Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.20000

Year: 2019
Gepaid: CAD021774559
TSD EPA ID: UTD991301748
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 1.20000

Year: 2019
Gepaid: CAD021774559
TSD EPA ID: NVT330010000
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons: 310.12480

Year: 2019
Gepaid: CAD021774559
TSD EPA ID: CAT080013352
CA Waste Code: 134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method: H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons: 0.16800

Year: 2019
Gepaid: CAD021774559
TSD EPA ID: ORQ000025197
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.30000

Year: 2019
Gepaid: CAD021774559
TSD EPA ID: CAD980675276
CA Waste Code: 135 - Unspecified aqueous solution
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 1.15000

Year: 2019

A B & I (Continued) **S113000053**

Gepaid: CAD021774559
TSD EPA ID: NVT330010000
CA Waste Code: 611 - Contaminated soil from site clean-up
Disposal Method: H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons: 104.34000

Year: 2018
Gepaid: CAD021774559
TSD EPA ID: NED981723513
CA Waste Code: 213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.)
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 0.15000

Year: 2018
Gepaid: CAD021774559
TSD EPA ID: ORQ000025197
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.52500

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
TSCA SUBMITTER
COMPLIANCE AND EMISSIONS REPORTING
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
OSHA ESTABLISHMENT
HAZARDOUS AIR POLLUTANT MAJOR
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
STATE MASTER
AIR MAJOR
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

A B & I FOUNDRY (Continued) **1023209716**

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000085
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Elevated concentrations of fuel hydrocarbons including free-phase diesel fuel is present in the area of former USTs and dispensers. Tank removal and excavation of soil took place in 2008. Additional corrective action has been proposed but not implemented. Not all historic documents for the fuel leak case are available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	OBSERVATION: Employees are not properly trained on hazardous waste handling as evidenced by: Used oil tank secondary containment is filled with used oil; hazardous waste labels and accumulation start dates ar not affixed to hazardous waste containers; hazardous waste containers are not closed when not in use; empty containers (steel and plastic 5 gallon pails, steel and poly 55 gallon drums, and steel and poly 200 gallon totes) of former hazardous materials are not properly managed or stored (containers appear stored on site indefinitely); spills and drips not promptly cleaned up; oil containing engine parts stored outside and not covered from precipitation; unknown/unlabeled, empty, and full containers of hazardous materials are stored in bare soil and are positioned adjacent to the creek increasing the potential of a release to navigable waterways. CORRECTIVE ACTION: Immediately provide training to all employees who handle hazardous waste and submit a copy of the [Truncated]

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	OBSERVATION: Facility has numerous unknown/unlabeled containers stored throughout the facility. Facility shall make a hazardous waste determination for the following containers: 55 gallon white poly closed head drum (unidentified, unlabeled, contains black liquid) in back lot near waterway; 55 gallon blue steel closed head drum, unlabeled, unknown, appear to be empty, drum has crushed sides, in back lot near waterway; 3 x 55 gallon closed head drums, red, blue (dented near top), and back, unlabeled, contents unknown, in back lot near waterway and concrete retaining wall; 1 x 200 gallon Liqua-Bin, grey with flexible pipe stored on top, unlabeled, contents unknown;

ROBERTO'S TRUCK REPAIR (Continued) **S123100453**

	and 2 x 55 gallon white poly closed head drums, one has "Zep" label, unknown if empty or full, stored in grassy area adjacent to the waterway. CORRECTIVE ACTION: If these contents are waste, they shall be immediately and properly disposed of under manifest after a hazardous waste determination is made. [Truncated]

ROBERTO'S TRUCK REPAIR (Continued) **S123100453**

	1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes:	OBSERVATION: Hazardous waste containers are not inspected weekly: Used oil double wall tank (Lube Cube) had oil in the secondary containment; all bung ports were open; used oil red 200 gallon Liqua Bin had the fill port open; tanks were not properly labeled and were missing the accumulation start date; 120 gallon IBC poly tote in back yard observed filled with oily water (not labeled, condition not known to owner until inspection). CORRECTIVE ACTION: Immediately begin conducting the necessary inspections for all hazardous waste containers at this facility. ACDEH emailed a weekly container inspection log to facility.
Violation Division:	Alameda County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	373837
Site Name:	Roberto's Truck Repair
Violation Date:	04-05-2017
Citation:	40 CFR 1 265.201(c)(5) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(5)
Violation Description:	Failure to inspect hazardous waste tanks for the following, when present: 4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams. 5) The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation).
Violation Notes:	OBSERVATION: Facility does not conduct weekly inspections of the two used oil ASTs. The surrounding area of both used oil tanks contains operational spills and drips with minor accumulation of spent used oil absorbents (kitty liter type) on the ground. ACDEH inspector informed the owner how to conduct weekly inspections to avoid operational spills, and the general condition of the ASTs. CORRECTIVE ACTION: Immediately begin to conduct weekly inspections of the construction materials, fixtures, and surrounding areas of the hazardous waste tanks. Submit the first month's verification of these inspections to the ACDEH inspector within 30 days. ACDEH emailed weekly inspection log to facility.
Violation Division:	Alameda County Environmental Health

Violation Date: 04-05-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: OBSERVATION: 1) Numerous unlabeled containers (5, 35, 55, 200 gallon containers) of unknown/unlabeled contents (waste or material has not been established) are stored outside on bare soil adjacent to the creek. 2) Secondary containment of used oil tank (Lube Cube) filled with oil. 3) Oil containing equipment (e.g. engines, transmissions) stored outside on wooden pallets or bare soil; oil stains observed underneath the equipment. CORRECTIVE ACTION: 1) All containers shall be properly identified as to their contents so that potential incompatible materials can be separated by distance or fire wall. 2) Secondary containment shall be emptied of all contents to provide proper containment in the event of a primary tank leak. 3) Containers and chemicals shall be positioned to prevent leakage, spillage to waterways. Containers shall be placed on non-permeable surfaces (e.g. concrete), not on bare soil, to avoid release to soil and groundwater. Containers [Truncated]

Violation Description:	Failure to inspect hazardous waste tanks at least once each operating day for the following, when present: (1) Discharge control equipment (e.g., waste feed cutoff systems, by-pass systems, and drainage systems) to ensure that it is in good working order; (2) Data gathered from monitoring equipment (e.g., pressure and temperature gauges) to ensure that the tank is being operated according to its design; (3) The level of waste in the tank.
Violation Notes:	OBSERVATION: Both Used Oil ASTs are not inspected daily as evidenced by: no written inspection logs, lack of closure on the access ports/bung opening, secondary containment full of oil in the Lube Cube. ACDEH Inspector informed the facility owner how to conduct inspections of both tank liquid levels, that the secondary containment of the Lube Cube tank shall not be used for used oil storage, and that all openings of both tanks shall be closed unless actively adding or removing used oil. Both tanks are direct filled via pouring oil from 5 gallon buckets into the tanks. No liquid level sensing devices are attached to the tanks. CORRECTIVE ACTION: Immediately begin to conduct daily inspections of the discharge systems, monitoring equipment, and tank levels for all tanks containing hazardous waste. Submit verification of the first month inspections to the ACDEH inspector within 30 days. Facility shall install a liquid level gauge to both tanks containing waste. [Truncated]

Violation Date:	09-21-2018
Citation:	23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description:	Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).
Violation Notes:	Returned to compliance on 09/21/2018. OBSERVATION: The first page of the Designated operator report for September was not completely filled out, although alarm logs were noted. April 4, 2018 T1 probe out and sudden loss alarm not noted and no explanation was provided. CORRECTIVE ACTION: Designated operator completed missed September report while onsite. Ensure that the facility's alarm log is looked at for any alrm conditions that have been corrected by the facility and note them on the DO report. Provide a copy of next month's DO report (October 2018) and alarm log to ACDEH to ensure that the DO is completing the report correctly by October 21, 2018.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill

SF OAKLAND TRUCK STOP (Continued) **S121790094**

prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. The drop tube in the diesel fill sump was inoperative. The flapper will move but the restrictor plate does not move. Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification. Repair the diesel drop tube and retest. A permit will be required to repair and replace the drop tube.

