessees of such owners, heirs, successors, and assignees, that the Restrictions as herein established must be adhered to for the benefit of the County and the Owners and Occupants of the Burdened Property

and that the interest of the Owners and Occupants of the Burdened Property shall be subject to the Restrictions contained herein.

1.3 Incorporation into Deeds and Leases. Covenantor desires and covenants that the Restrictions set out herein shall be incorporated in and attached to each and all deeds and leases of any portion of the Burdened Property. Recordation of this Covenant shall be deemed binding on all successors, assigns, and lessees, regardless of whether a copy of this Covenant and Agreement has been attached to or incorporated into any given deed or lease.

1.4 Purpose. It is the purpose of this instrument to convey to the County real property rights, which will run with the land, to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

ARTICLE II
DEFINITIONS

2.1 County. "County" shall mean the Alameda County Environmental Health Services and shall include its successor agencies, if any.

2.2 Improvements. "Improvements" shall mean all buildings, roads, driveways, regradings, and paved parking areas, constructed or placed upon any portion of the Burdened Property.

2.3 Occupants. "Occupants" shall mean Owners and those persons entitled by ownership, leasehold, or other legal relationship to the exclusive right to use and/or occupy all or any portion of the Burdened Property.

2.4 Owner or Owners. "Owner" or "Owners" shall mean the Covenantor and/or its successors in interest, who hold title to all or any portion of the Burdened Property.

ARTICLE III
DEVELOPMENT, USE AND CONVEYANCE OF THE BURDENED PROPERTY

3.1 Restrictions on Development and Use. Covenantor promises to restrict the use of the Burdened Property as follows:

a. Development of the Burdened Property shall be restricted to industrial;

b. No residence for human habitation shall be permitted on the Burdened Property;

c. No hospitals shall be permitted on the Burdened Property;

d. No schools for persons under 21 years of age shall be permitted on the Burdened Property;

e. No day care centers for children or day care centers for Senior Citizens shall be permitted on the Burdened Property;

f. No Owners or Occupants of the Property or any portion thereof shall conduct any excavation work on the Property, unless expressly permitted in writing by the County. Any contaminated soils brought to the surface by grading, excavation, trenching, or backfilling shall be managed by Covenantor or his agent in accordance with all applicable provisions of local, state and federal law. Notwithstanding the foregoing, Covenantor may perform routine landscaping and maintenance of surface improvements thereon;

g. All uses and development of the Burdened Property shall be consistent with any applicable County Cleanup Order or Risk Management Plan, each of which is hereby incorporated by reference including future amendments thereto. All uses and development shall preserve the integrity of any cap, any remedial measures taken or remedial equipment installed, and any groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, unless otherwise expressly permitted in writing by the County.

h. With the exception of the use of the one existing onsite water supply well for industrial water supply, no Owners or Occupants of the Property or any portion thereof shall drill, bore, otherwise construct, or use a well for the purpose of extracting water for any use, including but not limited to, domestic, potable, or industrial uses, unless expressly permitted in writing by the County.

i. The Owner shall notify the County of each of the following: (1) The type, cause, location and date of any disturbance to any cap, any remedial measures taken or remedial equipment installed, and of the groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, which could affect the ability of such cap or remedial measures, remedial equipment, or monitoring system to perform their respective functions and (2) the type and date of repair of such disturbance. Notification to the County shall be made by registered mail within ten (10) working days of both the discovery of such disturbance and the completion of repairs;

j. The Covenantor agrees that the County, and/or any persons acting pursuant to County cleanup orders, shall have reasonable access to the Burdened Property for the purposes of inspection, surveillance, maintenance, or monitoring, as provided for in Division 7 of the Water Code.

k. No Owner or Occupant of the Burdened Property shall act in any manner that will aggravate or contribute to the existing environmental conditions of the Burdened Property. All use and development of the Burdened Property shall preserve the integrity of any capped areas.

l. No Owner or Occupant of the Burdened Property shall use the Burdened Property to grow fruits or vegetables for consumption.

3.2 Enforcement. Failure of an Owner or Occupant to comply with any of the restrictions, as set forth in paragraph 3.1, shall be grounds for the County, by reason of this Covenant, to have the authority to require that the Owner modify or remove any Improvements constructed in violation of that paragraph. Violation of the Covenant shall be grounds for the County to file civil actions against the Owner as provided by law.

