Instructions for Completing Forms 2A-2C

Prior to preparing the RR Collection Services Maximum Recycling Service Rate Proposal Forms, proposers should review Article 7 of the RR Collection Services Contract, included as **Error! Reference source not found.** of this RFP, to familiarize themselves with the Maximum Recycling Service Rates adjustment methodology. In addition, it is the sole responsibility of the proposer to conduct their own due diligence, calculate and be responsible for the costs and other information quoted in the RR Collection Services Maximum Recycling Service Rates Proposal Forms.

Proposed Maximum Revenue (Form 2A). The proposers rates shall consist of two (2) rate elements: a cost per Collected Ton rate element and a projected maximum Tonnage cap rate element. The Maximum Revenue will be calculated by multiplying these two elements together. Proposers should base their Maximum Revenue calculations on the Customer and service data provided by the City in this RFP. Additionally, the proposer must provide the City with a guaranteed material Diversion standard as set forth in Article 8 of the RR Collection Services Contract (**Error! Reference source not found.** of this RFP).

Cost Per Collected Ton Rate Element. Proposers should provide a proposed cost per Collected Ton representing the total **dollar amount** the proposer anticipates Recyclable Materials Collection to cost. This shall include all costs of providing Recyclable Materials Collection Services including, but not limited to, Collection, Processing, Disposal of Recycling Residuals, and franchise fee costs.

Projected Tonnage Cap Rate Element. Proposers should provide projections for the total maximum Collected Tons for the period beginning July 1, 2015 through December 31, 2015, and the period beginning January 1, 2016 through December 31, 2016.

WM Alameda County Additions to RR Collection Services Form 2

**RR COLLECTION SERVICES FORM 2
MAXIMUM RECYCLING SERVICE RATES PROPOSAL**

WM of Alameda County has the following alternative pricing options to RR Collection Services Form 2:

1. RR RFP, Section 4.1.5, Page 4-3, Lines 1474 - 1476 (Alternative)

- **Alternative Cart Replacement option as specified in Alternative Section:**
 - Under the new RR Collection Services Contract, the RR Collection Services Contractor must provide NEW Carts available in sizes of approximately: 20, 32, 64, and 96-gallon capacity. Twenty percent of said new Carts will be provided during the initial year of the RR Collection Services Contract, and the remaining amounts pursuant to the Transition Plan set forth in Exhibit 5 of the RR Collection Services Contract
- **Adjustments**
 - Adjustment to all proposed rates on RR Collection Form 2A through 2C is a reduction of 2.53% or \$546,500 in year one.

2. RR Contract, Section 7.06.3, Page 25, Lines 1076 - 1105 (Alternative)

- **Alternative RRI price index calculation as specified in Alternative Section:**
 - Ensuring WMAC's rates are adjusted for increases in the ordinary cost of doing business in Alameda County is beneficial to the City and ratepayers. Otherwise, WMAC must anticipate such increased costs throughout the term of the Contract, and its declining margins, in establishing the Maximum Recycling Service Rates. The impact on ratepayers is higher initial costs to account for a less than equitable rate setting mechanism
- **Adjustments:**
 - Adjustment to all proposed rates on RR Collection Form 2A through 2C is a reduction of 13.21% or \$2,859,000.00 in year 1.

Automated Side Loaders Advantages

WMAC will use Automated Side Loaders manufactured by AutoCar to service SFD, MFD and commercial carts. Waste Management has an excellent relationship with AutoCar. We have found AutoCar products provide safe, environmentally responsible, and durable trucks. Our technicians and drivers are familiar with these vehicles. These trucks are the best fit for work in the City of Oakland.

Waste Management has worked with AutoCar across the country, purchasing trucks to service customers in our operations in a variety of locations. Working closely in partnership, Waste Management and AutoCar have developed truck specifications that meet and exceed the needs for reliable service each week for Waste Management customers.

As in all aspects of our operations, WMAC focuses on safety. AutoCar trucks provide a variety of features that ensure the safety for both the driver and the public. Safety aspects include

- Tough durable cab – the larger, stronger Expedito cab and doors are fully welded, two sided galvanized steel structure providing unmatched strength making it one of the safest cabs on the market
- Superior visibility – the Expedito cab offers minimum obstruction in the 360 degree view. A curved windshield minimizes “A” pillar front obstructions. A one-piece rear window, curved corner windows, and lowered emissions components minimize blind spots. Integrated controls eliminate body controls on top of dash, enhancing the cross cab view.
- Larger ergonomic cab – Autocar provides a larger cab environment. The position of the cab and the floor height are lowered and ingress/egress is significantly improved. Each precision instrument and control is ergonomically designed and located.
- Turning radius - a tighter turn radius allows operators to avoid accidents while improving efficiency and productivity. Expedito has the best turn radius in the industry! Spending less time in reverse improves efficiency and fuel economy and also keeps the drivers safer from accidents.
- Integrated cameras- cameras allow the operator as well as management to view a variety of aspects of the trucks operations ensuring efficiency and safety.
- Built-in Traffic alerts- back up alarms and strobe lights help other drivers see the truck and increase awareness of its operation.

AutoCar trucks weigh less than many other company's trucks, providing engine efficiency. We have also stressed fuel efficiency in the design of these CNG trucks, ensuring that they provide the highest efficiency possible.

To ensure that trucks perform their routes each day, WMAC selected trucks for their durability as well. AutoCar trucks include the strongest frame and the best overall strength-to-weight ratio in the industry.

Working with AutoCar, Waste Management has developed a complete training program for maintaining these trucks. AutoCar provides parts and service information to ensure that WMAC mechanics are fully trained to provide all necessary maintenance. WMAC drivers also use these trucks every day, servicing customers throughout Alameda County, ensuring proper training and safe operation.