Eval Notes: ANNUAL UST INSPECTION SF OAKLAND TRUCK STOP 8255 SAN LEANDRO STREET OAKLAND Annual underground storage tank inspection conducted by Alameda County Department of Environmental Health on September 6, 2016. Ron Breckenridge is the service technician conducting the monitoring equipment certification and spill container testing. The annual UST inspection was conducted as part of a Cold Start of the monitoring system under SR #0030953. Communication of the brine filled interstitials was shown at the turbine/pipe sumps and the diesel fill sump by loosening the bottom plug to the sump wall and allowing brine to escape into the sump. The brine reservoir level was observed to have dropped. The Premium and REgular unleaded gasoline fill sumps were deemed to hazardous to enter to test for communication. The premium and regular unleaded gasoline fill sumps were inspected and were clean and dry. The bolts in the piping interstitials were removed

Eval Date: 10-14-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: SF OAKLAND TRUCK STOP 8255 SAN LEANDRO STREET OAKLAND, CA Initial HAZARDOUS WASTE GENERATOR inspection conducted by Alameda County Department of Environmental Health (ACDEH) on October 14, 2015. Consent to inspect was given by and the completed inspection report was reviewed with Brendan Gately, owner and Al Vierra, manager. Hazardous waste stream: petroleum contaminated absorbent. As of August 1, 2015, the generator will be operating a truck wash which has been operating at the site. Previous analysis of the oily sludge has been found to be non-hazardous. Generator says that absorbent has not been disposed and is re-used. Unable to determine status of waste absorbent.

Site ID: 422156
Site Name: Lakeside Recycling
Violation Date: 01-19-2018
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 05/17/2018. Observation: Facility stores hazardous waste and the Business Activities form is not marked to reflect the presence of hazardous waste at the facility. The hazardous waste (Used Oil) stored on site has not been included on the hazardous

LAKESIDE RECYCLING (Continued) **S121781088**

materials inventory page. Corrective Action: Update the Business Activities form in CERS to reflect that the facility is in the hazardous waste program. Add the hazardous waste to the hazardous materials inventory in CERS. Submit the HMBP to CERS within 30 days.

Violation Division: Alameda County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 422156
Site Name: Lakeside Recycling
Violation Date: 01-19-2018
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 02/18/2018. This facilitys EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. Immediately contact DTSC and reactivate your EPA ID number (CAL000427926) and submit evidence to the ACDEH within 30 days.
Violation Division: Alameda County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 422156
Site Name: Lakeside Recycling
Violation Date: 01-19-2018
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 05/17/2018. Observation: The hazardous waste ((3) 55 gallon Used Oil drums) stored on the side of the building under the lean-to roof has not been included on the hazardous materials inventory page. Corrective Action: Add the hazardous waste to the hazardous materials inventory in CERS. Submit the HMBP to CERS within 30 days.
Violation Division: Alameda County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 422156
Site Name: Lakeside Recycling
Violation Date: 01-19-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

LAKESIDE RECYCLING (Continued) **S121781088**

Violation Notes:	Returned to compliance on 05/21/2018. OBSERVATION: (1) of the 55 gallon used oil drums does not have a label. (2) of the 55 gallon used oil drums do not have the EPA ID# listed on the labels. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all containers are marked with all the required information. Submit photo documentation to ACDEH within 30 days.

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 01/19/2018. Observation: Facility opened this location within 2017 and does not have training for 2017. Facility has completed training on 1/16/18. Corrective Action: Facility completed training on 1/16/18. Going forward the HMBP training must be conducted annually and records kept for a 3 year period.
Violation Division: Alameda County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 422156
Site Name: Lakeside Recycling
Violation Date: 01-19-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 05/23/2018. Observation: Facility stores hazardous waste and the Business Activities form is not marked to reflect the presence of hazardous waste at the facility. The hazardous waste (Used Oil) stored on site has not been included on the hazardous materials inventory page. Corrective Action: Update the Business Activities form in CERS to reflect that the facility is in the hazardous waste program. Add the hazardous waste to the hazardous materials inventory in CERS. Ensure that the EPA ID# is included on the Business Activities page. Submit the HMBP to CERS within 30 days.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Case Number:	RO0000508
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The site is located on the northern corner of the intersection of 75th Avenue and Snell Street in an industrial area of Oakland, CA. A commercial business currently operates from the two site buildings. On September 15, 1996, three USTs (8,000-gallon gasoline, 1,000-gallon gasoline, and 500-gallon gasoline) were removed. Five soil samples and one grab groundwater sample were collected from the UST excavation. Total petroleum hydrocarbons as gasoline (TPHg), benzene, and MTBE were detected in the soil samples at concentrations

OMEGA TERMITE (Continued) **S103672947**

up to 4,300 ppm, 13 ppm, and 25 ppm, respectively. The excavation was not backfilled in 1996. Soils from the excavation were stockpiled in the northern portion of the site for aeration and later used to backfill the excavation in March 2000. In October 1997, soil and groundwater samples were collected from six soil borings (BH-1 through BH-6). In June 1999, four groundwater monitoring wells (MW-1 through MW-4) were installed. Additional soil was removed from the tank excavation in March 2000. The excavation was extended to a size of 29 feet by 48 feet and a depth of 8 to 11.5 feet. During the excavation activities, an additional 500-gallon UST was discovered at the eastern end of the excavation. Following the removal of the 500-gallon UST, a total of six soil samples were collected from the sidewalls and bottom of the excavation. Pea gravel was placed in the excavation below the water table with the remainder of the excavation filled with the stockpiled and aerated soils from the 1996 tank removal. On October 9 and 10, 2003, eight soil borings (SB-7 through SB-14) were advanced on site and adjacent properties. Boring SB-14 was advanced to a depth of 30 feet bgs to assess whether the lower aquifer (termed the Deeper Zone in site reports) had been impacted by the fuel release. A grab groundwater sample collected from a gravel layer at a depth of 29 feet bgs in boring SB-14 contained 2,300 ppb of TPHg, 72,000 ppb of TPH as diesel, and 120 ppb benzene indicating that the Deeper Zone was impacted. In February 2006, five soil borings were advanced and completed as monitoring wells (MW-6 through MW-10). One monitoring well (MW-6) was completed in the first water-bearing zone and the remaining wells (MW-7 through MW-10) were completed in the Deeper Zone. In December 2006, two additional Deeper Zone monitoring wells (MW-11 and MW-12), one shallow zone sparging well (OZ-1), and seven dual level ozone sparging wells (OZ-2 through OZ-7) were installed. The ozone sparging system was installed in February and March 2007 with system start up on March 8, 2007. The system operated until August 28, 2009 when the system was shut down to assess whether groundwater concentrations would rebound to the higher concentration observed prior to operation of the ozone sparging system. Groundwater monitoring data collected since August 2009 indicate that groundwater concentrations have remained stable at lower levels since shut down of the ozone sparging system.

AT&T CALIFORNIA - Q31F7 (Continued) **S121771138**

Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 07/16/2018. OBSERVATION: Owner/Operator failed to annually review and electronically certify that the HMBP is accurate and up to date because a complete and accurate hazardous material inventory has not been submitted in CERS. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov/ within 30 days.
Violation Division:	Alameda County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	385948
Site Name:	AT&T California - Q31F7
Violation Date:	05-23-2018
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 07/16/2018. OBSERVATION: The facility has not submitted the Hazardous Materials Inventory Chemical Description page in CERS for the following: 1. Seven 8 gallon propane cylinders observed (one cylinder for each of the two forklifts; 5 cylinders in cage) for a total of 56 gallons. Inventory submitted to CERS only lists 20 gallons. CORRECTIVE ACTION: 1. Increase the total amount from 20 gallons to 56 gallons of propane cylinders handled on site to inventory in CERS. Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov within 30 days. Facility manager corrected on site by submitting a current hazardous material inventory in CERS during the inspection.

Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 07/16/2018. OBSERVATION: The business plan has not been updated and submitted to this department within 30 days of a 100 percent or more increase in the quantity of a previously disclosed material for the following: 1. Seven 8 gallon propane cylinders observed (one cylinder for each of the two forklifts; 5 cylinders in cage) for a total of 56 gallons. CORRECTIVE ACTION:

AT&T CALIFORNIA - Q31F7 (Continued) **S121771138**

Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov/ within 30 days.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-23-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine Hazardous Materials Business Plan (HMBP) inspection of AT&T Corp Q31F7 located at 865 77th Ave Oakland CA 94621. Met with Gary Chimienti, Environmental Site Manager, who granted consent to perform inspection. Alameda County Department of Environmental Health (ACDEH) to provide inspection report by email to: gc3184@att.com. Hazardous materials inventory includes: 56 gallons of propane (7 cylinders total). Portable 67 gallon diesel generator that is stored on-site was being utilized off-site and was not observed during inspection. I certify that the violation(s) noted in this HMBP inspection report have been corrected for AT&T Corp Q31F7 located at 865 77th Ave Oakland CA 94621. I have personally examined any documentation attached to the certification to establish that the violations have been corrected. PRINT:_____

Eval Notes:	Monterey Mechanical 8275 San Leandro St Oakland, 94621 Hazardous Material Business Plan (HMBP) inspection conducted by Alameda County Department of Environmental Health (ACDEH) on May 18, 2017. Consent to inspect was given by and the completed inspection report was reviewed with Jim Mallat, Safety Manager The business is a sheet metal fabricator. Chemical inventory: drained used oil filters, used oil, waste coolant. The shop that fabricates is now closed. The shop contained the various welding gases. The last complete CERS submittal was dated May 18, 2016. A complete CERS submittal is due each year. Each year you must submit a complete CERS submittal (Facility Information, Site Map and Inventory, Emergency Response/Contingency Plan, UST forms). Your next due date is May 2017. REVIEW THE CHEMICAL INVENTORY. ARE THE WELDING GAS QUANTITIES CORRECT? THE USED OIL TANK APPEARS TO BE LESS THAN THE QUANTITY ON THE CHEMICAL INVENTORY.

Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000105
Potential Media Affect: Soil, Under Investigation
Potential Contaminants of Concern: Gasoline
Site History: One 10,000-gallon gasoline UST was removed on August 21, 1995. No holes or cracks were observed in the tank. However, the sidewalls of the tank pit were reported to have staining and a slight odor. 60 cubic yards of soil was excavated. Petroleum hydrocarbons were detected in soil and groundwater and a subsequent investigation was performed to determine if soil or groundwater was impacted beneath the dispenser island. The fuel leak case met the criteria for closure under the State Water Resources Control Board Low-threat Closure Policy.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS:
Name: GOLDEN GATE TRUCK CENTER
Address: 8200 BALDWIN ST
City,State,Zip: OAKLAND, CA 94621
Site ID: 393961
CERS ID: 110002689289
CERS Description: US EPA Air Emission Inventory System (EIS)

Violations:
Site ID: 393961
Site Name: Golden Gate Truck Center
Violation Date: 01-10-2017
Citation: 22 CCR 15 66265.192(k) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(k)
Violation Description: Failure to include all required information in the tank system assessment.
Violation Notes: Returned to compliance on 07/26/2018. Observation: it is currently unknown if a hazardous waste tank assessment has been completed Corrective Action: if hazardous waste tank assessments have been completed provide documentation ACDEH to demonstrate that the above ground tanks have passed testing; if testing has not been completed contract an above ground tank testing contractor and test the tanks and provide ACDEH with the results of the testing.
Violation Division: Alameda County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 393961
Site Name: Golden Gate Truck Center
Violation Date: 01-10-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 02/27/2017. Observations: an incomplete record of uniform hazardous waste disposal manifests was available during the inspection. The hazardous waste tracking system lists 9 disposal in 2014, 8 disposal in 2015 and 7 disposal in 2016 Corrective action: contact you hazardous waste hauler/designated facility to obtain a complete record of uniform hazardous waste manifests for 2014, 2105 and 2016 and provide ACDEH with verification that the records have been received and are maintained on site.
Violation Division: Alameda County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 393961
Site Name: Golden Gate Truck Center
Violation Date: 01-10-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material

GOLDEN GATE TRUCK CENTER (Continued) **1000187011**

	inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 02/23/2017. Observation: chemical inventory listed in CERS (lubrication oil0 does not accurately reflect up to 7 drums of various lubrication oil observed in the shop area. Also, facility periodically disposes of waste diesel fuel, which was observed in 7-55 gallon drums that is also required to be included in the chemical inventory. Corrective Action: update the chemical inventory to note approximately 1500 gallons of various lubrication oil products stored throughout the facility and the waste diesel fuel also observed at the facility, and notify ACDEH when the chemical inventory has been updated.

CA BOND EXP. PLAN:

Reponsible Party:	DETAILED SITE EXPENDITURE PLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	In November, 1987, the RPs were found in noncompliance with an imminent and substantial endangerment order issued by the Department. Therefore, Bond funds have been utilized to remediate this site. DHS will undertake appropriate cost recovery activities. This site has not been identified as an NPL site, nor does it appear to be a NPL candidate in the future. Therefore, it appears unlikely that federal funds are a viable source of revenue for remediation of this site. EPA's Emergency Response Section funded a site stabilization IRM with federal funds. DHS has also funded IRM activities due to limited federal funds and resources.
Site Description:	Aero Quality Plating electroplated automotive and aircraft parts in baths using copper, chromium, lead, nickel and zinc salts in aqueous solution at the site.
Hazardous Waste Desc:	Wastes generated onsite included heavy metals and cyanide. Drums stored onsite were open, leaking and corroded. Cyanide and acid solutions were stored onsite in open tanks. Sumps contain toxic sludge. Acids and caustics are incompatible. They are highly corrosive. Acids react with cyanide compounds to produce highly poisonous hydrogen cyanide gas.
Threat To Public Health & Env:	There is suspected soil contamination and possible ground water contamination. There is a potenital for migration of contamination via surface water runoff to an adjacent stream. A nearby sanitary sewer showed contamination until the water service was disconnected. There was a potential for release of hydrogen cyanide gas into the building and offsite. The concern for a cyanide gas release was mitigated by the removal of cyanide containing liquids and by the segregation of incompatible materials by DHS in July, 1987.
Site Activity Status:	An interim remedial measure (IRM) was completed by EPA in May, 1987 to stabilize hazardous wastes onsite. DHS has implemented a follow-up IRM to dispose of extermely hazardous waste stabilized by EPA. A second IRM is in progress for removal, disposal and recycling of the remaining 5000 gallons of aqueous hazardous waste solution, 114 tanks, 356 floor sections, 150 cinder blocks, 263 drums of hazardous waste and for the demolition of two buildings and building foundations. Also, some of the soilwill be removed as well. RI/FS work by DHS is paralleling the IRM work as appropriate.

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	The Aero Quality Plating site is located at 710 73rd Avenue, Oakland, CA. Prior 1958, the site was used by Currier Corporation supplying paint equipment which involved handling of trichloroethylene and degreasers. In 1958, Aero Quality Plating opened an electro-plating shop for automobile and aircraft equipment and ceased in 1987. Electro-plating solutions contained various hazardous chemicals such as copper, zinc, nickel, silver, gold, cadmium, lead, acids, cyanide and caustic. Currently, the site is vacant and owned by the City of Oakland and the Pacific Union. In 1987, DTSC removed all hazardous wastes such as cyanide solutions and demolished building 1 and 2. In 2003, Honeywell International and Purex Industries, Inc. signed the Voluntary Cleanup Agreement with DTSC. Remediation methods such as Enhanced In Situ Bioremediation, Monitored Natural Attenuation and removal of contaminated soil have been used and proposed for this site. There are two parts for this site: [1] Groundwater monitoring and [2] cap inspection. For groundwater contamination, Removal Action Completion Report approved in June 2009. For soil contamination, a RAW is expected to be completed by end of February 2019. There will be on-going groundwater sampling and cap inspection and 5-year review reports. (Envirostor ID 01400015). 8/23/2018 ECH

Site History:	Between 1958 and 1985 Aero Quality Plating conducted plating operations onsite. In 1985 the company went bankrupt, the building's were decontaminated and two feet of soil under the two buildings was over-excavated and disposed of at a Class I landfill, Geotextile strips were placed as to demarcate the clean soil from the contaminated soil. In 1990 contractors performed an investigation and determined that groundwater was contaminated with volatile organic compounds. The site has been under a groundwater monitoring plan from 2003 until now. From 2004 to 2009 the site was operated by recycling and selling wooden pallets. In 2009 the City of Oakland purchased the site and it is used as a laydown and staging yard for City projects. A 2015 limited soil sampling investigation has determined that Aroclor 1254 has been detected between 0.11 and 790 mg/Kg.