3.3 Notice in Agreements. After the date of recordation hereof, all Owners and Occupants shall execute a written instrument which shall accompany all purchase agreements or leases relating to the property. Any such instrument shall contain the following statement:

> The land described herein contains hazardous materials in soils and in the ground water under the property, and is subject to a deed restriction dated as of _____, 2011, and recorded on _____, 2011, in the Official Records of _____ County, California, as Document No. _____, which Covenant and Restriction imposes certain covenants, conditions, and restrictions on usage of the property described herein. This statement is not a declaration that a hazard exists.

ARTICLE IV
VARIANCE AND TERMINATION

4.1 Variance. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or any portion thereof may apply to the County for a written variance from the provisions of this Covenant.

4.2 Termination. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or a portion thereof may apply to the County for a termination of the Restrictions as they apply to all or any portion of the Burdened Property.

4.3 Term. Unless terminated in accordance with paragraph 4.2 above, by law or otherwise, this Covenant shall continue in effect in perpetuity.

ARTICLE V
MISCELLANEOUS

5.1 No Dedication Intended. Nothing set forth herein shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Burdened Property or any portion thereof to the general public.

5.2 Notices. Whenever any person gives or serves any notice, demand, or other communication with respect to this Covenant, each such notice, demand, or other communication shall be in writing and shall be deemed effective (1) when delivered, if

personally delivered to the person being served or official of a government agency being served, or (2) three (3) business days after deposit in the mail if mailed by United States mail, postage paid certified, return receipt requested:

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

COVENANT AND ENVIRONMENTAL RESTRICTION
ON PROPERTY

AB&I Foundry
7825 San Leandro Street
Oakland, California

This Covenant and Environmental Restriction on Property (this "Covenant") is made as of the 21st day of September, 2011__ by McWane, Inc. ("Covenantor") who is the Owner of record of that certain property situated at 7825 San Leandro Street , in the City of _ Oakland _____, County of Alameda _____, State of California, which is more particularly described in Exhibit A attached hereto and incorporated herein by this reference (such portion hereinafter referred to as the "Burdened Property"), for the benefit of the Alameda County Environmental Health Services (the "County"), with reference to the following facts:

A. The Burdened Property and groundwater underlying the property contains hazardous materials.

B. Contamination of the Burdened Property. Soil at the Burdened Property was contaminated by previous industrial operations, including but not limited to the manufacture of cast pipe and fittings and warehousing operations and by releases from six underground fuel storage tanks formerly present at the Burdened Property. These operations resulted in contamination of soil and groundwater with organic chemicals including petroleum hydrocarbons, primarily benzene, toluene, ethylbenzene, and xylene; and chlorinated solvents, primarily 1,1,1-TCA, 1,1-dichloroethane (1,1-DCA), 1,1-dichloroethene (1,1-DCE), chloroethane, cis-and trans-1,2-dichloroethene (1,2-DCE), and vinyl chloride. These constituents constitute hazardous materials as that term is defined in Health & Safety Code Section 25260. To treat and control migration of contaminated soil and groundwater, several remedial actions were conducted at the Burdened Property including excavation and off-site disposal of contaminated

soil in the immediate vicinity of the UST areas and implementation of an enhanced biodegradation injection program.

C. Exposure Pathways. The contaminants addressed in this Covenant are present in soil and groundwater on the Burdened Property. Without the mitigation measures which have been performed on the Burdened Property, exposure to these contaminants could take place via exposure during future soil excavation resulting in dermal contact, inhalation, or ingestion by humans.. The risk of public exposure to the contaminants has been substantially lessened by the remediation and controls described herein.

D. Adjacent Land Uses and Population Potentially Affected. The Burdened Property is used for the manufacture of cast pipe and fittings and warehousing operations and is adjacent to industrial and commercial land uses and is adjacent to industrial and commercial land uses land uses.

E. Full and voluntary disclosure to the County of the presence of hazardous materials on the Burdened Property has been made and extensive sampling of the Burdened Property has been conducted.