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	MEJ
Local Agency:	Not reported
RB Case Number:	01S0764
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Sediments, Surface water
Potential Contaminants of Concern:	Polychlorinated biphenyls (PCBs)
Site History:	Between 1958 and 1985 Aero Quality Plating (Aero) operated a plating shop and reportedly, automotive and aircraft parts were submerged in aqueous solutions containing copper, chromium, lead, nickel, zinc, and caustic cyanide during the electroplating process. Aero became bankrupt in 1985 and abandoned the Site structures. The Department of Toxic Substances Control and the USEPA conducted numerous inspections and subcontracted the removal of all containerized waste, as well as decontamination and demolition of two of the Aero structures, and decontamination of a third structure during 1987 and 1988. Soil remediation was conducted at two of the former buildings on the west side and in the center of the site following building decontamination and removal of the floor slabs. Remediation by USEPA contractors included over-excavation of approximately 2 feet of soil from within the building. In 1990, DTSC contractors identified that groundwater below the Site had been impacted by volatile organic compounds (VOC). In 1997, two successor companies were identified as Responsible Parties for the remnant VOC impacts at the Site and were required to implement and manage a long term groundwater monitoring program. Honeywell International, Inc. and Purex Industries, Inc, entered into a Voluntary Cleanup Program (VCP) agreement with DTSC in 2003. From 2004 to 2009, the Site was occupied by Allstate Pallets, a business that recycled and sold wooden pallets. The lot was purchased by the City in 2009 and has been used as a contractor laydown and staging yard for various City and local projects. Remedial actions are

Alternate Address:	700 73RD AVENUE
Alternate City,St,Zip:	OAKLAND, CA 94621
Background Info:	The Site is located at the terminus of 73rd Avenue, west of San Leandro Street, in Oakland. The land was acquired by the Central Pacific Railroad in March 1895. Melrose Station (Elmhurst, CA) occupied the southwest corner of the site. This depot building was retired in 1933 and was removed. Central Pacific Railroad merged with Southern Pacific Railroad Transportation Company. From September 1959 to March 1992, the

UNION PACIFIC OAKLAND COLISEUM SITE (Continued) **S105481928**

site was operated as an auto salvage yard (Otto's Foreign Auto Salvage) under two successive tenants. Investigations conducted in 1998, 2000 and 2001 found polychlorinated byphenyls (PCBs), tetrachloethylene (PCE), trichloroethylene (TCE), and total petroleum hydrocarbons (TPH) in soil. Groundwater is also contaminated with PCBs, PCE, TCE and vinyl chloride above their respective drinking water standards. The site is adjacent to Aero Quality Plating (01340108) which has similar solvent contamination in soil and groundwater.

Comments Date: 04042002
Comments: IS&E Order issued to Union Pacific Railroad.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan.
Violation Notes:	Returned to compliance on 10/19/2018. OBSERVATION: Failure to prepare SPCC. SPCC Plan draft was provided 10/19/2018. CORRECTIVE ACTION: Prepare SPCC. Note: A draft SPCC Plan was provided to ACDEH on 10/19/2018. Corrected on that date.
Violation Division:	Alameda County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,
Site ID:	410705
Site Name:	Argent Materials Inc.
Violation Date:	10-10-2018
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 08/28/2020. Observed four 55 gallon drums/containers that appear to have stored a hazardous material. One drum had a motor oil hand pump on it and they were observed in the corner business owner storage without labels. Mr. Chasm stated that

ARGENT MATERIALS INC. (Continued) **S121778338**

these drums are the property of the property owner. The drums appear to have been stored for years, with dust present and no labeling of an empty date. Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7. This is a violation for the property owner.

ARGENT MATERIALS INC. (Continued) **S121778338**

Violation Date:	10-10-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/25/2018. OBSERVATION: One 55 gallon drum of used oil was located in the hazardous waste location in the crushing area was observed without a hazardous waste label. One 55 gallon drum of used oil filters, and one 55 gallon drum of oil contaminated absorbent had hazardous waste labels, but they were missing the accumulation start dates and currently contain hazardous waste. The filters appear to be handled as hazardous waste and not as metal recycling. CORRECTIVE ACTION: Since it cannot be determined when the last accumulation dates were, have the registered hauler pick up the containers for disposal and be sure to follow all hazardous waste labeling requirements. Provide documentation of disposal within 30 days.

Violation Description:	"Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."
Violation Notes:	Returned to compliance on 01/08/2019. OBSERVATION: Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas. CORRECTIVE ACTION: Test or inspect each aboveground container for integrity based on industry standards on a regular schedule, after making material repairs, using non-destructive testing, inspecting each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas. Maintain testing and inspection records.

ARGENT MATERIALS INC. (Continued) **S121778338**

Violation Program: APSA
Violation Source: CERS,

Site ID: 410705
Site Name: Argent Materials Inc.
Violation Date: 10-10-2018
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 10/23/2018. OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material; a change of business address, business ownership, or business name; or a substantial change in the handler's operations that requires modification to any portion of the business plan. Observed the following materials and quantities that need to be update/added to the inventory: 973 cubic feet of Acetylene, 1,967 cubic feet of oxygen gas, 55 gallons of used oil, 110 gallons of 150 gear oil, 110 gallons of AW 68 hydraulic oil, and 55 gallons of SAE 15W-40 motor oil. CORRECTIVE ACTION: Update all submittal elements effected by the change(s) and electronically submit the update within 30 days. Note: HMBP Hazardous Materials Inventory updated on 10/23/2018.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	22384
Site Name:	Creative Wood Products Inc
Violation Date:	01-24-2017
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 03/20/2017. OBSERVATION: Evacuation Map and Emergency Contacts observed in the upholstery / accessorizing area only. CORRECTIVE ACTION: Place emergency evacuation map and emergency response contacts at all locations where hazardous materials are handled and / or stored. Locations for these items include the flammable inventory storage shed, hazardous waste storage area, and finishing room. ACDEH to email an example emergency contacts poster to facility.

Violation Date:	01-24-2017
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 03/20/2017. OBSERVATION: The flammable inventory storage shed (NEW HazMats only) secondary containment is dry and free of flammable liquids. However, small bits of wood and wood dust, some debris were observed in the secondary containment floor. These materials could present a fire hazard if flammable solvents are spilled and saturate the debris. CORRECTIVE ACTION: Maintain the secondary containment floor free of all debris.
Violation Division:	Alameda County Environmental Health

Violation Date:	01-24-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 08/29/2018. OBSERVATION: No waste analysis was available for the spray and wipe stain stations spray booth filters. This waste is being disposed of as non-hazardous waste. A generator shall make a hazardous waste determination and keep a record of any test results, waste analyses, or other determinations made in accordance with hazardous waste regulations for at least three years

CREATIVE WOOD PRODUCTS INC (Continued) **S123505258**

from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal. CORRECTIVE ACTION: Immediately locate a copy of the waste analysis, or have a hazardous waste determination made, and submit a copy to the ACDEH inspector within 30 days.

Violation Date: 01-24-2017
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 08/23/2018. OBSERVATION: [INITIAL / ANNUAL] training documentation for all applicable employees was not available. Employee hazard communication quiz observed for ten employees, dated 1/16/2017. Plus, Creative Wood Products Employee Training Table (dated December 2000) observed for various departments: Finishing, Machining, Metal/Maint, Mill, Sanding, Upholstery, CNC, Pre-Assembly, Final Assembly, Accessory, Installation, Shipping, and Specials. Facility employs 140 to 145 personnel in various departments. CORRECTIVE ACTION: Submit documentation to the ACDEH inspector within 30 days demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan. Facility shall maintain a complete training roster and topics covered for all employees. Hazardous materials and hazardous waste training shall be specific for the job functions and duties of the employee or department.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

AB AUTO COMAPNY (Continued) **S103472395**

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 07/08/2016. "OBSERVATION: Observed oil in the secondary containment for the used oil and waste antifreeze tanks, oil in the secondary containment for the DIY oil drums, and liquid in the annular space of the 500 gallon diesel tank. Liquid in the annular space of the 500 gallon diesel tank was removed while onsite during follow-up visit on 5/25/2016. Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or release of hazardous waste to air, soil, or surface water which could threaten human health or the environment. "CORRECTIVE ACTION: Immediately clean out the secondary containments mentioned above and manage according to Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed within 30 days.

Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes: Returned to compliance on 07/08/2016. OBSERVATION: The generator failed to dispose of hazardous waste after the first 100-kilogram threshold amount was accumulated within a 90 day period. Observed one 55 gallon drum of waste "DIY motor oil" from the public that had a hazardous waste label with accumulation date 2/10/2016, which is 6 days over the 90 day storage period. "CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days. *Upon a follow-up visit, the drum was no longer onsite. It was picked up by Asbury on 5/24/16 according to Mr. Ellsworth. Provide ACDEH with a copy of the waste manifest for this drum of DIY used oil.

Violation Date: 05-20-2016
Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to maintain the following general tank operating requirements: a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: 1) Spill prevention controls (e.g., check valves, dry discount couplings); 2) Overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and 3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.
Violation Notes: Returned to compliance on 07/08/2016. OBSERVATION: The Owner/Operator failed to provide an overfill protection device on one or more continuously fed hazardous waste tanks. The 1000 gallon gasoline convault tank does not have an overfill protection device to prevent overfill. CORRECTIVE ACTION: Generator must install an overfill protection device onto the Waste Gasoline tank to prevent the overfill of the tank. Provide documentation that overfill protection device has been installed.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Status: Completed - Case Closed
Status Date: 06/23/2014
Case Worker: Not reported
RB Case Number: 01-3596
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: Not reported
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: On July 25, 2002 one 1,000-gallon capacity gasoline Underground Storage Tank (UST) was removed from the subject site. The removal of the tank is documented in the Underground Storage Tank Removal Final Report dated August 6, 2002 prepared by AEI Consultants (AEI). Two tank pit soil samples were collected by AEI at a depth of 8 feet below grade (fbg) following removal of the UST and analyzed for Total Petroleum Hydrocarbons as Gasoline (TPH-G), methyl tertiarybutyl ether (MTBE), benzene, toluene, ethylbenzene, and xylenes (BTEX), and lead. Groundwater was not encountered in the UST pit at the time of UST removal. The sample collected at the west end of the UST pit (closest to the intersection of 77th Avenue and Hawley Street) contained 4,600 mg/kg TPH-G and 4.5 mg/kg benzene. The sample collected at the east end of the UST contained 310 mg/kg TPH-G, and

THANH'S AUTOBODY REPAIR (Continued) **S106915894**

benzene was not detected. MTBE was not detected in either sample, and lead was detected at concentrations of 16 and 9.1 mg/kg, respectively. Subsurface investigation continued through 2008 but have not been completed. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Address: 700 71ST AVE
City,State,Zip: OAKLAND, CA 94621
Site ID: 171188
CERS ID: 10401124
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 171188
Site Name: Western Colloid N. C., Inc.
Violation Date: 06-14-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 06/21/2016. Observation: 5 gallon bucket of used oil was not properly secured. Corrective Action: Transfer contents of the bucket into a properly labeled 55 gallon drum and provide ACDEH with verification that the used oil has been transfered into the 55 gallon steel drum.
Violation Division: Alameda County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 171188
Site Name: Western Colloid N. C., Inc.
Violation Date: 09-24-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 10/23/2019. a) EMPTY drum and tote storage area observed adjacent to the "tanker parking" and "product storage" areas on the Site Map. Numerous dozens of totes (220 gallon IBC) and steel 55 gallon drums observed - these will be re-used for packaging

WESTERN COLLOID N. C., INC. (Continued) **S121749781**

and shipping finished product to customers. b) Empty container storage area is not denoted with signage to adequately delineate the area for emergency response. a) For emergency response, due to the large quantity of empty containers, indicate this area on the Site Map and upload to CERS. b) Denote with legible, permanent signage the empty container storage area.

Violation Division: Alameda County Environmental Health

Site ID: 171188
Site Name: Western Colloid N. C., Inc.
Violation Date: 09-24-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 10/23/2019. The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. Ammonium hydroxide is listed as 23% by weight in CERS HMBP. The certificate of analysis indicates 29% by weight. Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. UPDATE CERS HMBP chemical inventory for ammonium hydroxide to indicate 29% by weight.

Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 10/23/2019. The business failed to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page. In CERS in the BUSINESS ACTIVITIES section, Excluded and/or Exempted Materials, the facility has selected "Yes" that the facility has regulated substances in quantities greater than the CalARP prevention program. In actuality, based on the quantity and percentage of ammonium hydroxide, the facility does NOT exceed the CalARP threshold. Complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page. In CERS in the BUSINESS ACTIVITIES section, Excluded and/or Exempted Materials, UNCHECK "Yes" that the facility has regulated substances in quantities greater than the CalARP prevention program.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-24-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine triennial hazardous materials business plan (HMBP) inspection. Business manufactures, sells, and installs colloid-based, fluid applied commercial roof coating systems. Additionally, the business manufactures and sells asphalt sealants and emulsions. Facility handles and stores chromic acid in 5 gallon drums. The total quantity

WESTERN COLLOID N. C., INC. (Continued) **S121749781**

of chromic acid is less than 55 gallons. The facility handles and stores ammonium hydroxide (CAS 1336-21-6) which is a CalARP regulated substance if present in a process above 500 pounds (concentration 1% or greater) for California (Table 3) or 20,000 pounds (concentration 20% or greater (Table 1) for Federal. Per 19 CCR 2770.2(b): For the purpose of determining whether more than a threshold quantity of a regulated substance is present at the stationary source, the following apply: (1) Concentrations of a regulated toxic substance in a mixture: (A) A mixture of less than one percent by weight o... Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-14-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete an unannounced inspection for a roofing products manufacturer. The facility generates hazardous waste consisting of asphalt material generated during episodic clean out of the liquid asphalt storage tanks. In addition, the facility generates used oil during the servicing of equipment and 1-5 gallon bucket of use oil was not properly secured. Transfer the contents of the 5 gallon bucket to a properly labeled and secured container. All containers of hazardous waste must be properly labeled with the accumulation start date. CERTIFICATION OF RETURN TO COMPLIANCE I certify that the violation(s) noted on the Notice to Comply and/or /Summary of Violations page(s) have been corrected. I have personally examined any documentation attached to the certification to establish that the violations have been corrected. PRINT:_____ SIGN:_____ TITLE:_____ [Truncated]

WESTERN COLLOID N. C., INC. (Continued) **S121749781**

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-14-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Arrive onsite to complete an unannounced inspection and meet with the facility manager Justin McDaniels who grants access to complete the inspection. The facility manufactures roofing products and operates liquid asphalt emulsion storage tanks that store the asphalt at temperature above 250 degrees. The storage tank are exempt from APSA requirements, as at 60 degrees the material is solid. Facility processes the liquid asphalt emulsion and ships the product in tanker truck to job sites. In addition, the facility also manufactures a roofing seal coat that is a mixture of acrylic polymers adhesive mixed with surfactant, deforamers, dispsersant, propylene glycol/ethylene glycol and biocides and also mixed mineral binders such as bentonite clay, ground slate and amador clay, then once the product is mixed completely the slurry is stored in 3-6000 gallon batch tanks. Hazardous materials stored onsite include 12000 gallons of liquid asphalt emulsion, 300 gallons of propane. [Truncated]

CERS:
Name: MORGAN-TODT, INC. DBA UNITED COLD STORAGE
Address: 860 81ST AVE
City,State,Zip: OAKLAND, CA 94621
Site ID: 570320
CERS ID: 10661263
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 570320
Site Name: Morgan-Todt, Inc. dba United Cold Storage
Violation Date: 10-20-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 11/21/2016. OBSERVATION: 5 gallon bucket used for hazwaste storage (used hydraulic fluid) was observed open. Secondary containment for used oil buckets has accumulation of used oil at bottom. CORRECTIVE ACTION: Close all hazwaste containers unless actively adding or removing waste. Secondary containment structures shall not contain any liquids or debris. Transmit photo of cleaned secondary and sealed bucket to ACDEH inspector.

Citation:	HSC 6.5 25250.19(c) - California Health and Safety Code, Chapter 6.5, Section(s) 25250.19(c)
Violation Description:	Failure to record in an operating log and retain for three years the following information for each shipment of recycled or exempted oil: 1) The name and address of the used oil recycling facility or generator claiming the oil meets the requirements of HSC 6.5 25250.1. 2) The name and address of the facility receiving the shipment. 3) The quantity of oil delivered. 4) The date of shipment or delivery. 5) A cross-reference to the records and documentation required under HSC 6.5 25250.1.
Violation Notes:	Returned to compliance on 11/21/2016. OBSERVATION: The Owner/Operator failed to retain paperwork documenting disposal of used oil for 3 years. The mechanics self-transport no more than 55 gallons (usually only 5 gallons) of hazwaste to the Agro Merchants Dean's Services truck shop at 850 92nd Ave, Oakland. Facility shall maintain a record of all self-transported hazwaste with date, quantity, and destination for three years. CORRECTIVE ACTION: The Owner/Operator shall maintain copies documenting disposal of used oil for a minimum of 3 years.

Waste Code:	D022
Waste Description:	CHLOROFORM
Waste Code:	D023
Waste Description:	O-CRESOL
Waste Code:	D028
Waste Description:	1,2-DICHLOROETHANE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D038
Waste Description:	PYRIDINE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	D040
Waste Description:	TRICHLORETHYLENE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

ALAMEDA CHEMICAL HTP (Continued) **1004676667**

Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	P012
Waste Description:	ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE
Waste Code:	P022
Waste Description:	CARBON DISULFIDE
Waste Code:	P028
Waste Description:	BENZENE, (CHLOROMETHYL)- (OR) BENZYL CHLORIDE
Waste Code:	P030
Waste Description:	CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
Waste Code:	U002
Waste Description:	2-PROPANONE (I) (OR) ACETONE (I)
Waste Code:	U003
Waste Description:	ACETONITRILE (I,T)
Waste Code:	U012
Waste Description:	ANILINE (I,T) (OR) BENZENAMINE (I,T)
Waste Code:	U019
Waste Description:	BENZENE (I,T)
Waste Code:	U044

ALAMEDA CHEMICAL HTP (Continued) **1004676667**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Violation Date:	04-25-2018
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 08/02/2018. OBSERVATION: The Hazardous Materials Business Plan (HMBP) has not been adequately implemented as demonstrated by observing: 1. Compressed gas propane cylinder not properly secured. Cylinders must be stored properly by securing to prevent falling due to contact, vibration, or seismic activity. 2. The following open containers: a. 30 gallon drum of used oil located next to used oil tank b. 55 gallon drum of used oil filters. All containers must be kept closed unless in use. CORRECTIVE ACTIONS: 1. Properly secure compressed gas propane cylinders to prevent from falling during an earthquake. 2. Close containers holding used oil and used oil filters when containers are not in use. Submit proof of corrective action with photos/written documentation to ACDEH within 30 days.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 06/29/2018. OBSERVATION: 1. The facility has not submitted the Hazardous Materials Inventory Chemical Description page in CERS for the following: a. Two 8 gallon propane gas cylinders for fork lift 2. The facility consolidates different grades of motor oil, degreaser, and automatic transmission fluid under one inventory item- petroleum oils. Each material should be listed separately on the hazardous material inventory. CORRECTIVE ACTION: 1. Add the total amount (8 gallons) of propane handled on site to inventory in CERS. 2. Add the total amount of each material (different grade of motor oil, degreaser, different grades of automatic transmission fluid. etc) handled on site to inventory in CERS. Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov within 30 days.

Global Id:	T10000013744
Lead Agency:	ALAMEDA COUNTY LOP
Lead Agency Case Number:	RO0003400
Latitude:	37.7555159332743
Longitude:	-122.194878775463
Case Type:	Cleanup Program Site
Case Worker:	DR
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Under Investigation
Potential Contaminants of Concern:	Asbestos Containing Materials (ACM), Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chlordane, DDD / DDE / DDT, Endrin, Other Insecticides / Pesticide / Fumigants / Herbicides, Lead, Nickel, Polynuclear aromatic hydrocarbons (PAHs)
Site History:	The Site was historically improved with an industrial warehouse building which burned to the ground October 2018. Historical on-site operations reportedly included the following:  Aluminum casting foundry (1934-1941)  Furnace and furnace burner manufacture (1950-1953)  Rubber printing dies, stamps or seals manufacturing (1955-1970)  Long Manufacturing Co., manufacturers of rodent exterminators (1962)  Redwood products manufacturing (1967-2000)  Storage for Commercial Painting Company (2000-2018) The Site is currently planned for redevelopment with a six-story residential building. The ground floor is proposed to consist of a residential units, a 26-car parking garage, two offices, a community room, and non-occupiable mechanical and electrical rooms.

Case Worker:	KEN
RB Case Number:	NA
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0002905
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Chromium, Lead, Nickel, Zinc, Benzene, Diesel, Ethylbenzene, Gasoline, Kerosene, MTBE / TBA / Other Fuel Oxygenates, Toluene, Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	Not all historic documents for this fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at http://www.acgov.org/aceh/lop/ust.htm. Please copy and paste this link into your browser to access the ACDEH website. This site has two Alameda County Department of Environmental Health (ACDEH) regulatory oversight program cases associated with it: (1) Leaking Underground Storage Tank (LUST) Case No. RO0002905 for petroleum hydrocarbon contamination, and (2) Site Cleanup Program (SCP) Case No. RO0003180 for non-petroleum contamination. The LUST Case No. RO0002905 has been closed as a low risk site in accordance with the State Water Resources Control Board (SWRCB) Low Threat Underground Storage Tank Case Closure Policy (LTCP). ACDEH must be notified if any changes in land use or site redevelopment is proposed. Preparation and submittal of a Site Management Plan (SMP) for ACDEH review and approval is required prior to any site redevelopment which may involve repair or maintenance activity, site improvements that include modifications to the foundation, subsurface utilities and/or hardscape or subsurface work, of existing site improvements in areas of residual contamination, and/or permitting of any proposed site redevelopment including a change in land use to residential, or other conservative land use. Current Land-use at time of Closure: The site is located on the north corner of the intersection of 77th Avenue and Spencer Street in Oakland, California. The property consists of one parcel having the Assessors Parcel Number of 41-4142-38 and the physical address of 1001 77th Avenue. Site development consists of one single-story building with associated paved and un-paved areas. The most recent reported use of the building was for storage. Adjacent Property(ies) Land-use at Time of Closure: The site is located is a mixed use neighborhood consisting of generally residential properties to the northwest of 77th Avenue and industrial properties to the southeast of 77th Avenue. Petroleum hydrocarbon contamination in

ACTS COMMUNITY DEVELOPMENT (Continued) **S107144165**

groundwater appears to be limited to the immediate vicinity of the site to the south-southeast and extends beneath 77th Avenue. Based on the groundwater monitoring well data from the well network, contamination does not extend across 77th Avenue. However, should off-site redevelopment occur, ACDEH recommends evaluating the redevelopment site(s) for chemicals of concern identified on this site. Historic Land-use / Site Investigation: Historic site use includes a gas and oil station with auto repair since at least 1951 through the 1960s and followed with use as an auto repair facility through the mid-1980s. At the time this case was opened in 2005, the site was used for material storage by a local church doing business as Acts Community Development. A site investigation was performed in 2005 following the recommendations of an environmental transaction screen. Though the presence of an underground storage tank (UST) pit was identified at the site, no USTs were located within the pit. The investigation included the collection of soil and grab-groundwater samples from two on-site soil bores. Laboratory analysis indicated groundwater contained petroleum hydrocarbon contamination. Three additional investigations were performed, including the installation of on- and off-site groundwater monitoring wells. Based on the data collected from these investigations, it was determined that the petroleum hydrocarbon contaminant plume was defined by the off-site wells and the case met the closure criteria established in the LTCP. Potential Exposure to Chemicals of Concern: Potential chemicals of concern (PCOCs) identified for the site include the fuel related petroleum hydrocarbons compounds gasoline, diesel, and motor oil; benzene, toluene, ethylbenzene, and xylenes (collectively known as BTEX); methyl tertiary butyl ether (MTBE) and the wear (LUFT) metals. Additionally, chlorinated hydrocarbons were identified by site investigations and include tetrachloroethene (PCE), trichloroethene (TCE), and vinyl chloride (VC). The non petroleum hydrocarbon contamination is address in the SCP case RO0003180 and is not part of the closure of this case. Remediation Activities: Remedial activities performed at the site include the excavation of soil from the former UST pit and water infiltrating into the excavation. A total of 128 tons of soil and 6,000 gallons of water were removed and disposed off-site. Case Closure & Future Site Management Requirements: This fuel leak case has been evaluated for closure consistent with the State Water Resource Control Board Low-Threat Underground Storage Tank Closure Policy (LTCP) for petroleum related contaminants. In addition, chlorinated solvents have been identified in groundwater beneath the site. A separate case, ACDEH case file RO0003180, has been opened to address the chlorinated solvent contamination. Due to residual contamination at the site, the site is closed as a commercial site with site management requirements. If there is a proposed change in land use to any residential, or conservative land use, or if any redevelopment occurs, ACDEH must be notified as required by Government Code Section 65850.2.2. ACDEH will re-evaluate the site relative to the proposed redevelopment. Excavation or construction activities in areas of residual contamination require planning and implementation of appropriate health and safety procedures by the responsible party prior to and during excavation and construction activities.