F. Covenantor desires and intends that in order to benefit the County, and to protect the present and future public health and safety, the Burdened Property shall be used in such a manner as to avoid potential harm to persons or property that may result from hazardous materials that may have been deposited on portions of the Burdened Property.

ARTICLE I
GENERAL PROVISIONS

1.1 Provisions to Run with the Land. This Covenant sets forth protective provisions, covenants, conditions and restrictions (collectively referred to as "Restrictions") upon and subject to which the Burdened Property and every portion thereof shall be improved, held, used, occupied, leased, sold, hypothecated, encumbered, and/or conveyed. The restrictions set forth in Article III are reasonably necessary to protect present and future human health and safety or the environment as a result of the presence on the land of hazardous materials. Each and all of the Restrictions shall run with the land, and pass with each and every portion of the Burdened Property, and shall apply to, inure to the benefit of, and bind the respective successors in interest thereof, for the benefit of the County and all Owners and Occupants. Each and all of the Restrictions are imposed upon the entire Burdened Property unless expressly stated as applicable to a specific portion of the Burdened Property. Each and all of the Restrictions run with the land pursuant to section 1471 of the Civil Code. Each and all of the Restrictions are enforceable by the County.

1.2 Concurrence of Owners and Lessees Presumed. All purchasers, lessees, or possessors of any portion of the Burdened Property shall be deemed by their purchase, leasing, or possession of such Burdened Property, to be in accord with the foregoing and to agree for and among themselves, their heirs, successors, and assignees, and the agents, employees, and lessees of such owners, heirs, successors, and assignees, that the Restrictions as herein established must be adhered to for the benefit of the County and the Owners and Occupants of the Burdened Property

and that the interest of the Owners and Occupants of the Burdened Property shall be subject to the Restrictions contained herein.

1.3 Incorporation into Deeds and Leases. Covenantor desires and covenants that the Restrictions set out herein shall be incorporated in and attached to each and all deeds and leases of any portion of the Burdened Property. Recordation of this Covenant shall be deemed binding on all successors, assigns, and lessees, regardless of whether a copy of this Covenant and Agreement has been attached to or incorporated into any given deed or lease.

1.4 Purpose. It is the purpose of this instrument to convey to the County real property rights, which will run with the land, to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

ARTICLE II
DEFINITIONS

2.1 County. "County" shall mean the Alameda County Environmental Health Services and shall include its successor agencies, if any.

2.2 Improvements. "Improvements" shall mean all buildings, roads, driveways, regradings, and paved parking areas, constructed or placed upon any portion of the Burdened Property.

2.3 Occupants. "Occupants" shall mean Owners and those persons entitled by ownership, leasehold, or other legal relationship to the exclusive right to use and/or occupy all or any portion of the Burdened Property.

2.4 Owner or Owners. "Owner" or "Owners" shall mean the Covenantor and/or its successors in interest, who hold title to all or any portion of the Burdened Property.

ARTICLE III
DEVELOPMENT, USE AND CONVEYANCE OF THE BURDENED PROPERTY

3.1 Restrictions on Development and Use. Covenantor promises to restrict the use of the Burdened Property as follows:

a. Development of the Burdened Property shall be restricted to industrial;

b. No residence for human habitation shall be permitted on the Burdened Property;

c. No hospitals shall be permitted on the Burdened Property;

d. No schools for persons under 21 years of age shall be permitted on the Burdened Property;

e. No day care centers for children or day care centers for Senior Citizens shall be permitted on the Burdened Property;

f. No Owners or Occupants of the Property or any portion thereof shall conduct any excavation work on the Property, unless expressly permitted in writing by the County. Any contaminated soils brought to the surface by grading, excavation, trenching, or backfilling shall be managed by Covenantor or his agent in accordance with all applicable provisions of local, state and federal law. Notwithstanding the foregoing, Covenantor may perform routine landscaping and maintenance of surface improvements thereon;

g. All uses and development of the Burdened Property shall be consistent with any applicable County Cleanup Order or Risk Management Plan, each of which is hereby incorporated by reference including future amendments thereto. All uses and development shall preserve the integrity of any cap, any remedial measures taken or remedial equipment installed, and any groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, unless otherwise expressly permitted in writing by the County.