Lead Agency:	ALAMEDA COUNTY LOP
Lead Agency Case Number:	RO0003240
Latitude:	37.74962
Longitude:	-122.18704
Case Type:	Cleanup Program Site
Case Worker:	JES
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History:	The site is comprised of five structures (Building A, Building B, Building C, Building D, and Building E) across three parcels spanning a total of 3.5 acres. Building B is subdivided into two discrete sub-units: Building B South and Building B North. All on-site structures are single story slab-on-grade construction except Building C which has a crawl space. Constituents of concern at the Site consist of chlorinated hydrocarbons including perchloroethene (PCE), trichloroethene (TCE), trans- and cis-1,2-dichloroethene (tDCE & cDCE), vinyl chloride (VC), chloroform and petroleum hydrocarbons, including benzene, toluene, ethylbenzene, xylenes (collectively BTEX), bulk gasoline range hydrocarbons (TPHg), and fuel oxygenate methyl tert-butyl ether (MTBE). The primary risk driving constituents of concern are associated with vapor intrusion and consist of PCE, TCE, VC. Benzene, chloroform, and 1,1,2,2-Tetrachloroethane have also been identified in sub-slab vapor at concentrations representing a potentially unacceptable vapor intrusion risk, however, the risk contribution of these species relative to PCE, TCE, and VS are minor. The source of PCE in soil and soil vapor is attributed to on-site releases which have impacted shallow soil. PCE has not been reported as present in groundwater samples. The source of TCE and VC in groundwater appears to be from an off-site source located to the east of the Site. TCE and VC in soil vapor has been attributed to

AMELIA STREET REDEVELOPMENT (Continued) **S124639680**

off-gassing from groundwater and no soil sources of TCE or VC have been identified at this junction. Environmental risk to on-site occupants is currently being addressed via the implementation of corrective actions intended to remove identified on-site source areas of PCE and to control vapor intrusion risk from the groundwater source via the implementation of vapor intrusion and migration mitigation measures.

RB Case Number: 01S0100
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Polynuclear aromatic hydrocarbons (PAHs), * Volatile Organic Compounds (VOC)
Site History: The site was used for the production of engines for electrical power generation and a iron and brass foundry and manufacturing plant. The operations ceased in 1987. Investigations found soil and groundwater impacted by underground storage tank leaks and spills and discharges from equipment. Groundwater monitoring for VOCs was required by SCR 97-051 at one well MW-6, to monitor the shallow aquifer in vicinity of the Machine Shop Vapor Degreaser/Storm Drain Area. Remedial

IMO DELAVAL ENGINE MFG FAC (Continued) **S100946867**

actions include soil excavation and groundwater extraction. Prior to commercial development in 1999, the site was used for foundry operations and engine and wheel manufacturing. The soil and groundwater investigations and soil and groundwater cleanup between 1987 and 1997 were approved by the Water Board adopted Orders Nos. 90-041 and 97-051. Order No. 97-051 required a risk management plan to mitigate risks associated with residual chemicals by requiring: 1) soil containing polynuclear aromatic hydrocarbons above specified cleanup levels be covered during redevelopment, 2) soil containing petroleum hydrocarbons and/or chlorinated solvents above specified cleanup levels encountered during demolition and redevelopment be excavated and properly treated or disposed, and 3) groundwater use be restricted through a recorded environmental restriction. Regional Water Board Order No. R2-2021-0016 was adopted administratively by the Executive Officer on July 19, 2021, and rescinds the Site Cleanup Requirements Order No. 97-051 for the subject property. The Order requires documentation of well abandonment in compliance with local requirements. A recorded deed restriction remain in effect and prohibits the use of groundwater as a source of drinking water and residential use on portions of the property. The deed restriction also requires compliance with the February 27, 1997, Risk Management Plan (RMP) that includes annual inspection reports for the capped soil. An RMP amendment pursuant to Section 4.2 of the Covenant is recommended, since groundwater monitoring is no longer required.

SHELL SERVICE STATION (Continued) **1006805543**

RB Case Number: 01-2308
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000223
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Petroleum hydrocarbons were detected in soil during piping repair in August 1996 and a station upgrade in 1998. Various site investigation activities took place between 1998 and 2004. Groundwater monitoring to evaluate natural attenuation processes for fuel oxygenates was conducted from 1998 to 2009. Soil vapor assessment has indicated a potential for vapor intrusion to indoor air for the kiosk building. Vapor mitigation and air sampling for the kiosk building has been completed and case closure will take place following decommissioning of the monitoring wells.

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name:	R&A TRUCKING COMPANY
Address:	1026 77TH AVENUE
City,State,Zip:	OAKLAND, CA 94621
Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	04/22/2020
Global Id:	T10000014036
Lead Agency:	ALAMEDA COUNTY LOP
Lead Agency Case Number:	RO0003418
Latitude:	37.75388
Longitude:	-122.1887
Case Type:	Cleanup Program Site
Case Worker:	PK
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene, Diesel, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	CURRENT STATUS Alameda County Department of Environmental Health (ACDEH) opened Site Cleanup Program Case No. RO0003418 in April 2020 based on a review of draft data submitted for the soil, soil vapor and groundwater investigations conducted in 2019 and 2020 that indicate an on-Site source of tetrachloroethylene (PCE) and benzene and a potential off-site source of TCE in groundwater migrating beneath the site. This determination was based on the following: The highest detections of PCE in the dataset are in the soil vapor sample collected from probe SV-6 (PCE = 770 ug/m3) and the grab groundwater sample from soil boring SB-9 (PCE = 19 ug/l). These concentrations exceed the San Francisco Bay Regional Water Quality Control Boards 2019 Environmental Screening Levels (ESLs) for soil vapor and groundwater vapor intrusion risk at commercial sites are 67 ug/m3 and 2.8 ug/l, respectively. The soil vapor samples collected within and adjacent to the proposed building footprint indicate elevated levels of volatile organic compounds (VOCs) including but not limited to benzene that may be to be associated with the fill material placed in

R&A TRUCKING COMPANY (Continued) **S125952696**

this location to build the pad for the proposed building. On April 22, 2020 ACDEH requested the Responsible Party to complete the following tasks: -Claim the case in the State Water Resources Control Boards Geotracker database and upload all environmental information related to the subject site to the Geotracker case file including but not limited to Phase 1 Environmental Assessments and investigation reports, and analytical laboratory data and water level data in electronic deliverable format (edf) by May 6, 2020. -Conduct the sewer vapor sampling activities from the sewer cleanouts located on the site by May 1, 2020. -Execute a Voluntary Remedial Action Agreement (VRAA) with ACDEH to provide regulatory oversight of the case by May 8, 2020 -Submit a Site Investigation Report documenting the November 2019 and 2020 site investigation activities by May 15, 2020 -Schedule a meeting with ACDEH to discuss the path forward for obtaining clearance for the proposed warehouse and conducting additional investigation activities at the site by May 8, 2020. SITE HISTORY Site is an active trucking facility providing warehousing and distribution services. R&A specializes in handling bulk processed metals such as coiled steel & aluminum. Site entirely hardscaped with pavement or concrete. DTW is reported at 7 feet bgs. A previous owner- Safeway- is reported to have manufactured soap on the property and operated several vertically-oriented AGTs and a fuel UST. Petroleum hydrocarbons, including TPHd and BTEX compounds, and chlorinated VOCs, including PCE, TCE and chloroform, have been identified in groundwater and/or soil vapor at the site. Investigations at this site are in the preliminary phase for characterization. The current property owner has plans to construct a new one-story, 39,000-square-foot material storage warehouse on the northern half of the 1100 77th Avenue parcel (Figure 1-2). The storage warehouse will be constructed over a slab-on-grade foundation that will be eight inches thick. The building will be of steel-framed construction with steel siding and rooftop. The building will measure approximately 34.5 feet high, 300 feet long, and 135 feet wide. No offices, bathrooms, or other interior working spaces are planned as part of this development. The proposed building will be constructed over an existing building pad. The building pad was laid in 2019 and is comprised of crushed concrete and brick generated from the demolition of the building formerly located in this area. Minimal grading or soil excavation activities are anticipated for this Project and groundwater is not expected to be encountered.