h. With the exception of the use of the one existing onsite water supply well for industrial water supply, no Owners or Occupants of the Property or any portion thereof shall drill, bore, otherwise construct, or use a well for the purpose of extracting water for any use, including but not limited to, domestic, potable, or industrial uses, unless expressly permitted in writing by the County.

i. The Owner shall notify the County of each of the following: (1) The type, cause, location and date of any disturbance to any cap, any remedial measures taken or remedial equipment installed, and of the groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the County, which could affect the ability of such cap or remedial measures, remedial equipment, or monitoring system to perform their respective functions and (2) the type and date of repair of such disturbance. Notification to the County shall be made by registered mail within ten (10) working days of both the discovery of such disturbance and the completion of repairs;

j. The Covenantor agrees that the County, and/or any persons acting pursuant to County cleanup orders, shall have reasonable access to the Burdened Property for the purposes of inspection, surveillance, maintenance, or monitoring, as provided for in Division 7 of the Water Code.

k. No Owner or Occupant of the Burdened Property shall act in any manner that will aggravate or contribute to the existing environmental conditions of the Burdened Property. All use and development of the Burdened Property shall preserve the integrity of any capped areas.

l. No Owner or Occupant of the Burdened Property shall use the Burdened Property to grow fruits or vegetables for consumption.

3.2 Enforcement. Failure of an Owner or Occupant to comply with any of the restrictions, as set forth in paragraph 3.1, shall be grounds for the County, by reason of this Covenant, to have the authority to require that the Owner modify or remove any Improvements constructed in violation of that paragraph. Violation of the Covenant shall be grounds for the County to file civil actions against the Owner as provided by law.

3.3 Notice in Agreements. After the date of recordation hereof, all Owners and Occupants shall execute a written instrument which shall accompany all purchase agreements or leases relating to the property. Any such instrument shall contain the following statement:

> The land described herein contains hazardous materials in soils and in the ground water under the property, and is subject to a deed restriction dated as of _____, 2011, and recorded on _____, 2011, in the Official Records of _____ County, California, as Document No. _____, which Covenant and Restriction imposes certain covenants, conditions, and restrictions on usage of the property described herein. This statement is not a declaration that a hazard exists.

ARTICLE IV
VARIANCE AND TERMINATION

4.1 Variance. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or any portion thereof may apply to the County for a written variance from the provisions of this Covenant.

4.2 Termination. Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or a portion thereof may apply to the County for a termination of the Restrictions as they apply to all or any portion of the Burdened Property.

4.3 Term. Unless terminated in accordance with paragraph 4.2 above, by law or otherwise, this Covenant shall continue in effect in perpetuity.

ARTICLE V
MISCELLANEOUS

5.1 No Dedication Intended. Nothing set forth herein shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Burdened Property or any portion thereof to the general public.

5.2 Notices. Whenever any person gives or serves any notice, demand, or other communication with respect to this Covenant, each such notice, demand, or other communication shall be in writing and shall be deemed effective (1) when delivered, if

personally delivered to the person being served or official of a government agency being served, or (2) three (3) business days after deposit in the mail if mailed by United States mail, postage paid certified, return receipt requested:

5.3 Partial Invalidity. If any portion of the Restrictions or terms set forth herein is determined to be invalid for any reason, the remaining portion shall remain in full force and effect as if such portion had not been included herein.

5.4 Article Headings. Headings at the beginning of each numbered article of this Covenant are solely for the convenience of the parties and are not a part of the Covenant.

5.5 Recordation. This instrument shall be executed by the Covenantor and by the Director of Environmental Health Services. This instrument shall be recorded by the Covenantor in the County of _____ within ten (10) days of the date of execution.

5.6 References. All references to Code sections include successor provisions.

5.7 Construction. Any general rule of construction to the contrary notwithstanding, this instrument shall be liberally construed in favor of the Covenant to effect the purpose of this instrument and the policy and purpose of the Water Code. If any provision of this instrument is found to be ambiguous, an interpretation consistent with the purpose of this instrument that would render the provision valid shall be favored over any interpretation that would render it invalid.

IN WITNESS WHEREOF, the parties execute this Covenant as of the date set forth above.

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.