Highlights:	An affordable housing development of 72 units has been constructed on the site. It is part of the transit -oriented development within walking distance of several modes of transportation. Occupancy began 12/16/2011. A grand opening is scheduled for 5/16/2012 to coincide with available county affordable housing week. Former Use: The subject property is relatively flat. It was originally composed of 11 separate privately-owned legal parcels which were combined to create the present building site. All of the properties ere improved. The improvements were demolished prior to abatement work. It was used for both residential and commercials uses.

Case Worker:	KEN
RB Case Number:	01-1830
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0000225
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Dichloroethane (DCA), Dichloroethene (DCE), Benzene, Diesel, Ethylbenzene, Gasoline, Kerosene, MTBE / TBA / Other Fuel Oxygenates, Other Petroleum, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History:	Caltrans Oakland (Hegenberger) maintenance facility was previously used for used for material storage and as a fueling station. Site stored solvents in addition to TPH products. In September 1994 four USTs were remove, holes observed in all USTs. Elevated levels of petroleum hydrocarbon contamination were detected in soil. Reporting of contamination to ACDEH resulted in opening the case on July 23, 1993. Free phase product observed beneath a 6.5k-gal gasoline UST. Site investigations conducted between 1996 and 2002 confirmed the presence of a dissolved plume; however the offsite extent of the dissolved plume is not adequately defined. Free phase product observed in soil boring SB-3. Interim remedial action plan conditionally approved January 4, 2017, however does not appear to have been implemented. City of Oakland added as additional RP following 2018 meeting with Caltrans.

RB Case Number:	01-0934
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0000094
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Site investigation activities have identified two environmental concerns for the site: Fuel leaks from two former underground storage tanks (USTs) located in the southern portion of the site. Prior to 1989, the Malibu Grand Prix facility maintained two 6,000-gallon underground storage tanks (USTs) containing marine mix gasoline. The two USTs were removed on March 29, 1989 and February 1, 1990, respectively. Free-phase fuel was observed floating on water in the tank excavations during both tank removals. During the tank removal on March 29, 1989, soil samples collected from the tank excavation contained benzene at concentrations ranging from 7.3 to 33 milligrams per kilogram (mg/kg) and total petroleum hydrocarbons as gasoline (TPHg) at concentrations ranging from 50 to 150 mg/kg. During the tank removal on February 1, 1990, soil samples collected from the tank excavation contained benzene at concentrations ranging from 0.07 to 0.31 mg/kg and TPHg at concentrations ranging from 26 to 79 mg/kg. Subsequent site investigations from 1990 to 1996 that included soil and groundwater sampling detected fuel hydrocarbons and oxygenates in soil and groundwater over a wide area beneath the site. Benzene and TPHg were detected in groundwater samples collected from monitoring wells at the site at concentrations up to 2,700 and 20,000 micrograms per liter (a%g/L), respectively. Imported fill material that contains a tar-like substance. The fill material is present throughout the site and appears to have been placed on the site between 1955 and 1975. Known chemicals of concern in the imported fill include polychlorinated biphenyls, phenanthrene, naphthalene, pyrene, and lead. ACDEH has requested but not received additional information to evaluate these environmental concerns. A separate Site Cleanup Program Case is associated with the non-leaking underground storage tank contaminants.

Evaluation:
- Eval General Type: Compliance Evaluation Inspection
- Eval Date: 06-20-2018
- Violations Found: No
- Eval Type: Routine done by local agency
- Eval Notes: Alameda County Department of Enviornmental Health (ACDEH) unable to gain access to AT&T Mobility Oakland Coliseum USID 24081 located at 8000 S Coliseum Way Oakland CA 94621 to conduct field inspection to verify that facility no longer stores hazardous materials at this location. AT&T submitted an "Under Threshold Notification" reporting 46.7 gallons of battery electrolyte stored on site in CERS on 5/11/2018. Gary Chimienti, Environmental Site Manager, provided photo documentation demonstrating that 28 lead-acid batteries with a total amount of 46.7 gallons of electrolyte is stored on site. ACDEH to remove AT&T Mobility Oakland Coliseum from the Hazardous Materials Business Plan (HMBP) program since the facility no longer stores, uses, or handles hazardous materials in quantities greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gas. If hazardous materials are stored, used, or handled in quantities greater than the reporting [Truncated]

Lead Agency Case Number:	Not reported
Latitude:	37.743944478801
Longitude:	-122.191679477692
Case Type:	Cleanup Program Site
Case Worker:	STG
Local Agency:	Not reported
RB Case Number:	01S0149
File Location:	Regional Board
Potential Media Affected:	Indoor Air, Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History:	The site was first developed in the late 1940s for use by Oakland Iron Works. Ran Rob operated onsite from 1952-1988 during which time Mr. Heath and his partners operated a tool & die machine shop; by the 1980s, Ran Rob operations included the manufacturing of parts for computer circuitry. Bulk TCA and TCE were stored outdoors in drums and other containers. The property was sold in 1988 and is currently owned by Baldwin Landmark Associates LLC. Current site tenants include a smog testing shop, a plastic molding business, a metal sign business, a hydraulic hose supply company and an event display shop. The VOC contamination currently occurs in a shallow zone between approximately 5 and 18 feet below surface grade (bsg) in silty clay and clayey silt soils. The deeper aquifer is not impacted. The highest vapor concentrations of total VOCs was detected in 2008 at location SES-2 (292,000 [μg/m%])

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

LUST:

Name:	GMC TRUCK CENTER
Address:	8099 COLISEUM WAY
City,State,Zip:	OAKLAND, CA 94621
Lead Agency:	ALAMEDA COUNTY LOP
Case Type:	LUST Cleanup Site
Geo Track:	http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0600101692
Global Id:	T0600101692
Latitude:	37.7439826562195
Longitude:	-122.198020219803
Status:	Open - Site Assessment
Status Date:	06/12/2017
Case Worker:	KEN
RB Case Number:	01-1826
Local Agency:	ALAMEDA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	RO0001389
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Acetone, Other Chlorinated Hydrocarbons, Benzene, Diesel, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Naphthalene, Polynuclear aromatic hydrocarbons (PAHs), Toluene, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	USTs were removed from the site in August 1993. Based on analytical results from the soil samples collected during the UST removal activities, a UST Unauthorized Release/Contamination Site Report was filed with the ACDEH on August 19, 1993, resulting in the opening of the case. Several boring were installed at the site between 1993 through 1995 with monitoring well installations sometime in 1996. Elevated concentrations of petroleum hydrocarbons are present in soil and groundwater. Down gradient plume not defined. Plume daylights at adjacent tidal wetland to west and tidal canal to north with offsite sediment impact documented with TPHd.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Latitude:	37.752236
Longitude:	-122.187167
Case Type:	Cleanup Program Site
Case Worker:	PK
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel, Acetone, Trichloroethylene (TCE), Waste Oil / Motor / Hydraulic / Lubricating
Site History:	After conducting a Phase I, AEI performed a Phase II investigation on March 4, 2005. Fifteen soil borings were advanced using a GeoProbe rig. TPHd and TPHmo were detected in soil in one boring at concentrations of 17 ppm and 48 ppm, respectively. Zinc was detected at a concentration of 2,200 ppm. Maximum groundwater concentrations were 1,400 ppb TPHmo, 210 ppb TPHd, 57 ppb TPHg, 44 ppb PCE and 3.4 ppb TCE.
